low-permitt. multilayer glass-ceramic substrate with Ag-Pd wiring for multiple VLSI packages 88−38945
low-profile ceramic-card cooling package 86−26640
LSI, micro-solder joint, optimum bonding shape control *(Japanese)* 87−60532
LSI, thermal stress-free package for flip-chip devices 85−23891
LSI and packaging technologies for future computers 85−35132
LSI chip carriers for PCs, reliability prediction technique 86−34067
LSI chips, high performance cooling method 86−2337
LSI interconnection method for smart IC card packaging, printed wiring technique 87−23349
LSI macro packaging system 86−35248
LSI packages using SiC ceramics with high thermal cond., construction and characts. 86−26644
LSI packaging, trends, assembly methods and reliability *(Japanese)* 87−36504
LSI packaging technology, Hitachi plastic packages development, 1 Mbit DRAM appl. 88−33288
LSI PCB carriers, reliability prediction 86−47148
LSI plastic moulded packages, silicone gel for high reliability encapsulation, expt. study 85−16794
LSI shrinking, wire bonding technology 87−18274
LSI-based computers, cooling by direct immersion in inactive liquid *(Japanese)* 88−13494
LSI/VLSI cooling technology and temp. control during manufacture *(Japanese)* 86−53737
LV switchgear and distribution boards, enclosures 86−26634
MA 2000 moduli for system integration *(Italian)* 85−34265
machine drives for manufacturing systems, reliability, maintenance and packaging 88−24206
magazine packaging for resistor network insertion 86−26646
magnet wire, standards for spools and reels 86−62877
magnetic bubble memories, technological developments and packaging, review 87−25875
magnetic bubble memory drive system and packaging method 86−28714
magnetophone heads, new method of gluing Permalloy shaped pieces in packages *(Polish)* 85−56118
mainframe computer, package effects on CPU performance 86−13492
maintainability of microassemblies of a particular use *(Russian)* 85−33186
manufacturer's view of ESD control 88−18473
manufacturing science directions 87−45839
Manufacturing Sciences program of Semiconductor Research Corporation, for US IC industry 87−25482
mark sensor requires no sensitivity adjustment 87−49755
matched glass-to-metal seal improvements by controlledatmosphere metal oxidation 87−130
mated array chip-configuration for packaging technique 86−7525
materials, solder, and adhesives specification guide 87−16386
materials science, conf., Boston, MA, USA (Nov. 1984) 86−13304
materials science, conf., Palo Alto, CA, USA (Apr. 1986) 87−23022
materials science and processing 86−13510
measuring instruments, explosion-proof pressurized housings *(Polish)* 87−36505
mechanical equipment, packaged, elec. specifications 87−31301
mechanical structure of 19″ casings for measuring instrumentation *(Polish)* 85−33185
mechanically-sealed circuit module construction 85−60770
medications, safety against tampering, analytic hierarchy process anal. of packaging 87−65210
medium voltage cubicles, protected, construction *(French)* 86−56491
medium voltage oil-free switchgear reliability and safety trends *(German)* 87−64735
Megablock VLSI chip interconnection system 88−43710
Mentor space-efficient packages for PCB encapsulation 88−56011
Met-Lam PC for reducing board hot spot problems 85−55243
metal DIP package, impact on automation 87−16403

packaging continued
metal electrode facebonding (MELF) component mounting system, development 86−1554
metal hybrid sealing, glass metal seals 88−1235
metal matrix composite microwave packaging components 88−24576
metal matrix composites for microwave packaging components 88−11755
metal package leads, improving bond yield when US lead bonding to 85−55344
metal-cordierite systems compatibility studies for electronic packaging 87−73161
metal-loaded gasketing reduces RFI problems 86−48610
metal-metal interactions of importance to electronic packaging 87−23361
metal-to-metal joints, technological considerations *(French)* 87−72836
metal/ceramic system, residual stresses, cracking, microelectronics packing appl. 85−39556
metallic electromigration phenomena 88−38801
metallised ceramic/polyimide chip carrier packaging technology, design and reliability testing 86−61950
metallised cermet packaging applications, thin film precision resistors addition 87−72856
metallo-organic decomposition films for electronic packaging 87−24641
metallo-organic deposition for advanced interconnects on substrates and hermetic packages *(German)* 87−74220
MIC and MMIC, development 86−7529
MIC packaging structures, analysis by finite difference method 88−25554
MIC substrate carriers, use of Alloy 42 as substitute for Kovar 88−1010
micro-interconnect systems for VLSI/VHSIC packaging appls. 88−64140
microassembly encapsulation method *(Russian)* 86−61935
microcapillary attachment between chips and rough substrates 87−16399
microchemical identification of corrosion related problems on electronic components 87−72889
microcircuit packaging trends, chip carriers 85−10501
microcomputer backplane systems, PCB connectors and packaging 85−11706
microcomputer housing designs for effective coding and EM shielding *(German)* 88−49524
microcomputer systems board level subassemblies selection and testing 88−31505
microelectronic, using silicone rubber adhesive 87−44002
microelectronic adhesives for hermetic packages, requirements of military specification MIL-A-87172 86−62950
microelectronic chips, simulated, natural convection heat transfer 87−58685
microelectronic component temp. fields modelling and visualisation 88−49549
microelectronic devices, static protective packaging and work area design 86−46090
microelectronic materials, surface and thin film anal. 88−57756
microelectronic package thermal analysis by finite element method 88−43712
microelectronic packages, annular glass-to-metal seals, strength estimation, expt. study 85−16797
microelectronic packages, corrosion and dendrite growth and other metallurgical phenomena 87−67521
microelectronic packages, hermeticity meas. 88−6282
microelectronic packages, passivation technology, requirements and deposition methods 88−189
microelectronic packages, plated, seam seal resist. welding 88−18501
microelectronic packages, thermal contact resistance 85−28827
microelectronic packaging, die bond materials, bonding mechanisms 88−18495
microelectronic packaging and materials characterisation, differential scanning calorimetry 85−34372
microelectronic packaging module, hermetic chip carriers and multilayer thick-film substrate 86−13489
microelectronic packaging reliability, environmentally related 87−72864
microelectronics, conf., Anaheim, CA, USA (Nov. 1985) 86−52131
microelectronics, world market and technologies, conf., Munich, Germany (Nov. 1986) 87−36337
microelectronics at Auburn University 86−45973
microelectronics packaging and interconnection technologies for hybrid cct. and PCB assemblies 86−7527
microelectronics packaging and interconnection technology, handbook 86−7375
microelectronics symposium, conf., Dallas, TX, USA (Sept. 1984) 85−27933
microjoining, book 87−36308
Micropack surface mounted device carrier from Siemens AG, construction and characts. *(German)* 85−49352
microsensor design constraints: system partitioning, technology partitioning, and packaging 88−53677
microstrip housing design, spurious cavity reson. calc. technique 87−45194
microstrip line structs. for HF interconnections and packaging, interfacial roughness effects 85−61433
microstrip lines as very-high-speed chip-to-chip interconnector, closely-packed struct. 87−23350
microwave antenna housing, CAD to withstand vibrations 87−5229
microwave applicators for sealing cartons 86−61934
microwave assisted curing, rapid thermal treatment, improved reliability 87−10223
microwave blind-mating connectors to create compact systems 85−40288
microwave cascaded amplifier thin-film hybrid IC, KA series with ceramic packages 86−20843
microwave device embedding, anal. using 3D finite difference method 87−66531
microwave FET/bipolar devices, design, performance and packaging for land mobile communications appls. 85−11551
microwave IC packages, co-firing technology 86−52288
microwave ICs thermal analysis using IR imaging system 88−50414
microwave modules, hermetic sealing by laser welding 85−28062
microwave multifunction components with single compact housing, product review 88−50379
microwave packaged transistor, design procedure using Smith charts and CAD techniques 85−34170
microwave packages, characts. comparison and system integration considerations 86−52291
microwave packaging, circuit complexities, design considerations 85−55127
microwave packaging, colloquium, London, England (April 1986) 86−52147
microwave packaging, evolution for design and market challenges 86−7528
microwave packaging, market growth and performance aspects 86−52286

packaging continued
microwave packaging developments 87−36494
microwave packaging schemes to meet GaAs MMIC requirements 87−24448
microwave-packaged power MOSFETs allow 10 MHz switching 87−65830
microwire, substrate design for connecting ceramic chip carriers *(Dutch)* 85−49353
Midcon 85, conf., Chicago, IL, USA (Sept. 1985) 86−45919
MIKROPACK, surface mounted devices housing 87−45441
military and commercial electronics, techniques 88−11754
military electronics, packaging for land, sea, air 85−61523
military electronics equipment, thermal performance eval. 86−46076
military equipment packaging design and EMI 87−72835
military helicopters, advanced flight control and navigation system implementation 88−68544
military hybrid IC packages, adhesive related failure mechanisms 85−28856
military hybrids, VLSIC/VHSIC technology 88−1247
military products, hermetic packaging protects circuitry from moisture 85−28050
Mini Puck solid-state relays using surface-mount technology 85−40286
miniature chip carriers, benefits for hybrid ICs 85−11811
miniature ICs automated assembling *(German)* 86−28377
miniature potentiometer package design 87−1007
miniature switchboard cubicle characteristics and performance test results *(Japanese)* 86−40011
miniaturised laser diode modules for Michelson type interferometer *(German)* 87−18991
mixers, price/performance trade-offs 86−7530
MLC, process for forming conductor patterns on ceramicsubstrates 86−35242
MLC arrays, substrate for high-density packaging 86−53246
MLC low temperature co-fireable ceramics: a new approach forelectronic packaging 86−62977
MLC module solder containment frame 85−49354
MLC modules, ground wire technique for crosstalk reduction between engineering changes 86−58190
MLC package for VLSI, processing of photosensitive polyimides 88−26109
MLC packages, HF performance modelling using computer model, expt. verification 86−52287
MLC packages, tunable delay line technique 86−34635
MLC packaging, thick film and alumina types for high reliability, fabrication and characts. *(Italian)* 88−49525
MLC pluggable-module power-connection mechanism 85−54145
MLC substrates manufacture, chem. removal method for defective I/O pins 86−27749
MM-wave components, low cost packaging techniques, integrated 94 GHz radar transceiver appl. 86−52290
MM-wave front end using Gunn oscillator and hybrid cct. techniques, design and housing 87−11066
MM-wave microstrip IC transceiver packaging 88−25545
MM-wave packaging goes modular 87−6295
MM-wave subassembly packaging techniques 86−35081
MM-wave thin film subassemblies, downconvertor designs, packaging and performance 88−71079
MMIC, high-speed IC and power hybrid IC packages, construction and materials 86−52289
MMIC hermetic packaging with high performance characts., design and construction 87−24449
MMIC manufacture, cost reduction 87−6124
MMIC multiport chip carriers, design and characts. 86−35121
MMIC ultra-wideband amplifier, 2 GHz *(Japanese)* 86−58064
MMICs, WAFFLELINE high-density packaging technique 85−55163
modified standard enclosures reduce tooling cost 88−37978
modular avionics packaging standardization 86−18478
modular design of passive components improves systemperformance 86−53023
modular housing system in plug-in technology *(German)* 87−65203
modular packaging technology impacts signalconditioning and control 87−5227
modular standards for emerging avionics technologies 86−18476
module compact packaging technique with improved thermal dissipation 85−10515
module component design rel. to cooling efficiency, computer simulation 86−46114
module system refrigeration concept for high power density heat sources 85−5798
modules in air-cooled environments, non-uniform fin shapes 86−34040
moisture resistance testing of packages 88−56027
molded cavity package with optical window 87−68309
molded cct. interconnects, performance and advantages 88−38936
molded plastic packages, mechanical characts. 87−36515
molded-in-place cover gaskets for environment seals and EMI/EMP shields 87−68807
Molex sockets and connectors, packaging options 86−1460
monolithic IC die attach in high-reliability DIPs, polyimides, low-chloride epoxies 85−23888
monolithic multicomponent ceramic substrate 87−24651
monolithic p-channel JFET/bipolar quad op amp with in-package trim, design and characts. 88−18936
MOS ICs reliability characts. 88−33404
MOS memory ICs, reliability aspects 86−57843
MOSFET applications, packages 87−1564
motor control centre components packaging, programmable and solid state controllers 88−18125
motor drives using power MOSFETs, device packaging 87−64849
motor position control, power IC packaging technology 88−63504
Motorola microprocessor and microcomputer chips, advances in technology 85−28547
moulded electronic packages, resin selection criteria 87−10177
moulded interconnection packages, double-sided planar and 3D configurations 87−10176
moulding compounds for small-outline packaged devices, props. 86−62286
MP-85 mold-type package for power devices *(Japanese)* 86−192
mullite ceramic packages and substrates 88−63063
multi-chip module technology with impedance controlled wiring 86−14751
multi-chip on tape memory packaging 87−5238
multi-chip packaging 87−10163
multi-chip packaging, high density/high speed 87−44005
multi-chip packaging design for VLSI-based system, internal thermal resist. 88−64144
packaging continued
multi-chip packaging design for VLSI-based systems 87−73932
multi-chip packaging technology for VLSI-based systems 87−58687
multi-purpose equipment practice for communication office terminals and its cooling characteristics *(Japanese)* 85−22260
Multibus I packaging systems from Mupac 88−49522
Multibus II, 19″ design system *(German)* 86−66617
Multibus II enclosures, Electronic Solutions Gemini Series 88−49523
multichannel systems, optimal arrangement of heat sources *(Russian)* 86−46084
multichip carriers, propagation characteristics of signal lines in high performance computer packages 85−2626
multichip high-performance packages, impact of fabrication on manufacturing technology 87−23346
multichip module, high-performance, thermal management 88−64145
multichip modules, cond. cooling, errors in lumped parameter modelling 86−46107
multichip modules, low stress design of flip chip technology 86−52284
multichip modules, pre-chip-join burn-in-and-test-in-situ chip carrier 86−13465
multichip modules using high performance packaging techniques 88−56031
multichip multilayer packaging, electrical issues associated with high density packaging 87−73935
multichip package strategy to reduce system costs 86−13507
multichip packaging strategies for system cost reduction 85−16795
multichip/wafer scale interconnects, modelling 87−67160
multiconductive base form package (SNMIG) 87−44007
multidimensional microstrip package design 88−38693
multifibre circuit pack to backplane optical connector 87−46563
multifunctional packaging applications of moulded PCBs 87−11211
multilayer backplanes require careful design specs 88−57062
multilayer boards for surface mounted components *(Swedish)* 86−27748
multilayer ceramic capacitors, resin coated, for auto-inserters *(Japanese)* 86−58081
multilayer ceramic capacitors for IC designs 85−55192
multilayer ceramic carrier, interposed segmented chip carrier 85−44513
multilayer ceramic chip carriers for semiconductor ICs 85−54142
multilayer ceramic IC packaging, defective pin detection system 85−5795
multilayer ceramic modules, discretionary engineering change wiring plane technique 85−10514
multilayer ceramic package and substrate production line *(Hungarian)* 88−31492
multilayer ceramic packages, materials and design 86−57211
multilayer ceramic PGA package, elec. charactn. 87−72840
multilayer ceramic process for high density interconnections in LSI chips 86−2336
multilayer ceramic substrate with UV curable dielectricpaste for multi-chip package 86−53209
multilayer ceramic substrates, solder wettability enhancement 85−28053
multilayer ceramic technology, packaging reliability evaluations 87−44088
multilayer ceramic-metal packages, residual stresses and damage 87−23358
multilayer ceramics for microelectronic packaging 85−33183
multilayer ceramics technology for capacitors and IC packages 86−13842
multilayer chip carrier of prefabricated glass layers featuring inner vias and conductors 86−13478
multilayer flexcircuit wart package 85−44516
multilayer glass-ceramic substrate of low firing temp. 85−16799
multilayer hybrid IC, thick film dielectric material *(Japanese)* 88−7230
multilayer hybrid thick film ccts., low-temp. co-fired ceramic tape packaging technology 88−19571
multilayer interconnects, screen printable polyimide films, development and performance study 88−1190
multilayer laminate requirements for GaAs IC Technology 87−6771
multilayer package design, elec. CAD anal. 87−58677
multilayer package design, elec. CAD anal. 87−72827
multilayer package designs, elec. CAD anal. 88−1192
multilayer packages, die attach at large dice with Ag/glass 87−6292
multilayer packaging structures, elec. modelling of interconnections 88−182
multilayer packaging structures, elec. modelling of interconnections 86−61943
multilayer PCBs, engineering change orders 86−8630
multilayer PCBs, thermal problem solns. 85−55240
multilayer polyimide PCB containing integral copper/Invar composite planes, thermal expansion 85−40318
multilayer PWBs, buried via design 86−47156
multilayer rigid-flexible PWB 86−67570
multilayer thick film hybrid technology, LCC module designs for military system 86−14741
multilayer thin-film substrate for multichip packaging 88−64142
multilayer thin-film technology 88−7221
multilayer universal electronic package 85−33180
multipin connector insertion force rel. to tip shape, theory and expt. *(Japanese)* 88−57048
multiple chip module packaging on Si substrate 88−18500
multispectral linear array visible and shortwave infraredsensors 86−12151
Multiwire, discrete wiring process for high-speed logic families 86−46099
multiwire circuit board, round wire coupled transmission lines, crosstalk 87−32124
Multiwire CoAxe coaxial interconnection board for high speedcircuits 86−53154
Multiwire discreted wired cct. board 86−185
Multiwire production methods automation 87−36493
multiwire technology, process and organisation 86−197
MXB.2 data multiplexer/VZS branching cct. rack system, construction using backplane cct. boards *(German)* 88−15265
National Semiconductor's Odyssey FMS for IC packaging 88−57743
National Semiconductor Tapepak IC housing *(German)* 87−58675
NEC mini-flat photocoupler, PS2101 *(Japanese)* 86−58774
NEC miniaturised SC-59 package, development *(Japanese)* 87−72830
NEC PCM COMBO LSI housed in a PLCC package, development *(Japanese)* 88−21820
NEC plastic pin grid array package, review *(Japanese)* 86−34053
NEC SLIC-LSI encapsulated in a PLCC package, development *(Japanese)* 88−21833
NEC SX supercomputer series, packaging technology 86−13490
NEC SX system, packaging and cooling *(Japanese)* 86−40556
NEMP enclosures for electronic equipment protection, ventilation panels design 88−58894
networks, packaging standardisation and developments 87−24490

packaging continued
new plastic packaging for semiconductors: some performance and reliability considerations 85−44526
Odyssey, flexible IC packaging system 88−11753
operational amplifiers, developments in performance and packaging *(German)* 86−763
optical connector, high fibre density, for use in electronic packaging systems 88−33670
optical fibre cables for local networks 87−56198
optical fibre coupler/photodetector struct. for IC interconnection 87−61040
optical fibre fusion splice packages, high-speed, using internal heat sources 85−12562
optical fibre packagings characterisation procedure relative to microbends 85−46136
optical fibres, excess loss of packaged fusion splices at low temperatures 85−35517
optical fibres alignment robot system 88−1952
optical interconnect technology developments 87−38967
optical interconnects for high speed computing 87−26232
optical power tester, portable, from Seiko Instruments and Electronics 85−41157
optically coupled p-n-p-n switch in moulded DIP 8-pin package 87−45342
optoelectronic components, guided wave, manufacturing technology development 85−41297
optoelectronic components, mechanical stress aspects 87−46914
optoelectronic device package, design providing mech. stable interface with optical fibres 87−5234
optoelectronic devices, critical issues in assembly and packaging 87−74945
optoelectronic devices, packaging and integration, conf., Cambridge, MA, USA (Sept. 1986) 88−6
organic PC manufacture by temporary adhesion and wave soldering *(Japanese)* 86−53198
overview of molded circuit boards 88−12722
oxides and nitrides, surface chem. studies, packaging appls. 86−13905
P-DIP devices, failure anal., IR microscopy 87−135
P-DIP parts, bond failure mechanism 87−133
p-n-p beam lead transistor failures in high-reliability PC assembly, and packaging soln. 86−13595
package-based power systems, CHP, gas turbine, steam turbine and fuel cell 88−75426
packaging for large general purpose computers *(Italian)* 87−67411
parallel fin conduction module 85−5796
parallel printed circuit manifold 88−32637
parallel-spaced electronic assemblies, heat removal by convection and radiation, anal. *(German)* 88−43709
passivation technique for high density packaging *(Japanese)* 88−13130
passive components, new materials and technologies impact 88−32477
passive thermal management systems for electronics 88−167
PC, semiautomatic wire-wrapping systems 86−27745
PC boards manufacture and mounting, CIM technology appl. *(German)* 87−1076
PC card connector, latching mechanism for displacement prevention 85−6612
PC cards, single source for whole package 85−17952
PC feature size and package placement 86−8574
PC HV packaging design criteria, electrical insulation impact on operational life 87−65216
PC modular jack connectors, design and manuf. 85−11692
PCB, delta-I noise model of high performance computer board 85−1149
PCB, filler card 86−35183
PCB, planar, thermally conductive elastomer for cooling 86−27688
PCB, power distrib. system design for improved power density 86−47157
PCB, through-hole component inserters 88−38905
PCB air cooling, buoyancy-induced forced convection on an isolated plate, rough and smooth 87−72848
PCB assembly, ESD damage, bagging and boxing 85−11737
PCB assembly automation employing tape and reel packaging 86−47194
PCB CAD reflecting packaging trends and resource constraints 85−40296
PCB cleaning techniques after assembly of through-hole components 86−27724
PCB connectors, IEC packing standards 85−23271
PCB connectors for increased component density 87−1093
PCB design for EMC 88−20946
PCB Expo, conf., San Jose, CA, USA (6-8 May 1987) 88−11602
PCB ground plane thermal conduction brackets 87−1097
PCB hierarchical interconnection technology 87−66679
PCB high density packaging by chip-on-board techniques 86−27721
PCB industry, future development in Europe 85−40295
PCB interconnection problems, VLSI adaptors appl. 88−32675
PCB interlock system 85−23268
PCB module, thermistor-based air vel. mapping method 88−64063
PCB mounting high performance package 86−13476
PCB package for large modules 86−7523
PCB packaging, materials science, overview 86−14718
PCB packaging engineers face conflicting demands 85−61528
PCB packaging for high-speed logic 88−11757
PCB packaging options 87−73901
PCB production process improvements for LSI circuit packaging 86−14712
PCB production technology for the 1990s 88−44449
PCB spacing for optimum cooling, principles and program 87−45385
PCB testability with surface mounted devices 85−45290
PCB thermal management techniques 88−25628
PCB three-dimensional moulding process 87−66729
PCB to ICs, cost-density analysis of interconnections 88−1094
PCB with electronic components, vacuum-formed protective cover 85−34329
PCB-mounted DIL relays, high-density design appls. 86−35161
PCBs, chemicals, electronic, 86−14662
PCBs, Cu-clad polyimide, ionizing radiation effects 85−17949
PCBs, Daisy's CAE environment, electromechanical design aspects 86−66943
PCBs, heat transfer effects in future package design 86−1483
PCBs, Hierarchical Interconnection Technology 87−37668
PCBs, protective packaging in harsh environment 85−28779
PCBs, repairability of surface mount assemblies 85−34277
PCBs, surface mounted device soldering using radiant IR 86−14703
PCBs, TAB technology tackles high density interconnections 85−40332
PCBs and masterslice LSIs, wireability study for designing packaging standards *(Japanese)* 88−31501
PCs, leadless component placement technology, advances 85−34359
packaging continued
PGA multilayer ceramic modules with cost-reduction features 86−34037
PGA silicone gel encapsulated chips, corrosion protection mechanism 88−24563
phase change cooling of power electronic devices, thermal system optimisation using CAD 87−10186
phase-change cooling of power microelectronics 88−49534
Philips PM3295 VHF scope layout increases circuit density 87−56726
Philips SOT-194 SMD handles higher power 87−37653
photo-patternable stress relief material for plastic packaged integrated circuits 88−26482
photoformed chip carrier 86−34045
photonic I/O's at the PWB and chip level? 87−45451
photosensitive polyimide for packaging appls., eval. 87−74398
physically isolated ICs, power and communication coupling techniques 87−67530
picture tube packaging system 85−6668
pin grid array chip package, thermoplastic injection moulding 87−10175
pin grid arrays and fine pitch chip carriers for high performance packaging 86−195
pin-arrays for multilayer ceramic modules, interconnection optimization 85−22255
pinned multilayer ceramic substrate 85−5794
planar hybrid interconnection technology 87−60031
planar hybrid interconnection technology for high density packaging 88−1257
PlanarPak, new surface-mounted package breaks from traditional MIC packaging 85−1038
PlanarPak miniature packages suit wide range of components 86−41445
plane multilayered systems, thermal anal. 88−63045
plastic, EMI shielding techniques 85−19162
plastic, wire sweep in small outline package 87−58680
plastic chip carrier placement, statistical method 86−67597
plastic chip carriers, load distrib. anal. under stress 86−46115
plastic coated, integrated test ccts., for package development, reliability/humidity testing 88−56032
plastic containers for ICs, corrosion processes *(Italian)* 87−72824
plastic DIP, debleeding procedures 88−24565
plastic DIPs, thin-film cracking and wire ball shear due to temp. cycle and thermal shock 88−196
plastic dual-in-line packages, dendritic growth of Ag on die surface 85−33190
plastic encapsulated IC reliability comparison *(Afrikaans)* 88−11807
plastic encapsulated ICs, association of bonding-wire displacement with gas bubbles, expt. study 87−23352
plastic encapsulated ICs, stress-related corrosion failure during press. temp. humidity tests 87−72842
plastic encapsulated ICs in moisture environments, reliability study 85−194
plastic encapsulated large-area chip, mech. stress and life tests 88−63055
plastic encapsulated semiconductor devices, role of ionic contaminants in moulding compounds on reliability 87−51873
plastic encapsulation for Al triple track chips, temp.-humidity-bias tests at 130°C and 85% RH 87−51872
plastic housings, screening against EMI *(German)* 87−2312
plastic housings for electronic components, EM shielding *(German)* 86−19853
plastic IC packages, flux penetration and pressure cooker fail mechanism 86−61951
plastic leaded chip carrier assembly automation 86−53283
plastic leaded chip carrier packages, stiffness/yielding of J lead 88−24562
plastic leaded chip carrier packages J-lead stiffness 87−16402
plastic leaded chip carriers 85−16790
plastic moulding for ICs, advances 87−10171
plastic package, IC encapsulation method and pressure cooker tests 87−72839
plastic packaged devices, reliability evaluation for long life appls. 86−52319
plastic packages for LSI, moisture resist. degradation by reflow soldering 86−13501
plastic packages for power ICs with improved mech. performance 86−46111
plastic packaging for IC *(Swedish)* 88−49528
plastic packaging for VLSI-based computers 88−56029
plastic pin array package 85−10518
plastic ringed high density 'J' leaded chip carrier 87−126
plastic-encapsulated IC reliability, moisture-resistance test using unsaturated pressure cooker equipment *(Japanese)* 86−52234
plastic-membrane heat exchangers, 8ME78, for electronic equipment cubicles 86−34055
plastic-moulded semiconductor packages, Cu wire bonding 86−14764
plastic-packaged ICs, moulding compound developments 85−60776
plastic-packaged one-time programmable EPROMs 87−52572
plastically encapsulated microelectronic devices, residual stresses, photoelastic determ. 86−7520
plasticised packages and thermal dissipation *(Italian)* 86−66618
plastics, component packaging, static safe materials and products, review 87−5520
plastics enclosure shielding techniques, characteristics and test methods 87−26877
plastics enclosures, suitability for EMI protection 87−5228
plate-type electronic equipment designs, computer-analysis of resonance characts. 86−34054
PLCC, housing for 68070 microprocessor using CHMOS technology *(French)* 87−46180
PLCC coplanarity measurement and improvements 87−36513
PLCC leadform optimisation tests 88−11770
PLCC manufacture, optical scanning inspection 88−39552
plug-in SMPSUs suit 19 in rack technology 87−72252
pluggable module can, modified design 85−193
pluggable multilayer ceramic three-dimensional module power and signal distributionmechanism 85−54144
plugged units, protection and screening *(German)* 85−60764
polarized capacitor mounting method 86−14566
Polaroid Sun camera, packaging Mylar material, solderless connections 85−16789
polyetherimide as a high performance, high density interconnect media 87−36516
polyimide, siloxane, package coating material for improved moisture resistance 86−13485
polyimide dielectrics for high density and high speed packaging 87−37768
polyimides, applications in IC fabrication and packaging cycles 85−23607
polymers in electronics. I 85−22559

packaging continued
polypropylene, glass mat reinforced, for air tightness improvement of cable splice case *(Japanese)* 87−11094
porcelain/steel substrate air turbulator/resistor card for cooling improvement 87−5235
positive adjustable voltage regulator series *(French)* 88−6649
power chip packages, effect of voids and cracks, thermal investigation 87−51880
power chip packages, thermal response anal. 85−50625
power chip packages, thermal response anal. 86−61933
power devices, cooling and heat spread model 88−43713
power devices, thermal anal., multilayer model 87−52349
power distribution using bus bars 86−57214
power electronic systems 86−34058
power hybrid micro-based thermal spreading model for package configurations 87−60033
power IC, Si design, packaging, testing and reliability 87−44560
power IC modules, development, protection and cooling aspects *(German)* 88−56436
power ICs 87−46054
power ICs, packaging, solder fatigue problems 85−23890
power ICs, packaging and technology developments 86−62436
power modules, packaging, advantages 88−44045
power modules cooling using heat pipes 88−70148
power modules for severe industrial applications 87−45911
power MOSFET, pressure cooker tests at 130°C, device failures 87−25363
power MOSFETs, microwave package for speed increment and losses reduction 88−64580
power packages, types, technology and performance *(Italian)* 87−65207
power semicond. modules, development trends and props. comparison 87−36507
power semiconductor components, cooling and thermal resistance calc., BASIC program listings *(German)* 86−21465
power semiconductor module combined with ceramic substrate *(German)* 85−54143
power semiconductors, cooling, lateral, temp. charges in barrier layer and housing *(German)* 86−13475
power semiconductors, heat pipe cooling, configs. and design aspects *(Dutch)* 88−24567
power semiconductors, packaging, characts. and appls. 88−1658
power semiconductors, technology forecast 87−44528
power supply design, heat sink config. satisfying miniaturisation and thermal protection criteria *(German)* 88−43706
power supply miniaturisation with improved heat dissipation, packaging and reliability 88−62427
power systems, semiconductor technologies and packaging in future switching systems 85−57654
precision packaged frequency sources using specialised precision crystals 88−13634
pressure sensor for chronic in-vivo use, fabrication technology 85−53100
primary cells, miniature design for small appliances *(Czech)* 87−72372
printed cct. card guide and retainer selection 88−63044
printed circuit card holder and cage 85−11788
printed circuit laboratory, link between engineering and manufacturing 88−19530
printed circuit mech. design, housings, AutoTherm CAD system for temp. distrib. anal. *(German)* 88−64073
printed circuits, boardless, appls. 85−61527
printed circuits packaging, integration of mechanical and electronic design systems 88−49521
product report on enclosures, connectors and cooling devices 87−23337
programmable jumpers for signal rerouting 85−1204
programmed analogue arrays *(Italian)* 87−18203
protection of electronic assemblies, sheet resistance measurement of buried shielding layers 87−44000
protection of electronic devices against electrostatic discharge, cellular packaging surface resistivity determ. 87−51865
protective enclosure for electronic equipment *(German)* 88−63042
PSU reliability, manufacturing and field studies 87−44529
PTF appls. in hybrid ccts. 88−12862
PTF assembly techniques 88−191
pulp mill and board machine for Duplex packaging board manufacture, power supplies 87−22942
pulsed Read IMPATT oscillator, SHF operation, computer-aided anal., package parasitics determ. 85−17873
PWA convection cooling, thermal anal. approach 88−12720
PWB's thermal management, using heat pipe substrates, avionics appl. 87−44008
PWB chip packages, buried vias appl. 87−37742
PWB connectors on multiple edges 87−53062
PWB design, product group vs. CAD 88−12744
PWB electronic package: power distribution, positive retention system 85−11789
PWB electronic packaging trends 86−27685
PWB high-thermal conduction module, thermal performance, computer simulation 86−14632
PWB leadless chip carriers for power IC, thermal dissipation anal. 85−34290
PWB manufacture, technological developments over next five years 87−6238
PWB polymer multilayers for chip carrier applications 85−40298
PWB substate materials for leadless ceramic chip carrier attachment 86−53137
PWBs, fabrication of FR-4 pin-grid arrays 87−11154
quartz, crystal oscillators in hybrid cct. technique, design, manufacture and encapsulation 86−52724
quartz precision crystals with high stability, manufacturing process 87−18444
quartz VHF five-resonator crystal filter, processing 86−42042
R520 and R520L power MOSFETs with high performance in small package 88−13406
radio equipment, thermal conduction channel design *(Russian)* 88−21914
radio relay equipment, modular design for high density packaging of components/ccts. *(Slovenian)* 88−35345
rape automated bonding, chip-on-board and SMT, comparison 87−65192
rapidly solidified solder foil for die attachment appl. 86−46088
rectangular modular ferrite core prod. line automation 88−39809
relay mounting on PC boards 85−34251
reliability evaluation of interconnection products 88−24549
packaging continued
reliability of electronics improvement, Government Industry Data Exchange program 86−61970

thick film hybrid ICs, encapsulation and reliability study *(Italian)* 87−53079
thick film hybrid microcircuits, encapsulated and unencapsulated, reliability study 86−62970
thick film hybrids, chip carrier attachment, flux residue meas. 85−23289
thick film integrated decoupling capacitor withredundancy 86−8664
thick film leadless chip resistor networks, fabrication using orifice direct writing system 88−1211
thick film power hybrids for high density appls. 85−34404
thick film processing, custom packaging using low temp. cofired multilayer ceramic technology 85−34386
thick-film hybrid circuit design 85−23297
thick-film hybrid ICs, high-density packaging technology and reliability aspects *(Japanese)* 85−39558
thick-film power hybrid, wire-creep rupture problem, soln. 87−1118
thin film interactions, electronic packaging 88−6276
thin film metallised ceramic substrate packages, through-hole pinning technique 86−13499

packaging continued
thin film module package, programmable line width and ground plane technique 86−8657
thin film resistor technology for high speed and high density cct. appls. 86−67602
thin film resistor-conductor laminate system for use in high speed interconnection packaging 87−37592
thin film wiring substrate for high density packaging with thin ceramic insulating layer 88−57761
thin films and metallo-organic deposition 88−37987
thin photopatterned dielec. and Cu metallisation 87−65213
thin-film hybrids, Cu/polyamide materials system, high-performance packaging 85−23290
third generation DIP relays 85−40282
three-dimensional interconnection system, connecting pads on upper/lower surfaces of chip carrier 85−44521
three-dimensional interconnection system for high-density packaging 86−183
three-dimensional interconnection system for leadless chip carriers 85−33176
three-dimensional modelling of cooling of electronic package *(French)* 87−5245
three-dimensional moulded interconnection processes and markets 88−32620
three-dimensional multilayer ceramic wiring structure for semiconductor devices 85−23288
three-dimensional semiconductor chip package suitable for low-cost mass production 85−44520
TO-8 packaged amplifiers for pulse and HF appls., Hewlett-Packard devices *(German)* 86−67040
TO-series, thermal performance of heat transfer materials underactual operating conditions 86−34057
tolerance analysis in electronic packaging 87−65194
transducers, micromachining and micropackaging, book 87−22974
transferred bump TAB, film-carrier-assembly technology for Al metallised IC chip 87−24657
transient thermal analysis for electronic packages 87−65209
transistor heat sinks, effects of flatness, roughness and contact area on losses *(Czech)* 87−16392
Transportation electronics, conf., Dearborn, Michigan, USA (Oct. 1984) 85−63246
trends in enclosures 88−11759
trends in IC socket design 88−6270
two-level planar low temperature interconnection 86−53251
ultra high speed diode lasers and photodetectors, characts. packaging and physics 87−46909
ultra-low permitt. porous ceramics and composites for high-speed IC packaging 87−74402
undersea fiber-optic regenerator using an integral-substrate package and flip-chip SAW mounting 85−37036
unified CAD system for electronic design 85−1147
Unilayer II discrete wiring interconnection system, elec. characts. 86−27654
universal enclosure system design factors *(German)* 86−40544
UNIX based system for four-point resist. meas. during temp. cycling 88−10101
US military hybrid specification for polymeric adhesives, MIL-A-87172 88−1254
user insertable nonvolatile RAM 88−751
user-specific integrated circuits *(German)* 88−1704
UV curable coating advantages and limitations 88−18768
UV curable dielectric paste for multichip package, multilayer ceramic substrate 87−43990
UV curable marking systems in semicond. industry 86−40559
vacuum trench filling process for semiconductor andpackaging device fabrication 86−1864
versatility, flexibility are essential when selecting enclosures and cabinets for electronic control equipment 88−37977
vertical PCBs, cooling, natural convection heat transfer 86−1490
vertical stand assembly for electronic enclosure 87−5240
vertically mounted module, config. for high density printed circuitry 85−10513
vertically-integrated package for VLSI appls. 88−63059
VHSIC chip and module packaging status 87−10180
VHSIC level device technologies, interconnection and packaging design considerations 87−10181
VHSIC packaging using leadless chip carriers 86−52274
video display drivers module, application specific packaging and heat sink construction 87−137
Vitreous coverings for the protection of surfaces inthe electronic sector *(Italian)* 85−60775
VLSI, chip carriers and pin grid arrays 85−10523
VLSI, failure mechanisms in temperature and humidity stress 86−63425
VLSI, hermetic chip carriers in military appls., VLSI/VHSIC interconnections 85−23846
VLSI, IC packaging design 86−61936
VLSI, low-permitt. multilayer glass-ceramic substrate with Ag-Pd wiring 87−72841
VLSI, low-stress and T-shock resistant semiconductor device encapsulation 85−44527
VLSI, multilevel interconnection technology 86−58496
VLSI, optical interconnection technology 86−47757
VLSI, optical interconnections for higher speeds 86−47758
VLSI, overview of packaging and interconnect technology 87−36508
VLSI, power distribution cap 86−52259
VLSI, Tape Pak−a novel approach to packaging 87−37766
VLSI, thermal and thermomechanical analysis and testing of electronic packaging systems 87−25422
VLSI, transmission line impedance mismatches effects, prediction 86−62580
VLSI advanced packaging, high density interconnect struct. 88−71635
VLSI advanced packaging for high integration and high speed applications 87−23355
VLSI and custom devices, impact on sockets and connectors 88−39655
VLSI assemblies, packaging and mounting *(Slovenian)* 88−39637
VLSI chip carrier using pressure interconnects and thin film flex circuitry 86−2319
VLSI chip thermally-enhanced packing technique 86−188
VLSI chips, optical interconnections 86−53716
VLSI composite type pin grid array package 86−63429
VLSI devices, Au-Si fibre shorts 88−57777
packaging continued
VLSI devices, thermal management and interconnection problems exploration using burn-in technique 87−38502
VLSI DRAMs with plastic encapsulation, effect of filler-induced stress on sense amplifiers 87−37285
VLSI electronic packaging problem solns. using integrated approach *(German)* 87−58673
VLSI ground plane, current magnitude and streamlines 88−57766
VLSI hierarchical chip physical design procedure using macros 86−35748
VLSI high-pin-count packaging trends 87−38498
VLSI hybrids are built with modular parts using thin-film piggyback substrates 87−17566
VLSI hybrids manufacture, thin film daughter/thick film mother piggyback substrates technique 88−57203
VLSI IC heat transfer microstructures 86−26642
VLSI IC package reliability 88−7638
VLSI interconnection trends and impact on materials 87−25531
VLSI military systems, testability and maintainability in operating environment 86−15190
VLSI modules, temperature/humidity stress tests, air flow depend. 86−52242
VLSI multichip packaging, interconnection design considerations 88−1749
VLSI multichip packaging using thin film interconnection technology on Si substrate 88−50565
VLSI nonhermetic reliable packaging 87−53595
VLSI package and board level modelling for 100 MHz clocks 87−59974
VLSI package planning, custom chip layout design 86−63392
VLSI package quality levels under environmental stress tests 85−60765
VLSI package reliability improvement in ionizing and EMP environment, use of hardened functions 87−46144
VLSI package selection, computer program 88−64731
VLSI packages, design graphs 88−63067
VLSI packages, transient thermal characts. of MOS die obs. 87−23324
VLSI packaging, die attach eval. using test chips with localised temp. meas. diodes 86−63427
VLSI packaging, die attach reliability prediction 88−24573
VLSI packaging, impact on system performance 88−24571
VLSI packaging, options and technology 85−16805
VLSI packaging, plastic encapsulation, surface passivation 85−23869
VLSI packaging, trends and considerations 85−16804
VLSI packaging alternatives 85−12327
VLSI packaging and assembly trends in late 1980s and 1990s 88−31500
VLSI packaging and electrical interconnections *(French)* 86−26655
VLSI packaging impact on system 87−53657
VLSI packaging strategy to reduce system costs 85−33195
VLSI packaging technique using liquid-cooledchannels 86−61949
VLSI packaging technology 86−57219
VLSI packaging technology developments 85−12349
VLSI packaging thermal modelling and charactn. 87−72847
VLSI packaging trends, surface mounted assembly 86−7532
VLSI packaging with high density tab interconnect tapes *(Italian)* 87−67412
VLSI packaging/interconnection structs., design, materials, selection criteria 85−17946
VLSI physical design, heuristics approaches 85−29230
VLSI physics, conference, Palo Alto, CA, USA (August 1984) 85−22051
VLSI plastic package reliability, computer-aided stress modelling 86−13500
VLSI SMT, digital, testing aspects 86−35839
VLSI systems, high performance packaging 87−67531
VLSI systems, packaging developments 87−43999
VLSI trends in semiconductor packaging, a merchant house view 88−63065
VLSI/VHSIC, AlN substrate, tape casting technology 86−15243
VLSI/VHSIC packaging, multi-chip module design 86−57212
VLSI/VHSIC TAB advances, SiC and AlN high-speed substrates 85−12350
VLSIC assembly and packaging technology 87−60564
VME bus systems, packaging of unit in case 87−31296
VMEbus packaging, total system approach 88−168
VMEbus system packaging 86−66619
VSLI packaging, main trends *(French)* 88−31508
wafer hybrid interconnection packaging 85−29348
Wafer Scale Integration, thick film stripline micro transmission line interconnection 86−21756
wafer scale integration from packaging point of view 85−29313
wafer scale packaging, standing wave resonance in bypass capacitor struct. 87−141
wafer transmission module−wafer scale integrationpackaging 86−2321
wafer-scale integration, technological developments, review 87−25452
wafer-scale integration, VLSI packaging approaches 86−2318
wafer-scale integration and packaging, appl. of focused ion beam for repair 87−1648
wafer-scale packaging, focused ion beam for unified lithography/testing/repair 87−46109
wafer-scale packaging technology 87−5241
Waffleline board and microwave chip carriers for GaAs systems 86−61937
water cooling of power semiconductors, depend. on water quality and other design constraints 87−24732
water-cooled cold plate, heat-producing cct. package with releasable attachment 86−34047
wave tinning of component leads using hot oil finishing 87−10152
welded filament chip heat sink 86−40548
wide-scale integration and high speed technology, status report 86−63415
wideband finline power divider in metallised plastic housing, design and performance 87−73624
wirability model for chips and chip packages in VLSI 86−47710
wire sweep in small-outline packages 87−36512
wire-wrap schedule generation, SIMULA program 85−34283
wiring space design for logic chips and chip packages 85−6269
WSI, conf., Grenoble, France (Mar. 1986) 87−31150
WSI comparison with VLSI packaging approaches 88−178
WSI packaging, elec. thermal and environmental functions 87−31302
WSI packaging design issues 87−32664
WSI restructurable VLSI technology, performance characts. 87−32732
Zener diode, glass-sealed mini-package, development *(Japanese)* 86−2115
zero-insertion-force hybrid circuit connector for severe environments 85−23205
AG-glass die attachment of Au backed and Cr-Au backed Si die, adhesion mechanisms 87−53088
Ag electromigration suppression effect 2,4-diamino-6-vinyl-s-triazine compounds 87−51839

packaging continued
Ag electroplated Cu leadframes, porosity meas. by electrographic printing 87−79255
Ag/glass, die attach material for multilayer packages 86−52278
Ag/glass die attachment of Au backed die, adhesion mechanisms study 88−188
Ag-filled glass die-attach adhesive, rheology for high-speed automatic processing 87−73943
Ag-glass die attach adhesive, rheology for high-speed automatic processing 88−57236
Ag-glass die attachment, adhesion mechanisms with Au and Cr/Au backed die, expt. study 87−53085
Al MIC package laser welding for hermetic sealing 86−61939
Al alloy package for microwave amplifier 86−52270
Al electrolytic capacitors, packaging 86−1412
Al electrolytic chip capacitors for surface mounted *(German)* 85−50060
Al heat sink selection for high-speed gate arrays 88−56014
Al humidity resistance improvement by special formulation of epoxy moulding compounds 87−72837
Al interconnects, ceramic packaging anneal effect on reliability 87−1454
Al metallisation corrosion, failure anal. 87−65220
Al metallisation corrosion in semicond. devices *(Japanese)* 88−26090
Al metallised corrosion devices, accelerated test performance of when organic coated 87−72844
Al package, laser hermetic sealing technique 88−18477
Al power electronics appls. including heat sinks, packaging and busbars 88−56021
Al thin film metallisation, electromigration, influence of passivation and packaging 87−45827
Al thin films for IC packaging materials, coating methods and props. study 87−43993
Al/Au(Al) bonding using insulated wire for high lead count packaging 87−37764
Al-Mg alloy bonding wires in plastic packages, corrosion failure 86−57220
Al-Si alloy package for microwave amplifier, hermetic sealing methods study 87−43989
AlN multilayer PGA packages 87−74401
AlN, substrate and casing material for electronic applics. *(German, English)* 88−64120
AlN substrates with high thermal conductivity 86−13502
Al_2O_3-MgO-SiO_2 ceramics, processing for low α-particle emission 86−13846
Au eutectic vs. Ag glass die bond in ceramic packages, thermal performance assessment 87−36511
Au in IC packaging, advantages and possible replacements *(German)* 87−72851
Au packages, die-attach temp., effect on bondability of bond finger 88−6273
Au thermosonic wire bonding to precious-metal-free Cu leadframes 88−64160
Au wire bonders trends 88−38954
Au-Si preform die-attach system using Ag substrates 88−195
Br concentration in moulding compounds, effect on Al ball bonds to Al pads 86−62983
C-Zn dry battery with outer metallic jacket *(Japanese)* 87−36096
Cu alloy lead frame material evaluation for moulded DIP 87−10173
Cu alloys, use in IC and semicond. device packaging *(French)* 87−65212
Cu ball/wedge bonding to Cu thick film 88−25753
Cu, electrodeposited, leadless chip carriers and pin grid array packages 86−52283
Cu, microelectronic packaging and interconnection uses 88−25750
Cu studs formation for multilayer metallurgy systems 85−33181
Cu thick film for joining electronic packages 85−10517
Cu wire bonding of plastic moulded semiconductor packages 87−1123
Cu/Ni coating for EMI shield, qualification using resistance-testing method 86−26938
Cu/polyimide thin-film multilayer interconnects for high-performance packaging 87−72858
Cu-Al_2O_3-Cu substrate as base plate of highly integrated bridge-circuits 88−44044
Cu-Be wires, low cycle fatigue behaviour, effect of Au-Sn coating 87−10523
Cu-MgO-Al_2O_3-SiO_2, glass ceramics, phase charactn., dielec. props., electronic packaging system 88−24807
Cu-Ni-Sn wires, low cycle fatigue behaviour, effect of Au-Sn coating 87−10523
Cu-alloy based metal DIP with superior thermal conductivity 87−51869
Cu-polyimide thin films, outgassing studies 87−73164
Fe-Ni alloy lead materials for hermetic seals, characts. and appls. 86−52266
GaAs DIC, high-speed multigigahertz, eval. 88−39615
GaAs DIC, high-speed multigigahertz, packaging 88−44106
GaAs FET, 12 GHz, using plastic mould packaging 85−45239
GaAs FET lumped-element equiv. cct. models for various carrier mountings 85−17865
GaAs IC based signal processor design 87−17103
GaAs IC high-speed/microwave packaging developments 87−32647
GaAs, IC, packaged high-speed, electrooptic sampling 88−39732
GaAs IC technology and devices, conf., Boston, MA, USA (Oct. 1984) 85−54034
GaAs ICs, chip carrier packages for ultra-high speed devices 85−54150
GaAs ICs, low,cost multiport microwave package design 85−55164
GaAs ICs production, design steps 87−1601
GaAs ICs, symposium, Grenelefe, FL, USA (Oct. 1986) 87−31142
GaAs IMPATT diodes as MM-wave power sources, modelling, design, fabrication and packaging 87−37538
GaAs MMIC X-band amplifier yield evaluation 87−52871
GaAs MMIC and LSIC components, mechanical stress reliability factors 87−66567
GaAs MMIC ceramic packages, design aspects 87−52870
GaAs MMIC high-performance packages 87−52869
GaAs MMIC low-noise amplifiers and switches, L-band operation, design and packaging 85−55175
GaAs MMIC manufacture, low cost packaging/reliability testing procedure 87−59902
GaAs MMIC reliability and packaging 88−7058
GaAs MMIC tapered distrib. FET amplifier in hermetic surface mount package, 1-10 GHz design 86−35120
GaAs MMICs, high-performance 20-GHz package, design 88−38739
GaAs MMICs, low-cost packaging/testing procedure for manufacturing 87−73732
GaAs X-band MMIC amplifier, measured elec. package performance 87−52868

packaging continued
GaAs chips for CRAY-3 supercomputer system 88−19102
GaAs depletion-mode MESFET MSI digital/analog array, design and packaging 85−55976
GaAs device digital board systems, coaxial interconnection for high speed 87−24560
GaAs dice packaging using leadless chip carriers 86−15192
GaAs digital ICs, high lead density mini chip carriers developments 87−32648
GaAs digital ICs, high-speed packaging anal. and modelling 86−13494
GaAs digital ICs, packaging and interconnect technology, book contrib. 87−43996
GaAs digital ICs; testing and packaging *(French)* 88−7669
GaAs digital MESFET technology, WSI packaging concept 86−58627
GaAs high-speed ICs, multilayer interconnect packaging technique 86−53781
GaAs high-speed digital ICs, packaging techniques for discrete and multichip hybrid configs. 86−34056
GaAs microprocessor systems design 87−17104
GaAs multi-GHz digital ICs, low-cost packaging 88−50119
GaAs power MESFET packaging, design aspects 86−53676
GaAs systolic processor, piggyback WSHP, interconnection complexity study 88−63734
GaAs ultra-high speed ICs, chip-carrier packages 85−45787
GaAs wafer processing techniques 88−26474
In GaAsP lasers, high speed design and performance 87−33205
InGaAs 12-channel p-i-n detector arrays and packaging for 1.3 μm appls. 88−45325
InGaAs picosecond PIN photodiode for optoelectronic integration, design, packaging and performance 85−62463
InGaAsP 12-channel LED arrays and packaging for 1.3-μm appls. 88−45325
InGaAsP edge emitting LED, reliable package for hermetic encapsulation 88−2137
Li batteries embedded in CMOS ICs 85−62071
MgO-Al_2O_3-SiO_2 glass ceramic, α-cordierite phase form., elec. props., thermal expansion, VLSI encapsulation appl. 86−20117
MgO-Al_2O_3-SiO_2 glass-ceramics for electronic packaging, nonconventional route 87−23753
Mo for cooling power semiconductors, keeping cool when chips are down 85−44524
Ni alloys in electronics industry 88−38267
Ni coatings of IC casings, microcorrosion damage, SEM and Auger spectra 85−22254
Ni plated packages for hybrid appls. 85−33188
Ni press plate electroforming technique and results 87−16213
PCB heat dissipation use of BeO packages 86−41426
Pb-Sn solder for die bonding of Si chips 86−14769
Pb-Sn solder/Cu joints, tensile behaviour 87−59014
Pb-alloy Josephson chip packaging, intermetallic compound formation on In-Bi-Sn solder bumps 88−1902
Pb-alloy Josephson device packaging, water soluble flux 88−1901
PbO-B_2O_3-SiO_2-Al_2O_3 passivation and VLSI packaging glasses 87−25114
PbO-SiO_2-B_2O_3-GeO_2, glass system, DTA, thermal expansion, comp. depend., LSI package sealing appl. 87−52224
Si IC micromech. foundry concept, modelling, design 88−39657
Si IC transducers and appls. *(French)* 86−24509
Si cct. boards for dense small-size memory arrays 88−44498
Si chip reliability, thermal fatigue investig. *(French)* 88−26379
Si circuit boards, IC breadboards 87−74369
Si hybrid substrates for VLSI chips, characts., bonding and packaging considerations 87−6291
Si large chips, ceramic plastic composite substrate for face down bonding 87−73931
Si power diode characteristics and packages *(German)* 86−15116
Si pressure sensors, piezoresistive absolute, packaging eval. 88−53930
Si sensors, trends and technologies *(Chinese)* 88−9963
Si thin-film multichip technology 88−64141
Si wafer-scale packaging technology using hybrid and monolithic techniques 87−16396
Si-on-Si WSI ultra-reliable packaging 88−64143
SiO_2 low α-molding compound as IC filler 88−56028
Sn-Pb solder joints, thermal fatigue failures, microstructural study 88−43749
Ti-W/Au/Cu metallisation system for TAB assembly 85−61870
TiW/Al-Si metal to silicide contacts, plastic packaging stress induced failures 88−57518
W-Al_2O_3 multilayer ceramic substrates, furnace atm. effect on cofiring 87−131
YIG filters using polyimide circuitry support 86−9419
Zn coating plastic cabinet using flame-spraying *(Japanese)* 85−22246
ZnO-B_2O_3-SiO_2-P_2O_5 passivation and VLSI packaging glasses 87−25114
ZnO-SiO_2-B_2O_3-P_2O_5 glass system, DTA, thermal expansion, comp. depend., LSI package sealing appl. 87−52224

packet switching
1.2 Gbps optical loop LAN for wideband office communications 86−54920
1-persistent CSMA/CD systems, effect of acknowledgment traffic on performance 87−40042
1-persistent dual channel LAN for integrated voice/data appl. 88−67003

amateur packet radio operation 88−46879
amateur packet radio primer, introduction 87−34340
AMBRE multiservices local network, performance evaluation *(French)* 85−25233
AMC system for trunk-mode access to Transpac data network from PSTN 85−57606
announced arrival random access protocols 87−48264
APEX510F packet switching system from NEC, technical trends of network *(Japanese)* 87−8116
architecture for experimental meas. centre 86−16631
area network approach to store-and-forward deadlock prevention in packet networks 88−8920
Army/DARPA distributed communications and processing expt. 86−49124
ARPANET and the DARPA Internet 88−67008
ARQ protocols, complexity and accuracy of algorithms for performance evaluation 86−30126
ARQ protocols, evaluation of link by link vs edge-to-edge schemes 88−52646
ARQ protocols with copy transmission, delay performance 88−52645
ARQ resequencing in reliable transmission over parallel channels 88−3299
ARQ schemes with service interruptions, delay performances *(Japanese)* 88−59381
artificial intelligence assisted packet radioconnectivity 87−3038
ASK 101 modular system architecture for packet and message switching 85−52172
ASPEN packet switching field performance meas. tool 86−16994
asymmetric capacity communications channel and divestiture 85−30508
asymptotic analysis of frame sequence delay in data link 87−48252
asynchronous multitrunk HYPERchannel networks, performance models 87−33830
asynchronous packet transmission system, multiaccess stack algorithm 88−3294
asynchronous random access CDMA systems, stability analysis 87−40040
asynchronous TDM (or fast packet switching), switching techniques 87−76434
asynchronous TDM packet switch, output buffer sharing effects on buffer requirements 88−59388
asynchronous time-division networks: terminalsynchronization for video and sound signals 86−54739
asynchronous time-division switching for broadband networks 87−13185
asynchronous time-division techniques: an experimental packet network integrating videocommunication 85−47107
AT&T ACCUNET Packet Service perform. in reln. to data communications standards 86−16998
AT&T and Philips distributed 1PSS architecture for packet switching network 87−48660
AT&T common channel signalling packet switch, No.2 signal transfer point, overview 87−48439
AT&T Communications common channel signalling network, No.2 Signal Transfer Point design 86−54712
AT&T No.1 Packet Switching System, architecture 86−43678
AT&T Technologies Local Area Data Transport service, hardware and software overview 85−2965

packet switching continued
AT&T Western Electric 1 Packet Switching System, remote packet module software implementation 85−42108
Atlas 400 service from Transpac for DPX400 message handling system 88−46400
ATTIS and NTI approach to voice and data integration 86−10930
AUSTPAC, Australian packet switching network 86−37524
AUSTPAC, Australian packet switching network, services and development 85−63361
Austrian public data networks *(Czech)* 87−76091
authentication and discretionary access control in computer networks 87−28044
authentication and discretionary access control incomputer networks 86−16909
automobile communication protocol for mobile packet communication system using continuously allocated small zones *(Japanese)* 88−53186
autonomous adaptive LAN, ring communications via point-to-point implementation 85−8208
AXE for packet switching integration 87−28333
B-ISDN, broadband packet network architecture 88−59943
backbone packet-switched communications network design using graph theory and heuristic knowledge 88−34868
banyan networks decomposing for perform. anal. 88−34859
baseband local network for integrated services 87−55823
baseband network with controlled access, probability characts. 86−30071
Batcher-banyan packet switches, reservation-based contention resolution mechanism 88−59358
BBC Datacast, transmission system 87−13322
Belgian and X25 network experiences 85−42304
Belgian network ISDN field trial based on ITT1240 digital switching system 85−19661
Belgium broadband experiment, evolution 87−76133
Bell Atlantic public packet switched network service, implementation 87−48663
Bell DPS 1500 data-packet switching network 85−3195
Bell Operating Companies public packet switching networks, addressing and routing 86−30393
Bell Operating Company environment 86−59398
Bellcore Internet, packet-switched network 86−43574
bicycle-mobile packet radio, design 88−41537
binary frame synchronisation sequences for packet radio 88−3291
binary router chip in custom LSI technology, packet network appl. *(Japanese)* 85−6390
bit dropping in packet voice multiplexer, during congestion, traffic smoothing effects 88−52647
Blazenet: A high performance wide-area packet-switched network using optical fibers 87−69744
blockage time distrib. queueing anal. for end-to-end controlled virtual cct. 88−46329
blocking anal., simultaneous resource possession 86−23175
BOCs technical requirements for public packet switching networks 85−42119
British Telecom Packet Switchstream public service, development 85−36589
broad-band packet switch for multi-service communications 88−52635
broadband central office for asynchronous transfer mode 88−67181
broadband integrated network development *(Spanish)* 88−14933
broadband ISDN, routing and resource control 88−59728
broadband ISDN, synchronous composite packet switching 87−34314
broadband ISDN, synchronous composite packet switching architecture 88−15296
broadband ISDN local access system, CMOS VLSI framer chip design 88−9367
broadband networks, asynchronous TDM and switching, analytic tools 87−34008
broadband networks, asynchronous TDM and switching, resource sharing for flow control and congestion avoidance 87−34007
broadband networks, asynchronous TDM communication *(German)* 87−76068
broadband packet switch for integrated transport 88−15293
broadband packet switch for multirate services 88−3778
broadband packet switching networks for data transmission, comparison with ISDN *(German)* 88−52896
broadcast and multicast techniques, use on computer networks 87−13473
broadcast bus LANs, demand assignment multiple access schemes 85−19812
broadcast channel, limited feedback sensing algorithms 85−51829
broadcast channel random access protocol, packet delay distrib. of tree conflict resolution algorithms 87−55408
broadcast communications packet conflict algorithms 87−13183
broadcast packet switch performance 88−3714
broadcast packet switching network, design 88−59901
broadcast packet switching network design 86−59400
buffer blocking effect on operating characts. of data link 87−19978
buffer reservation for store and forward deadlock prevention 85−25560
buffered Banyan networks under nonuniform patterns, perform. eval. 88−52642
buffered CSMA/CD system, performance anal. *(Japanese)* 86−54588
buffered CSMA/CD systems, performance comparison of packet transmission schemes *(Japanese)* 87−33838
buffered packet-switching banyan networks, distribution of delays 85−30510
buffered slotted ALOHA scheme, analysis, stability, and optimisation 85−42006
bulletin boards, tips for users 88−59507
Bundespost's Datex-P, packet switching network *(German)* 88−59345
burst and fast packet switching, performance comparisons 88−8887
burst cross-connect switch using BENES switching network *(Japanese)* 88−53099
burst switching and fast packet switching comparisons 86−59399
burst switching for integrated voice/data services, performance analysis 88−41132
burst-switching for integrated voice/data service, voice delay scheme, performance anal. 87−62514
bus networks, FCFS-like group random access protocol, performance eval. 87−62411
bus-structured multiservice LAN, architecture and implementation of access mechanism 88−73637
bus-type LANs, performance eval. of FCFS-like group random access protocol *(Japanese)* 87−33834

packet switching continued
bus-type local networks for integrated voice and data, traffic control *(Japanese)* 85−57897
business packet-switched data networks 87−55834
business transformation 88−28410
Butterfly satellite IMP for the wideband packet satellite network 87−20430
C, D, D_2 MAC decoder architecture 88−29096
C&C-NET LOOP6830 local area network 87−28096
C&C-NET STAR subsystem using radial linking 85−52061
C-MAC, D2-MAC, E-MAC for satellite TV *(German)* 85−8350
C-MAC/packet system for DBS, principle and adoption as European standard *(Spanish)* 85−30968
C-MAC/packet system for satellite broadcasting in Europe 85−37201
cable TV, C-MAC packet system for distribution 87−28817
Cambridge Fast Ring protocol, performance modelling 88−59721
Cambridge Ring LAN, network service performance comparison 88−8922
CANTUS, packet switching point-to-point network 85−25573
capacity assignment algorithm for centralized computer network 85−42307
capacity optimisation in packet-switched data networks *(German)* 87−75984
carrier sense multiple access with time-split collisiondetection and split channel reservation 86−16611
carrier-sense multiple access with fixed retransmission assignment 87−40027
carrier-sensed multi-access protocols, queueing anal. 87−55412
CATV, interactive, distributed switching for data transmission 85−47688
CATV-based high speed packet switching metropolitan area network 88−52923
CCITT Common Channel Signalling System No.7, level 2 simulation 85−19546
CCITT Recommendation X.25 comparison with ISO 8208 and 7776 standards 88−46552
CCITT Recommendation X.75 and packet switched public data networks interconnection 85−7971
CCITT recommendations development, users and manufacturers involvement 85−7970
CCITT standards development for packet data networks, 1980-1984 86−4258
CCITT standards for packet data networks, development 87−13357
CDMA multihop networks, acknowledgement protocols, performance comparison 87−33846
CDMA multihop packet radio networks, throughput anal. 86−17219
CDMA packet radio network, multi-hop, throughput performance anal. 88−41516
CDMA packet radio networks, code-assignment for multi-receiver nodes 86−55176
cellular ALOHA network for mobile radio communication, spatial distrib. of traffic 88−41539
cellular digital mobile system, towards high-capacity system 85−58004
cellular land mobile radio channels, spectrum utilisation efficiency for simulcast data transmission 87−69980
cellular telephones, mobile data terminals and data packets approach 87−3118
centralized routing method of packet switching network *(Japanese)* 88−52626
Centrenet network, distributed network services 85−63143
Centrenet network, voice communications 87−20107
channel assignment, distributed dynamic algorithm 88−52662
character packet assembly/disassembly unit for network data terminal equipment, design and features *(Japanese)* 85−8246
circuit and packet switching system architecture for an ISDN 88−3775
circuit vs. packet switched networks, comparative cost anal. *(Japanese)* 86−69300
circuit-based hybrid switching, strategy 86−64814
circuit/packet switch interworking, open world protocol 85−2927
circuit/packet switching network, trunk frame organisation performance 86−23185
class of service routing of network traffic, statistical analysis 87−55446
clustering techniques for large mobile packet radio networks 87−56017
code, maximum-likelihood decoding, noisy packets combining 85−46693
code division multi-access frequency-hopping communication system, stack algorithm 87−55422
code switching technique for distributed spreadspectrum packet radio networks 86−16615
coding scheme for concurrent error detection/correction in multistage interconnection networks 88−8918
collision channel without feedback 85−51517
collision channel without feedback, convexity of nonachievable rate region 85−51518
collision resolution algorithms for a time-constrained multiaccess channel 88−34877
collision resolution for buffered users 87−69407
collision resolution protocols utilizing absorptionsand collision multiplicities 85−62942
collision-free access protocol for packet radio networks 88−46858
collision-free protocol for local area networks 88−66951
combat radio network system using packet switching techniques 87−34444
combined ALOHA/reservation access methods, characts. and stability anal. *(Japanese)* 88−21396
combined ALOHA/reservation access schemes for AA/TDMA system, channel partition methods, eval. *(Japanese)* 88−21397
commands and interconnections for packet radio 88−59971
common channel signalling for independent companies 88−59902
communication link speed design, genetic algorithms 88−21430
communication network, capacity and flow assignment joint optimisation 87−40113
communication network routing optimisation 85−30493
communication networks *(German)* 86−23494
communication networks, architecture design 88−8890
communication networks, dynamic control of session input rates 85−19638
communication networks and packet switching 85−42318
communication networks for electric power systems, appls. of packet exchange method 86−49160
communication networks for information age 87−20039
communication networks routing, flow control and learning algorithms 87−55451
communication networks traffic control problems, dynamic flows modelling and simulation, book 88−49356
communication primitives supporting the execution of atomic actions at remote sites, request manager 85−7949
packet switching continued
communication processor network node utilizing dual buffer insertion rings 87−28079
communication protocol on virtual link 86−43541
communication satellites for packet radio 86−69702

discrete time $G^{[X]}/D/1$-S queueing system analysis, appl. in packet switching 88−52649
discrete-event process supervisory control with partial observation 88−34847
discrete-time single-server system with requests of several types 85−19561
distributed access for large packet networks 87−48662
distributed computer networks, data transmission process *(Spanish)* 85−13655
distributed database management in a highly reliable distributed communications network 85−19703
distributed environments, packet complexity 88−73418
distributed interconnect scheme for high-throughput packet switch applications 85−13933
distributed network management system for packetswitch stream 86−37200
distributed networks, packet duplication and elimination 86−64788
distributed objects based on the master/server model 87−13466
distributed packet switched type LANs with wide area communication capability 86−30395
distributed packet switching equipment *(Japanese)* 86−64639
distributed packet switching system with high throughput 86−30394
distributed packet voice communications protocol, initial design 87−55429
distributed reservation protocol for integratedline-and packet-switched networks 86−49063
distributed routing algorithm for circuit packet switching network 85−13666
distributed routing with on-line marginal delay estimation 88−59391
distributed spread spectrum packet radio network, acknowledgements effect on perform. 86−64391
distributed spread spectrum packet radio networks, acknowledgements effect 87−34366
distributed spread-spectrum packet radio networks, spreading code protocols 88−41131
distributed store-and-forward deadlock detection and resolution algorithms 88−15086
distributed switching interactive CATV network, fast switching protocol 86−60050
diverse data services, worldwide 88−59428
double-loop computer networks with multinode failures, parallel data transmission routeing 88−59689
DPN Data Networking System, development 88−15115
DPN packet switch architecture 88−46831
DPN SNA Multihost, IBM SNA and X.25 networks marriage 88−67027
DPN-10 concentrator for packet network 87−34271
DPS1500 as example of 2nd generation packet-switching system 88−21698
DPS1500 Packet Switching System, netgram protocol for intra-network communication 85−19860
DPS 1500 packet switching software technology transfer to Japan 87−62457
DPS 1500 Packet Switching System, high performance line access module 86−54731
DPS 2500 data packet switching system, review 87−62779
DPS-1500 packet switching system, congestion and flow control 85−51936
dual-channel LAN, performance analysis 88−3592
dynamic conference call participation among asynchronous communicating nodes 86−17051
dynamic flow control evaluation based on window mechanism 85−13939
dynamic flow control protocols for packet-switchingmultiplexers serving real-time multipacket messages 86−49049
dynamic parameter selection in packet radio transmissions 87−40049
dynamic routing in communication networks 85−2978
dynamic TDM, packet approach to broadband networking 88−3715
dynamic TDM packet assembler and packet multiplexer, design architectures 88−46430
dynamic window congestion control in heterogeneous environments 87−33859
EBU C-MAC/packet system for direct broadcasting by satellite 85−20309
EBU standards for satellite broadcasting and cable distrib. *(French)* 86−37840
educational computing with amateur radio stations 88−53144
EDX-P high performance packet switching nodes 86−43698
efficiency of slot utilization with hangover *(Japanese)* 88−52627
Egyptian public packet-switched data network 85−63363
EHV interconnection substation operation monitoring, LAN integrated telecontrol system, experiences and economics 88−10787
electronic switching system processor, development *(Japanese)* 86−59723
emergency 'pocket' packet radio station, installation 88−41501
EMPAK scientific and research data packet switching network *(Croatian)* 87−40357
end-to-end group acknowledgement error control mechanism anal. 85−42012

packet switching continued
end-to-end performance objectives of the Datapacnetwork 86−43376
ENERGONET-PS1 network, security features 88−21415
engineering large scale packet networks 85−7977
Enhanced Packet Radio System: further results 87−8210
Enhanced Packet Radio System for the forward area 86−64857
enhanced-quality TV distribution *(French)* 86−37990
entity structure based design methodology: a LAN protocol example 88−41314
equipment, comparison 86−10888
equipment, international markets 86−43560
Equipment Bus, network to interconnect control and monitoring equipment 87−13437
ERIPAX data communication networks for Swedish railways 85−2958
ERIPAX data communication system appl. in public/private packet-switched networks *(Croatian)* 85−30699
error recovery protocols for high-speech packet switched networks, eval. 88−46355
Ethernet, dynamically varying voice packets for collision avoidance, stochastic anal. 87−69738
Ethernet LAN buffer management scheme 87−55821
Ethernet MAC-level protocol, bounded packet delay time, performance 88−3622
Ethernet protocol anal., binary exponential backoff 88−46375
Eurocom systems, error protection *(Dutch)* 85−7820
European Computer Communications Conf., London, England (June 1986) 86−61855
EWSD for ISDN, integration of packet switching 86−55136
EWSP architecture for universal packet switching, modular technology 87−69818
EWSP high performance packet switching system, review 87−48661
EWSP packet switching system for German Federal Railways 88−67173
exact delay analysis of packet-switching concentrating networks 88−21373
exchange network appls. *(Japanese)* 87−69475
exchange networks, implementation of emerging technologies 86−37292
exchange services, current state and perspective *(Japanese)* 87−69472
exchange system, data communication network nucleus *(Japanese)* 87−69476
experimental ISDN X.25 terminal adaptor 88−59806
explicit offset routing for interconnected high-speed networks 88−9197
express pipe network design 87−19995
fairness in computer networks 86−23503
fast packet approach to integrated broadband networks 87−20182
fast packet switching, channel performance eval. 88−52603
fast packet switching, principle for future system generations 87−76435
fast packet switching market, driving factors 87−76018
fast packet switching networks, multi-media communications *(Japanese)* 88−3362
fault tolerant computer networks, container control for relaying packets 87−2684
fault tolerant packet switched network design using capacity augmentation 88−52655
FDDI, fiber distributed data interface, suitability for avionics architecture 87−49127
FDDI, fibre distributed data interface, performance analysis 87−49125
FDDI, fibre distributed interface, 100 Mb/s token ring 87−49124
FDDI token ring, packetized voice investig. 88−60201
FDDI-II hybrid operation for high speed fibre optic data networks 88−67432
FETEX-5300 packet switching system *(Japanese)* 85−36539
fibre distributed data interface (FDDI), American National Standard for 100 Mb/s token ring 86−55328
Fibre Distributed Data Interface standards for high speed LANs 87−48615
fibre optic LAN gateways implementation 88−35156
fibre optic ring network appl. to process control 88−41692
file transfer, probability characts. of no. of frames in data packet 88−28147
finite message storage buffer, overload control 88−59389
finite queue performance evaluation with random routeing 88−24624
finite storage switches with buffer management 87−40011
finite-user infinite-buffer slotted Aloha system, stability anal. of interacting queues 88−46371
five-node computer network simulation using SLAM model 85−25211
five-node network simulation using GASP II package 85−25209
fixed TDMA with finite buffer capacity, blocking and delay 85−8215
flight and ground packet telemetry systems activities at NASA's Goddard space flight center 88−61600
flow control algorithms in information communication systems *(Japanese)* 87−27681
flow routing algorithm to solve maximum concurrent flow problem, application to packet switched telecommunication networks 86−49174
formal specification and anal. of DMI, X.25 based protocol 88−59708
FORTIS, fibre optic based distributed information network, architecture 87−40952
frame optimization in an integrated voice/data link 86−30223
Frame Relaying Service opportunity 88−67066
framed ALOHA protocols performance, capture effect, exact anal. 88−46342
Framed ALOHA scheme with capture effect, performance eval. and optimisation *(Japanese)* 88−34863
French Air Force data exchange network 88−73558
French inter-banking clearing network−SIT 86−64403
French packet-switched ISDN 87−69857
frequency-hop multiple-access packet radio network with noisy side information 87−55971
frequency-hop radio networks, statistical dependence and noisy side information, packet error probabilities 87−34361
frequency-hop transmission for satellite packet switching and terrestrial packet radio networks 87−13182
frequency-hopped spread spectrum packet radio networks, packet error probabilities 88−59366
frequency-hopped spread-spectrum packet radio networks, random access protocol, throughput anal. 88−21935
frequency-hopped spread-spectrum random-access communications with multiple-reception capability 87−55407
frequency-hopped spread-spectrum systems, modelling and test patterns 88−28674
Fuji Photo Film Co. packet exchange appls. *(Japanese)* 87−69480
future networks requirements and solns. 85−19570
GAck Ethernet, local computer networking scheme with global acknowledgement mechanism *(Japanese)* 88−59688

packet switching continued
gateways, interfaces from SNA to X.25 87−76327
gateways provide multiple protocol conversion for network links 85−36714
gating service type multi-packet transmission, charact. anal. *(Japanese)* 87−40025
general probability density function of packet service times for computer networks 87−27676
generalized packet routing problem 88−14865
genetic algorithms and communication link speed design: constraints and operators 88−21431
German Federal Railways packet switching integrated text and data network *(German)* 88−73689
GETSCO packet exchange network appls. *(Japanese)* 87−69481
GILT, open interconnection of local message systems in Europe 86−37541
give-up-based protocol for token passing 87−39999
global distributed deadlock detection and resolution with finite buffers 87−27711
grade of service fairness optimisation method for packet switched networks *(Japanese)* 88−21369
group testing protocol with capture for random access communication 88−8908
guided wave optics, use in high speed wide bandwidth digital switching and communications 87−20577
H-network, CSMA/CD with adaptive and nonadaptive backoff protocols, throughput and packet delay anal. 88−15087
H-network, performance evaluation through simulation 86−43599
HDLC, specification and validation using composite state diagram and logical expressions 88−52604
HDLC custom chip for 5ESS switch 88−67190
HDLC protocol, specification and validation method *(Japanese)* 87−7891
HDTV picture transmission compatible withD2-MAC/packet format *(French)* 86−55403
helical window token ring LAN, access rule 88−41379
heterogeneous system, buffer management schemes 85−36473
HF data message and facsimile terminal system 88−46900
HF packet network, automated robust system simulation 88−21929
Hi-Net X-25 PSS communications gateway from Digital Microsystems Ltd. 86−64633
hidden-user packet radio systems, approx. output processes 86−69211
hierarchical and nonhierarchical packet switched data networks, comparison 87−13420
hierarchical packet switched local subscriber loop for broadband ISDN 88−28563
hierarchical packet switching network, mutual overflow routing algorithm, performance eval. *(Japanese)* 87−55389
hierarchical routing in large networks, new approach 88−21506
high capacity asynchronous random access usingtime-of-arrival based collision resolution 86−54623
high capacity multiple microprocessor X.25 packet switching node 85−36768
high definition MAC, compatible route to HDTV 88−29033
high speed packet switching protocol 88−46359
high-level protocols for packet radio 86−69570
high-speed packet switching system development 88−21855
high-speed packet switching systems for multimedia communications 88−15198
high-speed slotted ring, improved traffic scheduling 87−62622
high-throughput packet switch with fullydistributed switching 85−52207
highly modularized packet switching mode, performance modelling 87−48301
history and future trends 87−48332
hop-by-hop flow control on unreliable connections 88−8911
HR^4-NET hierarchical random-routing and reconfigurable network for metropolitan area 87−55783
Hubnet, high-speed LAN using optical fibre links 85−25882
HUBNET high-performance LAN, reliability and protocol 86−43575
Hungarian PTT and database access *(Hungarian)* 88−14964
Hungarian PTT packet switching exchange *(Hungarian)* 87−28310
Hungarian PTT public data networks 86−64497
hybrid access method in a multiple access channel 86−64665
hybrid ARQ coding formats, performance over binary symmetric channel 88−34589
hybrid circuit/packet switching network, distributed routing algorithm 88−52648
hybrid concept, packet-satellite networks 88−15392
hybrid contention-based TDMA technique for data transmissions 87−40416
hybrid data communication networks, perform. eval. and design 88−46358
hybrid packet and circuit computer communication network, optimal routing 85−8194
hybrid packet-/cct.-switched computer network, traffic distribution method 85−25534
hybrid routing algorithm for computer networks 87−28027
hybrid switch architecture using hierarchical memory structure, study 87−3021
HYMAP, hybrid multiple-access protocol for data and voice-packet over local area networks 85−30496
IBCN, service, network, economic changes 88−3343

LAN register-insertion ring study 87−55440
LAN speech packet size optimization 88−28448
LAN speech transmission *(German)* 87−27789
LAN/WAN transport relay implementation 88−73649
land cellular systems, data transmission using TDMA approach 88−67276
land mobile radio, idle-signal casting multiple access with collision detection (ICMA-CD) scheme 87−76580
land-based packet network, satellite links integration 86−23832
LANs, bus type for integrated communications, demand assignment schemes with adaptive reservation, anal. *(Japanese)* 88−59687
LANs, integrated voice and data, transmission and flow control protocols 86−69209
LANs, isolated and interconnected token-bus types, performance evaluation 85−13914
LANs, protocols for large data transfers 86−23509
LANs, protocols for real-time voice communications 87−27715
LANs, review of the various types 88−9142
LANs and WANs, development and appl. of packet switching technology *(Japanese)* 87−40381
LEC packet networks, interconnection 87−13419
LINEA UT, reliability and maintainability in switching network 88−52629
livelock-free algorithm for packet switching 85−19547
load distrib. in packet switched networks 88−9169
load scheduling schemes using inter-PE network *(Japanese)* 86−49301
local area data transport, integrated voice and packet data service 85−13710
Local Area Data Transport (LADT), testing of a packet data transport network 85−19853
local area data transport communication service, characteris. 85−25538
Local Area Data Transport service, overview 85−2964
local area packet communications system, design concepts *(Japanese)* 86−49265
local area rings, short-packet transfer performance 85−8221
local distributed deadlock detection with finite buffers 86−55011
local information system connection to packet switched network *(Italian)* 85−30733
local network model with random multiple access 87−69623
local packet switched network, implementation 85−51935
logical channel allocation scheme allowing for logicalchannel reservation 85−57783
London University data network for user needs 86−10624
lookaside input buffer for packet switched data communication networks 86−16683
loop networks fairness, optimum capacity-flow assignment 86−23504
loop networks fairness, optimum capacity-flow assignment problems 86−69206
low altitude multiple satellite system, packet-switched, crosslink communication architectures 87−34494
Low Cost Packet Radio characteristics 85−42433
low-cost packet radio, implementation for network development 87−34443
MAC packet broadcasting, data multiplex managing 87−13832
MAC signals, glass-fibre transmission *(German)* 88−35697
MAC-packet TV signals, integrated decoder 87−34807

packet switching continued
MAC/packet family, automatic meas. methods 87−76933
MAC/packet family, overview 87−76931
maintaining distributed networks 88−73556
MAN gateways, traffic scheduling technique 88−21624
MAN trials in OTC., data collection and analysis 88−52978
management service of packet switching processors 86−64721
Manhattan Street Network, routing 87−48599
MAP and INTERFACE multiple access algorithm forhierarchical computer network delay table transfer 86−16610
Markovian access control protocols, static and dynamic, state space analysis 85−57573
Markovian access to collision channels 88−21047
MASPnet, multiple access type satellite packet network, architecture and protocols *(Japanese)* 87−28486
MASPnet satellite network control processor *(Japanese)* 88−15425
Maxemchuk's integrated voice/data LAN protocol, throughput anal. 88−35241
maximal throughput in a tandem multi-hop radionetwork 86−54607
Medical Data Transmission Center packet exchange network appls. *(Japanese)* 87−69482
medical lab. installation of packet-switched network 87−2861
megabit packet radio system 86−55230
MELCOM computer series packet network support system for WAN and LAN appl. *(Japanese)* 86−37496
MELNET: hierarchical hybrid local area network 87−20000
MELPAX 1000 packet multiplexer, development, fns. and implementation *(Japanese)* 88−46796
memory ARQ scheme with soft decision detectors, performance anal. 87−2675
mesh networks, sharp models of adaptive routing 87−34177
mesh type distributed packet switching systems 85−36765
message delays in prioritized packet switching systems 86−54632
message delays with prioritized HOLP and round-robin packet servicing 87−62400
message packetization and synchronisation, Poisson inputs, finite queue behaviour 85−19554
message switching network with backup channels 88−41123
message-switched network with local and global window flow control, perform. anal. 88−52932
meteor burst channel data collection system with unattended sensors, features and protocols *(Japanese)* 85−63263
metropolitan area packet switched data network for videotex service, perform. sampling method 85−19755
MEUNET, high performance, high availability packet switch 85−19977
MEUNET packet switch for industrial communications, fault detection and recovery 85−19866
microprocessor based packet-switching radio system for electric utility 88−53120
microprocessor bugs packet transmission, CMOS hardware 85−57842
microprocessor communication network, switching functions/concept *(Spanish)* 85−13886
MIDAS, Australia's international packet switched service 86−37525
MIL-STD-1777, Military standard-internet protocol 87−19998
MILPACS tactical communication network development 88−21517
minimal spanning trees for packet-switching networks, distributed algorithm for construction 87−40368
minimum cost communication network design withreliability and congestion constraints 86−37204
minimum cost maximum flow routing technique in computer networks under reliability constraints 85−19565
missing speech packets, reconstruction by waveform substitution 87−47570
missing speech segments recovery in packet voice communication, waveform substitution techniques 87−19453
mixed renewal and Poisson input queueing model, anal. 87−7890
MNA-P computer network architecture *(Japanese)* 88−46567
mobile computer communications packet radio network, protocol performance eval. 85−3155
mobile data network for Oslo area 86−37794
mobile packet radio channels, performance degradation due to hidden terminal problem in carrier sense multiple access 85−14203
mobile packet radio networks, concurrent slot assignment protocol 88−73833
mobile packet radio networks, state-of-the-art 85−42481
mobile packet radio system, computer simulation 88−35389
mobile packet-switched radio network for defence communications *(Norwegian)* 88−41552
mobile radio channel appl. 87−7871
mobile radio channels, demand time assigned speech interpolation (D-TASI) access strategies 86−69677
mobile radio channels, packetised data communication system, perform. anal. 88−73412
mobile radio communications *(Japanese)* 86−69646
mobile radio networks, cluster head set problem 86−17267
mobile radio networks with frequency hopping signalling, design concept using multiple access techniques 87−34445
mobile radio slotted ALOHA networks anal., Markov model 85−3369
mobile satellite communications, fading channels, coding and delay-throughput anal. 87−34513
mobile systems, local ALOHA radio communications with capture andpacket buffers 86−55225
modeling of integrated packet-switched voice and datanetworks 86−54609
modem for packet radio, computer as radio transmitter *(German)* 88−35375
modular testing system for packet switch networks 86−37202
movable boundary scheme eval. in circuit and packet switched networks 87−48354
movable boundary scheme evaluation in circuit and packet switched networks *(Japanese)* 86−23206
movable-slot TDM protocol, simulation studies 88−3632
moving-server random-access protocols, delay modelling, book contrib. 87−19993
multi-access broadcast channel decentralised access strategy, decomposition 87−55419
multi-access channel transmission control scheme, infinite source model and ternary feedback 88−8893
multi-access communication channel, packet delay under golden ratio weighted TDM policy 87−55374
multi-access computer networks, design aspects 85−30681

packet switching continued
multi-access packet broadcast channels with acknowledgement feedback, distributed control, stability 85−57572
multi-access packet broadcast systems under limited buffer conditions, protocol performance study 86−59391
multi-access single channel, perform. eval. of interval-searching conflict resolution algorithms 87−54797
multi-access systems, erasure, capture and random power level selection 87−62415
multi-destination flow banyan networks−modelling and performance analysis 87−33869
multi-hop packet radio networks, performance evaluation 87−40050
multi-hop spread spectrum network modeling 87−40046
multi-link packet transmission system with random allocation, resequencing characts. anal. using queue model *(Japanese)* 85−19563
multi-link packet transmission systems, allocation algorithms, performance evaluation *(Japanese)* 86−23205
multi-link packet transmission systems with heterogeneous servers, performance eval. *(Japanese)* 87−33837
multi-link systems employing single queue scheme, analysis *(Japanese)* 86−64375
multi-media packet switching system with packet burst generation, traffic characts. *(Japanese)* 87−55387
multi-node queueing system, delay characts. anal. *(Japanese)* 88−73406
multi-packet transmission, continuous-service type, characts. anal. *(Japanese)* 88−8900
multi-packet transmission on erroneous channel, characts. study *(Japanese)* 87−27693
multi-server non-preemptive priority queue with batch Poisson inputs, diffusion approx. *(Japanese)* 88−46332
multi-service network connection control protocols 87−76021
multi-service networks 86−30162
multi-station packet-radio network 88−41139
multi-station packet-radio network, splitting-type algorithm 87−40706
multi-user random access communication networks, output process approximation 88−52651
multiaccess channel, maximisation of one-step throughput 87−75975
multiaccess scheme for the maximization forone-step throughput 86−49071
multibeam packet satellite networks, uplink ALOHA random-access/downlink TDMA techniques, performance study 85−13668
multibeam packet satellite systems with conflict free scheduling 87−20442
multibeam packet satellite systems with freq. reuse, optimal TDMA assignments, anal. 87−28498
multibeam satellite, combined random/reservation access for packet-switched transmission with onboard processing 85−14165
multicast and broadcast services in a knockout packet switch 88−52636
multicast broadband packet switch architecture 88−52633
multicast communication facilities in a high speed packet switching network 87−48435
multicast packet switching, nonblocking copy networks 88−59394
multicast services on high-speed interconnected LANs 88−21736
multicast transport protocol design 88−67077
multichannel CSMA-CD protocols, acknowledgement traffic effect 86−10828
multichannel multihop packet radio networks, architectures and performance 87−75970
multichannel multihop packet radio networks, performance 87−28380
multichannel protocols for real-time microcomputernetworks 87−2900
multicluster data-voice integrated network with dedicated channels, design 86−64445
multihop, mobile, packet radio networks, distributed broadcasting transmission schedules 88−52663
multihop mobile packet radio network routing protocols 86−54606
multihop packet radio, transmitter-oriented code 88−21949
multihop packet radio communication network with transmission error, statistical analysis 86−43732
multihop packet radio network, 3D CSMA/BT-CD 86−10607
multihop packet radio network, routing strategies, performance anal. 85−42435
multihop packet radio network, use of multitone, multiaccess with collision detection 87−27724
multihop packet radio network using random access techniques, optimal design parameters 87−28408
multihop packet radio networks; asymptotic anal. 87−13564
multihop packet radio networks, channel access schemes, performance evaluation by simulation 87−28360
multihop packet radio networks, channel signalling and access protocols, performance anal. 87−34449
multihop packet radio networks, channel spatial reuse and access protocols 87−33833
multihop packet radio networks, iterative model 86−64750
multihop packet radio networks, local Markov models, CDMA appl. 87−28381
multihop packet radio networks, routing strategies 86−17218
multihop packet radio networks, routing table update activity anal. 87−48914
multihop packet radio networks, throughput anal. theory 85−13680
multihop packet radio networks, throughput evaluation 85−8317
multihop packet radio networks with capture, performance anal. 86−23682
multihop packet-radio networks, fail-safe routing algorithm 86−55178
multihop radio computer networks, transit traffic distrib., influence of routing 88−46615
multihop radio network using random access, optimal design parameters 85−42436
multihop radio networks, critical connectivity phenomena 87−34463
multihop random access radio network with spread spectrum signals 87−48915
multilink packet transmission system with random allocation, anal. 86−69202
multimedia global VAN by JAPAN ENS *(Japanese)* 88−41187
multimedia information network, high-speed packet-switching architecture 87−34187
multimedia messaging system based on CCITT X.400 series recommendations 86−54746
multimedia packet switched network, architectural and functional aspects 87−76143
multimedia packet switching network access protocol 86−16625
multinational packet switching networks, field performance meas. comparison 88−46611
multipacket Aloha, decentralized control algorithm 88−34878

packet switching continued
multipacket transmission, traffic anal. 86−30095
multipacket transmission in erroneous channel, characts. considerations 88−59357
multipath environments, wide-band packet radio 88−53181
multipath packet switching networks, connection principles 85−19873
multiple access broadcast communication channel, terminal-priority contentionless access (TPCA) protocol perform. anal. 85−42032
multiple access channel, hybrid access method 86−54622
multiple access network decentralised control 87−55411
multiple access protocol, performance and stability of simple gated conflict resolution algorithm 87−62401
multiple access protocols, performance analysis, book 87−2929
multiple access system with stack algorithm, packet delays 85−51833
multiple radio channels, radom access system without retransmission discrimination discipline using packet switching 86−30096
multiple satellite system, low-altitude survivable 88−22047
multiple token ring networks, design and anal. 88−59697
multiple-access channel with ternary feedback, conflict multiplicity estimation and batch resolution algorithms 88−46326
multiple-access communication networks, ALOHA-type, erasure, capture and noise errors 87−55413
multiple-access systems, erasure, capture and random power level selections 88−41130
multiple-access systems, erasure, capture and random power selection 87−55398
multiplexers, all-packet integrated voice/data types 88−21858
multiplexing, packet-speech 88−14854
multipole access protocol, behaviour, countable Markov chain theory appl. 85−51838
multiprocessor-based packet switch in networks with link-level sliding-window flow control 88−3293
multiprocessor-based packet switches, modelling and perform. eval. 88−59376
multiqueue cyclic service system with feedback, anal. and appls. 87−40364
multiring LAN, throughput and reliability improvement 86−59680
multiservice integrated communication system using satellite link, demand assignment signalling system *(Japanese)* 86−37836
multiservice integrated networks, capacity allocation 88−41222
multiservices local network, message delay characts. for buffer insertion rings 85−51902
multistage cube type interconnection networks, performance comparison 88−59723
multistage fast packet switches, multipath routing techniques 88−59393
multistage networks, N log N, packet switching 85−42282
multistage networks, non-congestion self-routeing control algorithm *(Japanese)* 87−48285
multistage nonrectangular interconnection networks, performance 86−59402
multistage voice-data switch, design and anal. 88−46804
multistation packet-radio networks, slotted ALOHA as access scheme to shared channel 85−13678
MUMPS networking, evolution 88−73610
narrowband packet radio, distributed approach, system design 87−8208
nationwide data distribution using broadcasting technology 87−49238
NCR protocol convertor for connection to Datex P *(German)* 87−13399
NEFAX-711 facsimile transceiver for packet switched digital network *(Japanese)* 86−4223

networks, traffic engineering, performance anal. 86−54638
networks, worldwide access to corporate datafiles 88−28402
networks in USA, reemergence in market 86−64628
networks role in future telecommunications network 86−37304
networks under end-to-end packet transit delay constraints, optimisation method *(Japanese)* 87−48282
new digital PBX system for integrated office services, ISDN compatible 88−3730
Nippon Sheet Glass Co. Ltd. packet exchange network appls. *(Japanese)* 87−69483
Nippon Steel Corp. packet exchange network appls. *(Japanese)* 87−69477
NIT high-throughput packet switching system, hardware design 87−33938
node based on LAN principles 86−10590
node characts. estimation for two flow control algorithms 88−28146
NOM, software tool for optimal design and perform. eval. of routing strategies 88−59390
non-preemptive $\Sigma M_i/G/1(\Sigma N_i)$ system, priority packet switching transmission, characts. and approx. methods *(Japanese)* 88−21395
non-preemptive $\Sigma M_i/G/1(\Sigma N_i)$ system, priority packet transmission for ISDN, anal. *(Japanese)* 88−21394
nonhierarchical integrated circuit-switched and packet-switched networks, circuit-switched routing, packet performance 87−40010
nonhierarchical packet networks routeing issues, design 88−21400
nonlinear multicommodity flow problem 87−40000
nonlinear multicommodity flow problem in packet switching network *(Japanese)* 86−23201
nonpersistent carrier-sense multiple-access mobile packet radio protocols 87−48310
nonslotted random access radio channel with higher utilisation 87−34372
Nordic VLSI chip set for the C/D/D2-mac/packet receivers 88−29055
Northern Telecom DPN Access Module, network access integration 87−48830
Northern Telecom DPN Data Networking System, architecture 87−48829
Northern Telecom DPN-100, system architecture for DPN packet switches 88−67189
Northern Telecom SL-10 packet switching system, evolution 87−55914
Norwegian digital telephone system's packet switched data network *(Norwegian)* 85−36593
Norwegian power system communication system for control centres 87−71592
NPCSMA scheme, optimal packet size in mobile fading channels 87−55450
NTT's digital switching systems toward ISDN 88−21880
NTT D51 high-throughput packet switching system 87−33937
NTT high-throughput packet switching system, software design 87−33939
NTT Network System for ISDN 88−15205
one-way simultaneous transmission of large information files, performance indices of data channel 87−69404
open networking in a closed environment 86−64402
operating system mechanisms for multi-media applications 88−59711
operations data networking, network element functions and OSI protocol architectures 88−3404
optical fibre LAN using data packet transfer transmission 88−46627
optical fibre LANs with arbitrary topology, data/voice integration 85−19784
optical fibre loop network at 100 Mb/s for on-premises use 85−42280
optical gigbit packet communication networks 88−47071
optical LANs, MELNET series, high- and medium speed ring configs. *(Japanese)* 86−54900
optically activated optical switching 88−67422
optimal adaptive routing algorithm 86−16997
optimal adaptive routing algorithm 87−2672
optimal adaptive scheme for two competing queues with constraints 86−64397
optimal analysis and design of a packet switchingnetwork 86−37203
optimal congestion control in single destinationnetworks 85−63134
optimal multiplexing of heterogeneous traffic with hardconstraint 86−64381
optimal routing algorithms for packet-switched networks 86−10591
optimal routing and flow control of a network ofparallel processors with individual buffers 86−64392
optimal scheduling of interactive and noninteractive traffic in telecommunication systems 88−34848
optimal scheduling policies for a class of queues with customer deadlines to the beginning of service 87−55399
optimal window size choice 86−30348
optimum pocket size calculation in computer network 86−43515
optimum time-hopping patterns 88−41134
optoelectronic data packet routing cct., monolithic implementation 87−20494
origins of 86−64693
OSI, layers 3, 4 and 5, IBM support products, OSNS and OTSS 86−55031
OSI communication controller for heterogeneous computersystems 86−64740
OSI for public networks, BT's plans for implementation 86−16626
OSI protocols, BSC terminals for X.25 networks 85−36754
OSI seven-layer model for ISDN 88−3513
p_i-persistent protocol for unidirectional broadcast bus networks 88−289
p-persistent CSMA/CD, dynamic behaviour using cusp catastrophe 87−69406
PABX, office communication solution 88−59911
PABXs in ISDN/packet communications integration 85−3312
Pac-Comm micro power terminal node controller for packet radio 88−67217
Pac-Comm TNC-200 terminal node controller for amateur packet radio 88−28635
packet buffering and protocol performance 86−69243
packet length and window size selection 86−37178

packet switching continued
packet mode network anal., global simulation 86−64513
packet network technology standardization 87−28128
packet radio, binary frame synchronisation sequences 88−67230
packet radio, data communications system for military, design 85−63386
packet radio, Tucson Terminal Node Controller features 86−23751
packet size determination using probability method 86−49173
packet speech communication link, simulation study 86−30273
packet switching computer network, dynamic evaluation of error level in data link 88−66773
packet switching interconnection networks for multiprocessor systems, perform. eval. 88−66800
packet switching networks, node efficiency evaluation *(German)* 86−30367
packet-based data collection system, analysis of tandem network of queues 85−13667
packet-switched speech interpolation advantages 85−63152
packet-voice performance evaluation of two multiple access protocols with the use of an 8086-based real-time simulator 85−19849
packet/circuit switch internetworking protocol 85−19785
packetised voice and data traffic and related statistical multiplexer, Markov modulated characterisation 87−12869
PACKSATNET packet satellite network in Indonesia *(Japanese)* 86−43776
PACKSIM, personal computer implementation of packet switched network simulation model 87−40461
PACNET development, new versatile data communication service 86−59685
PAD features 85−3171
PADs, W. European market survey 86−23586
parallel communication with limited buffers 85−36496
parallel processing system for communication control *(Japanese)* 85−25278
PARIS: voice/data packet switched network 88−3395
passive star topology LAN, high-speed optical fibre based, protocols used 88−28380
path allocation access control in fiber optic communication systems 88−53309
path-oriented routing strategy for packet switchingnetworks with end-to-end protocols 86−23518
PBXs for voice/data integration, comparison 88−59905
PCM packet voice networks, waveform substitution effect on quality 88−34599
PDAMA satellite access protocol, performance evaluation 86−59870
performance analysis of interconnected CSMA/CD networks with finite population 88−52948
Performance analysis of multi-buffered packet-switching networks in multiprocessor systems 88−73417
performance analysis of packet broadcast network with priority-free capture schemes 86−64404
performance of fault tolerant packet switching networks, modelling 87−20255
performance of integrated services (voice/data) CSMA/CDnetworks 86−10648
performance parameters for a packet switched network 86−49067
periodic contention, model of packet switch 88−52640
personal computer communications using packet protocols: powerful communications system for personal computers 87−55677
personal computer radio links 85−36928
PHILAN, a local-area network based on a fibre-optic ring and TDM operation 87−28599
Philan, LAN for reliable message service 88−21739
PHILAN fibre-optic ring for integrated traffic 86−54921
photonic knockout switch for high-speed packet networks 88−47124
picture coding for variable rate transmission, VLSI implementation 87−69349
picture transfers, amateur packet radio 88−59994
point of scale support 86−54732
point to point packet network, round robin scheduling for fair flow control 87−55403
Poisson conflict resolution with feedback based onconflict intensity 86−64390
poisson contention resolution problem with feedback based on conflict intensity 88−45803
Poisson multiple-access contention with binary feedback 85−19550
Poisson packet traffic accessing single-slotted channel, 0.487 throughput limited sensing algorithm 87−48270
polled and packet-switched performance comparison using ANSI standard techniques 86−54625
polling backbone for metropolitan and packet-radio networks, random-access reservation 88−9401
power control at Tokyo Electric Power Co. Inc. using packet switching network system *(Japanese)* 87−64084
power-supply information packet transmission equipment for KANSAI Electric Power Co. Inc. *(Japanese)* 87−62632
PPSN anal. program, training and maintenance procedures 87−36379
preemptive information insertion mechanism for combining synchronous data with asynchronous data 87−2671
preemptive packet transfer scheme with virtual cells in a long packet 88−41125
preemptive packet transfer scheme with virtual cells in a long packet *(Japanese)* 87−19991
prioritised multiplexing systems, perform. boundaries 87−55373
priority acknowledgement schemes for 1-persistent CSMA-CD systems 88−3300
priority exhaustive-service-type multi-packet transmission, anal. *(Japanese)* 86−16607
priority exhaustive-service-type multipacket transmission 87−48257
priority queueing analysis of packet switching networks 85−30511
priority queues with synchronous service, packet switching system appl. *(Japanese)* 88−21388
priority scheduling algorithm for packet-switched system with two-priority classes 88−41127
priority-based processor sharing, anal. of system 86−10593
priority-oriented packet voice system, performance anal. 87−62513
private data network market, user benefits 87−40407
private data networks, transmission service alternatives 87−55753
private intracompany communication network system from NEC *(Japanese)* 87−7926
private networks with added benefits 88−66861
private packet mode ISDN and a PSDN, internetworking 88−59808
private packet networks, delay modelling 88−41295

packet switching continued
private packet networks, performance 87−55452
private packet switched networks, anal. and design system 87−40182
private packet switching approach used in globalwide-area network 85−63438
private packet switching network response times 88−66977
private packet-switching networks 86−10662
private voice/data network, economising 86−23275
private wide-area packet switching networks 85−57801
private X.25 data networks, control and accounting of user access to PDN 88−52639
private/public packet switched data networks interworking 85−13754
program system, medium capacity *(Japanese)* 88−35284
protocol convertor for Sperry Univac 1100/80 mainframe 85−25605
protocol for transparent interconnection of broadcast networks 87−20264
protocol implementation in Ada, ADAX X.25 88−9186
protocol translation for packet network interconnection 85−19770
protocol with adaptation of frame length, aggregate model 86−10589
protocols, performance parameters 87−20001
protocols for packet switching networks, automatic construction 85−46974
PSTN auto-dial backup contingency for packet switched networks for Barclays Bank 88−46483
PTARMIGAN packet switched network for tactical C^2 communications 85−63387
PTARMIGAN packet switching network, development proving 85−63388
public and private networks, VENUS-P service appl. 88−3756
public circuit switched data communications network in Sweden, implementation and operation experiences 86−37520
public circuit-switched data network in higher level appls. 86−37540
public data network, access 85−7972
public domain packet radio networks 86−55196
public networks, performance testing 87−28055
public packet switched network, anal. program 87−40583
public packet switched network, appl. of field anal. program 87−40584
public packet switched network access, service provisioning 88−9300
public packet switched network anal. tools, design and capability 87−40283
public packet switched network test system, architectural design 87−40162
public packet switched networks deployment, practical problems 87−40163
public packet switching networks, experience and requirements, Siemens/Databit approach 86−16989
public packet-switched network, design technique with service grade fairness criterion *(Japanese)* 87−69420
public packet-switched networks, computer-aided planning 86−23257
public switched data services 85−30532
public/private network packet switching 86−59384
PulseLink, intraLATA packet switching service experience and evolution 85−47235
PulseLink packet network deployment 87−28166
QPSX packet access protocol, distributed queueing 87−48827
QPSX packet switching capacity 88−46832
QPSX queue packet and synchronous circuit exchange, development 87−48826
quasi-M/D/1 cut-through switching network, window flow control acknowledgment schemes 88−66786
quasistatic routing algorithm with quadratic convergence 88−3322
Queensland remote educational programme delivery, satellite trial 87−51788
query scheduling is common channel signalling network 88−52657
queueing analysis of a packet voice communicationsystem 86−16628
queueing model for networks with nodal blocking 85−42008
queueing network, overtaking 85−2977
Rabobank Terminal Network, data communication infrastruct., OSI architecture, protocols and services 87−55744
race resolution in TDM any-to-any path connections in a space division switch 87−34263
RACINE data transmission network using packet switching method, RATP appls. *(French)* 88−34940
radio, digital networks and library automation 88−35197
radio, forwarding schemes in a single-hop multi-stationpacket-radio network 86−30607
radio and satellite networks, protocols and appls. 85−14096
radio bulletin board operation and amateur prospects 87−48852
radio channels, adaptive link level protocol 86−59397
radio channels, multiple access protocols collision detection technique 88−3822
radio channels with packet shadowing, enhanced throughput 88−67251
radio communication appl. 87−55957
radio communication at 1200 Baud 86−69567
radio CSMA/CD LAN packet selective macroscopic diversity based on bus contention 88−67249
radio network, good neighbours characteristics 85−42437
radio network, single-hop multi-station, anal. 85−8318
radio network, survivable protocols approach 85−42432
radio network, synchronisation 87−13579
radio network architectures and protocols 87−34446
radio network for library automation 88−21932
radio network in urban environment, information flow characterisation 87−55969
radio network performance, layer protocols 87−48708
radio network protocols 86−16629
radio network routing algorithm, survey 85−13664
radio networks, anal. of routing strategies 86−17217
radio networks, canonical approx. of performance anal., book contrib. 87−19994
radio networks, carrier sense multiple access with busy tone and collision detection 85−8319
radio networks, design issues and management aspects 87−34442
radio networks, double-tier access-control schemes using polling backbone 88−21477
radio networks, dynamic ground, hierarchical routing 85−63586
radio networks, hidden terminal performance in two interfering channels 86−17215
radio networks, logical neighborhood size 88−3819
radio networks, multi-hop packet-switched, knowledge-based routing 88−21942
radio networks, performance anal., canonical approx. 86−55177
radio networks, received-initiated busy tone multiple access 88−59964
radio networks, technology 87−55974
radio networks protocols, performance comparison 86−30594

packet switching continued
radio networks using ALOHA random multiple-access system, packet transmission 86−23668
radio networks using code division multiple access, supernodes 86−30592
radio networks using spread spectrum signalling, multi-access capability and protocols 87−34448
radio packet switching for industrial automation systems 87−69901
radio system, primer 86−69566
radio system for data transmission, leased lines replacement 86−69619
radio systems, conf., London, England (Oct. 1986) 87−5152
radio systems, introduction 88−59968
radio technology, future directions 86−16630
radio terminal node controller and HF modem 87−48907
random access algorithm, full feedback-sensing window 88−52652
random access algorithms, finite and infinite population models relationship 88−14857
random access broadcast channels with unknown arrival rates, decentralised control 86−16102
random access channels with bandwidth and energy overhead, collision resolution protocols 85−42033
random access communication, group testing protocol 87−75980
random access for a multibeam satellite with dynamic transponder switching 88−52660
random access interconnected channels, stability region 87−55405
random access multibeam packet satellite with bufferand arbitrary transition overhead 85−63605
random access multibeam packet satellite with buffer and arbitrary transition overhead 85−30999
random access packet switched systems, with intelligent central node, performance comparison 87−48305
random access protocol based on tree conflict resolution algorithms, delay anal. 86−54620
random access spread spectrum networks, slotted ALOHA type approximation methods 88−52653
random access system, channel throughput variations for geometrically distributed packet lengths *(Polish)* 85−57173
random access system, optimisation by biased source blocking 86−4081
random access systems with intelligent central node, performance anal. 88−9391
random multiple access stack algorithm for local networks, characts. 88−73403
random multiple access system with impatient packets 86−4082
random multiple access system with unmodified treelike algorithm, upper bound on packet delay 87−40020
random multiple-access channel with unknown interference probabilities, adaptive algorithm 87−55423
random multiple-access communications, stack algorithm anal. 85−51828
random-access communication system, nonhomogeneous user population 88−40772
random-multiple-access prediction protocols in packetradio networks 86−30072
randomized parallel communications 87−20002
Rayleigh fading local radio channels, ALOHA with capture 88−46885
Rayleigh-fading channels, slotted ALOHA capacity 87−34349
real time data transmission network for the control of the French power system 87−71593
real-time conversion facility for interworking betweentelex and teletex services 85−51969
real-time video packet switching, queueing analysis 88−46330
reassembly delay in packet switching networks 88−59352
reconfigurable tactical communication networks, testbed design 87−40222
record and packet communication, integration 86−10664
reference models for a fast packet based network 87−20183
regional node routing 88−46356
registered public data networks, 1986 survey *(Czech)* 87−13249
regression testing automation 88−46830
reliability allocation methodology for large-scalecommunication networks 87−8063
reliability and availability in packet switching networks 88−52628
reliability evaluation of packet switching systemswhich share stand-by equipment *(Japanese)* 86−69541
reliable broadcast protocols in unreliable networks 87−27687
rendezvous type protocols without acknowledged packets 88−52952
reordering in packet switched network, anal. *(Japanese)* 88−21391
reservation multiple access, tree algorithm 86−16612
reservation multiple access scheme for packet switched satellite communication *(Japanese)* 86−64376
residential CATV systems, high-speed packet switching network 86−11286
response times anal. and optimal resources allocation in message and packet switched networks 87−75956
retransmission schemes for CSMA/CD networks 86−16621
RF based packet switched networks for packet radio 85−36497
ring data transmission, structure optimization 87−28029
ring data transmission system, high speed, of LAN, control method and device for multiple access 87−27672
ring LAN, traffic meas. model using packet trains 87−13388
ring networks supporting packet voice service, performance eval. 88−59353
ring struct. local networks, voice/data multiplexing, switching strategies and capacity 87−2683
ring-division multiplexing, potential throughput increase in ring networks 88−59342
RMCNET, LAN with multiple connectivity 87−28146
routeing information communication networks, distributed control *(French)* 85−25271
routing, flow control and fairness in computer networks 87−34139
routing algorithms for data networks *(German)* 88−14859
routing algorithms in packet switching networks, comparison by simulation *(German)* 88−3561
routing and flow control algorithms, interactions 86−43359
routing in network with unreliable links 88−52671
routing in packet-switching data networks *(Russian)* 85−7955
routing of messages using source routing in the packet 86−37472
routing strategies for different traffic conditions, comparison 87−55816
routing using internodal coordination 88−52977
routing with packet duplication and elimination in computer networks 88−66794
RSESS network, design, simulation and analysis 87−48275
RTPS, real time packet system, for voice, video and data integration 85−42401
rude-CSMA, multihop channel access protocol 85−63133

packet switching continued
S-ALDHA multi hop networks, throughput and delay 88−41577
sampled optical time-division multiplexing of asynchronous data 88−9534
Saponet-P, South African packet-switching network, service status and trends 88−8977
satellite broadcast channels, SRUC protocol with go-back-N ARQ scheme, perform. anal. 85−42013
satellite broadcasting, distributive demand-assigned packet switching with trailer transmissions 85−25200
satellite channel multiplier, packet technology appl 85−30990
satellite channels, RADYS reservation ALOHA dynamical switching access method *(Japanese)* 87−40803
satellite channels in networks with packet switching 86−37818
satellite channels with ARQ protocol, optimal transmission study 86−30124
satellite communication for aeronautical safety 88−15434
satellite communication of real-time packet videoimages 86−43798
satellite communication reservation protocol, stability and performance anal. 85−3403
satellite communications, channel assignment control based on the traffic load estimation *(Japanese)* 86−49060
satellite earth stations, microprocessor-broadening using packet switching/spread spectrum techniques 85−14175
satellite network, spread spectrum technology for data transmission 86−49558
satellite networks, adaptable multiple access technique for varying traffic intensity *(German)* 85−25198
satellite networks, development 85−30992
satellite packet communication architecture 88−3925
satellite packet communication networks using multiple-access protocols, performance comparison 85−14181
satellite packet communication systems, retransmission strategies 87−55424
satellite packet data networks, expts. at RRL *(Japanese)* 87−48621
satellite packet-switched computer network, adaptive routing protocol for mobile earth stations 85−14141
satellite systems with low duty factor terminals, two-level multiaccess schemes 85−63606
satellite transmission networks, stochastic flow systems and equilibrium point anal. *(Japanese)* 85−3409
satellite-switched packet data networks, performance objectives 85−51930
SAW convolvers, appl. to spread-spectrum transmission of packet voice 86−10962
SAW convolvers and signal processing in a packet radio data links 87−6969
scheduled bus: an efficient protocol for mixing voice-data local communications 87−13188
scheduling algorithm in Bell Labs Network, simulation 88−3619
scheduling in flow control for data communication networks 87−40487
SDLC high-speed link, voice/data multiplexing in multi-signal processor synchronised architecture 86−30078
secure and inexpensive PC to PC packet communications 86−54923
secure packet voice integration in generic packet switched network, system level architecture 86−54612
secure packet voice integration in generic packet switched network, protocol architecture 86−54613
security policy modeling for the next-generation packet switch 88−52984
segmentation algorithm for Air Force packet-DAMA 86−30110
segmented ring LAN, simulation model using Basic Block Protocol *(Czech)* 87−40328
selective load redistribution in packet-switched networks 88−52656
selective repeat ARQ receiver, queueing analysis 87−55443
self-routeing packet-switched network with mutual control, design and topology *(Japanese)* 87−69421
serial bus system for digital control, design factors *(German)* 85−42264
service independent broadband network based on the asynchronous time division concept 87−33940
service independent network with distributed control, performance 88−14921
service integrate internetworking system in Japan 86−37341
service standards for packet-switched networks−an introduction 85−13712
services in 1990's 88−46455
ship-shore packet switched communications 88−21690
short-packet transfer performance in local area ringnetworks 86−23467
shortest path routing algorithms, asymptotic optimality 87−40014
shortest path routing algorithms, distributed loop free 88−52664
shuffle-exchange networks, performance evaluation 86−49070
shuffle-exchange packet-switched networks, switching strategies 85−30498
Siemens and Databit packet-switching exchanges for US market 86−10920
Siemens packet switching systems appls. in public data networks 87−69524
Sigma network, development, management, and features 88−66959
signal processing for narrowband packet radio 87−8209
signalling in digital telecommunication networks *(German)* 85−57883
SIMD two-dimensional FFT array processor 85−20559
simplex repeaters, operation 86−59759
simplified protocol for message transfer between exchange systems *(Japanese)* 88−41324
simulation model for a class of contention-based multiple access, multihop packet radio networks 87−40051
simulation program 86−37205
simulation study of different routing rules *(German)* 86−16599
simulation study of network delay for packetized voice 87−40175
single-server message queue with 2 message priorities, optimal low-priority queue quantum 88−46369
skew time slot switching and slotted-ring in a metropolitan area network 88−59703
SL-10 packet networks, integrated test centre 86−24342
SL-10 packet switching network, management 86−55117
SL-10 packet switching system, evolution 85−57875
SL-10 RAPID access concentrator, network integration 86−54733
SL-10 use, budgets, gains and benefits 85−57876
sliding window flow control, performance anal. of packet switches 85−63142
slotted ALOHA channel interconnection, throughput and queueing analyses 88−28379
slotted ALOHA dynamic control procedures 87−55410
slotted ALOHA for multihop packet radio networks withmultiple-directional-antenna stations 87−7878
slotted ALOHA multi-access systems, thrashing cusp, catastrophe theory 86−23187
slotted ALOHA multihop packet radio networks, throughput-delay characts. 86−23190
slotted ALOHA packet radio networks, delay anal. 88−3831

packet switching continued
slotted ALOHA protocol, performance in a spread spectrum environment 85−8151
slotted Aloha protocol performance in Rician fading channels 88−53162
slotted ALOHA system, interacting queues, approx. model for delay anal. 87−40004
slotted ALOHA system, multiple access protocols, approx. performance evaluation 86−30117
slotted ALOHA systems, lightly loaded, optimal retry distrib. 85−63132
slotted broadband networks, packet multiplexing scheme 88−59387
slotted loop computer network, performance eval. method *(Japanese)* 87−48631
slotted nonpersistent CSMD-CD systems, acknowledgment traffic anal. *(Japanese)* 86−23203
slotted protocols in multi-segment LAN environment, performance anal. method 86−30121
slotted random access spread spectrum (frequency-hopped) packet radio networks 87−40039
slotted random access spread spectrum networks, analytical framework 86−30595
slotted random access spread-spectrum networks: an analytical framework 87−75968
slotted ring Vs. token ring LAN, comparison of speech packet delay and packet loss 88−21710
slotted ring with distributed frame buffery for voice/data integration 88−53037
slotted-frame packet-switched integrated voice/data network, performance 87−7892
slow-frequency-hop packet radio networks, side information and code rate tradeoffs 88−3814
small packet voice systems, analytical modelling 86−4080
SMARTIX network for new messaging standards 88−73513
SNA and OSI in the same hardware environment 86−59618
SNA data, public packet networks and synchronous microcomputer communication 86−4270
SNA integrating with packet network, merger issues 87−2862
SNA support on X.25 networks: architectural issues 88−46592
SNA/LEN, possible extension of SNA for small systems 85−52047
SOFTNET, high level packet communication 85−47200
software protocol for handling ISDN in the packet-switched network 87−13176
SOPHO-NET for non-voice communications in banking 85−36758
sound signal transmission errors in MAC/packet family 86−59973
South Africa university computer network 85−19782
Southern New England Telephone packet switched service 87−28228
space division packet switch, input vs. output queueing 87−40029
space division packet switching, queueing 88−52641
space-division packet switch, space-division packet switch, input and output queueing 88−21377
spatial TDMA, collision-free multihop channel access protocols 86−4077
spectrum efficient data networking by radio, packet techniques appl. 86−49470
speech communication, queueing delay optimisation 85−46985
speech communication system, slotted-frame, computer simulation models 85−46987
speech communications systems design 85−46986
speech multiplexer with limited delay accurate anal. method 88−45976
speech quality of conversational packetised voice communications 86−43205
speech systems, sound quality degradation and intelligibility, effects of losses and delays 87−47558
speech transmission, packeted, with CSMA/CD protocol *(German)* 85−30747
speech transmission in packet data networks *(German)* 88−15204
speech/data transmission system, microprocessor controlled rationalisation for 3 network levels *(German)* 85−52229
split reservation upon collision, SRUC, protocol for satellite packet communication 87−7885
splitting multiple access algorithms, erasures and noise errors effects 87−40015
spread ALOHA, simulation results on error rate performance 88−66798
spread spectrum, slotted code division multiple access network, performance anal. 85−30886
spread spectrum capture capability networks, collision resolution algorithms 87−40704
spread spectrum packet radio switching appls. 88−21930
spread spectrum packet radio with convolutional codes and Vitterbi decoding, error probabilities 86−30591
spread spectrum packet radio with convolutional codes and Viterbi decoding, error probabilities 87−34352
spread spectrum packet signals, rapid code acquisition schemes 88−53130
spread-spectrum multihop packet radio networks, throughput anal. 86−17216
spread-spectrum packet radio networks, direct-sequence, throughput anal. 88−41514
spread-spectrum packet radio networks, freq. hopped, packet error probability 88−41515
spread-spectrum random-access monohop networks, with adaptive packet protection 88−41517
spread-spectrum signal processing with SAW convolvers 87−55966
spread-spectrum slotted ALOHA satellite packet networks, performance anal. 88−21412
spreading code for distributed spread spectrum packet radio network 85−42434
SS/TDMA systems, scheduling algorithms for SS/TDMA systems improvement 85−31000
stability of adaptive congestion controls in packetnetworks 86−16596
stable slotted ALOHA systems, delay anal. 86−54626
staged circuit switching 85−30497
staged circuit switching and circuit caching, performance analysis 88−3625
stand-alone protocol handler test environment 88−9366
Stanford Packet Radio Network 86−55195
Starlite, wideband digital switch 85−42374
statistical multiplexing for packet video sources, perform. anal. 88−46363
statistical switching architectures for future services 85−51835
statistical switching networks for integrated services 88−28500
statistical switching networks for voice and data communication, performance eval. 87−48436
statistical voice/data multiplexing systems with voice storage, performance anal. 85−63432
stochastic analysis of data, voice and video packet channels 88−3314

image processing, Mukhopadyay's parallel string matching algorithm two-dimens. generalization 86−3993
image processing, scale change versus scale space representation 87−62369
image processing, systolic algorithms for local operations on images 86−27222
image processing, threshold selection, parallel algorithm 87−19906
image processing algorithms *(Japanese)* 87−27576
image processing algorithms implementation, versatile chip set 88−44209
image processing on linear transputer arrays 87−19938
image processing parallel algorithm design 88−46304
image relaxation operations, pipelined architecture implementation, NMOS SIMD chip 88−25246

parallel algorithms continued
image restoration algorithm; iterative, VLSI implementation 87−27667
image segmentation, parallel algorithm based on Gibbs field model 86−59350
image segmentation, parallel associative algorithms using NR-graphs 87−47932
image synthesis using ray-casting technique, algorithms and parallel processing architecture *(French)* 86−16492
image template matching parallel algorithms on hypercube SIMD computers 88−14771
image thinning and vectorisation on PASM 86−4027
implementation of Strassen algorithm 87−31630
intersecting and incomplete boundaries segmentation, noniterative parallel algorithm 88−66670
inverse matrix techniques for solving BVP on parallel processors, explicit semi-direct method 87−44243
iterative array multiplication 87−628
iterative methods scheduling on multiprocessor systems 88−329
Jacobi method for diagonalizing symmetric matrix 88−338
Jacobi SVD algorithms, parallel, equivalence and convergence 88−40927
k-dimensional grid computation communication-time tradeoffs *(Japanese)* 86−30386
Kalman filters, parallel algorithms and architectures 88−38640
Kalman filters parallel algorithm structures, implementation 86−1298
Karhunen-Loeve transform for systolic array mappings 86−27255
Landsat data multiresolution spatially constrained clustering algorithm 85−38333
large nonlinear programming problem solving on vector processing computer 88−63185
large-scale network problems, multi-step diakoptics and parallel computation method *(Japanese)* 87−44480
large-scale sparse matrix, LU decomposition, parallel processor 86−57297
least squares estimation and Kalman filtering by systolic arrays 87−39854
least-squares linear prediction method, circular lattice filter based 86−64261
line patterns structural anal., distance transformation, iterative local parallel operations 87−27648
linear arrays, homogeneous graph mapping 86−41878
linear systems solver, pipelined VLSI implementation 88−25267
linear systolic array for Romberg integration 87−23558
LMS adaptive filter implementation using SIMD multiprocessor ring architecture 86−16449
load flow anal., appl. of parallel soln. spare linear systems 88−48455
load flow calculation parallel processing method using sensitivity matrix 86−25495
logic verification algorithms and their parallel implementation, LOVER, PODEM 87−66114
longest common subsequence problem, dynamic programming systolic algorithms 88−25249
LS FIR smoothing and MEM spectral anal. using highly parallel algorithms 88−72998
LU decomposition of sparse matrices 88−341
macro cell placement with parallel simulated annealing 87−38444
manipulator Jacobian computation, parallel algorithms and VLSI architectures 88−63725
mapping of parallel algorithms to reconfigurable parallel architectures 87−75906
matrix and polynomial arithmetic ccts. 85−33881
matrix computation using systolic array 87−61829
matrix manipulation using modified Faddeev algorithm 85−28177
matrix multiplication, optimal algorithms *(Chinese)* 88−63228
matrix multiplication systolic array 87−23563
matrix operation in Connection Machine, linear time complexity 88−52462
matrix problems with no size restriction on a systolic array processor 87−17049
maximum entropy method use 88−28069
maximum network flow, $O(n^2n^{1/2})$ distributed algorithm 88−6374
minimum spanning trees, parallel vertex insertion algorithm 86−66727
modular circuit simulation multiprocessor system 88−26444
morphological operations on mesh connectedarchitecture: a generalized convolution algorithm 87−2632
MOSAIC, algorithmically specialised multiprocessor 88−40934
moving object extraction using temporal variance 88−66768
multibit convolution using a bit level systolic array 85−25094
multigrid algorithms on 3D PDE problems 88−63242
multimicrocomputer system design, educational course description 88−70045
multiple matrix product, real-time processing, optical system 85−41951
multiple parallel-acting iterative arrays for fast division 88−56587
multipliers, parallel VLSI algorithm design 86−46654
multiprocessor-based parallel stack algorithm speech encoder, performance 87−27350
multiresolution edge image computation using Laplacian, systolic parallel processor design 86−24434
multiresolution spatially constrained clustering algorithm 86−12147
multisplittings and parallel iterative methods 88−11917
Nelder-Mead simplex algorithm for unconstrained optimisation 88−49723
Newton-Raphson iterative method based for linear multistep formulas *(Chinese)* 88−63258
noncausal Markov random field segmentation, parallel hierarchical and relaxation algorithms 87−47899
nonlinear algebraic equation soln., parallelism 86−57389
nonplanar switchable arrays 88−38443
null space problem 87−187
number-theoretic transform for parallel VLSI architecture for digital filter, book contrib. 85−45185
numerical algorithms, design 87−44216
O(log n) algorithm for parallel update ofminimum spanning trees 86−46185
ODE solution using parallel processing *(Japanese)* 88−18658
one-pass thinning algorithm and its parallel implementation 87−27630
optical logic parallel processor using polarisation states 86−54200
optical logic processing based on scattering, 2D spatial filtering method 85−25166
optical parallel logic gate using spatial light modulators, PROM device implementation 86−42362
optical parallel processor for product inspection 88−52554
optical symbolic substitution, modified signed-digit addition and subtraction 86−69107
optimisation algorithms and parallel execution automatic differentiation part 88−49724
ordinary DEs soln. using systolic array extrapolation tables 87−23579
parallel algorithms continued
PABX, microprocessor-based, fast processing algorithm for signalling 88−3742
para-Hensel codes for exact parallel matrix inversion with systolic processors 88−58286
parallel computational structures for multiobjecttracking algorithms on associative processors 87−3239
parallel computing architecture for Kalman filter meas. update 86−1116
parallel processing state of the art report 88−11578
parallel sparse matrix solution algorithms, nuclear engineering appl. 86−13607
parallelism in solving partial differential equations 87−36671
path planning on the Warp computer, using a linear systolic array in dynamic programming 88−38477
pattern perception using parallel arrays, pipelines and pyramids, book contrib. 85−46951
pattern recognition, posn.-, rotation- and scale-invariant method 87−62377
permutation network, routing algorithm *(Japanese)* 85−17054
permutation network, structure and application 87−27551
perturbed biharmonic solver 87−65421
Petri net control unit for high-speed modular signal processors 87−61850
pipelined event-driven mixed-mode simulator for logic and circuit simulation 88−24915
pipelined VLSI systolic array and algorithm for digitalfiltering 86−63471
Pisarenko frequency estimates determ. as eigenvalues of orthogonal matrix 88−40925
PISCES, 2D device anal. program, parallel implementation for IC design 87−59108
PLA minimization, parallel algorithm implementation 87−65718
polynomial GCD computations, systolic VLSI arrays 85−832
polynomial transformer for parallel and pipeline VLSI algorithms 85−62056
power pool daily conditions calc. using parallel processing algorithm *(Russian)* 87−4286
power system load flow, decomposed algorithm for parallel processing 86−12234
power system simulation, multiple factoring algorithm for parallel soln. of simultaneous linear algebraic eqns 85−53292
power system simulation, parallel processor algorithm 88−61839
powers of integers, parallel computation 85−33882
PR^2 algorithm for 0.1 knapsack problem 88−70257
preconditioned conjugate gradient method on CYBER 203 and FEM 85−33325
preconditioners for elliptic problems, construction by substructuring 86−66777
prime no. counting function, Meissel-Lehmer method of evaluation 85−49451
prime-length fast DFT algorithms, hardware implementation 85−51649
probabilistic algorithms implementation on VLSI architectures, systolic struct. 88−50183
programmable systolic chip, systolic algorithm for stereo matching 86−21730
pyramid linking algorithms for image segmentation on the Connection Machine (tm) 88−46222
range imagery analysis, parallel fitting of quadric patches 88−41065
recursive filtering, systolic array technology appl., book contrib. 85−46816
Reed-Solomon codec suitable for VLSI implementation, systolic based encoder/decoder, design method *(Japanese)* 88−53064
region growing, parallel and hierarchical algorithm 86−4055
RNS VLSI digital ccts., parallel error correction algorithm 88−63722
robot control using parallel vision processing on VLSI systolic array device 87−10916
roots of polynomials, computation on vector processing machines 85−54338
routing algorithm and its implementation 87−38362
routing algorithm and its implementation on array processor AAP-1 87−6847
RSA cryptosystem, parallel algorithm and systolic array design 88−70851
Runge-Kutta methods for parabolic problems withtime-dependent coefficients 86−66767
Rutovitz method for parallel thinning of digital pictures 88−73210
scale-independent dominant point detection algorithm 88−73313
segmented partial pivoting and parallel sparse-matrix solution on multiprocessors, cct. simulation appl. 87−65753
seismic signal processing, L_1 deconvolution appl. 86−10426
sequential programs, parallel extraction, for VLSI appls. 88−39612
short-cct. calcs. in power networks, online technique using parallel programming 88−48540
signal processing, with interference and noise, very fast adaptive array processing method 87−55193
signal processing algorithms, parallel and pipelined VLSI implementation, book contrib. 85−46815
SIMD processor, nonlinear filtering 86−43276
simulated annealing for parallel placement 88−24927
simulated annealing for standard cell placement, multiprocessor based 87−6846
simultaneous linear equations, parallel elimination *(Japanese)* 88−18641
singular value decomposition, generalised, signal processing computations 85−30247
singular value decomposition computation using optical processing techniques, highly parallel algorithm 85−30302
singular value decomposition with systolic arrays 85−30244
singular value problems solution using systolic arrays 85−30243
SLAPP, special purpose multiprocessor array for signal processing and linear algebra 88−40933
smoothing, fast parallel algorithm 87−55195
sorting and parallel processing 87−5938
sparse large linear systems, parallel algorithms 85−22389
sparse network eqns., fast soln. method with array processor, new data storing scheme 87−30007
sparse network eqns., fast solution using array processor, transmission network appls. 86−56409
spectral estimation, from conventional methods to high-resolution modelling methods, book contrib. 85−46810
speech processing, parallel cellular structures for linear predictive coding 85−26136
stability classification method, appl. to pipelined soln. of linear recurrences 87−72975
standard cell placement by simulated annealing on the connection machine 88−24902
standard cell placement on hypercube computer 87−38445

parallel algorithms continued
standard cell placement on Intel hypercube, perform. of parallel algorithm *(German)* 87−67465
starvation free mutual exclusion protocols *(French)* 87−48636
Strassen algorithm 87−31630
successive overrelaxation (SOR) iterative methods 86−46254
suffix soln. for recurrence systems for parallel and pipelined machines 86−26993
supercomputing, conf., Athens, Greece, (June, 1987) 88−69999
supercoprocessors, dedicated VLSI systems for sorting 88−26450
SUPPLE: simulator utilizing parallel processing and latency exploitation 88−25152
sVD update algorithms and spectral estimationapplications 87−7770
symbolic computing, optical implementation of compare-and-exchange operation 88−33830
symmetric redundant binary no. system, parallel algorithm 87−52500
syntactic image segmentation parallel algorithm 87−7823
systematic generation and enumeration of systolic arrays from algorithms 88−6807
systolic algorithm and architecture for solving sets of linear equations with multi-band coefficient matrix 88−70267
systolic algorithm design, three-stage approach 86−20192
systolic algorithms for functions on rectilinearpolygons 86−62510
systolic algorithms for rectilinear polygons 85−35138
systolic algorithms for word detection, theory and practice *(French)* 85−13525
systolic algorithms with hexagonal and rectangular processor arrays 88−1752
systolic architecture for solving dense linear systems 88−848
systolic array, sparse matrix-vector multiplication 88−70683
systolic array architectures, least-square estimation algorithms, results 86−64313
systolic array for cyclic-by-rows Jacobi algorithms 87−66043
systolic array for efficient execution of the Faddeev algorithm 88−24674
systolic array for matrix triangularization and eigenvalue computation 88−38442
systolic array processing for order and time recursive generalized least-squares estimation 87−13018
systolic array processor for target detection in images 85−2907
systolic array structure, modified recursive linear predictor 88−14664
systolic array technique for adaptive antenna beamforming 86−57878
systolic arrays, adaptive algorithm implementation *(French)* 88−21278
systolic arrays, spacetime transformation 86−64312
systolic arrays for dynamic time warping algorithm, architectures for memory minimisation 86−62621
systolic convolver for parallel multiresolution edge detection 86−1137
systolic cubic architecture, three dimensional for simultaneous triple matrix multiplication 86−41914
systolic designs selection using linear transformations of space-time 85−30249
systolic detection of shortest routes 87−16778
systolic detection of shortest routes 87−16778
systolic VLSI arrays, SIMD algorithms 85−28500
Toeplitz matrix operations, parallel algorithms 86−13686
Toeplitz system solver, pipelined, lattice filter array implementation 86−67248
tomographic imaging methods, implementation on SIMD-type computer 88−14834
transitive closure R^+ soln., parallel evaluation for Warshall's algorithm *(Chinese)* 86−19933
triangular systolic arrays and related fault tolerance 88−40916
two and three dimensional FFTs on highly parallelcomputers 86−40696
two-dimensional recursive digital filters, hardware implementation using residue number system 85−34080
unifying framework for systolic designs 88−1751
V-language for polymorphic architectures and algorithms 87−75907
vector supercomputer, FFT algorithm 88−49779
VHSIC processor real-time multimode image tracker 88−53369
vision algorithms for hypercube machines 86−34063
vision system algorithms 87−13109
VLSI algorithm and architecture for subgraph isomorphism 85−12388
VLSI algorithm for a visibility problem 86−21732
VLSI algorithms and architectures, conf., Loutraki, Greece (July 1986) 88−32
VLSI algorithms and pipelined architectures for solving structured linear system 88−1755
VLSI architecture for covariance eigen systems, real-time Pisarenko spectrum estimation 86−14285
VLSI architecture with appls. to geometric problems 87−38493
VLSI architectures, Alvey projects 88−7682
VLSI array processor for matrix multiplication 85−11377
VLSI design methodology for self-timed systems 85−17291
VLSI image processor chip, parallel Hough transform approach 88−50208
VLSI implementation of residue number system architecture, lower bounds 87−6795
VLSI mask data, concurrent pattern operation algorithm 87−60554
VLSI parallel shift sort algorithm and design 85−28569
VLSI placement using MIMD multiprocessor 87−38446
VLSI signal processing: from transversal filtering to concurrent array processing, book contrib. 85−45092
VLSI simulation programs, partitioning onto multiprocessor by simulated annealing 87−25396
VLSI sorters, implementation on high speed shuffle bus 88−26449
VLSI spanning tree generators 85−40839
VLSI systolic array processor simulation for band matrix triangulation 85−61309
VLSI systolic array simulation for load flow throughput enhancement 85−23911
VLSI systolic arrays for image processing, symbiosis 85−11306
VLSI time/space complexity of an associative parallel join module 87−18341
wave digital filters, parallelism, a comparison 87−7792
waveform relaxation algorithm partitioning for MOS digital cct. using RELAX 2.3 simulator 86−57569
Winograd Fourier transform algorithm, bit-level systolic array implementation 86−3853
Winograd Fourier transform algorithm, systolic implementation 86−13719
WSI fault-tolerant algorithm for high availability 86−35845
WSI oriented two dimensional systolic array for FFT 87−27462

parallel architectures
1-D to N-D highly parallel computing structures for IIR digital filters 87−66402
2 D arrays, high harvest approaches 88−63741
2-D FFT processor in 3 micron CMOS technology 88−3074
2D array processor with controlled pipelined architecture for elliptical sparse matrices 86−16570
2D convolution of image matrix on pyramid computer 88−66632
2D digital filters, multiprocessor architecture 87−59741
2D digital signals, block parallel processing 86−64267
2D signal filters, block parallel processing using state-space model 87−47824
2D systolic arrays, easily testable and reconfigurable 88−6937
3D circuitry, technological developments 88−33360
3D IC for high-performance image signal processor using parallel processing 88−42165
3D microelectronics in image anal. 86−31320
9-kbit associative memory for high-speed parallel processing applications 88−52514
50 ns DSP with parallel processing architecture *(German)* 87−62135
A/D convertors, monolithic IC realisation *(Czech)* 88−19233
adaptive array processing techniques, spacial superresolution 86−3913
adaptive delay filters, a parallel implementation 87−7778
adaptive equalizer based on parallel computation scheme 87−76499
adaptive equalizer based on parallel computationscheme *(Japanese)* 86−55142
adaptive filtering, high performance architecture based on Gram-Schmidt algorithm 85−30246
adaptive lattice filters, systolic realisation 87−19794
adaptive multichannel algorithms, highly parallel architecture 87−27511
adaptive optical networks using photorefractive crystals, holographic interconnections in neural networks 88−51950
adaptive optical processor algorithms, architecturesand devices 86−49015
adaptive quadratic digital filters, efficient array processing structures 87−66403
adaptive quadratic digital filters, VLSI array processing structures 88−38627
adaptive signal processing, modular recursive estimator 88−21286
ADSP-2100, single chip DSP, architectural overview 88−6931
algorithmically specified systolic arrays, design 86−10411
architecture synthesis, dynamic programming solver 87−18281
Array Chip I, bit-slice processor chip 87−5913
array processor results displayed in near real time 88−19195
array two's-complement multiplier and square function 88−645
ASP, associative string processor, fault tolerant, costs effective systolic processing 88−70854
associative networks with versatile adaptive learning capabilities, optical implementations 88−20459
associative processor, adaptive 2D holographic type 87−17126
associative processor based on modular, fully parallelassociative memory field *(German)* 86−67223
ATE system 87−20881
backplane simulation using MSPICE 88−49953
banded matrix algorithms, optical implementation using outer products 88−26915
BDFA data-flow multiprocessor architecture 85−8476
behavioural simulator and its use for the validation of hypercube architectures 88−70426
Bezier curve generator chip, architecture and algorithms 86−20629
bidirectional prototype crossbar switch for the gamma network, parallel process architecture 87−52660
binary multiplication, recursive algorithm and VLSI layout 86−52769
bit level systolic arrays, system level functions mapping 87−27463
bit serial arrays, testing strategy 87−37219
bit serial techniques in VLSI 86−20659
bit-level pipelined VLSI architectures for high-speed signal processing 88−6916
bit-level systolic array chips, use of unidirectional data flow 86−46865
bit-parallel based filters using residue number systems 86−1301
bit-sequential VLSI 'pixel-kernel-processor' for image processing 87−18322
bit-serial silicon compiler parallel extended Kalman filter 88−27987
bit-sliced M-D filter chips, modular implementation of M-D digital filters 87−44930
Boolean cubes and related networks for computation of FFT 88−38121
Booth multiplier, modified, parallel architecture 88−50173
CATHEDRAL II: a synthesis and module generation system for multiprocessor systems on a chip 88−6926
cell-based interconnection network 86−4282
cellular architectures for implementing projection operators 88−14673
cellular array architecture for relational database implementation 88−70653
cellular array parallel processor chip, transistor-level simulation using a hardwareaccelerator 86−41153
cellular array processor for discrete Fourier transform computation 85−45065
cellular hypercube architecture for image processing 88−59313
cellular VLSI processing architecture using CORDIC elements for image processing 87−44946
central processing unit design and performance 88−33819
chess move generator, single-chip implementation in CMOS, design and architecture 87−66260
chip placement by simulated annealing on shared memory systems, parallel techniques 88−24926
CLAP-4 cellular logic array processor, implementation 86−34824
class of multiprocessors for real-time image and multidimensional signal processing 88−57801
CLIP, superfast image processing architecture, commercial prospects 85−25144
CLIP parallel image processor chip 86−57848
CMOS arithmetic processor chip for robot control architecture and appl. 86−20632
CMOS digital signal processor, 8-MIPS, with parallel processing capability 87−5912
CMOS DSP, 8 MIPS execution rate, design with highly parallel architecture 87−17156
CMOS integrated systolic processors for image treatment *(Italian)* 87−763
CMOS multiple pipeline function unit chip as building block for parallel architectures 88−20134
CMOS systolic digital filter processor 88−25270

DSP Workbench, parallel architectures modelling as concurrent processes 87−24252
DSPs, Valvo/Philips SP 50 family, PCB 5010 and 5011 devices using 2 μm CMOS technology *(German)* 87−10901
dynamic-time-warp integrated circuit for a 1000-word speech recognition system 87−37163
easily testable and reconfigurable VLSI processor arrays, design 88−63746
ECL enhances proven parallel architecture 87−5813
ECL implementation of parallel scientific computer hardware 87−705
edge detection in real-time 85−36323

parallel architectures continued
eigenvalue problems, large scale, conference, Oberlech, Austria (July 1985) 87−30106
elastic pipeline mechanism by self-timed circuits, VLSI implementation for data-driven processors 88−32243
electro-optic data communication system for the Delft parallel processor 88−41610
embedding large tree machines into small ones 88−44247
emission tomography, algorithms and architectures for statistical image processing 85−30298
enhanced mesh connected VLSI architecture for parallel image processing 86−1136
equilateral triangular architecture for VLSI systolic implementation 88−25253
equilateral-triangular systolic architecture for computing divided differences 85−35131
estimation system of numerical stability for matrix operations in systolic arrays 88−70667
Fairchild Clipper 32-bit microprocessor 88−781
fast binary random number arrays generator using speckle, parameters optimisation *(French)* 88−58283
fast digital processing operator design for data flow computer, Fast Riccati Operator *(French)* 85−7847
fault tolerance techniques for array structures used insupercomputing 86−46862
fault tolerance techniques for highly parallel signal processing architectures 87−19706
fault tolerance techniques for systolic arrays 87−66001
fault tolerant communications architecture for wafer scale integration 88−64729
fault tolerant ICs and WSI, conf., London, England (Feb. 1986) 86−33958
fault-tolerance in parallel architectures 88−71666
fault-tolerant, bit-parallel, cellular array processor 87−37201
fault-tolerant, digital filtering structures for wafer scale VLSI 87−19797
fault-tolerant architecture for a parallel digital signal processing machine 88−29305
fault-tolerant FFT networks 88−44261
fault-tolerant FFT processor 88−44263
fault-tolerant interconnection network with linear growth, KYKLOS 86−37206
fault-tolerant reconfigurable processing arrays using bi-directional switches 85−23837
fault-tolerant systolic arrays, VLSI implementation 87−37375
fault-tolerant testchip for gathering wafer defect data 88−63743
FFT for VLSI implementation 85−55920
finite state automaton, VLSI design 85−33854
FIR digital filters with array architecture, parallel processing and VLSI implementation 85−23045
fixed size parallel architecture for computing fast Fourier transforms 88−26475
FLIR imaging, scale invariant target detection using optical processor 88−47227
floating point DSP vector signal processor 88−70830
floating point processor for VLSI implementation of parallel algorithms 87−67389
floating vector processor for power system simulation 86−32625
floorplanning by annealing on a hypercube multiprocessor 88−24901
fractal-surface generation, multiprocessor architecture 85−11314
FX FFT cross-spectrum analyser, 320 MHz bandwidth, 1024 channel config. for radioastronomical appl. 88−9692
general purpose content-addressable memory architecture 87−31909
gracefully degradable processor arrays 86−21642
Gram-Schmidt orthogonalization, algorithm and systolic architecture 86−23940
granularity, impact on yield 88−63738
graphic CRT controller using multiprocessor architecture, VLSI chip and language 85−33977
HAL: a high-speed logic simulation machine 86−14101
hardware acceleration of logic simulation using adata flow architecture 86−27271
hardware accelerator for VLSI layout, parallel placement on reduced array architecture 88−63466
hardware algorithm for logic simulation machines *(Japanese)* 86−14148
hardware algorithms in scientific computations, supercomputers vs. special purpose systems *(Japanese)* 86−15216
hardware maze router with application to interactive rip-up and rerouter 87−23829
hardware maze router with rip-up and reroutesupport 86−27021
Harvard architecture in TI TMS 32010 signal processor chip 85−17506
harvard microcontroller IC 8X400 chip set 85−54779
Harvard-style parallel architecture, Motorola 68030, 32-bit microprocessor 88−32223
hierarchical cellular logic for image processing 87−73427
hierarchically, organised WSI parallel processor, influence of defects on silicon efficiency 88−33346
high speed parallel architecture for recursivedigital filtering 86−62727
high-dimensionality pattern recognition feature space production 87−13108
high-speed 2 D digital filter structure 86−57991
high-speed architecture for image computation 88−66684
high-speed vision architectures and automated inspection, conf., Cambridge, MA, USA (Nov. 1987) 88−55784
highly parallel machines, PLA processing element control paths generation CAD 85−1697
highly parallel signal processing architectures, conf., Los Angeles, USA (Jan 1986). 87−19702
homogeneous vector supercomputer architecture 87−18278
homogeneous vector supercomputer architecture 87−18278
HPSm microprocessor chip, design choices 87−66245
Hughes three-dimensional computer for image and signalprocessing 86−2322
iconic to symbolic processing using a content addressable array parallel processor 85−30318
IMAGE2 VLSI systolic processor, instruction set 88−38586
IMAGE2M multi-processor chip for morphological image processing, VLSI implementation 88−38578
image array processor, Androx ICS-400 system, VME Image Computer 88−9925
image coprocessor architecture *(Polish)* 87−62226
image edge detection, real-time pipeline processing system 85−36449

parallel architectures continued
image normalisation, parallel processing structure and its control scheme 86−4049
image processing, architectures 87−20994
image processing, Datacube MaxVideo modular VME architecture 86−24417
image processing, efficient use of memory subsystems 88−41089
image processing, functional operation architecture 86−63467
image processing, parallel VLSI architecture design 87−69347
image processing, processor integration for cellular pyramidal architecture *(French)* 85−22936
image processing, reconfigurable architecture 85−37538
image processing, simulator of pyramid architecture 85−57533
image processing advances, conf., The Hague, Netherlands (Apr. 1987) 88−24326
image processing chips, parallel architecture comparison 86−67251
image processing cosine transform block codec using TMS32010 chip 86−70091
image processing in pulsed laser velocimetry, parallel and serial computer methods 88−29703
image processing on linear transputer arrays 87−19938
image processing on VLSI array processor 87−13111
image processing rank order filters, novel sorter architecture 87−24331
image processing systems, real-time operation 88−46263
image relaxation operations, pipelined architecture implementation, NMOS SIMD chip 88−25246
image restoration algorithm; iterative, VLSI implementation 87−27667
image synthesis using ray-casting technique, algorithms and parallel processing architecture *(French)* 86−16492
INMOS IMS A100, image decorrelation using parallel elements made from VLSI devices 87−44947
Inmos transputer family, features, parallel processing configs. and OCCAM software *(Spanish)* 88−38571
inspection policies for a computer with n-1/n parallelredundant system *(Japanese)* 86−253
instruction systolic array, new parallel computation method 88−38444
instruction systolic array, parallel architecture config. for VLSI implementation 86−46877
integrated circuits for advanced computing 88−798
integrated optical threshold gates for digital image processing 87−13109
Intel iAPX 432 32-bit microprocessor system, object-oriented architecture *(German)* 85−17472
intelligent decision making techniques for dynamic network management 87−76036
intelligent robots and computer vision, optical processing techniques 87−13105
interconnection networks based on a generalization ofcube-connected cycles 85−57630
ISP-2 LSI image signal processor, architecture 87−46132
Kalman filter meas., update 86−1116
Kalman filtering and systolic processors 87−27459
Kalman filtering discrete-time parallel structures 88−46110
Kalman filters, parallel algorithms and architectures 88−38640
Kalman filters parallel algorithm structures, implementation 86−1298
Karhunen-Loeve transform for systolic array mappings 86−27255
large GaAs systems, multiple component problem 86−53770
large-area binary tree architectures, cluster-proof scheme for improving yield and reliability 88−63739
large-area-device implementation strategies 87−44720
large-scale network shortest path calc. *(Korean)* 86−13933
large-scale sparse matrix, LU decomposition, parallel processor 86−57297
layered restructurable VLSI architecture for robotic control 88−26451
least-squares linear prediction method, circular lattice filter based 86−64261
lenslet array processor, appls. 87−13098
LEP control system, message architecture 85−43141
line processor in multilevel structs., iconic and symbolic use 87−75915
linear arrays, homogeneous graph mapping 86−41878
linear systems solver, pipelined VLSI implementation 88−25267
linear systolic array for Romberg integration 87−23558
liner recurrence eqns., uniformization, for automatic synthesis of systolic arrays 88−70465
LMS adaptive filter implementation using SIMD multiprocessor ring architecture 86−16449
load flow anal., appl. of parallel soln. spare linear systems 88−48455
locally synchronised algorithms, programming notation, for VLSI ccts. 86−21740
logic simulation with parallel processors 87−10555
MA7170 systolic correlator, architecture and applications using CMOS-SOS processes 87−38577
MA7180 and MA7188 VLSI chip-set for real-time 1-D/2-D digital convolution 87−44951
MA7190 and MA7186 vLSI chip set for rank order filtering 87−44948
macro data flow graph node scheduling for an advanceddata flow signal processing architecture 86−69095
manipulator Jacobian computation, parallel algorithms and VLSI architectures 88−63725
mapping of parallel algorithms to reconfigurable parallel architectures 87−75906
MARS hardware accelerator, architecture and design 87−65703
massively parallel artificial intelligence processor 87−17165
Massively Parallel Processor, staging memory, book contrib. 86−34804
massively parallel processor staging memory 85−28546
Massively Parallel Processor VLSI multiprocessor integrated circuit design, book contrib. 86−35898
matrix computation using systolic array 87−61829
matrix problems with no size restriction on a systolic array processor 87−17049
MC88100 RISC processor 88−44188
measurement data acquisition and processing with freely programmable computer systems *(German)* 87−34994
MegaGatemaster for hardware acceleration applied to gate array layout 86−21719
memory organisation and interconnection networks for array processing 86−26969
memory state based digital pulse generator 88−53747
mesh-connected processor array, pattern matching in binary trees, VLSI implementation 86−21731
microlevel, cooperative microcontrollers with real time considerations 87−11973
microprocessor development trends *(French)* 87−31934
parallel architectures continued
microprocessors performance enhancement, multiprocessing principles *(German)* 87−52646
microwave circuit design, vector processing concepts 85−6547
mil-DAP: its architecture and role as a real timeairborne digital signal processor 86−60900
MIMD architectures, image processing, connected component labelling 87−75909
MIMD processor array for interconnection routing algorithms 85−49696
MISS: a distributed simulator for systolic architectures 87−25492
MIT database accelerator, content-addressable memory in parallel processor architecture 88−6938
molecular optical logic device materials 88−58291
morphological operations on mesh connectedarchitecture: a generalized convolution algorithm 87−2632
MOS parallel logic simulation, circuit description language and compiler *(Japanese)* 87−36885
MOSAIC, algorithmically specialised multiprocessor 88−40934
motion video coders, motion detection and compensation coding 88−45936
Motorola 32 bit microprocessor *(Norwegian)* 87−24214
multi-application signal processing architectures, military appl. 85−9308
multi-channel communication networks, hypercube techniques appl. 88−3608
multi-level simulator for VLSI 88−71667
multi-processor architectures for artificial intelligence processing 88−7677
multi-processor WSI boundary value architecture 88−25272
multi-sensor integration using concurrent computing 88−29299
MULTIBUS algorithm for product-form networks 88−41136
multilayer optical learning networks based on holographically interconnected nonlinear devices 88−20461
multilevel pipelined processor for the singular value decomposition 87−55135
multiple matrix product, real-time processing, optical system 85−41951
multiple parallel-acting iterative arrays for fast division 88−56587
multiple-image and multimodal augmented pyramid computers 87−75910
multiplier based on negative-base binary system, digital signal processing appls. 86−62661
multipliers, parallel VLSI algorithm design 86−46654
multiprocessor accelerator for mixed-level simulation 88−44016
multiprocessor implementations of real-time multisensor integration avionics 87−77771
multiprocessor pyramid architectures for bottom-up image analysis 86−31307
multiprocessor systems, parallel solution of eigenproblems 88−40926
multiprocessor-based parallel stack algorithm speech encoder, performance 87−27350
multiprogrammed parallel architecture for digital signal processing 87−62007
multiresolution edge image computation using Laplacian, systolic parallel processor design 86−24434
multistage interconnection networks, survey 85−42281
multiwavelength optical crossconnect for parallel-processing computers 88−20340
N-ARCH project, network of transputers to emulate a parallel symbolic processor 88−38559
neural net, optoelectronic analogue, self-organization and stochastic learning architectures and methodologies 88−58314
neural nets, self-programming, optoelectronic analogues, architecture for fast stochastic learning by simulated annealing 88−20462
neural network, prototype in nonconventional computer architecture design for artificial intelligence applications 86−47756
neural network electronic chips 88−19119
neural network electronic hardware implementations 88−19121
neural network hierarchy for associative memory, image vector quantisation 88−19120
neural network models, connectivity requirements 88−33334
neural networks, bias and anticipation 88−57780
neural networks, reduced interconnections and compact types 88−57781
neural networks, VLSI asynchronous using pulse stream arithmetic 88−56576
neural-based electronic architectures, research challenges and opportunities 88−57782
neuromorphic VLSI learning system for modelling neural nets 87−67532
NMOS radix-2 FFT butterfly arithmetic unit 86−34873
NMOS systolic array for rapid string comparison 86−8302
nonlinear edge preserving noise smoothing image filter, VLSI architecture 88−41086
nonplanar switchable arrays 88−38443
nonplanar systolic architectures, performance improvement through increased fan-out 87−66213
number-theoretic transform for parallel VLSI architecture for digital filter, book contrib. 85−45185
NYU Ultracomputer, VLSI interconnection network 86−47698
NYU Ultracomputer, VLSI node design for memory traffic reduction 87−67317
ODE solution using parallel processing *(Japanese)* 88−18658
Omega-crossbar network, config. for highly parallel multiprocessor systems 85−30708
optical arithmetic/logic unit based on residue arithmetic and symbolic substitution 88−51624
optical cellular array processors 87−13087
optical cellular automata, architectural principles 88−65424
all-optical computation, design for specific physical problem 86−3955
optical computing, architectural aspects 88−58306
optical computing architectures, combinatorial logic based 88−51622
optical computing based on interference fringe shifting, parallel implementation of multiple logic gates 86−37142
optical crossbar architecture based arithmetic/logic unit 88−51619
optical crossbar network in parallel computer architecture *(French)* 88−8018
optical crossbar signal processor 87−13093
optical digital and symbolic computation via optical phase conjugation 88−58287
optical digital computing and optical parallel logic gate *(Japanese)* 86−29985
optical digital truth table look-up processing system 85−36372
optical finite element processor, design 87−13094
optical holographic associative memory using a phase conjugate resonator 87−19102

parallel architectures continued
optical information processing systems, past, present andfuture *(Japanese)* 86−29982
optical interconnections and computer architecture *(German)* 88−33906
optical interconnections using GaAs optoelectronic ICs 87−16967
optical logic processor using anisotropic scatt., large data array handling in parallel 85−46940
optical multistage 2D interconnection networks in parallel computing systems 88−33828
optical neural computers, information processing capabilities and component requirements 88−20473
optical parallel array logic system, architecture without memory elements 87−13054
optical parallel computing, complexity implications 88−3254
optical parallel multiprocessing systems, development 87−38959
optical parallel processor for product inspection 88−52554
optical processor architectures for alternating-projection neural nets 88−58297
optical single-instruction multiple-data array architectures for digital optical computing 87−27561
optical symbolic substitution architectures, performance analysis 88−51627
optical systolic array processor designs for the linear estimation for data sequences 85−30301
optical systolic array processors, fault tolerance and self-healing 85−36374
optimal routing and flow control of a network ofparallel processors with individual buffers 86−64392
orbital architectures for matrix products 88−739
oversampling digital filter forvideocommunications 86−62759
P-NAC, linear systolic array for comparing nucleic acid sequences 87−66209
PA^3 arrays for supercomputers 86−41001
PACE, VLSI architecture 88−7723
packet switched Delta network, distributed resource sharing 87−13211
parallel computational structures for multiobjecttracking algorithms on associative processors 87−3239
parallel computing architecture for Kalman filter meas. update 86−1116
parallel transcendental-function processor built from LSI building blocks 87−66236
PARSIFAL digital-serial silicon compiler for constructing chips with data-flow architecture 88−70632
partitionable distributed beamformer and signal conditioner architecture 87−27433
partitioning and mapping algorithms into fixed size systolicarrays 86−26991
partitioning PDE computations, methods and perform. eval. 87−65441
PASM for multifunction processing 87−75914
pattern perception using parallel arrays, pipelines and pyramids, book contrib. 85−46951
PAVE PACE: system avionics for the 21st century 88−68554
Petri net control unit for high-speed modular signal processors 87−61850
photonic computing using the modified signed-digit numberrepresentation 86−37137
PIER: A VLSI Prolog inference engine on a RISC 87−66252
pipelined multiplier unit and its hardware architecture for VLSI technology 87−17041
pipelined signal processing architectures, reviews 85−30242
pipelined VLSI systolic array and algorithm for digitalfiltering 86−63471
placement and interconnection of systolic processing elements, LU decomposition algorithm 87−37244
polymorphic arrays: an architecture for a programmablesystolic machine 86−27259
polymorphic arrays, VLSI layout for massively parallel systolic computers 85−33985
polymorphic-torus architecture, VLSI implementation 88−70819
polynomial transformer for parallel and pipeline VLSI algorithms 85−62056
power system reliability computation using parallel processing 87−15209
power system voltage instability and voltage collapse, singular value decomposition, parallel processing 88−10771
PPPE, parallel pipelined projection engine, for real-time image processing in random space, VLSI implementation 88−25300
pre-design tool for a class of parallel processingsystems 87−424
prime-length fast DFT algorithms, hardware implementation 85−51649
procedure flow processor with aloof executionunits 86−46908
processor arrays for parallelism 87−31867
programmable interconnection network module, building block for parallel processing environment 85−61239
programmable optical processor based on symbolic substitution logic 88−51625
programmable parallel machine architecture, ALU implementation 86−21734
Prolog hardware interpreter, VLSI architecture 87−66240
prototype WASP machine, design 87−31950
PSP/SVP advanced VLSI programmable systolic signal processor 87−27537
pyramid linking algorithms for image segmentation on the Connection Machine (tm) 88−46222
pyramid paralleled computer for image processing 85−30400
pyramid vision, integrated image-driven bottom-up and model-driven top-down approaches 87−62153
pyramidal processing, contour labelling 87−75913
Q-p data driven processor, design philosophy 88−44199
quadratic digital filters, reconfigurable systolic array implementation 87−903
quadratic residue number system/systolic arrays combination for VLSI-based DFT implementation 87−66253
raster graphics, parallel processing in pixel planes, VLSI logic-enhanced memory 86−46825
ray casting parallel synchronous machine, custom IC design and implementation 87−777
ray-casting machine architecture 85−33976
real time CCD parallel radar processor 88−28946
real time image restoration, hybrid architecture 88−59294
real-time Hough transform processor 88−56201
real-time image appls., parallel/pipelined architectures class 88−41087
real-time image processing chip set with pipelined and parallel dedicated architectures 87−17164
real-time image signal processor in 1.5 μm bipolar technology, microprogrammable and expansible architecture 87−24259
real-time parallel processing of pixel arrays, using adaptive logic 88−52566

parallel architectures continued
real-time signal and image processing, systolic architectures, barrel shifters based 86−16395
real-time signal processing, VLSI systolic array architecture 86−44228
real-time video signal processor architecture *(Japanese)* 85−52714
reconfigurable cube-connected cycles architectures 87−1628
reconfigurable fault-tolerant parallel computer−wafer scale implementation approach 87−52662
reconfigurable massively-parallel processor 88−38579
reconfigurable mixed systolic arrays, algorithm implementation 86−27262
Reconfigurable Processor Array computer, VLSI implementation 87−37391
reconfigurable systolic array processor 87−52661
reconfigurable systolic primitive processor 86−14284
reconfigurable VLSI processor arrays, easily testable, design. 88−33351
reconfiguration algorithms for interconnection networks 85−57631
recursive filtering, systolic array technology appl., book contrib. 85−46816
recursive least square method of system identification 87−69097
reduced processing element architecture for parallel local image processing 88−25250
Reed-Solomon codec suitable for VLSI implementation, systolic based encoder/decoder, design method *(Japanese)* 88−53064
reservation protocol for fibre-optic network, anal. 87−13187
residue arithmetic VLSI array architecture for manipulator pseudo-inverse Jacobian computation 88−63647
residue number system chips, models 85−22942
residue-to-decimal convertor, hardware architecture based on Chinese Remainder Theorem 85−45137
ring array processor architecture for parallel dynamic time warping 87−12947
ring bus network, hierarchical, evolution 88−15127
robot control using parallel vision processing on VLSI systolic array device 87−10916
rotorcraft blade element real-time simulation 88−68534
round-robin architecture for relaxation operation 87−19950
RSESS network, design, simulation and analysis 87−48275
RTL logic design aid for parallel control VLSI processor 88−31940
satisfaction of bonds in parallel programmable logic 87−31826
Saxpy 1M systolic computer system 87−19708
SCAPE−a VLSI associative string processor for image processing 87−44944
SCAPE VLSI chip implementing SIMD architecture for signal processing 86−28509
scene analysis SIMD processor 85−37539
SCHOLAR, silicon compiler for VLSI architecture design from algorithmic behavioural descriptions 88−13553
SCS-40, ECL PALs in a Cray-compatible minisupercomputer 87−46171
self tested data flow logic 85−49816
sequential detection, real-time, for diffusion signals 88−46108
sequential stack decoding algorithm, systolic array architecture 87−54873
serial/parallel modules for complex arithmetic, architecture config. 87−10782
shuffle-exchange, 2 D state for 1 D data arrays 88−20471
shuffle-exchange graph, placement algorithm 88−18875
signal and image processing, systolic architectures, barrel shifters based 86−16395
signal flow graph computing networks, temporal localisation and systolisation 85−30694
signal processing algorithms, parallel and pipelined VLSI implementation, book contrib. 85−46815
signal processing and sensing, VLSI full custom devices, parallel architecture 87−69198
signal processing architecture, residue number system approach 86−62634
signal processing in high-data-rate environments, exploitation of parallel architecture and fast system clock rates, book contrib. 85−45097
signal processing systems, multidimensional memories appl. 86−16437
signal processor without multipliers, VLSI design 85−33983

synthesizing nonuniform systolic designs 87−18280
system sciences, conf., Kailua-Kona, HI, USA (Jan. 1987) 87−58537
systolic algorithm design, three-stage approach 86−20192
systolic algorithms for functions on rectilinearpolygons 86−62510

parallel architectures continued
systolic algorithms for word detection, theory and practice *(French)* 85−13525
systolic and wavefront array processors, comparison 86−14288
systolic architecture−a wafer scale approach 85−33978
systolic architecture for Cartesian-to-polar coordinate mapping 88−729
systolic architecture for optimal filter design support 88−40886
systolic architecture for solution of linear systems over GF(p), CMOS design appl. 87−52491
systolic architecture for solving dense linear systems 88−848
systolic architecture for the logic design machine 86−28423
systolic architecture of fast biased polynomial transform 87−59539
systolic architectures, concurrent error correction and detection 88−32135
systolic architectures, design and descriptive tools 85−30248
systolic architectures, introduction 88−70678
systolic array architecture for VLSI FFT processor 85−61306
systolic array architecture for VLSI FFT processor 86−53777
systolic array architectures, least-square estimation algorithms, results 86−64313
systolic array for distance computation in video-codec 87−40514
systolic array for matrix triangularization and eigenvalue computation 88−38442
systolic array implementation of second-order IIR transfer fn. 88−32338
systolic array processor for target detection in images 85−2907
systolic array quadratic signal processing, computational aspects 87−69209
systolic array technique for adaptive antenna beamforming 86−57878
systolic arrays, CMU programmable systolic chip 86−34888
systolic arrays, conf., Oxford, England (July 1986) 87−36329
systolic arrays, conference, San Diego, CA, USA (May 1988) 88−70015
systolic arrays, design methodology 87−55132
systolic arrays, spacetime transformation 86−64312
systolic arrays for dynamic time warping algorithm, architectures for memory minimisation 86−62621
systolic convolver for parallel multiresolution edge detection 86−1137
systolic correlator array, bit level, high speed CMOS/SOS implementation 87−16973
systolic cubic architecture, three dimensional for simultaneous triple matrix multiplication 86−41914
systolic database machine implementation, using CMOS technology 88−38584
systolic design synthesis 86−20193
systolic design using S-MP, matrix-vector multiplication example 88−70853
systolic designs selection using linear transformations of space-time 85−30249
systolic device for image transformation 87−31949
systolic discrete Fourier transform using residue number systems over ring of Gaussian integers 87−17148
systolic linear algebra parallel processor architecture 87−52536
systolic linear algebra processor, one-third gigaflop 85−28555
systolic multiplier unit and its VLSI design 86−1010
systolic processor, piggyback WSHP, interconnection complexity study 88−63734
systolic processor arrays, 2D fault-tolerant VLSI design 88−50201
systolic processor chip dedicated to the shortest-path problem 87−67576
systolic programmable chip, architecture 85−11309
systolic recursive filters , architecture performance anal. 88−70918
systolic routeing hardware, performance eval. and optimisation 88−38343
systolic solution of linear systems over GF(p) with partial pivoting 87−58865
systolic structs., probabilistic algorithms implementation on VLSI architectures 88−50183
systolic VLSI arrays, SIMD algorithms 85−28500
systolic VLSI multi-precision polynomial evaluator and matrix multiplier 85−62054
T424, INMOS transputer, architecture for concurrency 86−41161
telecommunications switching node control 86−43654
TMS34010 Graphics System Processor, flexible approach to image processing for office documents 87−44949
TMS 320 architecture, DFT and speech filterbank appls. 86−16448
TMS-32020 DSPs, image processing with multiple DSPs 87−44950
Toeplitz system solver, pipelined, lattice filter array implementation 86−67248
translation of systolic algorithms between systems ofdifferent topology 86−27263
Transputer, architecture and features 87−59528
Transputer, massively parallel IC architecture *(French)* 88−32252
transputer architecture for real time video processing 85−46964
transputer family architecture *(Spanish)* 88−56681
transputer-based concurrent systems 86−27372
triangular systolic arrays and related fault tolerance 88−40916
TST/SS-TDMA system, variable origin algorithms 88−67287
two's complement multiplication-division arrays, config. and eval. 87−44756
two and three dimensional FFTs on highly parallelcomputers 86−40696
two-dimensional binary images processing, real time blob analysis hardware 88−53595
two-dimensional recursive digital filters, hardware implementation using residue number system 85−34080
two-level data-flow architecture for programmable signalprocessing 86−59948
ultra-high-speed parallel implementation of low-orderdigital filters 86−67425
Unisys RISC architectures as a multiprocessor base 88−19016
V-language for polymorphic architectures and algorithms 87−75907
VASTOR array processor, architecture using VLSI array of 1-bit processors 86−47712
vector associative processor, use in continuous speech recognition 86−48827
vector associative processor, VLSI architecture 85−33972
Vector Engine: a VLSI parallel processingsystem, architecture and appls. 86−20633
Vector Engine, VLSI-based array processor for microcomputer systems 87−60529
vector processing concepts in microwave circuit design 85−6547
vector processors for high speed logic simulation 87−59081
vector signal processor using GaAs chips, spaceborne appls. 88−6907
vector-radix 2D FFT chip 86−2440
VHSIC processor real-time multimode image tracker 88−53369
VHSIC programmable processor for image processing, Ada model 87−13089
video rate Fuzzy Golay Processor, wafer scale integration 86−47724
video-RAM multiprocessor architecture 88−70760
parallel architectures continued
video/graphic processor, dynamically reconfigurable design 86−60037
vision algorithms for hypercube machines 86−34063
VLSI algorithm and architecture for subgraph isomorphism 85−12388
VLSI algorithm for a visibility problem 86−21732
VLSI algorithms and architectures, conf., Loutraki, Greece (July 1986) 88−32
VLSI algorithms and pipelined architectures for solving structured linear system 88−1755
VLSI architecture for application-specific synchronous multiprocessor 88−34651
VLSI architecture for cellular logic operations 86−35822
VLSI architecture for concurrent data structures, book 88−33328
VLSI architecture for covariance eigen systems, real-time Pisarenko spectrum estimation 86−14285
VLSI architecture for data flow commutations 87−67504
VLSI architectures, Alvey projects 88−7682
VLSI architectures for computer graphics 86−34887
VLSI architectures for digital image processing 87−27658
VLSI architectures for string and pattern matching 87−37351
VLSI array for computing the DFT based on RNS 87−27461
VLSI array processor for image and signalprocessing 86−8309
VLSI array processor for linear phase transversal filtering, design and performance 88−44157
VLSI array processor for matrix multiplication 85−11377
VLSI array processors, CAD, hierarchical flowgraph integration 86−14286
VLSI array processors for digital signal processing 88−13549
VLSI array reliability, fault diagnosis and reconfiguration 88−50202
VLSI artificial neural networks, word recognition appl. 88−44853
VLSI associative string processors for structured data 86−52866
VLSI CAD workstation with parallel computer 88−39663
VLSI ccts. and concurrent computations 86−28422
VLSI chip set for a massively parallel architecture *(German)* 87−59615
VLSI design methodology for self-timed systems 85−17291
VLSI digital filter bank for signal processing appls., top-down design 85−55046
VLSI for image processing, conf., London, England (Apr. 1987) 87−43812
VLSI mesh-connected parallel computers, fast parallel communication 87−25471
VLSI parallel homogeneous computer media and structures, effect on arranging computations 88−38561
VLSI parallel processors, architecture interconnection network and software considerations 86−57876
VLSI parallel shift sort algorithm and design 85−28569
VLSI processor array, meshes with reconfigurable buses 88−44246
VLSI processor array for contour tracing 88−73275
VLSI processor arrays, large synchronising 85−55898
VLSI processor engine for vector wave equation calc. *(Spanish)* 87−75569
VLSI real-time pipelined architecture for direct kinematics processing 87−59598
VLSI Reed-Solomon decoder, single chip design 87−27207
VLSI robotics vector processor for real-time control 88−63723
VLSI signal processing: from transversal filtering to concurrent array processing, book contrib. 85−45092
VLSI signal processing architectures containing distributed fault tolerance 88−825
VLSI sorters, implementation on high speed shuffle bus 88−26449
VLSI spanning tree generators 85−40839
VLSI systolic array processor simulation for band matrix triangulation 85−61309
VLSI systolic array simulation for load flow throughput enhancement 85−23911
VLSI systolic arrays for image processing, symbiosis 85−11306
VLSI systolic vector quantization processor for real-time speech coding 87−27460
VLSI two-dimensional visual tracking array 88−46322
VLSI yield modelling and defect tolerance, conf., Oxford, UK (July 1987) 88−62905
VLSI-oriented architecture for parallel processing image generation 87−25473
VLSI/VHSIC signal processors, multiple-instruction multiple-data stream architecture 86−1133
VLSI/WSI technologies *(French)* 86−62606
wafer scale integration for generic residue number system structures 86−67246

Si defect annealing and impurity activation during high-intensity As^+ implantation doping 87−32390
a-Si films, preparation in separated ultra-high vacuum reaction chamber 87−31579
a-Si films, sputtered, EPR, optical band gap, IR absorpt. 85−10795
Si, low energy Ar ion etching damage charactn. 87−66889
Si, process-induced point defects, EPR study 87−66891
a-Si, pure and H-doped sputtered films, ESR signals and resist. meas., defect complex studies 86−47327
Si, spin dependent conductivity along dislocations and EPR 85−23404
Si superthin films obtained by Si^+ implantation and annealing 88−7289
a-$Si_{1-x}C_x$:H films prepared by plasma CVD method, props. *(Japanese)* 87−6388
Si:F, amorphous, annealing effects, EPR meas. *(Chinese)* 86−67691
a-Si:F, glow-discharge, phys. props. 85−40463
a-Si:H, P doping, defect creation, photoinduced absorpt., ESR and ODMR studies 86−28146
a-Si:H RF deposited films, elec. and optical props. 86−35358
a-Si:H, RF sputter deposition, EPR, AES and IR studies 88−6503
a-Si:H, Staebler-Wronski effect, influence of impurities, defect creation and annealing 86−48257
a-Si:H, Staebler-Wronski effect kinetics, ESR and photocond. obs. 85−18774
Si:H TFTs, hydrogenation mechanism, H_2 plasma annealing 88−13370
Si:H, amorphous, metastability obs. reviews 88−1348
a-Si:H, electron irrad., recomb., dangling bond defects, optical absorpt. spectra, photocond., EPR meas. 85−50217
a-Si:H evaporated layer production from RF discharge, growth mechanism and props. 87−31562
a-Si:H film prep. by compressed mag. field magnetron sputtering *(Japanese)* 87−23726
a-Si:H films, Hg-sensitised photo-CVD 88−12060
a-Si:H films, evaporated, elec. props., hydrogenation effects 87−38911
a-Si:H films, posthydrogenated, photoconductivity 88−2108
a-Si:H, homogeneous CVD grown, transport props. and defect states 85−1334
Si:H, metastable light-induced defect formation, dopant and impurity incorporation effects 88−1349
Si:H, microcrystalline films with preferred orientation, elec. props. and ESR spectra 86−1678
a-Si:H, neutron transmutation doping 85−55685
a-Si:H, nonradiative carrier recomb., ESR and photocond. studies 88−1405
a-Si:H, prep. by ion bombardment-activated reactive evaporation, H incorporation 88−43918
a-Si:H, reactively evaporated, ion bombardment damage 86−7840
a-Si:H sputtered films, elec. props. and atomic struct., annealing effect 88−1389
a-Si:H/a-SiN_x:H interface system, struct. and electronic props. 87−17775
a-Si:H^+ films, ion implantation during electron beam evaporation 85−45558
Si:H,P, amorphous, neutron transmutation doping 85−6808
Si:O Czochralski wafers, electron traps resulting from O precipitation 87−11340
Si:P, damaged surface layer, ESR and low-temp. transport 86−27840
Si:P, quenching thermodefect prod. Hall effect, EPR meas. 87−11336
Si:Sb, damaged surface layer, ESR and low-temp. transport 86−27840
Si-Si_3N_4, SOI structs. formed by N^+ implantation EPR of defects 87−17957
Si-SiO_2 MOS structures, electron irradiated, spin-dependent recombination 88−44595
Si-SiO_2, SOI structs. formed by O^+ implantation, EPR of defects 87−17956
Si-SiO_2 interface, electronic traps and P_b centres, EPR study 85−12022
Si-SiO_2, interface states, paramag., passivation with H_2 88−71405
Si-SiO_2 interfaces, post-irradiation buildup of interface states, radiolytic H_2 diffusion 86−8886
Si-SiO_2 structure, H^+ implantation effects, ESR study 85−23566
n-SiC (6H), neutron irradiated, defect annealing 85−34545
a-SiC:H RF deposited films, elec. and optical props. 86−35358
Si_xGe_{1-x} microcrystalline films, structural, elec. and optical props., annealing effects 86−66855
a-SiGe:H films, preparation in separated ultra-high vacuum reaction chamber 88−24792
Si_3N_4 films for MNOS EAPROM memories, dangling bonds 85−40534
SiN_x:H, B, CVD films, photoconductivity study 86−36312
SiO_2, amorphous, O vacancy defects, irreversible. thermal annealing behaviour, EPR study 86−35537
SiO_2 core fibre, silicone clad, induced loss charact. under gamma irrad. 85−35526

paramagnetic resonance of defects continued
SiO_2 device oxides damaged by soft X-rays, new positively charged defect, electron spin resonance study 88−19790
SiO_2 optical fiber surface, drawing-induced H-associated defect centres, ESR study 85−1978
SiO_2 optical fibres, drawing-induced defect centres and radiation-induced loss, influence of O_2 86−42248
SiO_2-GeO_2 VAD fibre, sintering atm. effects on defects 88−478
SiO_2-GeO_2 fibres, defect centre form. and disappearance with heat treatments 86−42273
SiO_2-GeO_2 optical fibre, drawing- and radiation-induced paramagnetic defects 87−7067
SiO_2-GeO_2:H optical fibres, hydrogen interaction 88−51439
SiO_2-GeO_2:P, optical fibre glass, struct. defects, transmission losses 88−26784
SiO_2-P_2O_5 optical fibres, γ-irradiated, phosphorus oxygen hole centres 87−7066
SiO_xN_y films, plasma-enhanced CVD growth 87−10485
a-$Si_{1-x}Sn_x$:H films, sputtered, elec. and optical props., annealing effects 86−21155
ZrF_4 based fibre with improved tensile strength, surface flaw form., surface oxidation and devitrification 88−26780
ZrF_4-BaF_2-LaF_3 glass, mid-IR transmitting, electron damage, annealing 86−42209
ZrF_4-BaF_2-LaF_3-AlF_3 optical fibres, gamma irradiation, EPR and IR studies 87−18709

paramagnetic resonance of free radicals
coumarin laser dyes, photodegradation mechanism, ESR obs. *(Chinese)* 85−46347
PMMA films, irrad., ESR study 86−1978
polyethylene, high energy ion irrad., chem. changes, ESR study 88−26604
polyimide, heat treatment study 86−66867
polymer films, ion implanted, structure-majority carrier relationships 85−18107
silica glass optical fibres, γ-irradiated and H_2 treated, 1.52 μm absorption band 87−18649
silica optical fibres, drawing-induced peroxy radicals 87−74692
sucrose radiation dosimeter using ESR of free radicals *(Japanese)* 88−42587
$SrSO_4$:^{241}Am phosphor, trap level spectroscopy studies 85−12720

paramagnetic resonance of ions and impurities
see also paramagnetic resonance of iron group ions and impurities
polyacetylene:Br(I) films, elec. and mag. props., local dopant struct. relation 85−11971
polyacetylene:I_2 films, elec. cond., mag. field depend. 86−14873
quartz crystals, high quality, impurities assessment, production development results 87−32788

LiF:UO_2^{2+} (^{241}Am) phosphors, trap level spectroscopy studies 85−12719
Si:B, F implanted amorphous layers, struct. and elec. props., ESR and Hall effect meas. 87−17727
Si:F, amorphous, annealing effects, EPR meas. *(Chinese)* 86−67691
a-Si:Ge films, elec. and optical props. investig., dopant conc. depend. 86−47329
a-Si:H, evaporated samples, post-hydrogenation, charact. 87−32262
a-Si:H films, compressed mag. field-magnetron sputtering, heat resist. props. 86−52518
a-Si:H films prepared by RF sputtering in He/H_2 88−6511
a-Si:H, neutron transmutation doping, elec. and struct. props. 86−58387
a-Si:H solar cell prep. by laser-induced CVD of SiH_4 87−5471
a-Si:H,Li, interstitial doping, interfacial defect creation, characterisation 88−71385
a-Si:H,O RF sputtered film, photocond. and photoluminescence, O effects 86−47322
Si:P, shallow donors, influence of quenching 87−37867
Si:P-metal interfaces, electron transport, ESR study 88−13007
a-$SiGe_x$:H,F film props., photocond., ESR, XPS, IR and optical absorpt. spectra studies 86−27926
a-$SiN_{1.4}$:H/a-Si:H band offset and electronic struct., AES, XPS and IPES studies 87−53198
$Si_{1-x}(ZnS)_x$:H amorphous films, synthesis and characterisation 87−5455
$SrSO_4$:^{241}Am phosphor, trap level spectroscopy studies 85−12720
TlBr-TlI bulk and extruded fibres, optical aging effects study 88−58048

paramagnetic resonance of iron group ions and impurities
ruby, thermal energy conversion into coherent microwave radiation 85−41371
Al_2OSiO_4:Fe^{3+}, maser characteristics *(Russian)* 85−56466
Al_2SiO_5:Fe^{3+}, andalusite, three-level model, 3 mm range, appl. for travelling wave amplifiers 87−73702
Ba-Y-Cu-O compounds, Josephson junction size, microwave absorption meas. 88−20296
BaO-V_2O_5-B_2O_3-Fe_2O_3 glasses, EPR, IR spectra and DC resistivity 88−19672
BaO-V_2O_5-Fe_2O_3 semiconducting glasses, elec. props., Mossbauer, EPR and X-ray diffr. studies 87−1213
$BaTiO_3$, nonstoichiometry characterisation and influence on dielec. props. *(French)* 88−33433
CdF_2:Y,Yb,In,Mn cryst., AC cond., Mn^{2+} ESR study 85−34529
Gd-Ba-Cu-O, high T_c supercond., microwave study of Josephson junctions 88−13701
$Ge_{20}S_{80-x}Bi_x$:Mn, amorphous semiconductor, electronic props. 88−1394
InP:Fe substrate, intrinsic defects related to ion implantation 88−57447
Si:Fe, intrinsic gettering, EPR and TEM study 87−17698
Si:Fe,O, Fe intrinsic gettering, EPR studies 87−11580
a-Si:$Mn^+(Ni^+)(Fe^+)(Cu^+)$, transport phenomena, elec. cond. temp. depend., thermopower and ESR meas. 86−63052
ZnS:Cu, Br, Mn phosphor, electroluminesc. deterioration, EPR study 85−35621
ZnS:Mn, Cu_xS coated, EPR and brightness studies 88−40057
ZnS:Mn on Y_2O_3 (quartz), thin films, electrolum. charact. and struct. 87−74922
ZnS:Mn thin films, struct. and electrolum. charact., substrate temp. depend *(Japanese)* 86−28971

paramagnetism
see also paramagnetic properties of substances
ferrite-paramagnetic structure, weak signals amplification, effects of saturation and noise 85−62190
free-electron lasers, induced undulator radiation, diamagnetic and paramagnetic effects 87−68535

paramagnetism continued
maser, travelling wave, efficency of paramagnetic crystal *(Russian)* 85−41300
protein solutions meas., dilute, using Faraday balance 85−37734

parameter estimation
2-D planar body motion parameters estimation, nonlinear filtering approach 86−10536
2D adaptive recursive processing scheme using block Kalman filter 87−69359
2D image NSHP model parameter estimation, least-squares/correlation methods comparison 88−21358
2D SAR model fitting, efficient order recursive LS algorithms 88−67456
2D spectrum estimation using noncausal autoregressive models 86−59278
3-D object position estimation/recognition based on parameterised surfaces and multiple views 86−59368
3-D object recognition from single image 85−46899
3-parameter Weibull distribution, modified moment estimation 85−5897
3D complex-object position estimation from range data 87−7825
3D homogeneous anisotropic random fields, fast algorithm for linear estimation 87−55176
3D image restoration using ARM modelling and maximum-likelihood parameter estimation 86−30054
3D motion, estimation algorithms 85−41961
3D motion anal. using shape change information 87−13130
3D motion estimation using sequence of noisy stereo images 88−73367
3D motion parameters, direct estimation from image sequence and depth 86−69156
3D motion parameters, estimation from changing responses of 2D bandpass spatial frequency filters 88−41115
3D parametrized object estimation and recognition 86−10573
3D pattern recognition, adaptive filtering approach, concept 87−2606
3D scene parameter estimation from moving-camera picture sequence *(French)* 88−41106
6-10 kV overhead lines, individual phase transmissions, parameter estimation *(Russian)* 85−59763
6-pulse rectifier/DC motor system, smoothing choke quality measurement under working conditions *(German)* 85−44077
350 MW boiler-turbine-generator set, microcomputer parameter identification system *(Chinese)* 88−48776
abrupt functional failure during radiation testing, parameter estimation 86−34070
AC motor drives, induction and permanent magnet, parameter sensitivity study 88−43417
AC servo system, parameter self-tuning method appl. 86−56783
accelerated life test model parameters, efficiencies of maximum-likelihood and best-linear-unbiased estimates 88−63089
accelerated life-testing anal., convergence problems in numerical techniques 88−70172
acoustic spectrum analyser, spectrum parameter estimation and random signals discrimination 87−47711
acoustic transducers, time delay and transfer function parameters estimation using wideband transient signals 88−75004
acoustics, speech and signal processing, conf., New York, NY, USA (April 1988) 88−69997
active echo location systems, small aperture angle meas. 87−2509
adaptive algorithm using two Kalman filters for parameter estimation and forecasting 88−27979
adaptive ARMA model identification, principal component approach 87−61977
adaptive eigen-spectrum estimation, efficient conjugate directions method 88−73082
adaptive estimation method using instrumental variables and deconvolution 88−59157
adaptive gradient lattice algorithm frequency estimation perform. 85−51646
adaptive IIR filter, development and parameter/global convergence 87−10983
adaptive Kalman filter, for online sensor signal processing, design 88−40985
adaptive L_p nonlinear regression, appl. of Bayes approach 87−72954
adaptive least squares escalator algorithms *(Chinese)* 86−64235
adaptive max. entropy spectrum estimator, average detection performance 87−62090
adaptive nonstationary filtering, tracking error bounds 85−41893
adaptive parameter estimation for finite impulse responsesystems 86−57994
adaptive Pisarenko spectrum estimate, effective estimate 87−19771
adaptive probability distribution estimation based upon maximum entropy 85−39622
adaptive robust estimation based on a family of generalized exponential power distributions 85−5839
adaptive signal processing, modular recursive estimator 88−21286
adaptive smoother-predictors for trackingmaneuvering targets 85−57394
adaptive speech analysis based on a time varying ARMA model *(Japanese)* 88−45989
adaptive stochastic filters with no strict positive real condition 88−14668
adaptive technique for identification of sparse impulse response systems 85−46836
adaptive tracking, noise parameter estimation 87−7749
additive noise and data orthogonality, detection algorithms based on prediction error 86−10446
adjustment parameter adaptation, averaged residual method for meas. systems 87−3363
ADPCM using recursive max. likelihood parameter estimator 85−19318
advanced gas-cooled reactor, modelling and parameter identification 88−23667
α,β tracking filter, effect of missing data on steady state performance 88−53328
ambiguous meas. vector parameter max. likelihood estimation 86−29675
analog circuit fault diagnosis with tolerance, stochastic model 85−17609
analog circuit fault location techniques, review 86−1195
antenna array, parameter estimation of spatially-unresolved fluctuating signals *(Russian)* 88−72954
antennas, mutual and active impedances, crude estimates 85−13268
AR and ARMA models estimation, lattice filter appl. 88−46032
AR spectral estimation, least squares, global vs. local minimisation 85−19465
arbitrary nonstationary signals, time-varying modelling 88−73035
arbitrary observation sequences, resistance in detection and parameter estimation 87−55172
ARMA and AR models, robust estimation, lattice filter appl. 87−55166

parameter estimation continued
ARMA digital lattice filter based on new criterion 87−59738
ARMA digital lattice filter for signal processing 87−47569
ARMA digital lattice filter with white Gaussian input 86−69041
ARMA digital lattice filters, use in signal processing method for non-stationary stochastic signals *(Japanese)* 88−46077
ARMA estimation using the general order two channel fast transversal filter (FTF) algorithm 88−66572
ARMA estimator, perform. eval. 88−73078
ARMA models, maximum likelihood theory of parameter identification 87−2525
ARMA models, parameter estimation methods 85−51639
ARMA models parameter estimation by iterative inverse filtering method, max. entropy spectral anal. appl. 85−57337
ARMA parameter estimation, information tradeoffs in sample autocorrelation function autocorrelation 85−2713
ARMA processes, approximate maximum likelihood estimator based on power cepstrum 88−73059
ARMA processes, order estimation algorithm 88−73053
ARMA spectral approximation methods with weightingfunctions 86−69037
ARMA spectral estimation, recursive modified instrumental variable methods 87−47774
ARMA spectral estimation based on partial autocorrelations, statistical anal. 86−48713
ARMA spectral estimation for noisy signals observed through a linear system 85−46770
ARMA spectral estimation of time series with missing observations 87−2398
ARMA spectrum estimation, dual algorithm 87−62092
ARMA system identification and spectral estimation, iterative NCDE algorithm 86−10356
ARMA time-varying processes, noisy obs., max. a posteriori estimation 88−46029
ARMA transversal RLS filter, fast algorithm 88−34657
armoured reactors, magnetic field and parameter considerations *(Russian)* 85−65296
Arrhenius model, test procedures and parameter estimation 88−11802
Arrhenius model parameter estimation for experimental failure distrib. 87−23406
articulatory-to-acoustic nonlinearities anal., vocal tract shape determ. from formants 85−57306
asymptotic distributional risk properties of pre-test and shrinkage L_1-estimators 87−72950
asymptotic maximum likelihood estimator for source parameters in a multipath environment 88−73108
asynchronous machine, eddy current starters, parameters determ. *(Polish)* 85−9893
asynchronous machine, secondary cores, powder composites, physical phenomena and parameters determ. *(Polish)* 85−9881
asynchronous machines, on-load tests for parameter determination *(German)* 86−12810
asynchronous machines, parameter identification for nonlinear model *(Russian)* 86−6737
atmospheric EM wave propagation, estimation of partitioned set of parameters 87−19816
auditory evoked potentials extraction by filtering and smoothing algorithms 85−53083
automatic signal estimation of modulation type, carrier freq. and symbol rate *(Japanese)* 88−46079
automatic voltage regulators for supply network power transformers, parameter adjustment *(Russian)* 86−66122
automobile engine fault anal., expert system, sensor driven approach 87−43586
autoregressive and moving average processes variance estimation 86−48925
autoregressive parameter estimation appl. to crane scales, signal interference suppression 85−37775
autoregressive process order selection via model-critical methods 87−69110
autoregressive processes, parameter estimation algorithms, accuracy determ. by spectral density simulation *(Japanese)* 88−34712
autoregressive signals in white noise, computation of asymptotic bound for estimation 85−51627
average failure rate and unavailability per demand, estimation from sparse or vague data 87−5306
Bayes reliability measurements appl. 85−15372
Bayesian lower bounds 88−66254
bearing estimation, comparative study of eigenstructure methods 87−55201
bearing estimation, transform based covariance differencing approach 87−63028
Belini-Tartara, Chazan-Zakai-Ziv and Wax-Ziv lower bounds 88−66255
biased expert opinions combination using statistical model 85−22315
binary images, accuracy of consistent perimeter estimates 88−52539
binary sequence distorted by additive noise, estimation of values 85−2725
biomedical engineering control aspects, book 88−24338
bispectrum, optimised parametric estimation 88−73070
bispectrum, parametric estimation method and measure of non-Gaussianness *(Japanese)* 88−40975
bispectrum estimation, digital signal processing framework 87−75827
bispectrum estimation for short length data 86−16435
boiler, once-through type, for power plant, state-space models, controller design appl. *(Korean)* 87−78458
bounded meas. error estimates 88−60520
broadband beamforming on 2D transform plane 88−74058
broadband source direction estimation using a circular array 88−73113
busbar line electrodynamic durability, statistical parameter estimates *(Russian)* 88−5799
BWT generation mode regression analysis *(Russian)* 87−37837
calibration of linear, time-invariant systems, efficient strategies determ. 86−44086
capacitors, cylindrical, impedance and current density parameter anal. using Bessel functions *(Russian)* 87−11080
cardiopulmonary parameters estimation using deep breath method 88−48082
cascaded adaptive notch filtering, Cramer-Rao lower bound 87−52741
CAT radar echoes, spectral parameter estimation in presence of fading clutter 85−52401
censored life-data analysis using linguistic variables 88−43748
censored sample constant hazard rate model, empirical Bayes estimation of mean life 87−23402
censored type-I samples from mixed exponential population, asymptotic distrib. of Bayes estimators 86−34120

edge detection using the directional derivatives of a correlated random field model 87−55320
edge preserving image restoration, nonrecursive filter use 86−10522
edge preserving image restoration with robust image modelling techniques 87−55319
EEG classification during neurosurgery, comparison of parametric identification and Kalman filtering 86−60785
EEG processing, parameter extraction during riskful neurosurgical operations 85−64603
EEG signals, estimation of entropy and mutual information of continuous distrib. 85−59315
EEG time series, autoregressive models order estimation 85−48284
electric conduit protection, parametric study *(Russian)* 85−59780
electric drive control system, flexibly coupled, parameters selection and characts. determ. *(Russian)* 85−32725
electric energy demand forecasting and dynamic modelling, Hungary 88−17096
electric machine design for independent unbranched electromechanical systems 85−43928
electric machine estimation and control theory development trends 87−58028
electric machines, model parameters identification by stochastic optimisation *(German)* 88−69265
electric machines, parameter identification using stochastic optimisation and global probability methods *(German)* 88−69267
electric power systems, parameter estimation method from system responses *(Croatian)* 88−42740
electrical insulation strength, statistical eval., dielectric tests, parameter estimation *(Polish)* 87−32768
electrical machine parameters, Kalman filter estimation 86−26067
electro-optical target identification, aspect angles estimation by Kalman filtering 87−75845
electrodeless discharge lamps, parameter determination *(Russian)* 85−39296
electromagnetic transducer, solenoid type, selection of electric circuit parameters 85−42981
electronic equipment quality control, theoretical method using parametric information 85−10532
electronic equipment testing using polynomial-shaped meas. signals 85−33163
electronic systems testing, electromagnetic signal processing appl. 87−54589
electrostatic precipitator performance model accuracy and parameter estimation procedures 87−51046
elementary phase spatial microwave signals *(Russian)* 88−21198
energy acoustic system, functional method of parameter estimation 87−19774
ENG signal processing using linear prediction *(Korean)* 88−48150
e-median polish algorithm 87−72953
equipment testing in linear operation *(Hungarian)* 87−58630
error analysis for the Kalman filter applied to data corrupted by multiplicative noise 88−34731
errors-in-variables model, moment estimators 87−8498
ESPRIT and Toeplitz approximation methods, theoretical equivalence 88−73083
exponential signals parameter estimation, state-variable balancing and Prony's method 87−62028
exponential smoothing appl. 85−7852
exponentially damped sinusoidal signals in noise, max.-likelihood parameter estimation 86−16333
F-region, cross-correlation analysis and interpretation of spaced-receiver measurements 88−54742
failure diagnosis of technical systems using estimated parameters 85−39047
failure models evaluation through step-stress tests 87−23405
fast adaptive spectrum estimation: Bayesian approach and long AR models 87−62093
fast recursive estimation of the parameters of a space-varying autoregressive image model 85−46935
fast spatial recursive algorithm for 2D adaptive least squares filtering and prediction 88−73173
fault diagnosis by random data processing *(Japanese)* 88−31561
filtering, weighted normalized frequency domain LMS adaptive algorithm 88−66472
fleet equipment reliability, confidence limits 87−10217
flightpath reconstruction and systematic radar errorestimation from multi-radar range-azimuthmeasurements 86−59929
flow velocity determ., based on correlation principle *(German)* 86−31719
forest stand delineation/estimation from satellite images, segmentation method 87−75927
frequency estimation of single tone in noise from discrete Fourier transform phases 87−2528
frequency estimator for single complex sinusoid in white Gaussian noise 88−73049
frequency-wavenumber spectral estimation ofnon-planar random fields 86−16388
fundamentals and random errors 86−4933
fuzzy c-means clustering and maximum likelihood algorithms for finite mixture distributions 88−63158
gamma distribution, robust estimators for scale and shape parameters 88−63153
Gaussian ARMA processes with periodically missing data, asymptotic Cramer-Rao bound 86−59184
Gaussian autoregressive processes, exact Cramer-Rao bound 88−14566
Gaussian noise, generalised model, parameter estimation 87−47856
Gaussian signal restoration in Gaussian noise, consistency of minimum mean square error estimate 87−61995
Gaussian stationary processes, hybrid-sign correlation coeff. estimator perform. 85−62936
generalised cross correlator for passive time delay estimation problem 85−46764
generator parameter estimation and power system dynamic equivalents using Kalman filters *(Chinese)* 85−9826
Gibbs random fields, parameter estimation approach 86−16557

parameter estimation continued
gray-level images with multiplicative noise, stochastic relaxation for maximum a posteriori restoration 87−62287
hard limited process, spectral density estimation from obs. 86−3925
harmonic retrieval problem, perturbation anal. of SVD based method 86−10442
harmonic signal estimation, convergence rate of maximum likelihood spectral estimate 88−73068
HF basic circuit reliability, estimation from modal parameters 85−36014
HF radio channel simulation, sensitivity anal. 87−26794
hierarchical Fisher and moment-based pattern recognition 85−30310
high resolution frequency estimates, fast computation 87−62025
high resolution model based 2-D spectrum estimation 88−72972
high resolution spectral estimation 87−62084
high-resolution array processing, number of signals determ. 88−73126
histogram anal. using scale-space approach 87−39898
histogram analysis using a scale-space approach 86−3935
historical remarks on signal detect. and signal parameter estimation 88−21185
Hough transform modifications for lines 86−4060

Netomac simulation package for power system anal. and parameter identification *(German)* 88−68733
NMR spectral parameter estimation by deconvolution 87−62034
noise corrupted autoregressive series, spectral estimation statistics 86−16375
noise model identification in electrical measuring system 88−15887
noisy autoregressive signals, recursive parameter estimation 86−59275
noisy meas. system model, consistent structure determ. 86−31109
noisy measurement system model, consistent structure determ. 85−37396
noisy signals, autoregressive spectral estimation, aggregate group approach 88−73052
noisy sinusoid freq. estimation, spectral inversion method *(Spanish)* 87−69181
noisy speech, unbiased estimation of LPC parameters 85−41887
non-stationary signal processing, time-varying parameters estimation, deterministic method *(Japanese)* 86−16355
non-stationary signals, block processing regarding the prior estimated time-varying charact. *(Japanese)* 88−40976
noncausal autoregressive model fitting, selection of maximum cumulant lags 88−73066
noncausal autoregressive signal plus noise models, fitting to noisy non-Gaussian linear processes 87−55077
noncausal blurs restoration, image and blur parameters identification 86−10523
nonGaussian processes using cumulants, state-space and input-output identification results 88−40932
noninformative parameters, accuracy of approximation of Bayes estimates 85−51616
nonlinear continuous systems, fractional horsepower motor diagnosis appl. 85−39046
nonlinear damped oscillating circuits, parameter estimation *(Slovak)* 86−27036
nonlinear discrete systems, periodic modes, parameter determination *(Russian)* 88−59005
nonlinear distributed estimation 86−3739
nonlinear dynamic systems parameters meas., Kalman filter algorithm 87−61855
nonlinear electromechanical systems, fault diagnosis by continuous time parameter estimation 86−24302
nonlinear estimation in presence of non-Gaussiannoise 86−10447
nonlinear estimation of dynamic shift and shape parameters from set function measurements 85−8455
nonlinear estimation of stochastic signals using algorithms with adaptive parameters 88−3036
nonlinear filtering algorithms appl. 87−50626
nonlinear parameter estimation with segmented data:trajectory estimation with biased measurements 87−7765
nonlinear systems, distributed-parameter-model structure determ. *(Russian)* 86−13954
nonlinear time-varying discrete-time system, dynamic realizations of sufficient sequences 86−16075
nonoptimum parameter estimates, accuracy anal. 85−41815
nonstationary ARMA models via simultaneous AR and MA estimation 87−19827
nonstationary random processes and systems, recursive identification 87−47780
nonstationary signals, time-varying AR-modelling 87−47758
nonstationary signals identification, recursive vs. global methods 87−47789
nonstationary signals on block processing, unbiased parameter estimation 88−73037
nonuniformly spaced signal meas. for system identification 88−52465
nuclear reactor turbine system, model reduction technique appl. 88−5433
nuclear test seismic event detection and azimuth estimation 86−60930
number of signals estimation by chi-square statistics 88−73057
object motion parameter estimation from noisy images 86−10559
object motion parameter estimation from noisy images 86−43312
object position/displacement estimation in space, distance constancy approach 88−66633
objects recognition, modelled by planes/quadrics of revolution, depth map processing 88−66686
observation noise, statistical characteristics estimation based on signal data processing 87−47779
offset quadrature PSK, symbol rate detectability by delay-and-multiply receiver 88−52332
optical fibre transmission properties, dynamical model parameter identification 87−74666
optimal deconvolution filter for high-resolution NMR spectral parameter estimation 88−72983
optimal estimation of scale parameters 87−36585
optimal linear-quadratic systems for detection and estimation 87−55173
optimal recursive spectral estimation methods, survey 86−59266
order statistic filters, efficient design 87−39858
parameter estimation continued
overhead power lines, compact controlled, parameter calc. 87−21906
overhead transmission lines, conductor-earth deicing circuit, parameters and equivalent circuits *(Russian)* 85−59761
overvoltage parameter investigation for inductive transformer current interruptions, digital simulation 88−11276
parabolic equations inverse problems, regularization and discretization control 86−46278
parameter spaces searching with noisy linear constraints 88−73349
parametric modelling using rational transfer functions 87−47763
paraplegics, EMG-controlled stimulation limb function discrimination using Karhunen-Loeve expansions 87−29777
parsimonious ARMA parameters, identification of speech production model 88−59051
partial discharge measuring circuit, pulse method for parameter determination *(German)* 85−12438
passive linear two-ports parameter identification, low-loss meas. appl. 88−15994
passive networks, parameter calculations using nodal analysis and matrix equations *(Russian)* 85−17614
pattern recognition and acoustic imaging, conf., Newport Beach, USA (Feb. 1987) 88−24321
peak frequencies estimation, using adaptive linear prediction weights 87−2510
permanent magnet synchronous motors, parameter estimation and dynamic performance 86−39748
phase distribution function parameters, estimation 85−13566
photodetection process, parameter estimation of receiver 87−49753
picture processing, contour element parameter identification *(Italian)* 87−13081
Pisarenko's nonlinear spectral estimators, regression formulation 87−47767
Pisarenko harmonic decomposition, recursive method *(French)* 88−21282
Pisarenko line spectral estimate, reliability 85−46860
plane wave tone parameters, maximum likelihood estimation 88−27900
Poisson noise adaptive filtering, local statistics appl. 88−46298
polarimetric target model with backscattered EH fields, real-time, statistical approach 88−46041
portable time stores scales comparison, precision system parameters estimation *(Russian)* 88−21052
portable total artificial heart driver, control and estimation techniques appl. 86−12036
power circuit parameter estimation using iterative nonlinear least squares algorithms 88−70532
power consumption prediction for irregular days e.g. holidays *(Russian)* 87−78032
power load modelling and forecasting, recursive optimal estimator 87−9141
power overhead lines, parameter selection and power capacity improvement *(Czech)* 87−15311
power overhead transmission lines, modal parameter calculation for multiconductor systems 85−38518
power spectral density estimation, effect of record length and windowing 85−51631
power system, static load model, parameter estimation using Newton's method 88−75067
power system control, thermal unit input-output curves, online parameter identification 86−56377
power system equivalent voltage and reactance estimation using extended Kalman filter 87−71479
power system parameter estimator, microcomputer based, in presence of harmonics 88−68753
power system parameters probability anal. using nodal equations *(Russian)* 85−64867
power system peak demand forecasting, econometric approach 86−61101
power system security assessment, parameter identification 87−35547
power system state estimation on large-scale elec. utility 87−57569
power systems, dynamic equivalent load model using parameter identification technique 87−77940
power transformer, tap position, real-time processing 88−23995
power transformer parameter estimation from time-domain data 86−66126
power transformer parameter estimation of physical models from time-domain data 88−24019
predictive least squares filtering technique 87−62004
programme sound signal distributions, shape parameter estimation using numerical tables and graphs 88−41794
progressive-censored tests, Weibull distrib. parameters estimation using statistical methods *(Italian)* 86−13544
proper orthogonal projection-multiple signal classification (POP-MUSIC) 87−27471
pseudo Bayesian estimates, parametric stability (robustness) 87−12796
PSK-modulated carrier phase estimation, matched nonlinearity 86−59198
pulse interference action stability, parameter estimation of state 86−29682
PWM invertor-fed induction machine parameter identification 87−22368
PWM invertors, deadbeat control with parameter estimation using voltage sensor 87−22588
quadratic discriminant function, avoiding peaking phenomenon 87−48094
quadratic signal processing, distribution of positive-definite Gaussian quadratic forms 88−27912
quasi-periodic sequences, parameter estimation 88−73060
quasilinearization and terminal observation 86−62071
radar, clutter residuals, modelling and estimation 85−37090
radar clutter suppression performance of lattice prediction error filters using variations of Burg's algorithm 86−17435
radar signal processing, parametric modelling *(French)* 85−57505
radar system, super-resolution spectral estimation technique using staggered pulse repetition freqs. 86−17432
radar target signatures model, real-time simulation 85−58172
radio signals parameter meas., covariance functions estimation using thinned samples 87−48854
radio telephone equipment automatic testing, signal distortions evaluation, correlation method 86−37702
random censoring model with incomplete information, exponential mean lifetime estimation 88−63088
random field 88−40956
random field identification from sample 88−73207
random fields estimation theory, analytic and numerical results 87−55177
random parameter estimation, lower bound on mean square error 86−16076
random processes, parametric anal. of degree of synchronism *(Russian)* 88−283
random sequences, Bayes discrimination and estimation 86−29877

parameter estimation continued
random shape signals detection, sequential method with simultaneous parameter estimation 86−48939
range image data, 3D, segmentation 86−16560
rate estimation of random pulse trains by microprocessor based rate meter 85−37461
rational parametric coherence estimation via convolvedcorrelations 86−16432
rational Volterra models, parameter estimation, appl. to inverting amplifier *(Chinese)* 87−65774
Rayleigh distribution parameter estimation 86−69991
Rayleigh spectral estimation, singular value decomposition-like procedure 88−73065
RC oscillators, metrological parameter anal. using linear peak clippers *(French)* 88−18976
re-expression of data for normal distribution statistics 87−10195
real-time, based on Doppler frequency shifts 87−47683
real-time speech synthesis model, estimation of articulatory trajectories by Kalman filtering 87−47586
recursive descent tree traversal algorithm for finding point correspondences between two frames 88−66764
recursive estimation, lattice implementation of OBE algorithm 87−47859
recursive estimation algorithm with information-dependent updating, statistical props 88−70205
recursive estimation algorithm with information-dependent updating to ARMAX and ARMA models 87−61979
recursive estimation techniques for speech processing 88−59050
recursive maximum-likelihood algorithms, performance study 86−3881
recursive parameter estimation algorithms, array processor implementation 85−51652
recursive parameters estimation of non-stationary AR signals disturbed by white noise 87−47787
recursive process parameter estimation, guaranteed, a priori information approach 87−72911
recursively defined stochastic processes, limiting props. of distribs. 85−49442
recursively updated lattice filters, event detection 86−10443
reflection seismology, modelling problems 86−60926
refrigeration, HVAC system, modelling and simulation 87−72619
regional cerebral blood flow estimation from tomographic diffusable tracer clearance curves using instrumental variable techniques 88−23037
regression model with long memory errors, parameter estimation 86−52354
regular time series of degenerate rank, maximum entropy spectral estimation 85−2716
reliability, bayes interval estimation for the shape parameter of the power distribution 87−23401
reliability, parametric point estimation for a doubly-truncated Weibull distribution 88−70181
reliability analysis using available information *(German)* 88−235
reliability growth models 87−58709
reliability modelling, generalised gamma distribution, maximum-likelihood parameter estimates determ. by numerical root isolation 88−31541
reliability theory, Bayes sensitivity analysis when using the beta distribution as a prior 88−63090
ring transmission systems, power transmission parameter eval. 86−50944
robust image modeling techniques with an image restoration application 88−73184
robust spectrum estimation, 2D 88−66478
root-mean-square error, parameters of electronic devices using least squares method *(Russian)* 88−49746
rotation and scale invariant texture classification 88−73282
satellite altimeter signals, simulation and parameter estimation 85−58260
satellite tracking, trajectory estimation with angle-only measurements usingmultiple sensors 86−69834
saw material thickness parameter estimation from restricted number of blade meas. 88−22777
Schwartz convertor, transient anal., J3 SCR model 85−32572
SCR model for continuous topology CAD and computer aided anal. 85−10920
search and rescue satellite aided tracking, spectral estimation methods 85−58201
seismic data processing, regression model, graph-theoretic models 86−59267
seismic signal processing, two-parameter estimation schemes comparison 86−64273
self learning detection-estimation of abrupt and multiple changes of ARMA models 87−47786
semiconductor diffusion furnaces microcomputer control system, design aspects *(Polish)* 88−6038
semiconductor diode parameter estimation, programs for TI-58 and Sharp PC 1211 *(Czech)* 86−15109

sensor characteristics modelling, interdependence of physical, technological and theoretical fundamentals 85−37611
sentence recognition system, training of phoneme models 87−61732
sequential and adaptive algorithms for noise cancellation 88−72968
sequential estimation of intensity of renewal processes 86−22863
sequential estimation of parameters of diffusion process 86−22864
sequential stereo image pairs, robust algorithms for motion estimation 86−4043
shape determ. from object rotation 86−10575
shape estimation using calibration object, comparison with photometric stereo method 88−52559
shift-invariant nonlinear null filters for cancellation of autoregressive signals with unknown parameters 87−69215
short-time Fourier transform using a bank of low-pass filters, instantaneous freq. estimation for FM signals 85−46772
short-time unbiased spectrum estimation algorithm anal. 85−46768
sign-sign adaptive algorithms, stability problem 87−27526
signal and noise variance, fast estimation 86−3926
signal detection in non-Gaussian noise, using adaptive threshold detector 85−25087
signal filtering efficiency in case of multiplicative interference 87−47723
signal modelling, nonlinear autoregressive models testing 88−73046
signal parameter estimation, direction-of-arrival using ESPRIT and MUSIC, comparison 87−62127
signal parameter estimation via rotational invariance, ESPRIT approach 87−8347
signal parameters estimation using rotational invariance techniques, ESPRIT 87−55119
parameter estimation continued
signal phase estimation in nonparametric situation 85−51611
signal power upper bound in parameter estimation 85−46781
signal processing, adaptive, rule-driven algorithms 87−55245
signal processing, harmonic retrieval problem, cumulant-based approach 88−73044
signal processing, physical approach using structurally passive digital filters *(Italian)* 87−69090
signal processing, subspace rotation approach 86−69076
signal processing by nonparametric maximum-likelihood method 85−51612
signal registration, variable time delay estimation emphasis 88−14677
signal restoration from data aliased in time 85−46769
signal source location and spectral parameters estimation using sensor array, with coherent interference 88−21267
signal subspace methods for finite data lengths, resolving power 86−16444
simulated annealing for max. likelihood parameter estimation 88−73124
simulation parameter optimisation routine for use in real time nuclear power plant simulation 86−45073
simultaneous confidence bands for a class of 2-D spectralestimates 86−16387
sine waves parameters in coloured noise case, statistical anal. of nonlinear least-squares estimators 88−73074
sinewave parameter estimation algorithm, waveform digitiser effective bits meas. 88−59181
sinewave signal, initial phase estimation over extremely short record length 88−14698
single-conductor cable with metallic sheath in homogeneous ground, parameter calculation 85−43604
single-mission systems, logarithmic reliability growth model 85−5843
singular filtering problem, geometric approach 86−23036
singular value decomposition based algorithms, threshold anal. 88−73076
sinusoid, frequency estimation, fast maximum likelihood algorithm based on Newton's method 85−46767
sinusoid extraction from white noise, Prony modelling of higher-order correlation function 88−73077
sinusoid in broadband noise, frequency estimation based on iterated autocorrelation function 85−46766
sinusoidal signals, exponentially damped and noise-corrupted, parameter estimation *(French)* 88−21253
sinusoidal signals, highly damped, in additive noise, parameter estimation accuracy improvement 88−73055
sinusoidal signals, nonstationary, in coloured noise, freq. estimation *(French)* 88−21251
sinusoidal signals in coloured noise, freq. estimation *(French)* 88−21254
sinusoids and chips estimation from interrupted time intervals 87−62087
sinusoids estimation in coloured noise, Kalman filter algorithm 87−62005
sonar delay estimation improvement factors due to multiple measurements and a priori information 85−47608
sonar parameter estimation in a constrained state space 85−3523
sonar split array bearing estimation, appl. of freq. domain LMS adaptive filter 85−47609
sound field, logarithmic least mean square estimation 87−63080
source-parameter estimation by approximate maximumlikelihood and nonlinear regression 85−63034
space antennas, spline based identification 86−59147
space-time signal processing, radar target anal. 88−8766
spaceborne SAR, Doppler parameter estimation 85−25929
spatial signal processing, high-resolution identification and covariance matrix estimation *(French)* 88−21255
spatial spectral estimation using multiple beam antennas 88−8627
spatially varying diffusion coefficient for parabolic, partial differential eqns. 86−13701
speaker independent phoneme recognition, articulatory parameters estimation by table look-up 87−19596
spectral analysis of signals by linear filtering in nonprobabilistic framework 86−54511
spectral density of stationary random process, spectral windows use for parameter estimation 87−13008
spectral estimation, appl. of maximum-entropy and maximum-likelihood principles 87−55169
spectral estimation, covariance-constrained maximum likelihood method 87−55168
spectral estimation, modern, theory and appl., book 88−31283
spectral estimation algorithm for white noise, sequential regression based 87−69095
spectral estimation by covariance lattice algorithm for instrumental variable recursions 86−69084
spectral estimation from nonconsecutive data 88−27911
spectral estimation using principal components in tandem with the maximum entropy technique 85−51642
spectral estimation via minimum energy correlationextension 86−16376
spectrum estimation, general lower bound 85−2715
spectrum estimation, sensitivity anal. of state space methods 87−62020
spectrum estimation by square-root filtering 87−62089
spectrum matching method modification *(Japanese)* 86−37105
spectrum model-order determination via significant reflection coeffs. 86−16433
speech, analysis-synthesis hidden Markov model 88−66409
speech coding, continuously adaptive LPC approach 88−66415
speech coding, recursively estimated parameters 86−48841
speech output systems, storage requirements minimisation using optimal parameter approx. *(German)* 86−69985
speech processing, noise suppression by spectral magnitude estimation, mechanism and theoretical limits 85−57303
speech recognition, automatic, hidden Markov models, explicit modelling of state occupancy 86−16180
speech recognition, French, probabilistic language model at syntactic level 85−36234
speech recognition, vector quantisation, Markov models and Viterbi algorithm appl. 87−27254
speech recognition hidden Markov model parameters, max. mutual information estimation 87−19441
speech recognition with continuous-parameter hidden Markov models 88−66343
speech signal formant tracking with quasilinearization 88−66405
speech signal parameter estimation; noise-corrupted, nonstationary model *(French)* 88−21153
speech signals, fundamental frequency estimation, appl. of spectral peaks extraction method 87−69068
speech synthesis, sinusoidal representation, quasi-optimal anal. 88−21156

parameter estimation continued

stochastic procedures, convergence 88−49638
stress-strength models, Bayes estimation of system reliability 86−46134
structured matrix approximation problems, simultaneous frequency and wavenumber estimation from 2D array data 88−70194
superconducting generators, equivalent circuit parameter estimation *(Russian)* 87−15638
superconducting generators, parameter identification using machine models 88−48871
superimposed signals using EM algorithm 88−46030
surface classification, hypothesis testing and parameter estimation 88−73317
surface shape estimation of 3D objects from multiple 2D images 86−4015
switching circuit parameter optimisation for thyristor turn-off in electric drive power amplifiers *(Russian)* 85−17163
symbol-rate detection by a power-series-nonlinear envelope detector receiver 88−52333
synchronous generators with rare earth permanent magnets, electromagnetic design *(Russian)* 86−26018
synchronous machine, dynamic response, parameter identification by three-phase short cct. test 85−32465
synchronous machine parameter determ. from standstill DC test 87−42872
synchronous machine parameter estimation methods, survey 88−62328
synchronous machine parameter tracking and fault detection using observers 86−51609
synchronous machine transient subtransient parameters, least-square estimation from biexponential transient test curves 87−30546
synchronous machines, computer aided parameter determ. from DC tests at standstill *(German)* 86−56734
synchronous machines, observer construction for parameter tracking and incipient fault detection 86−61495
synchronous phase estimation of a signal corrupted by a close sinusoid 88−66569
systolic array processing for order and time recursive generalized least-squares estimation 87−13018
target parameter estimation in the near field with two sensors 88−72921
target parameter estimation with passive sensor in presence of false detections 88−9632
telephone traffic parameters estimation in exchange 88−3445
telephone zone network design, parameter selection 86−30262
testability numerical evaluation improvements 87−70341
texture synthesis using 2-D noncausal autoregressive models 85−46932
texture synthesis/compression using Gaussian-Markov random field models 85−57477
textured and noisy images, modelling and segmentation using Gibbs random fields 87−39892
textured images, fast technique for automatic segmentation and classification 88−66743
textured images modelled by Markov random fields, segmentation/global parameter estimation 87−13135
thermal network identification and modelling basedupon digital filter synthesis procedures 86−52968
thermionic electricity generating elements, parameter and distribution calculations 85−39219
three dimensional object recognition, iterative Hough procedure 85−13621
three-dimensional motion parameters estimation of rigid body from TV images 85−13595
thyristor invertor optimisation by random search with reset for failed steps *(Russian)* 86−56834
time delay between two signals with unknown relative phase shift, least squares estimation 85−46778
time delay estimation between two phase shifted signalsvia generalized cross-correlation methods 85−51625
time delay estimation performance in a scatteringmedium 86−36994
time response of analog to digital interface, identification and model *(Romanian)* 88−19214
time series, autoregressive parameters estimation using modified Yule-Walker eqns. 85−63039
time series analysis, numerical solution of nonlinear system 85−33357
time series analysis using variable transformation method 87−176
time varying parameter estimation, recursive adaptive algorithms 87−47817
time- and direction-of-arrival estimation, adapted MUSIC algorithm 87−8348
time-delay estimation performance in a scattering medium 85−46765
time-domain signal resolution problem 87−27427
time-varying coherence functions estimation 87−19828
time-varying model for speech signals 88−66356
Toeplitz-constrained covariances, iterative maximum-likelihood estimation 87−44121
tomographic and spectral analysis, unified approach 85−51641
transforms, localised noise propagation effects 88−46213
transient HF signal estimation with reflective nondispersive data, model-based approach 86−54512
transient signals reconstruction based on bispectrum estimation techniques 88−73073
transistor, algorithm for determ. of worst case parameters 85−23745
transitory shape signals, parametric modelling and classification, automatic *(French)* 88−21272
parameter estimation continued
transmission line discontinuity estimation using 'Pecstrum' spectral detection algorithm 86−24738
transmission line protection, digital protective relaying through recursive least-squares identification 88−75173
transmission line route planning, topographic model parameter identification *(Russian)* 86−56406
turboalternator system, structural identification using instrumental variable method 88−23895
turbogenerator, large size, parameters determ. 85−32446
turbogenerator dynamic parameters, expt. determ. using computer aided anal. 86−51585
turbogenerator model construction and parameter determ. 87−42873
TV images, isolated rigid object 2-D motion parameter, estimation algorithm 85−36405
two generating stations, dynamic equivalent using parameters estimation algorithm 85−64849
two machine interconnected power system, hierarchical self tracking control 86−6257
two-parameter exponential distrib., optimum two-sided confidence interval for location parameter 86−250
two-stage estimation of receivers formed image inhomogeneity 88−34787
unbiased parameter estimation of nonstationary signals in noise 87−12984
underwater acoustics, track parameter estimation from multipath delay information 87−69117
universal coding, information, prediction, and estimation 85−2752
unknown modulated signal, carrier freq., modulation type and bit rate estimation 88−8786
utility operating generator stability constant determ. by quasi-linearisation and Kalman filtering 86−12796
variance estimation and adaptive quantization, maximum likelihood estimator 85−57183
vibrational tests, automated, adaptive spectral-density control algorithm for a stationary random process 88−60552
viscoelastic testing process, adaptive controller design 88−37950
visual motion meas. convected activation profiles 88−73368
voiceband data modem, rapid equaliser training and carrier acquisition 87−55883
Walsh and block-pulse operational matrices in distributed-parameter and delay systems 86−36946
Walsh function input signals for parameter identification in identification systems 86−16322
water turbine, multiprocessor-based fault tolerant adaptive parameter-optimised governor 86−19156
Weibull, lognormal and gamma distribs., 3-parameter, estimation 85−44592
Weibull distrib., 2-parameter, estimation using sample statistics and jack-knife 88−31622
Weibull distribution, 3-parameter, minimum-distance estimation of parameters 86−34116
Weibull distribution maximum likelihood estimators, tolerance and confidence limits 87−155
Weibull distribution parameters, Bayes shrinkage estimators 86−34121
Weibull-Gnedenko distribution parameter estimation 88−31624
white discrete-time process, nonparametric estimation algorithms based on inputquantization 86−16077
wideband direction-of-arrival estimation using the ESPRIT algorithm 88−73116
wideband transmission lines parameters meas. and identification, using picosecond video pulses 85−4097
Wiener estimated filter, noise reduction using noise references 86−59281
WWER reactor, simulation of Xe-I oscillations *(Russian)* 86−18988
Yule-Walker equation, overdetermined high-order, anti-resonance frequencies estimation 87−19476
Yule-Walker estimates, new class of high order 87−61980

discretised PDEs, parallel solution of bidiagonal systems 88−49769
dispersion eqns., 3-level explicit schemes *(Chinese)* 87−10342
domain decomposition and relaxation methods 87−23580
domain decomposition for elliptic partial differential equations with Neumann boundary conditions 87−65444
dual reflector antennas, design and anal. using simultaneous nonlinear partial diff. eqns. *(Chinese)* 88−34430
dyadic calculus extension with fractional order derivatives 87−222
dynamic shape anal. 86−64321
dynamically adaptive grids in numerical soln. of PDEs 85−33366
dynamically-adaptive grids in the numerical solution ofpartial differential equations 85−49526
Dynamo effect, mathematical aspects *(French)* 85−24720
EADI scheme, fast selection of optimum extrapolation parameter 85−22392
eddy current problems, skin depth-independent finite element method 87−39298

partial differential equations continued
elastic curvilinear rods acted upon by pulsed moving load, coupled vibrations *(Russian)* 88−5919
electric field distributed parameter modelling, partial diff. constitutive state equations, construction 87−54470
electric field distributed parameter modelling, partial diff. constitutive state eqns., solution 87−54471
electric motors, solving linear partial diff. eqns. with piecewise continuous coeffs. by multigrid FEM 88−17531
electric water heating load prediction statistical model 87−58452
electrochemical, numerical analysis of free boundary problem 86−34245
electrofluidised beds, one dimensional small signal wave propagation and reflection anal. 85−24747
electromagnetism, nonlinear hyperbolic eqns. associated with classical theory 85−46514
electroplating, electric field potential distrib. *(Russian)* 87−19119
elliptic eqns., mixed FEM postprocessing schemes 88−56198
elliptic eqns. with smooth interfaces, fitted and unfitted FEM 87−73018
elliptic eqns. with variable coeffs., convergence of finite difference schemes 87−73019
elliptic equations, Cauchy problem, nonlocal differences 85−60928
elliptic equations and decomposition 88−31688
elliptic equations finite element approximation 88−70277
elliptic partial DEs, asymptotic expansion and extrapolation *(Chinese)* 87−65434
elliptic partial differential eqns. soln., iterative boundary method, electron device simulation appl. 88−13300
elliptic PDEs, a posteriori error estimators 85−49513
elliptic PDEs, iteration functions 88−70272
elliptic PDEs, solution using capacitance matrix algorithm 87−72993
elliptic problems, second order, optimal triangular meshing 86−26783
elliptic problems, second order, superconvergence phenomenon in the finite element method arising from averaging gradients 85−22433
elliptic problems with singularities, optimal order finite element methods 85−49516
elliptic system superconvergent finite element scheme 87−73010
elliptic-PDE discretisation, iterative methods for singular linear system soln. 85−54363
EM environments irradiated by unknown sources, lattice approach 88−2608
EM field FEA using first-order elements for potential and higher orders for field 88−58770
EM field in ferromagnetics, calc. method, stability conditions 88−27371
EM wave scattering from gratings embedded in inhomogeneous and lossy dielectric 88−27491
equidistribution schemes, Poisson generators, and adaptive grids 88−18648
error estimates related to singular perturbations of first-order equations and systems 87−65379
evolution equations, numerical soln. by method of discretization in time 87−44253
evolution equations, semigroups in spacc-time, andperturbations 85−49510
evolution equations of hyperbolic type, numerical methods 87−44252
explicit group iterative methods for solving ellipticpartial differential equations in 3-space dimensions 86−19979
explicit Runge-Kutta-Nystrom methods, absolute stability regions 85−5959
exterior problems, numerical solutions 87−44248
external mixed potential problems, exact solns. 87−5311
FEM, high-order local convergence rate by mesh refinement 86−7709
field theory problems, numerical solution on basis of space matrices 87−5366
finite difference methods and ordering of mesh points 87−36672
finite difference methods for numerical soln. of PDEs, book 86−52182
finite difference scheme for a class of first-order elliptic partial differential equations 85−44650
finite element methods 88−70261
finite element methods for numerical soln. of partial DEs 87−36673
finite-difference method for 2-pt. BVPs over semi-infinite Orange 86−57398
first order hyperbolic systems in space variables, finite element method 88−63244
first order parabolic partial DE's, splitting methods 87−23571
first-order Hamilton-Jacobi eqns., asymptotic behaviour of viscosity solns. 86−34264
four colour cell relaxation scheme on MPP, FLEX/32, and CRAY/2 88−6422
fourth order alternating direction method based on the (2,2)-Pade approximant 88−24665
free electron laser, average photon number, wiggler length dependence 88−14222
free electron laser transverse correlations in start-up from noise 87−12513
free-boundary problems, generalised moment representation 88−355
full-wave computerised tomography, resolution limits 85−9162
fully discrete Galerkin methods for the Korteweg-de Vriesequation 86−62163
fully vectorizable SOR variant 87−73024
Galerkin approximations of abstract parabolicboundary value problems with rough boundary data−L_p theory 86−66766
Galerkin approxs. for 2nd order hyperbolic eqns. with dissipation convergence 85−49518
Galerkin method for a nonlinearhyperbolic-parabolic coupled system *(Chinese)* 86−34255
Galerkin method for nonlinear Sobolev eqns. in 1D space, error estimates 85−60920
general approach to soln. of partial DE systems 88−63251
general approach to solution of partial differential equation systems 87−65422
general shell problems, approximation 88−6420
generalised FEM, COMPELL package for problem solution by input data 86−40683
generalised Galerkin method for nonlin. hyperbolic eqns. *(Chinese)* 86−62172
geometrical optics and beamforming lenticular antennas, nonlinear partial differential equations minimisation 88−27630
glass fibres, arbitrary cross section and curvature, EM wave anal., analytical 3D method 87−54049
global error estimation in the method of lines for parabolic equations 88−63264
global extrapolation of a first order splitting method 85−60926
grid. eqns., soln. methods, survey 85−341
group explicit methods for hyperbolic equations 88−63249
group explicit methods for the numerical solution of the wave equation 88−63250
partial differential equations continued
gyrotropic media, field representation by one scalar superpotential 88−27377
Hamilton-Jacobi eqns., approx. of solns. 85−5961
Helmholtz eqn., combined FEM-macro element solns. 87−5382
Helmholtz equation in 3D, fourth-order-accurate Fourier method 88−11923
Hermite bicubic collocation eqns., importance of scaling 86−62144
heterogeneous environments, potential fields anal. *(Polish)* 87−12656
hierarchical bases in the numerical solution of parabolic problems 88−24683
hierarchical breakdown of concepts relating to nonlinear partial differential eqns. 85−44651
hologram formation in photorefractive crystals, transient energy transfer, soln. of partial differential equations 85−51304
homogeneous linear partial DEs, sequence soln. 88−18653
Hopf bifurcation points, computation 85−54403
HV electrical discharges, nonlin. cct. eqn. approx. 86−58631
hybrid equation solution to EM wave scattering in inhomogeneous cylinders 88−8460
hyperbolic, stability of interfaces with mesh refinement 86−26779
hyperbolic conservation laws, moving mesh numerical method 86−34248
hyperbolic differential-integral eqn., numerical solns. 88−63243
hyperbolic initial boundary value problems, stability with two boundaries 86−26778
hyperbolic initial BVPs, stability criteria for differences approxs. 85−49517
hyperbolic partial differential eqns., periodic solns. 85−44655
hyperbolic problems, stability and accuracy for implicit semidiscretisations 86−34219
hyperbolic problems, stability and accuracy of difference schemes 85−49511
hyperbolic problems with time-depend. coeffs., Runge-Kutta-Nystrom methods 87−65423
hyperbolic system, simplified anal. using method of generating eqn. 85−44656
hyperbolic systems, behaviour of finite-difference and -element approx. over long time intervals 85−44652
hyperbolic systems, distributional approach to BVP 87−10343
hyperbolic systems with dissipation 86−46296
IC design, resistance calculation from mask artwork data byfinite element method 86−20211
image interpolation by generalised spline filters, 2-D schemes based on partial differential eqn. models 85−57467
image interpolation by generalized splines 85−30384
image models, 2D interpolation by generalised spline filters, comments and reply 88−14763
image processing, 2D vel.-field reconstruction as lin. estimation problem 87−62378
image restoration: a regularization approach 87−2644
image restoration, regularisation theory, MAP estimation, and Wiener filtering 87−69361
implicit convolution for image enhancement 85−57480
implicit finite difference methods on composite grids 88−18655
implicit hyperbolic difference eqns., effects 88−63247
incomplete LU factorisations, stability anal. 86−66778
incremental loss rate calc. from complex nodal admittance eqns. *(Russian)* 86−56407
induction devices, nonsteady-state finite element analysis 87−61330
induction motor EM field generalised prediction model 85−48960
infinite electrical network, finitely powered excitations *(Chinese)* 87−65617
inhomogeneous gyrotropic media, scalar superpotentials for EM field representation 88−20824
initial value problem for partial differential eqns. with multiple characts., soln. uniqueness 85−44657
integral transform between analogue and discrete systems 88−49614
interval arithmetic method for soln. of nonlinear systems of eqns. on vector computer 87−73023
interval arithmetic methods for systems of nonlinear equations arising from discretizations of quasilinear elliptic and parabolic partial differential equations 87−58871
invariant linear feature extraction theory *(Japanese)* 87−33752
inverse matrix techniques for solving BVP on parallel processors, explicit semi-direct method 87−44243
inverse scattering transform numerical schemes for nonlinear evolution eqns. 87−44259
iterated defect correction algorithms 85−10649
iterative methods, explicit group vs. implicit line 85−22390
Jacobian and Hessian matrices arising in finite difference calcs., optimal estimation 85−5945
Kiguradze classes for hyperbolic characteristic initial value problems 85−44654
l^p-instability and oscillation at discontinuities infinite difference schemes 86−40687
Landsat image restoration 88−59332
Laplace's eqn., fast numerical soln. on irregular regions 85−33362
Laplace BVPS with singularities, nonconforming combined method 87−5378
Laplace eqn., 5-pt. difference scheme for mixed problem 85−54408
Laplace eqn., boundary collocation method using auxiliary source points 88−24678
Laplace operator problems, determ. of boundary collocation points 85−5957
large scale scientific computing, conf., Oberwolfach, West Germany (July 1985) 88−24370
large tridiagonal and block tridiagonal linear systems on vector and parallel computers 87−65440
leapfrog schemes, instability 86−7716
least squares methods for elliptic systems 85−39661
less regular problem in rectangle, asymptotic error expansion *(Chinese)* 86−62175
lightning discharge, equivalent impedance cct. *(Russian)* 85−64942
line current above perfectly conducting earth, electric field solution 85−7574
line methods, a posteriori error estimation for finite element modifications 85−33367
linear, asymptotic representation of solns. 85−54399
linear equation systems with symmetric coefficient matrix, block banded algorithm solution *(Polish)* 85−28196
linear hyperbolic initial boundary value problem 87−44174
linear induction machine FEA, eddy current and convective diffusion eqn. 88−62385
linear multistep formulae for DAEs, correction 86−52413
linear Volterra equations in Banach spaces 85−44653
local relaxation method for solving elliptic PDEs on mesh-connected arrays 87−65446

partial differential equations continued
local state models for *m*-dimensional operators, digital filter appl. 86−1267
local uniform mesh refinement with moving grids 87−58882
logarithmic convexity for discrete harmonic functionsand the approximation of the Cauchy problem for Poisson'sequation 86−66768
logarithmic potential, computation in neighbourhood of boundary curve 86−57407
loosely coupled parallel processors for solving partial DEs 87−65442
lossy inhomogeneous dielectric cylinders, TE scattering, methods comparison 88−2546
lossy media, inverse scatt. problem soln. by discrete coupled eqns. 86−68728
low frequency acoustic and electromagnetic scattering 86−42811
M-type beam tubes, nonstationary nonlinear equations, anal. 85−34435
machine magnetic field calc., finite-element superconvergence accuracy *(Croatian)* 87−9508
MADP method, rates of convergence 85−60882
magnetic dyadic Green's functions, symmetries *(Chinese)* 85−10567
magnetic field analysis, finite and boundary element methods combined *(Japanese)* 86−15834
magnetic field modeling technique and appl. to saturated cage rotors 87−30571
magnetic field sources, flux and potential plots 87−33372
magnetic fields, 2D steady, coupled finite- and boundary-element analysis *(Korean)* 86−15836
magnetic shielding of solenoid, zero-first order boundary element method 86−36666
magnetostatic fields, linearised scalar potential problem, boundary parametric approx. 86−15840
MAMMY PDE package generator 88−52122
mathematical aspects of variational grid generation 88−11934
Maxwell equations reduction to system of two scalar equations of second order 85−19073
mesh generation and isoparametric elements 88−6421
mesh generation with conformal mapping 87−65430
method-of-lines approx. to partial differential eqns. convergence 85−22408
microstrip transmission lines with layered dielec. filling, discrete spectrum of normal modes 85−13189
microwave planar structures, Helmholtz eqn. soln. by FEM *(Hungarian)* 88−32406
miniature stepper motors, permanent magnet, design and dynamic calcs. 85−27446
missile base flow simulation, using ACSL language 88−68535
mixed FEMs for 2nd order elliptic problems 86−364
mobile boundaries, discretisation of base and boundary relationships *(German)* 88−49617
MODFET C-V characts., model 88−26357
modified least squares formulation for a system offirst-order equations 85−54386
moving FEMs, equidistributing principles 87−10336
moving finite-element eqns., structure 85−44646
moving mesh control, performance analysis 85−44665
moving mesh FEMs for nonlin. degenerate parabolic diff. eqns. *(Chinese)* 86−62171
multi-parameter error expansions in finite difference methods for linear Dirichlet problems 87−58866
multidimensional continuous systems, signal processing approach to digital simulation 87−47822
multidimensional quasilinear parabolic eqns., determ. of unknown coeffs. 85−54407
multigrid algorithms on 3D PDE problems 88−63242
multigrid continuation method for elliptic problems with folds 87−10344
multigrid methods of higher order 85−5963
multipartial elec. fields control in fluid phase 88−34231
multiple bifurcations, continuation and local perturbation 87−10347
Neumann and Dirchlet boundary conditions for 3D magnetic field computation 87−54474
Neumann problem, asymptotic expansion *(Chinese)* 86−62174
Neumann problem, FEMs 85−60916
Neumann problem for 2nd order PDEs, adapted mesh refinements 85−49515
nodal schemes, general family 86−46286
noisy convergence phenomena in decompositionmethod solutions 86−62170
nonhomogeneous line with nonzero initial conditions, general solution of telegraphist's equation 87−19230
noniterative scheme for semiconductor device simulation 88−19905
nonlinear, analysis of multidimensional dynamic models of semiconductor structures *(Czech)* 87−6635
nonlinear elliptic boundary value problems isomorphic iterative soln. 87−36652
nonlinear elliptic boundary-value problems, monotone iterative methods 85−22437
nonlinear elliptic Dirichlet problems on rectangle by almost globally convergent interval methods 85−60923
nonlinear eqn., formal linearization via partial differential equation solved by the Hermite expansion *(Japanese)* 87−16536
nonlinear estimation, small time behaviour, for finite bandwidth signals 88−52453
nonlinear filtering, Lie-Trotter product formula implementation 87−2536
nonlinear filtering, robust equation 85−7902
nonlinear infinite networks problems and current research state of theory 86−52639
nonlinear ordinary and partial diff. eqns., analytical decoupling 86−62192
nonlinear parabolic systems, error bounds for finite-difference approxs. 86−7705
nonlinear partial DE soln. on MIMD parallel computers 87−44264
nonlinear partial DEs, method of lines 88−63248
nonlinear PDEs, numerical soln. by Tau method 85−54402
nonlinear preconditioned conjugate gradient and least-squares finite elements 87−52059
nonlinear product formulae, sharp convergence rates 85−5964
nonlinear singular perturbation problem, exponential difference scheme 85−60914
nonlinear transmission lines, formation of shock discontinuities 88−66115
nonlinear transmission lines C^1 solutions 87−68821
nonorthogonal-series method for num. soln. of math. physics problem *(Russian)* 88−38118
nonspherical geometrical optics, numerical minimisation of nonlinear PDEs 85−54405
Noumerov-type method with minimal phase-lag for the integration of second order periodic initial-value problems 85−22410

partial differential equations continued
nuclear core thermal hydraulic transient analysis code, CASTA-1 *(Chinese)* 86−61255
nuclear power plant steam generator dynamics anal. using Rieman's method *(Czech)* 87−9247
numerical algorithm for partial differential eqns. 87−44254
numerical approximation of hysteresis problems 86−13695
numerical approximation of partial DEs, conf., Madrid, Spain (Sept. 1985) 87−36320
numerical computation of large partial differential equations on memory hierarchy *(Japanese)* 88−70281
numerical conformal mapping of a towel-shaped regiononto a rectangle 86−7715
numerical integration of second-order initial value problems, superstable two-step methods 85−49506
numerical integration of semidiscrete parabolic problems, higher-order methods, survey 85−10645
numerical soln. of eigenvalue problems 87−31455
numerical soln. of initial value problems, stepsize restrictions for stability of one step methods 86−26782
numerical soln. of PDE problems with standard software packages 88−18651
numerical solution, thyristor switching phenomena analysis, two-dimensional model *(Japanese)* 88−13366
numerical solution of problems involvingsingularities by the finite element method 86−66787
oil circuit breaker gas buffer model *(Russian)* 87−78815
optical analog solutions for partial differential and integral equations 85−36371
optical analog solutions of partial differential and integral equations 85−44659
optical coupled multiple waveguides, eigenmodes and wave evolution, continuum analogue 86−42278
optical fibres, conformal mapping appl. 88−51469
optical single-instruction multiple-data array architectures for digital optical computing 87−27561
optimal L_∞-estimates for a mixed finite element method for second order elliptic and parabolic problems 85−10651
order reduction of Runge-Kutta methods 87−36662
orderings and partition of PDE computations for a fixed-size VLSI architecture 88−26472
orthogonal expansions and the causality law 86−16323
p-version of finite element method, C^1 triangular element 85−10573
packaging appl., calculation of electrical parameters 88−56196
parabolic, soln. by semidiscretization in time 86−7719
parabolic and hyperbolic partial DEs, finite element soln. 88−354
parabolic eqns., quasilinear, unbounded solns., effect of localisation *(Russian)* 88−63142
parabolic equations, alternating-direction implicit scheme 88−70273
parabolic nonlinear equations, numerical approximation *(French)* 85−49523
parabolic problems, asymptotic theory of the global error and some techniques of error estimation 85−22398
parallelism in solving partial differential equations 87−36671
parameterised eqns., solution manifolds and submanifolds and discretisation errors 85−22438
particle method for first-order symmetric systems 87−65439
partitioning and allocation of PDE computations indistributed systems 85−49491
partitioning PDE computations, methods and perform. eval. 87−65441
periodic IVP integration, 2-step hybrid methods 88−43840
periodic reaction-diffusion systems, stability of num. soln. 85−54385
phase-lag analysis for a family of two-step methods forsecond order periodic initial value problems 86−57400
physical fields, POLE modelling software using R-fn. theory *(Russian)* 87−47068
pluridimensional problem with coupled parabolic-hyperbolic limits *(French)* 86−7695
Poisson's eqn., contraction no. of multigrid method with mesh ration 2 85−339
Poisson's eqn., fourth-order finite-difference analogues *(Chinese)* 86−7713
Poisson eqn. with mixed boundary conditions, domain optimisation by dual FEM 85−54382
Poisson equation, num. soln. 87−16543
portable vector-code for autonomous multigridmodules 85−49524
power overhead lines, split-phase, conductors vibration *(Russian)* 85−21226
power system transient stability anal. using Lagrange-Charpit method 88−42747
power transformer three-dimensional magnetic field numerical analysis using vector magnetic potential *(Russian)* 86−48524
preconditioned conjugate gradient, conjugate residual methods *(Japanese)* 87−23572
preconditioned conjugate gradient method, rate of convergence 86−52408
preconditioned conjugate gradient method for solving elliptic difference equations 87−36668
preconditioned conjugate gradient methods applied tocertain symmetric linear systems 86−52401
preconditioned gradient type methods applied to nonsymmetric linear systems 88−24663
preconditioners for elliptic problems, construction by substructuring 86−66777
preconditioning matrices arising from lin. integral eqns. for elliptic BVPs, new method 86−66775
preconditioning methods, eigenvalue distribution 86−52407
primal hybrid FEM for second order elliptic problems 86−7697
primal hybrid finite element method for quasilinearsecond order elliptic problems 85−60919
pseudo-spectral method and path following inreaction-diffusion bifurcation studies 86−46291
qualitative behaviour of solutions of the Goursat problem for hyperbolic differential equations 87−65426
quasilinear 2nd order elliptic PDEs, mixed finite element method 85−49514
quasilinear elliptic BVPs, iterative accel. of finite element approx. *(Chinese)* 86−34253
quasilinear parabolic systems, full collocation method *(Chinese)* 86−7712
railgun plasma acceleration of metal plate 87−26671
rapid elliptic solvers performance on vector processor 88−358
rational Runge-Kutta method, numerical expts. 87−16540
rational Wachspress-type finite elements on regular hexagons 85−28193

partial differential equations continued
reaction-diffusion eqns., monotone iterative methods for finite difference system 85−60915
reaction-diffusion eqns., solns. bifurcating from equilib. state 85−22412
real-time optical laboratory linear algebra solution of partial differential equations 87−55300
REDUCE package for automatically determining symmetries of partial differential equations 85−39681
reflector antennas, single and dual offset shaped, synthesis theory 88−8585
remote sensing, atmospheric scattering effects correction 88−3186
residual vector evaluation in global element calcs. 87−58876
Ritz operator associated with finite-element approx., L^{∞} bounds 87−5379
Runge-Kutta methods for parabolic problems withtime-dependent coefficients 86−66767
Runge-Kutta type two stage imbedding formulas using second derivatives *(Japanese)* 88−6419
saturated travelling mag. field problems, upwind finite element soln. 86−36632

scalar hyperbolic eqn., anal. of discontinuous Galerkin method 86−34247
scattered decomposition for finite elements 87−58877
Schwarz alternating procedure convergence for 2D problems 87−36660
second order elliptic problems, regularity results for discrete solns. 88−350
second order elliptic systems 86−46294
second order hyperbolic equation soln. 87−65424
second-order finite element approximations and a posteriori error estimation for two-dimensional parabolic systems 88−63259
second-order nonlin. BVPs, inform approx. soln. 86−13698
semi-definite Neumann problem, FEA 87−44207
semiconductor device equations, recombination term inclusion 86−35631
semiconductor devices, computer simulation, Poisson eqn. soln. technique 85−23726
semiconductor devices, FEM for fundamental eqns. 86−35632
semiconductor devices anal. using finite elements anal. 88−7546
semiconductor simulation using finite elements *(German)* 86−7681
shaded-pole motor field computation and inductance calc. 87−42969
shared memory multiprocessor, domain partitioning impact on performance 87−65443
signal source input RF amplifier, power gain and noise determ. *(Slovak)* 88−32035
single-phase transformer inductance calc. by finite element method *(Korean)* 86−19355
singular problems for partial DEs, numerical treatment 87−36667
singularly-perturbed BVPs, soln. *(Russian)* 87−65447
six-dimensional mapping phenomenology 85−44661
SLDGL-program package for self adaptive soln. of nonlinear PDEs 85−49525
small strains quasistatic elastoviscoplasticity 87−23574
smelting electrodes, three-dimensional calculations 88−18236
solution using numerical method, appl. to Laplace transform *(German)* 88−31692
space inhomogeneity and detuning effects in saturable absorber laser 88−51931
spatially varying diffusion coefficient for parabolic, partial differential eqns. 86−13701
spectral methods for exterior elliptic problems 85−60913
squirrel cage motors, two-pole, parametric vibrations anal. *(Polish)* 87−58091
stability and linear first-order boundary conditions of telegraph equation 87−62552
stability and power-boundedness of interval matrices 86−34225
steady-state carrier distributions in semiconductor devices 87−60387
steady-state convection diffusion problems, characteristics method appl. 87−44257
Stefan-like problems of second order, finite-element approx. 85−10650
stepsize restrictions for stability in the numerical solution of ordinary and partial differential equations 88−11933
stiff partial differential equations, spectral methods 88−24677
stochastic two-target pursuit-evasion differential game with three players moving in a plane 87−65312
Stokes problem, analysis of some finite elements 85−39648
strip/fin line config. on anisotropic substrate, anal. using method of lines 87−54636
successive overrelaxation methods, optimum, for class of linear systems 86−361
supercomputing for solving partial DEs 87−38494
superconvergence for a mixed finite element method forelastic wave propagation in a plane domain 86−62179
superheater/attemperator system control, real-time simulation 88−55193
symmetric Poisson process giving rise to hyperbolic boundary value problems 85−44658
symmetric versus nonsymmetric differencing 85−33360
synchronous ceramic-permanent-magnet motors, field/parameter calc. by BEM 87−64548
systolic arrays for group explicit methods for solving parabolic partial differential equations 88−70286
tensor product generalized ADI method for ellipticproblems on cylindrical domains with holes 87−227
time-dependent boundary and interior forcing in locally one-dimensional schemes 88−359
transient EM shielding in endless coaxial cylinders 87−19224
travelling-wave solns. of nonlin. parabolic eqns., num. calc. 86−62187
tubular-type linear stepping motor, nonlinear finite element algorithm *(Korean)* 87−51265
turbogenerator synchronous and dynamic parameters, finite element calc. 87−30539
turbogenerator three phase fault study using Galerkin method 88−11196
two point BVP, order h^2 method 87−10330
ultrashort laser pulse, spectral extent and pulse shape of supercontinuum 86−42626
uniform asymptotic form of the solution of a singularlyperturbed elliptic system in a rectangle 86−46293
upwind schemes, order barrier proof by Dahlquist's 2nd barrier 86−57399
vacuo-thermojunctions at ULF characts. 85−37581
variable coefficient 4th order parabolic partial DEs, family of second order methods 88−6416
vectorising incomplete factorisation and SSOR preconditioners 88−31694
VLSI models, linear systems soln. using iterative methods, error anal. 86−15218
VLSI semiconductor devices, finite element analysis of diffusion 87−5312
partial differential equations continued
weak compactum, incorrectly posed problems 85−60929
weakly damped systems, steady-state process calculation 88−31973
Wiener-Hopf technique for EM diffraction, analytical methods *(French)* 86−54284
GaAs diode structs., nonisothermal transients, numerical modelling 87−53469
O_2-I_2 diffusional CW chemical lasers, 2D model *(Chinese)* 88−58414
S pollution over Europe, mathematical model 85−59506
Si, crystal ribbon growth, stress-free, numerical simulation 87−44280
partial discharges
13.2 kV 21000 hp synchronous motor failure eval., partial discharge testing 88−30680
15 to 200 MVA power transformers, ultrasound testing for insulation faults 87−58164
33 kV XLPE insulated cable termination defect determ. by partial discharge test *(Japanese)* 88−55010
50 kV switchgear cable termination partial discharge detection *(Dutch)* 86−26201
420 kV gas insulated substations, diagnostic meas. at UHF 88−37345
420 kV transformer bushing insulator, electric field investigation of part in oil *(Hungarian)* 86−39877
500 kV Jin-Liao transmission line, partial discharge meas. of shunt reactors 88−68942
500 MW 22 kV turbogenerator stator winding, partial discharge location 88−48886
1000 kV metal-enclosed testing station for SF_6-insulated switchgear testing 85−5281
AC HV rotating machinery, stator insulation, partial discharge anal. 86−70870
AC machines HV stator windings insulation diagnosis using TESTACEC 85−38947
AC motor insulation, electric properties diagnosis *(French)* 88−11163
AC motors, large, turn insulation failure mechanisms 85−9836
aging substation plant diagnostic examination 85−60264
air, charge distributions shapes *(Polish)* 87−38600
apparent charge, digital determ., math. fundamentals *(German)* 87−60697
arcing byproduct detectors in SF_6 insulated switchgear 86−51803
arrester multiple spark-gap with graded voltage and simultaneous pre-ionisation *(Polish)* 87−50877
ATE for partial discharge detection and processing *(German)* 86−50209
automatic detection for electric insulation evaluation *(Dutch)* 88−57828
automatic system for measuring partial discharge *(German)* 85−14593
bisphenol A unfilled epoxy resin, partial discharge resist., testing procedure 86−68038
bushings, 132 kV, diagnostic monitoring 88−75213
cable insulating systems, corona discharge meas. techniques 86−70671
cable test equipment design based on wide band partial discharge measuring system *(German)* 86−65144
cables and switchgear, partial discharge detection and location 88−71838
capacitance increment and dissipation factor tip-up from parallelogram figures 86−68083
capacitor dielectric fluid impregnants, expt. eval. 86−67535
capacitor insulation partial discharges *(Russian)* 86−33576
capacitors, partial discharge meas. techniques for discrete devices, eval. 88−25581
colloquium on discharge detection in cables, London, England, (1983) 85−27959
composite insulating housing materials, erosion resist. to UV irrad. and surface discharges 88−64853
computer-aided partial discharge measurement system 87−34926
computer-aided partial discharge measurements 88−29268
computerised instrumentation for meas. of partial discharges in dielectric materials *(Italian)* 86−44196
converter transformers and smoothing reactors, recommended dielectric tests and procedures 86−66129
critical evaluation of conventional partial discharge measurement techniques for discrete capacitors 87−74453
cryogenic cables, taped insulation at liquid N_2 temps. 88−13620
current pulses generated by discharges in voids in solid dielectrics. A field theoretical approach 87−25654
DC partial discharge testing, ramp technique 85−33536
DC partial-discharge repetition rate, measuring circuit influence 86−68027
destructive tests on a 542 MW generator winding 87−30476
detection, limits, sample and defect geometry effects 88−39749
detection/location in gas-insulated substations, UHF signal meas. technique 86−61698
detector bandwidth, correlation with inherent integration errors 87−25655
dielectric containing gas chamber with elec. discharges, influence of voltage on charge flow *(Polish)* 86−58630
dielectric materials, conf., Xian, China (June 1985) 86−66537
dielectric solids, Townsend-like and streamer-like discharges 85−35219
dielectrics, partial discharges in voids, phys. processes 85−18498
dielectrics, spark and glow DC partial discharges 85−18493
dielectrics with nonsinusoidal voltage 86−28540
digital estimation 88−26579
digital measurement system *(German)* 88−29631
disk segment electrodes, partial discharge study *(German)* 86−63480
dodecylbenzene oil/polyethylene tape cable insulation, effect of temp. on air bubble behaviour 86−68123
electric equipment insulation monitoring by partial discharges measurement 85−43056
electric generator and motor insulation, dielectric breakdown 86−45324
electric generator maintenance strategy for reduced insulation breakdown, stator testing and partial discharge meas. *(German)* 88−17504
electric machine epoxy resin insulation, partial discharge characts. in void 86−45325
electric machine insulation-adjoining electrode gap partial discharges *(Czech)* 85−40955
electrical insulation, discharge types, Lissajous figure method anal. 85−29361
electrical technology appl. 85−33535
endurance of electrical insulation under non-sinusoidal voltage stress 88−26602
energetical relations in an equivalent circuit for partial discharges and partial discharges in the cavity between the insulation and the electrode 88−64832
epoxy condenser bushings, power factor and partial discharge values after ageing 85−38541

partial discharges continued

CDF muon detection system 86−11848
CDF small angle spectrometer 86−11919
CERN ACOL, conducting targets for $\bar{p}$ prod. 86−32134
CERN LEP storage ring project, reactive power compensation using thyristor-based reactors 88−68124
CESR cryogenic system for superconduct. RF beam tests 86−24926
Chalk-River superconducting cyclotron, foil changer for beam interception expt. 86−31805
charged particle tracking in CDF 85−26722
Cherenkov ring imaging detector, prototype tests at SLD expt. 87−41835
Cherenkov ring imaging detector for CERN Omega Spectrometer, design and performance 86−65356
chopping circuit for van de Graaff generator ns pulse ion source *(Chinese)* 88−10203
collider detector at Fermilab 85−31721

particle accelerator accessories continued
compact plane crystal spectrometer for synchrotron radiation at BESSY 86−60673
control systems in particle accelerators 86−38678
controller for pulse generator thyristors of betatron 87−73291
Cornell High Intensity Linac Injector, performance 85−26683
cryostat suspension system for SSC dipole magnets 88−45028
crystal septa for slow parasitic beam extrapolation at SSC 88−4753
current-pulse generator for electromagnet of induction accelerator 88−36388
cyclotrons and accessories, conf., East Lansing, MI, USA, April 1984 85−54032
cylindrical drift chamber for Mark II detector at SLAC 85−43238
DESY II, magnet excitation circuits 86−20272
deuteron cyclotron DC-1, cryogenic system for supercond. magnet 88−68103
Disktron generator development for MeV ion implanter 86−5743
dosimetric monitoring system, microcomputer controlled 88−42592
double crystal monochromator for Photon Factory wiggler beamline 86−60655
Dϕ hadron collider detector, design features 86−11850
dual mode electron gun for high-current electron linac 88−74648
duoplasmatron ion source of 35 MeV proton accelerator, O_2-impregnated Ni-matrix cathode 87−77514
Eagle off-plane spectrograph/monochromator at Photon Factory 86−60481
eight-channel gas threshold Cherenkov counter for GIPERON spectrometric system 87−50166
electro-optical Kerr effect voltage measurements on multi-megavolt pulsed power accelerators 87−21301
electron beam handling and diagnostics, primary converter for energy and flux density 88−36327
electron storage ring, metal vapour cell design 86−55937
electron storage rings, acoustic delay line, transit times of pressure waves 86−5675
electron storage rings and accelerators, permanent magnets appl. 85−52937
electron synchrotron, automatic orientation system for single-crystal targets 86−50297
electron-positron storage ring, superconducting spiral undulator for meas. radiation polarisation colliding beams 88−4713
electrostatic accelerator technology conference, Buenos Aires, Argentina (April 1985) 86−38626
electrostatic deflector high voltage system for Chalk River superconducting cyclotron 88−54299
EM wiggler design developments and specialised control systems 88−65746
erema-disk-type beam monitor for NERL 35 MeV linac *(Japanese)* 87−14692
feedback electron linac, variable ratio bridge appl. *(Chinese)* 85−58959
FEL, phase and amplitude feedback control system at Los Alamos 86−31790
Fermilab 1 TeV Switchyard, pulsed power supplies 86−26141
Fermilab abort kicker power supply systems 86−31855
Fermilab Antiproton Source, high precision current regulated power supply 86−26145
Fermilab CDF superconducting solenoid,m parameters and operation 86−11803
Fermilab DO overpass power supply system 86−26142
Fermilab experimental areas, semi-remote handling target stations 86−32135
Fermilab Tevatron, superconducting magnet development and accelerator status 85−31659
Flipper monochromator at HASYLAB wiggler/undulator, performance 86−60486
FN tandem accelerator, nanosecond pulsing system 86−38649
frozen spin target for SATURNE II 86−70306
FSU linac, liquid He distrib. line tests 86−55936
function generator for controlling the magnet power supplies of a superconducting spin synchrotron 88−607
fuse and resistor characts. for multi-megajoule capacitor bank appl. 87−22665
gas blown spark gaps of Advanced Test Accelerator power conditioning system 85−27130
gas discharge switch with laser beam triggering, for 6 MV PBFA-II accelerator 85−23380
GELINA, pulse compression system for e^- and n bursts 86−55944
gigatron, RF amplifier tube for linac collider appls. 88−57256
grazing incidence monochromator for soft X-ray spectroscopy at Photon Factory 86−60485
grid pulser for short pulse e^- gun, design and simulation *(Japanese)* 87−14683
gridded buncher, far field extension using C coated teflon sleeves 88−54078
Hadron Electron Ring Accelerator proton ring supercond. correction magnets 88−68169
Hadron Electron Ring Accelerator supercond. dipole magnet series prod. flowchart 88−68164
half quadrupoles for secondary particle beam extracting 86−50285
harmonic chopper with two-harmonic sweeping voltages, for Van de Graaff accelerator 86−55948
HASYLAB five circle diffractometer, recent developments 86−60679
Heavy Ion Synchrotron magnet prototype meas. 88−68150
HERA, injection scheme 88−47777
HERA beam abort system, laser-triggered HV switch with wide voltage range 88−54053
HERA dipole magnets, Rutherford-type cables, quality control by eddy current test method 88−63404
HERA project, prototype He transfer line 87−41719
HERA proton ring, supercond. protection switch 88−68104
HF 40 kW DC converter for particle accelerator, design and evaluation 85−39122
high energy accelerator and collider development, conf., Tsukuba, Japan, May 1984 85−31655
high flux photon beam monitor for X-ray storage ring beamlines 86−60660
high performance avalanche pulse generator for e^- gun appl. *(Japanese)* 87−14685
high power electron beam scanning circuits with improved homogeneity *(Chinese)* 88−74684
high resolution VUV spectroscopic facilities in Japan and United States 86−60671
high speed multi-channel data recording on a pulsed power accelerator 85−26726
high voltage isolation transformer for JAERI 350 kV injector 86−70958

particle accelerator accessories continued
high voltage pulser for beam pulsing of e^+ linac *(Japanese)* 87−14684
high-energy electron cooling device, beam optics and energy recovery 85−59064
HV ion accelerator terminal, hydraulic coupling for electric power generation 85−37844
HV power source, pulsed, high repetition 85−11019
HV vacuum lead-in for electron accelerator, using disk insulator 86−70271
IHEP proton synchrotron, with ring injector, initial operation 86−31902
image processing system for electron linac beam diagnosis *(Japanese)* 87−14694
inductively insulated Marx generator 86−31876
injector for Trieste Synchrotron Light Source, design 88−47952
injector linac for SSC 85−26543
international cooperation in radiation detector R&D 85−31751
international cooperation on superconducting magnet R&D in high energy physics 85−29516
ion current control system of linear accelerator, using fibre optic communication line 86−18222
ion energy meas. in intense pulsed ion beam 85−4190
ion source, data acquisition system for ion beam characts. monitoring 86−5731
IUCF beam cooling system, electron gun design study 86−24993
K800 superconducting cyclotron magnet mapping system, characteristics, performance 86−24711
KEK electron linac, klystron modulator controller, design 86−55939
laced EM wiggler for induction-linear accelerator, free-electron laser programme 88−66013
LAMPF, He-jet coupled on-line mass separator system, feasibility 86−55910
LAMPF, remote handling, recent advances, Monitor system 86−31809
LAMPF beam stop, metallographic examination 88−22865
LAMPF II, magnet design and power supplies 85−26654
LAMPF side-coupled-linac quadrupole magnet doublet quality improvement 88−68166
LAMPF-II, magnet vacuum chambers 86−24929
large acceptance mag. detector for CEBAF 87−21398
large detectors for hadron colliders 85−26667
laser neutral atom source for collective accelerator 85−15124
laser trigger system design for Particle Beam Fusion Accelerator II (PBFA II) 87−21334
laser triggering optical system for Particle Beam Fusion Accelerator II (PBFA II) 87−21333
LBL heavy ion RFQ, initial operation 85−26641
LBL Heavy Ion Spectrometer, 344 cm×86 cm low mass vacuum window 85−26734
LEP high energy physics data communication network, open system interconnection 86−17008
LEP injection system, high tension burst pulse generator 87−43268
LEP magnetic lens design, mfg. and performance 88−68165
LEP main ring klystrons, 3.6 MW high voltage interface 88−54050
LHC, jet detection, and hadron calorimetry, detector technology and electronics 88−10264
linear induction accelerator, beam current meas. device 86−25079
linear induction accelerator, low impedance strip shaping lines 88−68113
linear induction accelerator high-efficiency bidirectional pulsers 85−64350
Livermore Free-Electron Laser Program Magnet Test Laboratory 88−68149
low-noise 2-4 GHz preamplifier 85−20851
LU-2 GeV linear electron accelerator, computerised detection system using multiwire proportional chambers 88−36365
magnet technology, conf., Boston, MA, USA (Sept. 1987) 88−62848
magnetic linear accelerator (MAGLAC), switching studies 87−21320
magnetic moments meas. of permanent magnet blocks 88−64963
magneto-optical elements, field fluctuation attenuation 86−32099
magnicon, VHF generator with circular deflection of relativistic electron beam 88−57262
main coils power supply and current dumping system, Milan superconducting cyclotron 85−37830
metallic glasses in high-energy pulsed-power systems 85−62201
microprocessor-based linac main oscillator and beam stabilization using the phase-locked trigger *(Japanese)* 87−14792
microsecond Marx generator for intense electron beam accelerator *(Chinese)* 88−36334
microsecond square HV pulses generation for high-current electron accelerators 87−65932
microstrip vertex detector for E687 expt. at Tevatron 87−21421
microvertex detector for UA1 expt., design and operation 87−21425
MINIMAFIOS multiply charged heavy-ion source 85−64425
modulator of linear induction accelerator, compression sections and nonlinear shaping ccts. appl. 86−5832
monocast nylon insulators for tandem laddertron or pelletron, voltage behaviour 88−53966
multichannel ring commutator for high-currentaccelerators 86−5680
multicharged heavy ion source for the RIKEN linear accelerator *(Japanese)* 87−35320
multilayer dimpled insulation for TOPAZ supercond. solenoid cryostat 87−41721
NAC electrolytic tank facility for cyclotron orbit calcs. 85−59218
nanosecond electron injector 87−29405
NBS Los Alamos RTM injector, 100 keV chopper/buncher system 86−32055
NEC type terminal foil stripper, method to double capacity 88−54079
nonintercepting emittance monitor 85−26664
Oak Ridge 25URC accelerator, electronic improvements, beam profile monitors, chopper-buncher 88−54082
photon stimulated desorption in vacuum duct, angular distrib. obs. using unidirectional detector 87−77477
plasma erosion opening switches, appl. to high power accelerators for pulse compression and power multiplication 85−4184
polarimeter for high energy proton and electron beams in colliding machines 85−26663
polarized heavy ion source at Heidelberg MP-tandem 87−3866
polarized p and H^- ions, laser source for Moscow Meson Factory 87−3858
power oscillator circuit modelling for particle beam fusion accelerator switch trigger laser 88−24054
power supplies to magneto-optical elements of particle channels, digital remote control system 87−29407
power supply using unipolar rotary pulse generator 87−51362

particle accelerator accessories continued
prebuncher design for 150 MeV electron linear accel., calc. comparison with data 86−18217
precision gas feeding system for a PIG heavy ion source 88−61053
Princeton cyclotron QDDD spectrograph system 86−11915
process control systems, user-friendly 86−38662
programmable synchronization unit for timing system of Stanford Linear Collider 85−43291
proton accelerator, pulsed electrostatic, range-coordinate instrument for beam current and profile 86−25080
PS machine, damper for $\bar{p}$ injection oscillations 86−31914
pulse beam charge monitor for charged particle accelerators 87−70971
pulse forming system for Particle Beam Fusion Accelerator II (PBFA II), engineering design 87−21332
pulse shaper, coaxial capacitor type, for high-current electron accelerator appls. 86−32199
pulse width selecting system for e^+ beam transport line *(Japanese)* 87−14682
pulse-charge meter 87−70970
pulsed electron accelerator, with ribbon beam output, cathodes testing 88−61057
pulsed power accelerator for fusion research, SF_6 reprocessing system 87−21331
pulsed power supply with travelling wave charging for PBFA-II accelerator 85−27524
pulsed X-ray facility for testing radiation detect. instruments at SLAC 87−50197
pulser for main ring beam extraction 86−25068
quadrupole lens for sectional microtron 88−68115
quadrupole pulsed power supply for a GS polarized proton project 85−27525
racetrack microtron, high-power RF controls 86−31791
Racetrack Microtron, klystron DC power supply 86−26139
racetrack microtron, RF power system for chopper/buncher system 86−31792
RAL Spallation Neutron Source, remote handling facilities 86−31810
rapid wire scanner, transverse emittance meas. at CERN SPS 85−48167
rapid-cycling synchrotron, ring magnet power supply 86−26140
regulated resonant charging of modulators, linear accelerator appl. 87−70947
relativistic-positronium channel of accelerator at Institute of High-Energy Physics 88−16575
RF accelerating voltage shaper for ring injector, initial-frequency generator 87−70946
RF cavity tuning feedback scheme for heavy beam loading 86−31915
RF resonators, tuner sliding contacts, theory and design 85−59010
RIKEN Separated Sector Cyclotron, construction and equipment design status 85−64355
semicustom gate array IC design for SLAC SLC timing control system 85−43290
sensitive beam profile monitor for emittance measurements 85−26665
short pulse beam monitor signal processing system for KEK 2.5 GeV linac *(Japanese)* 87−14693
short pulse grid pulser for positron generator gun *(Japanese)* 87−14681
SIN 10 μA polarized source 87−3856
single bunch compressor system, design and operation *(Japanese)* 87−14687
SLAC, RF computer control, operation and linearisation procedures 86−24852
SLAC linear collider waveguides valve 88−54047
SLC, klystron control software 86−31782
SLC damping ring DC septum magnet design and mfg. 88−65981
SLC electron damping ring design improvements 88−68162
soft X-ray grating monochromators, optical component effects on resolving power 86−60482
solenoid spin rotator for large electron storagerings 86−18218
solid yoke bending magnetic, eddy current effects during slow acceleration *(Chinese)* 87−14659
SRS wiggler protein crystallography workstation 86−60678
SSC 4π dipole detector for intermediate and high p_t physics 88−74761
SSC magnets, suspension system design 87−41720
SSC Test Beams Facility, reconfiguration 88−10194
SSRL beamline I-I monochromator, net yield meas. 86−60480
Stanford Linear Accelerator, GaAs digital ICs for efficiency improvement 86−44598
Stanford Linear Collider timing system 85−43289
stepping motor controllers for detector, samples and beam-line optics positioning 87−41658
stochastic beam cooling amplifier system front endcomponents performance characteristics 86−31923
strong electromagnet wiggler development for Induction Linac Free-Electron Laser programme 88−65744
superconducting accelerating structures for ATLAS accelerator 86−55929
superconducting bending magnet for synchrotron radiation source 88−47905
superconducting coil bilateral power supply 86−26146
superconducting heavy ion injector linac, conceptual design and beam dynamics study 86−31854
superconducting magnet dual res. frequency circuit, GTO thyristor appl. 86−26144
superconducting quarter wave resonators appl. in booster module 86−55946
superconducting resonator, operating experience in ATLAS linac tests 86−55931
Superconducting Super Collider coil assembly suspension connection, improved design 88−45029
Superconducting Super Collider dipole magnet cryostat, thermal model meas. results 88−45030
superconducting tests of beta=0.1 and beta=0.2 resonators 86−55930
SURF II high resolution VUV spectroscopic facility 86−60670
synchronization circuit for shaping picosecondaccelerated-electron pulses 86−70360
tagged photon spectrometer, design, operating details, for Mainz microtron 86−18262
tagged photon spectrometer for Mainz 180 MeV microtron 86−32209
TASCC, Tandem Superconducting Cyclotron, facilities, equipment 85−31677
TEPSICO-II apparatus for use with UVSOR synchrotron radiation 86−60629
TeV-I storage rings, frequency response of stochastic cooling arrays 86−31921
particle accelerator accessories continued
Tevatron beam position and beam loss monitoring systems 85−26666
Tevatron Cryogenic System 85−26645
Tevatron cryogenic system, operation summary 86−31850
Tevatron operating experience with 1000 W refrigeration system 86−55949
thermionic gridded e^- gun for KEK e^+ linac, characts. *(Japanese)* 87−14717
thyratron commutator for Tesla transformer with increased pulse-repetition rate, for electron accelerator 85−22656
time expansion chamber as vertex detector for MARK J at DESY 87−21420
TOPAZ superconducting solenoid at TRISTAN, test results 86−50263
trigger and data-acquisition plans for the LEP experiments 86−17869
TRISTAN accelerator main ring magnet system performance 88−68160
TRISTAN AR, longitudinal instability feedback system 86−31920
TRISTAN AR steering magnet power supply control system 86−26143
TRISTAN main ring, low-level RF system, parameters and control aspects 88−54062
TRISTAN storage ring vacuum system, operational characteristics 86−24928
TRIUMF cyclotron, video-assisted remote operation of servicing equipment 85−20770
tunable ferrite-core induction coils for synchrotron supply system 87−50097
turbomolecular pump with hysteresis motor for particle accelerators *(French)* 87−22263
turbomolecular pumps with hysteresis motor fornuclear physics accelerators 86−70945
U-240 cyclotron, polarized p and d source proposals 87−3857
UHV gauges for storage rings and accelerators 88−16572
ultra-high frequency deflector shaping short electron bunches 85−26555
ultrahigh vacuum pump for accelerator use, design feat. 86−24927
UVSOR electron storage ring undulator and wiggler 86−32064
vacuum feedthrough insulator with shielded dielectric surface 87−41662
vacuum systems for particle accelerators and storage rings 88−42344
Van de Graaf, laser produced ions acceleration 86−55922
Van de Graaff accelerator, voltage regulation and breakdown prevention device *(Chinese)* 87−3821
vane coupling rings simplify tuning of the LBL RFQ accelerator 85−26640
variable energy cyclotron, ion source gas flow control 87−70978
variable energy cyclotron, quadrupole residual gas analyser appl. 87−70846
VENUS detector at TRISTAN, construction of thin solenoid magnet 86−50389
VEPP-4 storage ring, MD-1 transverse field detector, interaction region 85−26540
Vernier delay unit for Stanford Linear Collider 85−43293
VICKSI beam profile monitor system, modification for low beam intensities 88−54081
ZEUS detector at HERA, superconducting Helmholtz pair study 86−50284
ZEUS detector at HERA, superconducting solenoid preliminary design 86−50262
C cracked slacked accelerator stripper foil production 85−59046
C foil, long lived for heavy ion beam strippers 85−59047
C stripper foils, service lives at JAERI tandem accelerator 86−70287
CoR alloys, R=rare earth, permanent quadrupole magnets, construction and calcs. 87−14647
Cs sputter sources 86−55983
FeR alloys, R=rare earth, permanent quadrupole magnets, construction and calcs. 87−14647
H beam diagnostics in high-perveance DC extraction system 85−4189
Li lens, 2 cm diameter, beam test at CERN AA, Tevatron I appl. 86−32048
SF_6 gas handling system for the Dynamitron tandem at Bochum 88−53975

Al/Si system, ionised cluster beam deposition, film and interface props. 86−47422
Al/$Ti_{80}W_{20}$/n-Si, stability of Ti-W contacts against Al penetration 86−35429
Al-Cu films, Cl_2 reactive ion beam etching, Cl incorporation 86−63209
Al-Cu films, magnetron-sputtered, microstructure and resistivity, substrate temp. effects 88−18738
Al-O-F, planar magnetron sputtered composite materials prod. and props. 85−60997
Al-Si ohmic contact, barrier effect of Winter-layer, RBS studies 85−61763
Al-Si/W-Ti/Si ohmic contact systems, barrier effect of W-Ti interlayers 87−45683
Al-Si-Cu sputtered electrode for VLSI, Cu distributions meas. by RBS 87−1446
Al-W-Si structure, Al overlayer effect on W-Si interface interaction 88−57375
Al-W(WSi_2)-Si Schottky rectifier barriers, thermal stability during Al sintering 88−50749
AlAs-GaAs superlattices, Si ion implantation, dose-dependent mixing, RBS studies 87−6525
AlGaAs, GaAs, AlAs and GaAs/AlGaAs superlattices, Si^+ ion implanted, damage profiles, RBS/channelling anal. 86−58382
AlGaAs and GaAs, MBE on Si, Rutherford backscatt. study 85−364
AlGaAs, laser-modified MBE growth on (Ca,Sr)F_2/GaAs substrates 88−38132
$Al_xGa_{1-x}As$/GaAs, strained superlattice struct., backscatt. spectrometry and X-ray rocking curves anal. 85−29005
$Al_xGa_{1-x}As$/GaAs superlattices, ion implantation induced damage, RBS studies 87−45763
AlGaAs-GaAs heterointerface, MBE grown, struct. and transport props. 88−64310
AlN thin films by RF reactive sputtering 87−44393
AlSi-Si contact resist. improvement by plasma etch treatments 87−67164
Au/Zn/Au sandwich metallisation, ohmic contact form. with III-V semiconds. 86−35431
Au-GaAs (001) interfaces, MBE growth and thermal stability *(Japanese)* 85−29042
Au-Ge/GaAs interface, alloying produced by ion beam mixing 86−1821
Au-Ge/n-GaAs(n-InP) and Au-Zn(Be)/p-InP contacts, formation, microstructure and resistances *(French)* 86−8878
Au-Ge(-Ni) deposited on GaAs, ion beam mixing, ohmic contact fabrication 86−21453
Au-InP contacts, metallurgical and elec. props. 85−29037
$AuGa_2$-GaSb interface, metal film MBE growth, AES, LEED, EELS, SEM, X-ray microprobe anal., Rutherford backscattering obs. 86−1812
AuGe/n-GaAs:Si ohmic contact system, nanosecond laser pulse annealing studies 85−18165
AuGe-Ni ohmic contact of n-GaAs, backscattering anal. 86−41602
BP/Si multiple layers on Si substrate, crystalline props., backscattering study 85−22487
Bi-Sb alloys, production by ion beam mixing, for thin film thermoelec. devices 85−40470
Bi_2O_3 coatings for CRT shadow mask, secondary electron emission characts. 88−64215
(Ca,Sr)Fe epitaxial films, lattice matched on GaAs {111} and Ge(111) 85−16932
CaF_2 films, MBE growth on Si, RBS studies 85−49553
CaF_2-Si (100) epitaxy, rapid annealing effects 85−49540
$Ca_{0.44}Sr_{0.56}F_2$ films on GaAs substrate, MBE growth, struct. and elec. props. 86−53472
$Cd_{0.7}Hg_{0.3}Te$, ion implantation, furnace annealing and RTA, damage study and phys. props. 88−33004
CdMnTe, synthesis by implantation of Mn into CdTe 87−45769
CdSe thin films, electrodeposited from $SeSO_3^{2-}$ soln., comp. performance, polarography, RBS, cyclic voltammetry, power meas. 87−290
CdTe, ion implanted, Raman and Rutherford backscatt. spectroscopy obs. 88−44642
CdTe:B, heavily implanted, optical and struct. charactn. 88−32790
CdTe/PbTe multilayer structure, ionized-cluster beam epitaxy of CdTe, RBS studies 86−449

particle backscattering continued
CdTe-PbTe multilayer heteroepitaxial structs., ionised cluster beam growth and optical props. 85−45436
Co-Ni/Si interface, silicide formation, phase separation and nucleation, RBS, AES and SIMS studies 86−14939
Co-Si films, ion bombardment induced mixing, temp. sensor appls. 86−60215
$CoSi_2$, MBE growth, struct. props. and device appls. 87−10453
$CoSi_2$, epitaxial growth, transient annealing methods, RBS/channelling studies 86−28036
$CoSi_2$ epitaxial layers, form. by rapid thermal annealing 86−28076
$CoSi_2$ epitaxial layers on porous Si substrates, strained layer structures, MBE growth 88−38219
$CoSi_2$, ion beam mixed growth, contamination effects 85−34630
$CoSi_2$ self-aligned silicide technology using rapid thermal processing 87−24928
$CoSi_2$ shallow p^+-n and n^+-p junction form. and evaluation 88−71446
$CoSi_x$ on $Si(SiO_2)$, cosputtered films, silicide formation study 85−22525
CoSi-Si permeable base transistors, role of epitaxially grown silicide films 87−73085
$CrSi_2$:As, redistribution of As during silicide formation, RBS/channelling studies 86−28037
$CuInS_2$ films, RF sputtering, struct. and elec. props. 87−314
Fe_3O_4 coatings for CRT shadow mask, secondary electron emission charact. 88−64215
GaAs MBE growth and charactn. on $CoSi_2$ films on Si(111) 88−49812
GaAs, MBE growth on Si (100), effect of Ge buffer layers 88−31740
GaAs MBE growth on high temp. H annealed (100) Si substrates, expt. study 87−73060
GaAs, MBE growth on porous Si, TEM and RBS studies 88−38195
GaAs MBE layers on Si (100), crystalline quality, rapid thermal annealing effects, RBS/channelling studies 87−5402
GaAs, MOCVD grown on Si, Ge and Si/ge, structural, elec. and optoelectronic props. 88−39081
GaAs, capless annealed, ion implant damage, RBS channelling spectra studies 85−18085
GaAs epitaxial films, growth and characterisation 87−44349
GaAs film, excimer laser deposited by photolysis, characteris. 88−38185
GaAs, heteroepitaxial growth on Si, MOCVD 88−38197
GaAs interfaces, interrupted OMVPE grown, charactn. 88−12994
GaAs, ion implant amorphisation and epitaxial regrowth 86−34345
GaAs, ion implantation damage and annealing 85−23642
GaAs, ion implantation damage, rapid annealing studies 86−53532
GaAs, ion implanted, Raman and Rutherford backscatt. spectroscopy obs. 88−44642
GaAs, ion implanted, rapid thermal annealing, Rutherford backscatt. study 85−12131
GaAs, ion-bombardment enhanced etching, Rutherford backscatt. studies 85−45576
GaAs layer, MBE on (100)-oriented Si substrate, preheating effect, charactn. 87−58939
GaAs, neutron transmutation doping damage, ion channeling study 85−55687
GaAs, plasma anodisation, transport number meas. 86−47471
GaAs, rapid thermal processing, evaporation through encapsulants, RBS studies 87−53320
p-GaAs solid-phase ohmic contact with W and W-N diffusion barriers 88−7365
GaAs surface, RIE_x radiation damage, RBS studies 88−13126
GaAs, ultra-thin p^+ layer form., ion implantation and diffusion 88−7468
GaAs:Cr, Cd^+ implanted, dopant conc., Rutherford backscatt. study 85−45534
GaAs:Cr semi-insulating substrates, Be ion implantation *(Chinese)* 85−55658
GaAs:Cr,Si dopant distrib. and elec. activation by short time annealing 87−45766
GaAs:Se^{++}, annealing, elec. and struct. props. 85−23439
GaAs:Si, ion implanted, Si film as annealing cap, RBS studies 86−35543
GaAs:Si, ion implanted, amorphisation and epitaxial regrowth, defect depth profiles, RBS studies 87−6527
GaAs:Si/Si, ion implanted structure, defects and donor activation 87−53346
GaAs: Si(Se)(Zn)(Be), ion implanted, rapidly annealed, damage removal process 87−11589
GaAs:Si(Se)(Zn)(Be), ion implanted, rapidly annealed, relation between secondary defects and electrical activation 86−27858
GaAs:Sn, anomalous Sn diffusion, RBS studies 86−8988
GaAs:Sn, form. by pulsed ruby laser interdiffusion, props. and elec. characts. for FET contact structs. 87−38066
GaAs:Sn, heavily implanted, annealing effects, channelling/RBS studies 87−53180
GaAs/Au layer structs., ion beam mixing, struct. and elec. props. 87−37977
GaAs/Au ohmic contacts, thermally induced metal-semicond. reaction study 86−21258
n-GaAs/AuGe-Ni, ohmic contact fabrication RBS anal. 87−17783
$GaAs/Ca_{0.45}Sr_{0.55}F_2/Ge$ (100) heterostructures, lattice matched, MBE grown, RBS and SIMS 88−39174
GaAs/Pd/Ge nonalloyed ohmic contacts by solid phase epitaxy 87−74108
GaAs/$TiSi_2$ ($TaSi_2$) contacts, conc. profiles and elec. props. 88−25977
GaAs/metal contacts, interface reactions and elec. characteristics 87−66978
GaAs/polycrystalline Si interfaces, Si diffusion, RBS, SIMS and TEM studies 86−14890
GaAs-Au, encapsulated ohmic contacts, alloying process, RBS studies 87−53287
$GaAs-Ca_{0.43}Sr_{0.57}F_2$-GaAs, MBE, temp. depend. of crystal quality 86−52492
GaAs-Ge heteroepitaxy on Si substrates, recrystallised Ge-on-insulator intermediate layers 87−23676
GaAs-Ge-Mo-W, n-type, refractory ohmic contact 88−13031
n-typeGaAs-Ge,Ni ohmic contacts, form. by ion beam mixing 88−57373
GaAs-Mo Schottky diodes, elec. characts. and microstruct. study 87−11733
GaAs-Nb(NbN) Schottky barriers, RBS studies 87−32320
GaAs-Si MBE heterojunction, cross doping and defect control and charactn. 88−49814
GaAs-Si heterointerface, MBE grown, struct. and transport props. 88−64310
GaAs-Si(100), MBE growth of high quality GaAs layers, defect density 88−11971
$GaAs_{0.2}P_{0.8}$/GaP strained layer superlattices, ion implantation 85−45537

GaInAs, anodic oxidation, Auger and RBS comp. anal. 87−67103
GaInAs, heavily doped n-type layer form. by ion implantation 85−18235
$Ga_{0.47}In_{0.53}As$:Be(Mg), ion implanted, RTA, dopant redistrib., crystalline damage removal 88−13102
GaP, ion implantation damage and annealing characts. 88−64379
GaP, ion implanted, degree of amorphousness, ellipsometry and backscatt. spectrometry study 85−12143
GaP, laser induced damage, channelling in Rutherford backscatt. obs., defect prod. mechanisms 87−67038
GaP/Au ohmic contacts, thermally induced metal-semicond. reaction study 86−21258
GaSb, ion implantation damage and annealing characts. 88−64379
$GdSi_2$, oxidation behaviour studied by RBS 86−47492
Ge MBE on Si(100), growth and charactn. 88−43893
Ge detector, γ-ray scatt. in low-background shielding *(Japanese)* 88−10258
Ge, epitaxial CVD growth on Si(100), deposition, annealing and charactn. 88−56235
Ge epitaxial films, growth and characterisation 87−44349
Ge, epitaxial growth of $NiGe(CoGe_2)(Co_5Ge_7)$, TEM, SEM, RBS/channelling and X-ray diffraction studies 88−38218
Ge, epitaxial layer formation on Si, implantation and oxidation 88−6446
Ge epitaxial layers on Si substrates, growth and charactn. 88−12015
Ge ion beam deposition on (100) single cryst. substrate, interface, thin film and damage form. 87−5478
Ge, ion implanted and laser annealed, struct. and optical props., RBS studies 86−28167
Ge, low temperature epitaxy by direct ion beam deposition 88−406
Ge single-crystals, wet chemical oxidation 88−50721
Ge-Au-GaAs system, ion bombardment assisted reaction, Rutherford backscatt. study 85−40654
Ge-Si:P epitaxial layers, dopant implantation and rapid thermal processing 86−35378
Ge_xSe_{1-x} glass, photoinduced diffusion of Ag 85−34697
Ge_xSi_{1-x}, MBE growth on Si (111) vicinal surfaces 85−60960
Ge_xSi_{1-x}/Si, strained layer superlattice, MBE, Raman scatt. 87−45733
Ge_xSi_{1-x}/Si(Ge) strained layer MBE, layer synthesis and evaluation, structural studies 86−13782
GeSi-Si strained layer superlattices, growth using limited reaction processing 87−16646
GeSi-Si strained layer superlattices, growth using limited reaction processing, struct., TEM, AES, RBS 87−58967
$H_xLi_{1-x}NbO_3$ waveguides synthesized by proton exchange, structural characterisation 86−48096
HfN sputtered thin films, Kr^+ bombardment, microhardness and adhesion, Rutherford backscatt. spectra 85−54515
$HfSi_2$ grown thermally from evaporated Hf and Si films, formation and elec. props. 86−21447
HgCdTe, thermal processing, Hg loss rate 85−34492
$Hg_{1-x}Cd_xTe$ anodic oxide growth mechanism and composition studies 86−67806
HgTe epilayer interfaces, sublattice disorder, channelling and RBS studies 86−20047
HgTe/CdTe superlattices, struct. and elec. props. study 86−67727
InAs, ion implantation damage and annealing characts. 88−64379
InP (100) surfaces, structural damage during plasma-employing deposition processes 85−55464
InP, electron energy distribs. at 50 keV 88−39328
InP films, excimer laser induced MOCVD, RBS studies 86−482
InP films on oxidised Si substrate, laser recrystallisation 87−17720
InP, ion implanted, defect production and annealing 85−45532
InP:$Bi^+(N^+)$, ion implantation disorder, annealing effects, RBS channelling study 87−38097
InP:Fe, Mg^+, ion implanted, annealing behaviour 86−2023
InP:Si annealing behaviour studies 88−57407
InP:Si, ion implanted, rapid thermal annealing and furnace annealing effects 86−35338
InP:Si^+, ion implantation, disorder prod., Rutherford backscatt.-channelling study 85−50396
InP:Si-AuGe/Ni/Au rapid thermal alloyed ohmic contact, elec., structural and metallurgical props. 87−74110
InP/Au ohmic contacts, thermally induced metal-semicond. reaction study 86−21258
InSb, ion implant amorphisation and epitaxial regrowth 86−34345
InSb, ion implantation, AES, PIXE and RBS studies 85−45535
LaB_6-GaAs (001) Schottky barrier, form. and thermal stability 88−19742
$LiInSe_2$ films, hot wall epitaxial growth on {111} A oriented GaP, RBS and AES studies 86−46318
$LiInSe_2$ thin film hot wall epitaxy and structural charactn., RBS, SEM and AES studies 87−58948
$LiNbO_3$, He^+ implantation, lattice disorder, refractive index changes 87−12201
Mo/Al-Si interdiffusion kinetics and contact resistance study for VLSI appls. 87−11710
Mo-Pd-Si, thin film metallisation system, interdiffusion, cpd. formation 87−11701
Mo-Si, ion implantation induced silicide formation *(German)* 88−32933
$MoSi_x$ cosputtered films, stoichiometric shifts during subsequent heat treatment 85−22550
$MoSi_2$/Si polycide structure, rapid thermal annealing, RBS anal. 85−55740
$MoSi_2$-GaAs Schottky barrier diodes, Z 85−55764
$NISi_2$, epitaxial growth, transient annealing methods, RBS/channelling studies 86−28036
Nb-oxide-PbAuIn Josephson edge function fabrication, role of Ar^+, CH_4^+, O_2^+ and backscatt. Pb^+ ions 85−56172
$NbSi_2$ sputtered films, rapid thermal annealing 87−11523
Ni silicide formation by pulsed-incoherent-light annealing, RBS and scanning Auger microprobe studies 86−1859
Ni/Si layers, mixing by incoherent light pulse annealing 85−61764
NiSi, metastable phase formation on Si(111> by pulsed laser irradiation 88−38222
Ni_2Si, epitaxial, form. by electron beam annealing of Ni thin film on Si substrate 85−33454
$NiSi_2$, MBE growth, struct. props. and device appls. 87−10453
$NiSi_2$, epitaxial form. by electron beam annealing 85−33456
$NiSi_2$, epitaxial form. by multi-shot laser irrad. of Ni thin films on Si 85−49549
$NiSi_2$ epitaxial layers, form. by rapid thermal annealing 86−28076
$NiSi_2$:N_2^+-Si, buried Si_3N_4 nitride layers, formation by ion implantation 88−57445

particle backscattering continued
$NiSi_2$-Si, epitaxial growth of silicide layers by electron beam annealing 87−10473
Pd_2Si epitaxial film on Si, rapid thermal annealing prep., Schottky barrier studies 85−50274
PtSi epitaxial film on Si, rapid thermal annealing prep., Schottky barrier studies 85−50274
PtSi formation, using CW lamp annealing, kinetics, Rutherford backscatt. study 85−34636
Pt_xSi_{1-x}/n-GaAs contacts, elec. and metallurgical characts. 87−32325
PtSi-Si, interfacial metallurgical interactions, elec. characts., effect of H 87−24925
Rh/GaAs Schottky contact, correlation between solid-state reaction and electrical props. 87−32324

Si (100)/Ti-W interface, Schottky barrier height 87−60170
Si MBE on GaAs, characterisation 85−33414
Si, N^+ ion implantation, buried nitride layer structs., TEM, RBS, SIMS 86−58393
a-Si, RF sputtering, in Ar or Ne, comp., elec. and optical props. 85−33504
Si, RIE-induced damage using SF_6 gas mixtures 88−13133
Si SOI structure, O^+ implantation and high temp. annealing, RBS studies 87−24948
Si SOI structures, O^+ implantation and lamp annealing 88−39147
Si SOI structures by Si MBE growth on oxidized porous Si, RBS/channelling studies 86−62213
Si SOI structures, zone melting under SiO_2 cap, RBS studies 85−54480
Si, amorphous and single cryst., etching rate, ion backscatt. and channelling meas. 87−11693
Si, amorphous, ion implanted, pulse laser annealing, phase transformations and impurity redistribution, Rutherford backscatt. study 85−1329
Si, amorphous, pulsed-laser melting, resolidification from surface, RBS studies 86−52418
Si, annealing of damage caused by reactive ion etching 86−58395
Si buried oxide structure formed by O ion implantation 87−6539
Si defect annealing and impurity activation during high-intensity As^+ implantation doping 87−32390
Si epitaxial (100) films, low temp. electron beam evaporation 85−28218
Si epitaxial film growth on porous Si layers, oxidation and etching rates, Rutherford backscatt. and TEM studies 86−62223
Si epitaxial films on ZrO_2-Y_2O_3 stabilised substrates, physical props. rel. to growth temp. 85−10739
Si, epitaxial growth, low temp., by ultrahigh vacuum/chemical vapor deposition, RBS studies 86−40726
Si epitaxial layers on ZrO_2-Y_2O_3 (100), interfacial oxidation, RBS studies 85−50412
Si film on $(Y_2O_3)_x(ZrO_2)_{1-x}$, phys. props., influence of growth temp. 85−34468
Si films, solid-phase epitaxy on Si substrates, interfacial oxide effects, RBS/channelling studies 88−31753
Si gas immersion laser doping, struct. and elec. props. 85−12158
Si ion beam deposition on (100) single cryst. substrate, interface, thin film and damage form. 87−5478
Si, ion implantation, SiO_2 form. temp. depend. and excess O diffusion, Rutherford backscatt. study 86−35560
Si ion implantation, buried SiC layer form. struct., optical elec. characts. 86−35561
Si, ion implantation damage and annealing 85−23642
Si, ion implantation, formation mech. and structures of buried SiO_xNy layers 87−38104
Si, ion implanted, Raman and Rutherford backscatt. spectroscopy obs. 88−44642
Si, ion implanted, degree of amorphousness, ellipsometry and backscatt. spectrometry study 85−12143
Si, ion implanted, rapid thermal annealing, Rutherford backscatt. study 85−12131
Si, ion implanted, transient annealing, residual damage, diffusion and elec. cond. 85−34462
Si, ion-implanted, laser beam annealing, laser spot intensity distribution 86−41509
a-Si layer, ion beam-assisted annealing, epitaxial recrystn., RBS study 86−52480
Si layers, epitaxial regrowth using ion implantation amorphisation 88−56228
a-Si layers, pulsed laser irrad., melting and impurity redistrib. 85−12098
Si, low temperature epitaxy by direct ion beam deposition 88−406
Si molecular beam epitaxy, surface reconstruction effects, LEED, ion scatt. and channelling studies 85−54472
Si nitridation by plasma, SiN formation, insulating thin films for VLSI, electronic and physical characts. 86−2038
a-Si, p-n junction solar cells, ion drift of Au^+ and Au^- charge states 86−47386
Si, plasma anodisation, transport number meas. 86−47471
Si, plasma-assisted etching, surface modification 85−45575
Si, plasma-chemical etching, ion irradiation, struct. and microgeometry 85−34845
Si, reactive ion etching in $CClF_3/H_2$, near-surface disorder, He ion scattering/channeling study 85−34835
Si, reactive sputter etching, damage removal methods 87−11675
Si, reactive sputter etching damage removal methods 87−74207
Si single crysts., insulating cpd. form. by ion beam synthesis, RBS, SIMS and cross-sectional TEM studies 87−11623
Si, solid phase epitaxial growth, press. effects, RBS/channeling studies 85−54449
Si substrate, amorphous Ni-W(Ni-N-W) films reaction 85−12005
Si, surface contamination during reactive ion beam etching with Cl_2 87−1420
Si surface, plasma etching and Rutherford backscatt. investigs. 86−47473
Si, surface reconstruction during Ge epitaxial growth, LEED, Auger effect and Rutherford backscatt. studies 85−60964
Si surface texturing by Ar^+ ion beam dynamic recoil mixing, Rutherford backscatt. study 85−6845
Si thermal regrowth on sapphire, cryst. quality, ion implantation effects 86−20021
Si thin membranes, channelling transmission of protons 87−38031
Si, topographic marks, backward scattered electrons, lithography appl. *(Polish)* 85−1444
Si, vapour deposited coatings, amorphous and cryst., XeF_2 vapour etching, ion backscattering study 85−50411

TbFeCo amorphous sputtered films for magneto-optical media, microstruct. and mag. characterisation 88−58272
Ti films, magnetron sputtered, $TiSi_2$ and TiN formation during N_2 annealing, RBS study 86−21401
Ti, oxidation, Rutherford backscattering spectrometry, AES, X-ray diffr., elec. resist. meas. 87−11674
Ti sputtered thin films, on Si, silicide form. by halogen lamp annealing, Rutherford backscatt., X-ray diffr. and sheet resist. meas. 85−50272
Ti/Cu bilayer couple, cpd. form., glancing angle X-ray anal. and Rutherford backscatt. 86−15097
Ti/Si struct., O redistribution during sintering 85−23546
Ti/Si:As silicide form., impurity implantation and redistrib. effects, electron diffr. and RBS studies 87−38098
Ti/Si:B,As,Sb interface, dopant redistrib. during silicide form. by rapid thermal processing 87−32394
Ti-Si interface, self-aligned Ti silicide formed by rapid thermalannealing, RBS study 87−1291
Ti-Si thin film interaction, RBS and X-ray diffr. study *(Chinese)* 88−7366
Ti-TiN bilayers, diffusion barrier props. for low resistivity contacts, comparison with Zr-ZrN 87−17791
TiN (TiO_xN_y), SOS IC metallisation 88−20158
TiN films, brown and golden, diffusion barriers in large scale integration, TEM studies 88−64668
TiN films, reactively sputtered, diffusion barrier appl. 88−70360
TiN formation on Si and SiO_2 by rapid nitridation using large area electron beam 88−13181
TiN formation on top of SiO_2, in situ RBS, AES, and TEM study 88−39254
TiN, reactive sputter deposition, incorporation of N, O, and Ar 88−24787
TiN sputter deposited films, struct. and elec. charactn., diffusion barrier appls. 88−24789
TiN:O films, DC reactive sputtered, metallisation diffusion barrier appl., RBS studies 88−43932
TiO_xN_y, thin film diffusion barriers in SOS integrated circuits 88−7705
$TiSi_2$ film, surface segregation and initial oxidation, Rutherford backscatt. meas. 85−50456
$TiSi_2$, form. by incoherent light annealing, impurity effects 86−21346
$TiSi_2$, formation, by electron beam annealing, on Ti:As films 85−34629
$TiSi_2$, formation by electron beam irradiation under nonsteady state conditions 85−34638
$TiSi_2$ formation on Si wafer by means of ion mixing *(Chinese)* 85−45447
$TiSi_2$, oxidation, Rutherford backscattering spectrometry, AES, X-ray diffr., elec. resist. meas. 87−11674
$TiSi_2$ plasma-enhanced CVD films for interconnect appls. 87−23714
$TiSi_2$, self-aligned silicidation by lamp annealing 85−34890
$TiSi_2$ thin films, fast radiatively processed, elec. charact. 86−21248
$TiSi_x$, plasma-enhanced CVD films props. 85−22519
$TiSi_2$:As/Si silicide form., impurity implantation and redistrib. effects, electron diffr. and RBS studies 87−38098
$TiSi_2$/polycrystalline Si interface, heat treatment effects, RBS studies 86−41586
TiW/Al metallisation, N incorporation effects, RBS, AES, SEM and XPS studies 88−26103
$Ti_{0.3}W_{0.7}$/GaAs Schottky gate contacts, films-substrate interaction rel. to annealing temp. 86−47394
TiW-Si contact resist. improvement by plasma etch treatments 87−67164
V_3Si films by solid-phase reaction, struct. and elec. props. 88−26690
W layer, tempered, on Si single crystal. production and evaluation *(German)* 85−10788
W selective LPCVD films on Si substrate, charact. 87−16704
W, selective deposition on $CoSi_2$ by LPCVD 87−58996
W, selective low press. CVD on silicides 88−26104
W-GaAs diode system, Schottky barrier degradation after high temp. annealing 87−18071
W-GaAs high-temp. stable interface, appl. to MESFET and digital ccts. 88−25965
$W_{75}C_{25}$ cosputtered films, diffusion barriers 88−39259
WSi_2 film deposition techniques, Rutherford backscatt. studies 85−10786
WSi_x CVD layer, As^+ ion implantation, RBS studies 86−28154
WSi_x coevaporated films, struct. and props., RBS study 86−21445
WSi_x cosputtered films, stoichiometric shifts during subsequent heat treatment 85−22550
$W_xSi_3/In_{0.53}Ga_{0.47}As$ ohmic contacts to n-GaAs, self-aligned heterojunction bipolar transistor appl., stability study 87−45694
WSi_x-GaAs interface, thermal stability 87−24922
$WSi_x\text{-}Si\text{:}P\text{-}SiO_2\text{-}Si$ struct., LPCVD WSi_x layers, oxidation and annealing 88−1725
$W_{60}Zr_{40}$ amorphous film, diffusion barrier, metallisation schemes, thermal stability 85−23720
YSi_{2-x}, epitaxial growth on Si (111), RBS/channelling studies 88−38217
ZnO varistors electrode, laser fabrication 85−50605
ZnS films, MOCVD growth on GaAs, interface defects and impurities 88−18689
ZnSe, MOCVD growth on GaAs, stability and interdiffusion at interface 88−31841
ZnTe-CdSe, heterojunction, cleavage surfaces, electron probe investigations 85−28997
Zr-ZrN bilayers, diffusion barrier props. for low resistivity contacts, comparison with Ti-TiN 87−17791

particle backscattering continued
$ZrSi_2$, plasma anodisation, transport number meas. 86−47471

particle beam diagnostics
3 MV tandem pelletron system 87−56958
UoSAT-2 particle-wave experiments 88−10461
accelerated electrons handling and diagnostics, primary converter for energy and flux density 88−36327

CDF muon detection system 86−11848
CELLO liquid Ar calorimeter, particle identification in 250 MeV to 60 GeV region 88−68275
channel plate detector for time-of-flight meas. 85−4235
clocked, fast electronics trigger for high energyphysics 86−44592
collider detector facility, indirectly cooled supercond. solenoid design and tests 86−25115
collimated fission product detection system for fast reactor safety expts. 88−36375
combined hodoscope calorimeter, energy and spatial resolution at 18.5 GeV and 38 GeV 88−47996
Compton emission neutron detectors with Hf emitters for RBMK-1000 appls. 88−29795
Compton suppression shields, asymmetric NaI(Tl) and BGO, Monte Carlo calcs. 85−37917
conducting polymers, application of metal-insulator transition 86−2863
conference, monopole '83, Ann Arbor, MI, USA (Oct. 1983) 85−31637
conference, nuclear science, San Francisco, CA, USA (Oct. 1987) 88−55775
correlation counter calibration by calorimetry and γ-ray meas. 87−21451
CP violation in K^0 decays, beam and detector for high-precision meas. 88−47997
cryodetector using solar cells, α and spontaneous fission activity meas. in volatile species 88−4806
cryogenic detectors, hopes and challenges 88−61079
cylindrical rem meters, highly scatt. environments, calibration 88−10256
D0 experiment at Fermilab, data acquisition system 87−14217
dead-time measurement, electronic circuit design 88−4854
detector magnets in high energy physics 88−65980
detectors for quark and gluon jets at high energies 85−26715
discriminator system for neutron-gamma mixed beams *(Chinese)* 86−56042
distortionless bidimensional localisation on a resistive plane 88−10250
Dϕ hadron collider detector, design features 86−11850
dynamic range charge amplifier for Fermilab Collider Detector Facility 86−50432
EGS, EM shower simulation program for SSC calcs. 88−10281
electromagnetic shower background in air gap magnetic muon spectrometer 88−74773
electron avalanche light emission due to electron multiplication in high electric field, optimal conditions 88−54408
electron beam current density distrib. meas., improved detector design 85−9024
ELMUD, electron-muon detector for Higgs physics 88−16631
energetic particle detectors for space research 85−31718
evolution as particle accelerators have evolved 87−41823
Faraday cylinder-calorimeter system for beam dosimetry in high-power electron accelerators 87−41822
Fermilab collider detector, refrigeration tests of cryogenic system and solenoid 85−43266
Fermilab D0 colliding beams detector, monitoring system 86−60573
flow data acquisition with fast digitizers 88−23000
forward detector for SSC, modular design 88−10279
forward detectors, SSC requirements 88−68280
fusion reactor blanket models, selection criteria for activation detectors for integral expts. *(German)* 88−4794
future accelerators, physics workshop, La Thuile, Italy and Geneva, Switzerland (Jan. 1987) 88−42
future detector needs for high energy physics 86−50305
gas detectors, operational principles and appls. in intermediate energy range 88−10263
gas filled detectors, VME based pressure control system 88−47993
gas sampling electromagnetic calorimeter using conductive plastic tubes 87−63627
gradiometers, series-parallel, for monopole detectors 85−15176
H1 liquid Ar calorimeter, test results and fluctuation correction techniques 88−68272
hadron calorimeters, energy resolution of uranium and other absorbers 87−77537
hadronic showers, parametrisation of lateral profile in calorimeter 88−10282
hardware processor for a missing energy trigger 86−44593
heavy shield for γ-ray detector for fast n expts. 86−50377
HERA ep collisions, machine design and status, detectors 88−42354
high luminosity detectors, technology 85−26714
high resolution hadron calorimetry 88−29869
high temperature superconductors, superconducting magnets for particle accelerators and detectors 88−26730
high-resolution electronic particle detectors, review, book contrib. 85−37939
impact parameter trigger for charmed particle selection 88−48000
inhomogeneous, based on thermoelastic effect in crystalline quartz *(Russian)* 88−16633
interaction pileup tag for SSC 88−10289
intermediate energy physics expts., advantages and limits of using a microcomputer online, ANTIN system 88−48013
intermediate energy physics expts., data acquisition systems 88−48011
KNVK2 vacuum fission chambers for neutron flux density meas. 88−16625
L3, CERN's very large magnet with aluminium winding *(French)* 85−15195
L3+1 detector at SSC, reconstruction of isolated 500 GeV muon 88−74763
large capacitance detectors, dependence of transformer ratio on the shaper weighting function in transformer-coupled low noise preamplifiers 87−77581
large detectors, software design 87−77528
large detectors for hadron colliders 85−26667
large plotted circuit board production, delay lines for particle calorimeter 87−11187
large solid angle detection system for heavy fragments 87−77542
large solid angle magnetic detector for precision studies of e.m. processes in low-energy $\bar{p}$ interactions 87−77536
large-area fast-timing detectors developed for the TOFI spectrometer 88−29924
LEP detector proposals 86−56056
LEP detectors, DELPHI experience *(French)* 86−11844
LEP project at CERN, detectors *(Dutch)* 88−53955
LHC, jet detection, and hadron calorimetry, detector technology and electronics 88−10264
light pulser system for testingphotomultiplier-based counter systems 86−858
liquid Ar calorimeter for electron identification at D0 expt. 88−68276
liquid Ar detector, time resolution, physically realisable filters 86−25122
liquid sampling calorimeters, noise and pile-up 88−68302
liquid TMS calorimeter, performance test, charge yield and stability 87−14727
low capacitance solid state detector, low noise preamplifier 88−10252
low energy neutron detection, recent progress 87−29529
low noise front end electronics for large capacitance detectors 88−29909
low temperature detectors for neutrino expts. and dark matter searches 88−4834
magnet technology, conf., Boston, MA, USA (Sept. 1987) 88−62848
magnetic bolometer for single-particle detection 88−42415
magnetic shielding of a large volume for quasi-free neutron oscillation expt. 87−29467
microchannel plate arrays, triple-layer, operating characts. in pulse-counting mode 85−59217
models of particle counters with prolonged dead time 87−35326
monolithic integrated device for fast radiation detection with optical output 88−65357
multichannel sample and hold device, performance report 86−50426
multidetector apparatus, maximum readings range determ. 86−70341
multilayer composite material for X-, γ- and β-ray detector windows 87−3895
multiplicity registration in hodoscope systems with a large number of registration channels 88−36390
muon energy loss mechanisms in 100 GeV-5 TeV region, Monte Carlo simulation, detector design implications 88−74762
muon L3 type detector for SSC 88−10276
neutrino detectors, low temp., workshop, Ringberg Castle, Tegernsee, West Germany (May 1987) 88−37853
neutron calibration field from moderated ^{252}Cf source, design and calcs. 87−29508
neutron calibration field from moderated ^{252}Cf source, expt. characterization 87−29509
neutron flux intensity variation meas., integral counting technique 88−4818
neutron-activation detectors with fissionable nuclides 87−35329
nuclear electronics advances, detectors, spectroscopy and data acquisition 88−74738
nuclear event detector, appl. for protection of communication networks 87−39415
nuclear power systems and nucl. science symp., Orlando, FL, USA (Nov. 1984) 85−39411
Obelix data acquisition system for intermediate energy physics expts. 88−48012
OPAL detector for LEP, fabrication and selection of events *(French)* 86−11845
optical track detectors, calibration of automated meas. systems 87−50126
optically stimulated luminescence detectors, influence of detector parameters on neutron sensitivity 88−4810
optimum weighting functions, energy resolution improvement from input shunt inductor 87−77580
organic photocathodes, liquid and solid, TMAE, TMPD, for gaseous detectors 88−54409
parallel plate avalanche counter at moderate specific ionisation, timing props. 87−3893
parameter assessment for multiple n event detector 86−70322
particle-γ angular correlations, gamma detectors efficiency 87−50144
pedestal drift and cable pickup problems in multiplexed analog signal transmission 88−61175
phonon mediated position resolved α-detection using supercond. tunnel junctions 88−61081
photovoltaic cells, fission product detection *(French)* 88−47982
pileup rejection in pulsed beam experiments 88−29910
PMOS radiation dosimeters; zero bias operation, response linearity study 85−53104
position changing and monitoring system, using M-6000 computer 86−50384
positive and negative ions, high sensitive detection system appl. *(Japanese)* 88−47981
proton recoil telescope, scatter effects, Monte Carlo calcs. 86−11837
pyroelectric pulse ionizing-radiation detector 85−64451
quasi-adiabatic calorimeter for high-intensity electron beams 87−71013
radiochemical detectors for solar neutrino expts. 88−4832
RF SQUID detector for single ion trapping expts. 88−61117
secondary emission detectors, design, advantages for variable γ-dose meas. 88−16624
self powered Rh detectors, depletion laws for reactor use 85−4227
self-powered neutron detectors, appl. in WWER-440 in-core control system *(Czech)* 88−30514
self-powered neutron detectors, calibration, n- and γ-sensitivity meas. 88−61151
self-powered Rh neutron detector, depletion characts. 87−57041
SEM detector system, double, for BSE and SE imaging 85−28918
semiconductor electron current detector for direct recording of electron microscopic diffraction images 85−29714
shortening of pulses by zero pole compensation 86−5808
SLC Detector, analogue data transmission via fibre optics 87−38763
SLD data acquisition electronics system design 86−50306
SNO detector, α-ray background into central D_2O detector 88−4824
Solid state directional gamma detector 86−50364
solid state dosimeter, characteristics improvements 86−50356
SQUID based inductive monopole detector 85−64452
SSC 4π dipole detector for intermediate and high p_t physics 88−74761
SSC calorimetry, physics noise, unbiased events effect, Monte Carlo simulation 88−4830

particle detectors continued

droplet distributions in sprays, image processing system for anal. 85−51719
droplet size distribution changes of water-in-oil emulsion due to electric field induced coalescence 86−68672
drops size changes meas. using Mie scattering 88−47677
electrodynamic balance using photomultiplier tube 86−55844
electrophotographic powder electrostatic props., 3D meas. method 87−39319
electrophotographic toner charge meas. and particle radius meas. 88−27452
electrostatic paint sprays, pressure effects on drop size and distrib. 88−27447
ELZONE particle sizing system calibration improvement 88−36233
fibre optic in-situ particle size meter, power plants appl. 87−14549
fibre optic miniature probe for particle sizing 87−68100
fibre optic particle size monitor 88−74435
fine droplet sizing in dense sprays by using in-line holography *(Japanese)* 85−56887
flow visualisation and particle sizing holography, applications and problems 86−11772
fractal aggregates, imaging, in-line holograms, digital decoding 87−7451
Fraunhofer-holography of particles 85−2431
high purity gases, particle origin determ. techniques 87−77446
high-speed image processing technique, using parallel sampling lines 87−3531
high-speed meas. of particle size distrib., image processing technique 88−16486
high-vortex coal combustor particulate carry-over to gas turbine 85−53542
hologram, double-exposure, particle vel. and displacement distribs. using opt. and digital processing 87−19067
hologram, particle field, size distrib. data reduction by Fourier transform analysis 86−3384
holographic meas., digital image anal. *(Japanese)* 88−10128
holographic particle measurements, automated image analysis 85−15034
holography, far-field, at non-image planes, small particles analysis 87−61264
holography, far-field in-line, and diffr. pattern analysis of particulates, filtering effects 87−19069
industrial appls. of coherent optics at ISL (France) 88−51984
laser Doppler anemometer signals appl. 88−4618
laser flow particle counter and analyser for biomedical analyses 86−25213
laser interferometric droplet sizing techniques, performance comparison 87−21241
laser microparticle analyser, characts. correction for radiation flux density distrib. nonuniformity 86−24771
laser system for particle vel. and size meas. *(Russian)* 86−50249
lidar measurements, multispectral, information content for aerosol size distrib. determ. 85−31080
light scatt. apparatus for nm order particle size meas. 88−50966
light scattering detection with fibre optic sensor appl. to size meas. 87−18594

particle size measurement continued
magnetic tape, subsurface particles, localisation and charactn. 87−46351
meteor mass distribution index, determ. from radar obs. 85−3547
mica nuclear track microfilter cascade fractionator, industrial appl. 87−29666
mica nuclear track microfilter props. for industrial aerosol meas. instrument 87−29665
microelectronics clean rooms, submicron aerosol distrib. determ., diffusion battery assessment 86−34020
microparticle size and conc. meas. by working vol. separation 85−4154
modular laser system for gas flow meas. and combustion products analysis *(German)* 86−55892
multiphase flow, spherical particles size and velocity meas. 87−70885
optical fibre, particle size measurement by light scattering detection 88−36016
optical fibre droplet sizer development 86−2838
particle size analysis system, computerised 86−44759
pattern recognition method using concurrent spatial harmonic and fractal analysis 87−19700
phase Doppler particle analyser extension to submicron particle meas. 87−21239
phase Doppler spray analyser nonspherical drops effect 87−21240
photographs evaluation, digitisation of video signal, TV camera/microcomputer interface *(Czech)* 87−70510
polarisation intensity ratio and pointer beam techniques for suspended particle characters. in multicomponent systems 87−21238
powder grain-size analyser, laser-diffraction type *(Japanese)* 87−63515
pulmonary tree particle analysis by laser Doppler velocimetry 88−10331
semiconductor IC manufacture, fluid dynamic problems 88−26392
semiconductor industry, airborne particle monitoring 86−53752
semiconductor processing, submicrometre contaminant meas. 85−55652
soot particle measurement by the transmissive light extinction method *(Japanese)* 86−44423
soot particle measurement in diesel combustion chambers by the transmissive light extinction method *(Japanese)* 87−3758
spatially resolved droplet size measurements 86−60352
spray particle size distribution meas. by holography data reduction by Fourier transform analysis 85−51307
sub 0.1 μm particle measurement and contamination control 85−64285
surface contamination, particle monitor, coincidence losses 88−29638
Taipei, Taiwan, particulate air pollutant sample analyses, health status effects *(Chinese)* 85−9381
two phase flow diagnostics in propulsion systems, using laser Doppler anemometry 86−38614
volume magnification in particle field holography 87−61246
wafer contamination and defect size meas. using temporal reflectance variation 85−64279
wafer fabrication, comprehensive monitoring of particulates in deionized water [wafer fabrication] 87−60252
wedge-type capacitor for dispersive analysis of electrically conducting powders *(Russian)* 87−32111

conference, High energy particle physics, London, UK (Apr. 1988) 88−62898
cosmic ray particles recording instrument, with dielectric track detectors 85−20845
CR-39, tree track formation *(Chinese)* 86−11865
CR-39 detector, plate-out effects 86−18256
CR-39 for fast n detection, annealing effects on track density 86−60609
CR-39 neutron dosimetry system, operational trials, progress to Jan. 1985 86−44723
CR-39 plastic, B doped, neutron dosimetry and personal monitoring 85−26721
CR-39 plastic, etching tracks by dyeing method *(Chinese)* 86−11864
CR-39 plastic detector, effect of post-irradiation annealing 85−64488
CR-39 plastic doped with chlorinated cpds., track etch rates 88−48027
CR-39 plastic SSNTD, exposure to Mn beam, cross sections for calibration 85−20837
CR-39 plastic track detector, etching properties *(Chinese)* 86−11855
CR-39 plastic track detector, light particle discrimination 86−50403
CR-39 plastic track detector, sensitivity, etch rate response 85−15248
CR-39 plastic track detector, sensitivity and etching improvements 85−15247
CR-39 plastic track detectors, depth depend. of bulk etch rate 86−50402
CR-39 plastic track detectors, track recording characts. in mixed radiation fields 85−37958
CR-39 SSNT-detector response, dose rate depend. 86−11851
CR-39 SSNTD, track response depend. on registration temp. in vacuum 85−20841
CR-39 SSNTD, track response props. for heavy primary cosmic ray expts. 85−37963
CR-39 SSNTD, UV radiation effects on track registration 85−37957
CR-39 track detector, electrochemical etching, props. 85−20848
CR-39 track detector image analysis system using optic RAM image sensor 86−31270
CR-73, plastic track-etch detector, prep., charge resolution 85−37949
cylindrical drift chamber, Crystal Box detector LAMPF, construction, performance details 86−18254
dielectric track detectors, heavy nuclei registration time determ. 87−50183
dielectric track detectors, sensitivity changing technique 85−26720
digital images anal. appl. to nuclear particle track detector *(German)* 85−37951
drift chambers, laser calibration 85−48187
drift chambers array, resolution study 85−9037
electrochemical etching of particle tracks, tree initiation and propag. 86−50401
electrochemical etching of plastic track detectors, review 85−20844
emulsion telescope with interferential laser metrology *(Spanish)* 88−42437
emulsions, scanning efficiency formula, modification 87−50178
etching curves of external detectors *(Chinese)* 86−11876
fast circle fit with the conformal mapping method 88−68251
fast n spectrometer based on CR-39 p sensitive track detector 86−44599
fingerprints, display method using SSNTD *(Chinese)* 86−11903
fission track annealing in apatite, track length and Arrhenius plot, comments 87−29674
fission track counting, statistical model tests 86−60608
fission track dating of zircon *(Chinese)* 86−11885
fission track dating of zircon geostandard *(Chinese)* 86−11883
fission track distributions in external detectors *(Chinese)* 86−11875
fission track methods for effective ranges in ashed biological material 86−60610
fission tracks distribution in external and internal SSNTD surface *(Chinese)* 86−11877

particle track visualisation continued
fission-track dating of Baiyinchang pyritic copperdeposits *(Chinese)* 86−11884
Fourier hologram method for particle track detection in track detectors 86−58993
GEM magnet for LEP DELPHI detector 85−24251
heavy ion track registration in polyvinylidene fluoride 86−50414
high resolution particle tracking for microvertex detection 88−22986
individual neutron monitors, calibration and performance 86−18397
infusion terminal filter of nuclear trackmicroporous membrane *(Chinese)* 86−11898
inorganic SSNTD, fission fragment track annealing, three step model 86−5820
irradiation chamber for expts. with SSNTDs 85−37960
isotopic beams, energy per nucleon determ. utilising SSNTDs 85−37843
kangmar pluton, Xizang, fission track dating, uplift rate *(Chinese)* 86−11882
large area track-etch detectors, rapid automatic scanning system 87−35365
laser-induced amplification and visualisation of β-ray ionised tracks in dense gases 86−9923
layered track chambers, global pattern recognition method 87−29543
Lexan polycarbonate, plastic detectors, heavy ion tracks study 85−20849
LR-115 plastic track detector, response to ^{20}Ne ions 86−56057
magnetic monopole search using mica track etch detectors 85−31754
Makrofol E, solvent effect in nuclear track development 88−4846
Makrofol SSNTD appl. to high energy and heavy ion reactions 85−37962
Makrofol-E plastic track detector, etching conditions *(Chinese)* 86−11856
mica, X-ray small angel scatt. study of high energy Ar tracks 86−50412
mica track microfilters, gas throughput increase by pore struct. change 86−50400
microcavity solid-state detectors 86−56058
microporous membrane pore geometry, microscopic struct. *(Chinese)* 86−11895
microstrip-based tracking system for Xe detector at SSC 88−74769
multistep avalanche counter with optical readout, two-dimens. VUV photon or particle track detector 86−25139
multiwire proportional chamber imaging device with delay line readout *(Chinese)* 86−11911
muscovite, anisotropic track registration, impact distribs. 85−20839
Muscovite mica detectors, reaction product parameters determ. 87−77573
Mylar, plastic detectors, heavy ion tracks study 85−20849
NBX Black Neutron Detector, time correlated associated particle calibration method 85−59192
neutron beam depth-dose dosimetry using track detectors and multigroup transport calcs. 86−50407
neutron detection by LR-115 track detector dosimeter with (n,α) converter 85−37961
neutron fluence rate around reactor, SSNTD meas. *(Chinese)* 86−11888
neutron fluence rate determ. by fission track glass standard *(Chinese)* 86−11890
neutron fluence rate meas. by SSNTD in reactor control rod *(Chinese)* 86−11887
neutron therapy dosimetry by automatic readout of a solid-state nuclear track detector 86−50649
neutron therapy dosimetry by automatic readout of CR-39 SSNTDs 86−25336
neutron water meter in deep well with SSNTD *(Chinese)* 86−11909
non-etching method of displaying tracks *(Chinese)* 86−11854
nuclear track code technique *(Chinese)* 86−11910
nuclear track microfilters, preparation by heavy ion beam *(Chinese)* 86−11900
nuclear track microporous membrane, pore size meas. by flowing rate method *(Chinese)* 88−10287
nuclear track microporous membrane for water sample analysis *(Chinese)* 86−11893
nuclear track microporous membrane preparation *(Chinese)* 86−11899
nuclear track porous membrane for chemical reagent purification *(Chinese)* 86−11896
nuclear tracks in dielectric solids, chemical etching, survey 85−37952
olivine, track etch rate meas. for heavy ions 86−50409
olivine crystals, annealing studies of charged particle tracks 86−50406
olivine crystals, track length calibration of low-energy U ions 86−50408
OPAL central detector, Billoir's track fitting method, efficiency 88−54438
passive detectors for neutron fluence measurement 85−26809
passive personal monitor for working level accumulationexposure *(Chinese)* 86−11892
personnel neutron dosimetry using solid state nuclear track detectors, review 85−26808
phantom depth dose meas. in neutron beam by nuclear track detectors 85−38265
phosphate glass detectors, annealing of relativistic nuclei tracks 87−77575
phosphate glass spectrometric detector, optimum etching for fission fragments 87−29672
phosphate glasses for identification of heavy ions 87−29535
plastic detectors, automatic measuring system for particle tracks 85−4204
plastic monitoring dosimeters for high-power gammafields, PMMA and polyethylene use *(Russian)* 85−53112
plastic track detector, cellulose nitrate, response to heavy ions 86−5817
plastic track detector, CR-39, track recording props. for accelerated heavy ions 86−5815
plastic track detector, CR-39, UV sensitised, thermal stability of ^{240}Pu α damage trails 86−5818
plastic track detector, etching bath, temperature control *(Chinese)* 86−11872
plastic track detector, radial pore-etching rate study 86−50405
plastic track detector CR-39, detection of primary cosmic heavy nuclei 85−59207
plastic track detectors, response to heavy ions 86−44581
plastic track detectors used for relativistic nuclei identification 85−37948
polycarbonate detectors, Rn/decay product dosimetry by electrochemical etching, calibration *(German)* 87−8863
polycarbonate plastic, nuclear tracks, thermal annealing 86−65386
polycarbonate plastic detectors, heavy ion track study 85−48188
polycarbonate track detector, response temp. depend. *(Chinese)* 86−11860
polymeric nuclear track detector, CR-39, sensitivity, laser-induced enhancement 86−70349
polyvinylidene fluoride film, fission fragment irradiation, coexistent gases effects on track etching 86−60611
pore size measurement of nuclear track microporousmembrane *(Chinese)* 86−11894
particle track visualisation continued
projection chamber in large vol. sampling calorimeter 85−9040
proton sensitive track detector neutron dosimetry 86−60615
radiation detectors, charged-particle track simulation using X-ray and laser beams, reviews 86−25143
red blood cell deformability, nuclear track microporous membrane study *(Chinese)* 86−11897
simulation by two-photon ionisation of composite mols. 85−26718
soda glass detectors, improvement of track development properties using etching techniques 86−18255
soda glass detectors, response to heavy ions, calibration for cosmic ray heavy ions 88−4840
soda glass detectors, track recording props. 85−64497
soda glass track detector, annealing of ^{132}Xe-ion tracks 86−5816
soil humidity and waterlogging influence simulation in α-track survey *(Chinese)* 86−11862
solid state nuclear track detector for dose assessment of heavy charged particles 87−14762
solid state nuclear track detectors, U α particles detection efficiency 86−5814
solid state track detectors, registration temp. effect in cosmic ray expts. 86−50413
solid-state detectors, signal processing 86−65389
solid-state track spark automatic detector, absolute fission rate meas. *(Chinese)* 86−11868
spark counter design *(Chinese)* 86−11870
spark jumping technique of fission fragment tracks *(Chinese)* 86−11869
SSNTD, α-particle and proton discrimination *(Chinese)* 86−11874
SSNTD, appl. in neutron dosimetry, environment and life sciences *(Chinese)* 86−11886
SSNTD, etched track profiles of charged particle trails 85−37955
SSNTD, etching critical angle meas. in quartz and mica 85−20840
SSNTD, fission fragment track diameter bulk etching rate, swelling effect *(Chinese)* 86−11859
SSNTD, geometry factor G>0.5, finding values cause *(Chinese)* 86−11879
SSNTD, ion source emission profiles, determ. using solid state nuclear track detectors 86−18229
SSNTD, track nonetching revelation by graph copolymerisation and sensitisation techniques 85−37956
SSNTD, useful technique for basic research and applied work in Pakistan 85−37953
SSNTD appl. to geology and archaeology *(Chinese)* 86−11880
SSNTD audio frequency voltage source *(Chinese)* 86−11871
SSNTD bulk etching rate determination methods *(Chinese)* 86−11858
SSNTD etching methods *(Chinese)* 86−11853
SSNTD for cosmic ray research *(Chinese)* 86−11908
SSNTD personnel neutron dosimeters, research and development advances 85−38264
SSNTD readout, image anal. system, dosimetry and fusion diagnostics appl. 85−20850
SSNTD transfer characteristics from external surface tointernal surface *(Chinese)* 86−11878
SSNTDs for neutron detection, automatic spark counter for high track density meas. 86−70351
stacked film track detector, cosmic ray interaction tracks anal. 86−5821
streamer chamber pictures, digitized, track recognition 88−22988
stretched polyester film for fission fragment recording *(Chinese)* 86−11863
thermoluminescent sheets for high energy hadronic, EM shower detection 86−32197
thermonuclear fusion product diagnostics by nuclear track detectors 85−20838
time-of-flight neutron hodoscope, performance 86−50394
track etch detectors for mag. monopole expts. at SSC 88−68291
track reconstruction with the TRISTAN-TOPAZ TPC 88−29829
underground searches for anomalous penetrating particles, GUT monopoles, quarks, heavy charged particles 85−15242
vector drift chambers, track finding and fitting 85−48186
VENUS central drift chamber, charged particles, pattern recognition algorithm 87−3906
VENUS detector, fast track finding processor, RAM lookup-table based 88−61125
vertex and track parameter estimation method 86−65385
vertex detector using scintillating fibre optics, conceptual design 85−4230
vertex position determination using kinematic fit 86−65384
video-based automatic method to measure charges in nuclear track emulsions 87−63679
videoelectronic system for heavy ion microscopic track struct. meas. 87−77570
Z80 microprocessor-based subroutine system for track detector evaluation 86−44580
zeolites, annealing behaviour of fission tracks 86−50411
zero power reactor, $\delta^{25,28}$ meas. by SSNTD *(Chinese)* 86−11889
zircon, fission track dating *(Chinese)* 86−11881
α-particle detection theory for nuclear track detectors 86−50410
α-track methods for effective ranges in ashed biological material 86−60610
$\bar{p}p$, E=1.8 TeV at Fermilab Tevatron 1, CDF detector performance 88−68292
Ar-methane, liquid mixture, electrostatic imaging of ionizing radiation 88−4843
^{197}Au(^{238}U,f), 16.7 MeV/N, five prolonged fission events observed using SSNTDs 85−37964
B content in plants and soil, SSNTD technique *(Chinese)* 86−11905
B in agriculture, meas. by spark counter *(Chinese)* 86−11866
BaF_2 plastic scintillator, energy resolution, response curves 86−50393
Ce_2O4d30-based scintillating glass, fibre-optic plate detector 85−43275
Mn-Mo-Nb steel, B influence on stress relief cracking *(Chinese)* 86−11904
Rn and daughters, concentration measurement by multidetector devices 85−38262
Rn, dosimetric measurements using CR-39 plastic track detectors 85−38261
^{222}Rn and daughters, concentration inside houses, LR-115 and Cr-39 SSNTD meas. 85−38263
^{222}Rn/^{220}Rn discrimination in U prospecting with SSNTD films 85−20836
U content in Yellow River water fission track anal. *(Chinese)* 86−11906
U content in ores, fission track method *(Chinese)* 86−11901
U deposit in sand conglomerates, α-track study *(Chinese)* 86−11902
U estimation in ashed biological material by nucl. track methods 86−60610
U exploration in Pakistan, use of alpha sensitive plastic films 85−37959
U mine survey, fission track method, automatic measuring techniques *(Chinese)* 86−11867

particle track visualisation continued
U trace determ. in atmospheric precipitation by fusion tracks *(Chinese)* 86−11907
U(^{238}U,f), 16.7 MeV/N, five prolonged fission events observed using SSNTDs 85−37964
Xe time projection chamber, design, performance 86−38712

particle tracks
bipolar IC, single-event upset caused by charge collection from ion tracks 85−18442
charged particle tracking in CDF 85−26722
combined scintillation and track technique to search for $\beta\beta$-decay 88−23007
compound nuclei from α particle-nucleus reactions in minerals, tracks anal. 86−44582
Kalman filtering appl. to track and vertex fitting 88−22983
momentum and energy estimation for charged tracks in nuclear emulsions and bubble chambers 85−64494
neural networks and cellular automata, appl. to high energy physics expts. 88−68281
satellite memory cell double-bit upset rates, cosmic ion track size effect 88−25191
semiconductor devices, heavy charged particle track simulation using focused laser beams 88−26177
simulation by two-photon ionisation of composite mols. 85−26718
Techniques and Concepts of High-Energy Physics IV, conf., St. Croix, Virgin Islands (June 1986) 88−37848
TOPAZ TPC-trigger, design, performance 88−68217
vertex detectors, intermediate boson decay products 88−42441
Si surface barrier detectors, partially depleted, field funnelling and range straggling 85−20843

particle velocity analysis
see also ion mobility; mass spectrometers; particle spectrometers
AC corona charging of particles, mobility statistics meas. 87−38602
hologram, double-exposure, particle vel. and displacement distribs. using opt. and digital processing 87−19067
image velocimetry, automatic fringe analysis by cross-correlation 88−53884
image velocimetry, rapid transparency analysis using optical correlation 88−60960
industrial appls. of coherent optics at ISL (France) 88−51984
mass-separated neutral energy analysis by combined electrostatic analyser and E×B filter 86−50438
phase Doppler particle analyser extension to submicron particle meas. 87−21239
phase probes for on-line velocity measurements of superHILAC external beam liner 88−61017
steam turbine solid particle erosion damage modelling and design improvements 86−61375
thermographic look at plasma spraying 87−14166
vacuum arc, cathode-produced Mo macroparticles, velocities and emission rates 86−8671

Pascal listings
attenuator circuit calcs., Hisoft Pascal 80 program 88−44014
binary tree Gray codes generation algorithm 85−62971
CP/M computers as frequency counters, Turbo Pascal program *(German)* 88−10092
cyclic redundancy check implementations 86−29715
digit-reversal permutation algorithm, for FFTs and fast Hartley transforms 87−75780
equalising calc., program listing in Turbo-Pascal *(German)* 87−65638
extended Euclidean algorithm, matrix Pade approximants, Pascal procedure 88−70251
forest of quadtrees, conversion to binary array 88−14777
Fourier coeffs. sequence calc. for spectra evaluated on logarithmic freq. axes, fast linear algorithm *(Japanese)* 88−66514
Lee algorithm for printed conductors layout, Turbo Pascal program *(German)* 88−7148
linear assignment problem, shortest augmenting path algorithm 87−65405
LPCLIB - LPC analysis and synthesis on an IBM personal computer 88−59109
MPU-401 MIDI track data stream processing, Turbo Pascal programs for IBM PC 86−55502
music software writing for home computers 85−58463
NBS wideband sampling wattmeter design and operation 88−30425
operating programme for EPROM burner, self made EPROM programming system *(German)* 87−24177
prime factor FFT algorithm implementation, program generation 87−73033
radio for data transmission, Turbo Pascal programs *(German)* 87−40658
recursive digital filter, transfer function calc. using Pascal matrix *(Czech)* 86−1294
recursive integration and recursively defined polynomials, relationship 88−6348
Signalys test/measurement software package using standard programs *(German)* 88−53534
step motor driven system, start and stop process optimisation, CAD 87−58127
switching fn. minimisation, Turbo Pascal listing *(German)* 88−6613
systolic design-rule checker 87−23839
trapezoidal rotor bars, computer aided impedance computation *(German)* 88−69263
truth tables for logic PROMs, Turbo Pascal program for easier circuit design *(German)* 87−52300
Turbo, interface, videotex and PC linked using frontend processor 87−27960

Paschen-Back effect *see Zeeman effect*

passenger traffic *see traffic*

passivation
additive thin film hybrid technology 86−53268
amorphous film, dangling bond passivation by gas adsorpt. 87−38147
arsenosilicate glass as interlayer dielectric for multilayer metallisation and passivation 85−40647
bipolar transistor high-voltage planar structure using SiO_2-SIPOS-SiO_2 film 85−45655
borophosphosilicate glass film, rapid isothermal fusion 87−11685
brass condenser tube protection against polluted brackish water *(German)* 86−19118
BWR recirculation piping passivation to ease maintenance 88−11026
chip glass passivation, P migration kinetics from PSG, electron microprobe 85−7045
dielectric films, on compound semiconductors, conf., Las Vegas, USA (Oct. 1985) 87−16291
double layer dielec. films, X-ray irrad. effects 87−32413
DRAM, high density, bit line capacitance meas. *(Japanese)* 87−24181
electromigration, O_2 plasma treatment effects 86−15065
EPROM, failure modes, passivation film defects 85−54901
EPROM devices, plastic encapsulated, UV transmissive passivation, moisture resistive 85−6327
EPROM passivation technique, UV transparent process *(Italian)* 85−33895
functional organic thin film prod. by plasma polymerisation 85−10808
glow discharge polymerised film for electronic devices 87−16712
high density packaging, technique *(Japanese)* 88−13130
HV NMOS transistors, DC and switching performance, SIPOS passivation effects 87−46016
HV power transistors, silica glass passivation technique 87−60423
IC electron beam testing, capacitive coupling voltage contrast 86−2350
IC testing, gated-pulse stroboscopy for passivated device imaging 88−1764
IC trench fill process 85−12359
ICs, electron beam testing via capacitive coupling voltage contrast 88−57758
III-V compounds, epitaxy and passivation conf., Pelstin les Greves, France (April 1986) 86−45909
III-V semiconductor surfaces, by amorphous P and alkali metal polyphosphides 87−17979
III-V semiconductor-oxide interfaces, review 86−28217
ISFET incorporated in a differential amplifier 88−53605
Langmuir-Blodgett films, electronic appls. *(Spanish)* 88−13078
mesa junctions, post diffusion oxidated, defect generation and leakage currents 87−67115
microelectronic devices, passivated, LV SEM inspection 87−37753
microelectronic packages, passivation technology, requirements and deposition methods 88−189
MINP solar cells, surface recomb. vel. 87−58336
moisture resistance testing of packages 88−56027
MOS ICs, novel test structure for the accurate measurement of interconnect capacitance 87−18344
MOS memory ICs, reliability aspects 86−57843
MOS structs., implantation-induced defects, interaction of H RF plasma 86−8899
MOSFET, polysilicon, H passivation using plasma nitride source 85−12182
MOSFET, scaled p-channel, with passivation layer of Si_3N_4 and silicate glass, threshold voltage instabilities 85−18326
MOSFET, silicone elastomer vulcanized by the hydrosilation reactionand its influence on properties of a modified MOS device 85−55835
MOSFET, small-grain polysilicon, H_2 passivation techniques 86−21560
MOSFETs, n-channel, effects of device processing on hot-electron induced-device degradation 86−41848
MOSFETs, passivated, EBIC testing, radiation damage 85−61938
n-MOSFETs, short channel, hot carrier injection, mech. stress and H_2 effects 87−53566
MOSFETs, SILO isolated, localised interface trap generation during PECVD SiN passivation 88−26274
NMOS transistors, passivated, primary electron energy dependence of radiation damage 86−58491
p-n junction, breakdown voltage improvement by use of SIPOS passivation with field limiting ring *(Japanese)* 87−6408
p-n junction, glass passivated, polarisation induced instability 87−1239
p-n junctions, leakage currents with ZnO-B_2O_3-SiO_2 borosilicate glass passivation 86−8845
phosphosilicate glass, plasma-enhanced CVD coatings, dielec. and passivation-related props. 86−2044
phosphosilicate glass, rapid heating reflow, As ion implantation effects 87−11657
phosphosilicate glass film, reflow in steam, rapid thermal processing 87−11684
phosphosilicate glass films, plasma-activated deposition 85−453
phosphosilicate glasses, glass transition temp. and thermal expansion, VLSI appl. 85−39820
photosensitive heat resistant coating materials for IC production 85−12333
planar semicond. devices using amorphous Si:O film for surface field-reduction, expt. study 87−67176
plasma enhanced CVD, VLSI appls. 85−55969
plastic quad flat package, stress effects on mech. integrity 88−63057
PMMA, ion beam modification for dry etch development ion beam lithography 87−45741
PMMA, ion implantation passivation for lithography system based on dry etch develop. 86−21320
polycrystalline solar cells, defect passivation by H_2 annealing 85−60426
polyimide, etching and passivation downstream of O_2-CF_4-Ar microwave plasma 88−39215
polyimide, photodefinable, die coating, plastic-encapsulated IC, stress relief 88−64747
polyimide dielectric, electron injection effects in MIS structures 86−58329
polyimide film for development of super miniaturized and ultra high density packed resistor module 88−50541
polyimide for advanced logic/memory double metal devices, material and processing technologies 88−19840
polyimide layer adhesion on Si_3N_4 surface, surface treatment and cure 85−6847
polyimide-substrate bonding studies using γ-aminopropyltriethoxysilane coupling agent 86−62283
polyimides, applications in IC fabrication and packaging cycles 85−23607
polyimides, photoimagable, semicond. industry appl. 86−2061
polysilicon MOSFET, accumulation-mode p-channel, H passivated, hot carrier effects 87−53532
polysilicon MOSFET, n- and p-channel, grain boundary passivation effects 85−50597
polysilicon n-channel MOSFETs, H_2 passivated, hot electron degradation 88−26276
polysilicon submicron MOSFET, elec. characts. rel. to fabrication conditions 87−25328
polysiloxane plasma-polymerised passivating layer for GaAs 85−23709
polysiloxane spin-on interlevel dielec. material for ICs processing and performance 87−1438
pre-trench passivation layer for recessed oxide isolation process 86−28189
PSG on IC devices, effect of fillers in plastic resin *(Japanese)* 88−71665
rare earth/transition metal alloys, materials for magneto-optic data storage 88−58275
saturated steam turbines, erosion corrosion detection and prevention *(German)* 88−23751
self-aligned passivation process for non-self-passivatingconductors 87−6582

passivation continued
semi-insulating film deposition at lower substrate temperatures using Ar^+ beam sputtering 85−29164
semiconductor defects, conf., Paris, France (Aug. 1986) 87−51700
semiconductor device inspection using secondary electron image mode of LV SEM, contrast mechanism *(Japanese)* 87−67180
semiconductor surfaces, dielectric thin films, growth using rapid thermal/plasma processing 88−44686
semiconductors, plasma polymerisation *(Japanese)* 85−49603
semiconductors, poly-micro-crystalline and amorphous, conf., Strasbourg, France (June 84) 86−41499
poly-Si polycrystalline resistor modification by RF H plasma, postfabrication passivation 88−7482
Si solar cells, H plasma passivation study 88−75946
SIPOS on Si planar devices, characterisation and modelling 85−45600
SIPOS passivation, interface effects 86−63180
SIPOS-Si HV planar devices, charactn. and modelling 86−15121
solar cells, surface passivation by Cl-containing oxides, improved performance 85−53819
spatially resolved ellipsometry, convergent beam approach 87−6587
steam plant turbogenerator turbine operation using oxygenated cooling water to promote oxygen-stimulated passivation *(Russian)* 88−17375
steel, martensitic stainless, chem. passivation treatment 86−26921
TAB die, metal corrosion study 86−14765
thin film hybrid circuits, inorganic-organic passivation double layer 86−41462
thin film LPCVD poly-Si MOSFETs, subthreshold behavior 87−6722
trace cutting methods for diagnostic probing 85−55932
transport semiconductor passivation coatings, flaw detection, light scattering technique 85−55896
triacs, HV planar type for inductive loads, struct., charact. and appls. *(Japanese)* 88−39429
VLSI, contamination-sensitive metal films, annealing process using protective coating 86−9202
VLSI fabrication technology, thin film material appls. 86−35787
voltage contrast mechanism of passivated devices, SEM 88−57279
wide-band semiconductor film 86−35598
ZnSe growth methods, impact on device technology 88−31791
Al alloy thin films, electromigration kinetics, effects of composition and struct. 85−61991
Al alloy wire for welding electrodes, effect of electrochemical surface treatment 85−16475
Al dry etch reactor, surface passivation by adding fluorocarbons and chlorofluorocarbons 87−67105
Al electrodes, width/spacing relationship with corrosion 86−15093
Al electromigration MTTF, effect of stress due to passivation 88−19861
Al encapsulated fine line interconnect, stress anal. 87−60514
Al interconnection void form., in situ obs. 88−57517
Al interconnects, stress induced voids during IC processing 86−15088
Al metallisation, corrosion through flawed polymer passivation layers, in-situ microscopy study 88−1567
Al metallization, electromigration failure rel. to passivation and passivation defects 85−6868
Al thin film metallisation, electromigration, influence of passivation and packaging 87−45827
Al-Cu-Si films on Si wafers, passivation effect on electromigration resistance obs. *(Slovak)* 87−37640
Al-Cu-Si, photoresists, surface changes induced by reactive ion etching 86−63374
Al-Pd-Mg wire, corrosion-resistant, bondability improvement, development and expt. study 86−14767
Al-Si Schottky barriers, surface layer form. by Ar implantation, passivation by H 87−67091
Al-Si metallisation, mean-time-to-failure, passivation material and thickness effects 86−15086
Al-Si-Fe-Cr metal film resistors, effects of metal nitride passive material 87−73807
AlGaAs laser with high-quality mirror fabricated by reactive ion-beam etching and in situ passivation 88−34019
AlGaAs:Si, passivation of donors and DX centres, H_2 plasma exposure 87−45572
AlGaAs/GaAs/$Na_2S.9H_2O$, near ideal transport 88−26211
AlGaAs-GaAs HBT, dramatic gain enhancement by surface passivation 88−33167
$Al_xGa_{1-x}As$-GaAs selectively doped heterostruct., MBE, GaAs oval defect elimination by substrate prep. 87−36720
$Al_xGa_{1-x}As$-GaAs stripe geometry quantum well lasers, fabrication by hydrogenation 88−14179
Al_2O_3 surface passivation for thin Si solar cell 87−16048
AlSi surface oxidation states, photoresist. removal, plasma stripping effects 88−71420
As_2O_3-SiO_2 glass, reflow, depletion mechanisms 86−26929
C porous cathode passivation in Li-$SOCl_2$ cells 87−78862
n-$Cd_xHg_{1-x}Te$, anodic growth of native oxides 86−41707
p-$Cd_xHg_{1-x}Te$, doped and undoped, minority carrier lifetime 87−24789
CdS-Cu_2S solar cells with electrochemically formed Cu_2S, improvement of current collect 86−40090
CdTe, high-resistivity, passivation by H^+ implantation 87−53344
CdTe, polycrystalline, grain boundaries elec. and optical charact. 87−24780
CoNi thin films for mag. recording, corrosion resist. improvement by surface passivation 87−60811
Cr/Al-Cu thin film conductors with polyimide passivation, electromigration failure, stress depend. activation energy 88−50759
Cr-Si diode, on p-Si wafer, removal for passivation 86−41521
Cu-Ni alloy corrosion potential and current, electrochem. impedance spectroscopy 88−70363
Fe electrodes, passivated, capacitance under simulated erosion-corrosion conditions 87−1433
$Ga_{1-x}Al_xAs$:Si epilayers, shallow donors and D-X centres neutralisation by H plasma exposure 88−71409
GaAs (100) surface, interaction with multipolar plasmas, appl. to surface cleaning and passivation 85−6853
GaAs FET, electromigration rel. to reliability, effects of current field and passivation 85−55860
p-GaAs, H passivation of shallow-acceptor impurities 86−35599
GaAs HEMT, UV cleaning of surface in NH_3 gas, effects 87−25333
GaAs, IC, dry-processing induced isolation degradation 86−21807
GaAs MBE grown surface, Sb used for passivation 87−38116
passivation continued
GaAs MBE growth, substrate preparation for oval defect elimination 86−34332
GaAs, MBE layers, deep level defects, passivation by H_2 plasma exposure 87−11347
GaAs MBE regrowth with clean interfaces by As passivation 85−33440
GaAs MBE regrowth with clean interfaces by As passivation 85−40621
GaAs MBE surface, Sb passivation and props. charactn. 88−50718
GaAs MESFET, gate metal and dielectric overlayer stresses, compensating piezoelec. effect 88−13429
GaAs MESFET passivation, Si_3N_4 plasma CVD, interface chemistry, XPS 88−44792
GaAs MESFETs, passivation with Si_3N_4 plasma-enhanced CVD films of different stress states 88−71823
GaAs, device multipolar plasma passivation control by in-situ ellipsometry 88−19824
GaAs, epitaxial, optical passivation by polyimide, effects on photolum. 88−32780
GaAs, in situ selected area doping in MBE 86−53530
GaAs, ohmic contact passivation using SiO_2 film 86−21434
GaAs passivation by multipolar plasma in ultra-vacuum surroundings *(French)* 88−50739
GaAs, passivation by plasma CVD AlN films 88−1545
GaAs passivation in N multipolar plasma, photoemission study 87−60338
GaAs, passivation in $N_2(H_2)$ multipolar plasmas, photoemission study *(French)* 87−67110
GaAs, passivation/insulation, As segregation, photolumin. 88−33047
GaAs, photochemically unpinned, oxide passivation 88−71412
GaAs pn diodes, dark I-V charact., effect of Na_2S and $(NH_4)_2S$ edge passivation 88−64396
GaAs, power MESFET, effects of polymide and Si_3N_4 passivating layers 88−13415
GaAs power MESFETs, surface-induced degradation, reliable soln. 85−23773
GaAs power MOSFET surface degradation 86−15177
GaAs substrate, passivating oxide layer, XPS study 88−39223
GaAs surface passivation, a-P overlayer, Raman and photolum. spectra studies 86−2049
GaAs surface passivation by amorphous P overlayer, Raman and photolum. spectra 85−18242
GaAs, surface passivation obs. using Raman scatt. 88−44676
GaAs surface passivation technologies for device fabrication *(Spanish)* 87−74020

Si_3N_4 plasma deposited films, charactn. 86−21421
Si_3N_4/polyimide isolation enhancement 85−18476
SiO_2 chip passivation layers, stress reduction 86−35575
SiO_2 films, low temp. CVD, annealing, etch rate obs. 85−6827
SiO_2 passivating layer for WSi_2-poly Si struct., reduced out-diffusion of P 87−25126
SiO_2 secondary passivation layers, stability under bias temp. stress ageing 88−50741
SiO_2 thin films, thermally prepared for VLSI 86−2065
SiO_2, time-dependent dielec. breakdown, effect of p-SiN passivation layer 88−1553
SiO_2-PbO-B_2O_3-Al_2O_3:F(Na) glasses, surface charge props. 88−26061
SiO_xN_y, plasma-enhanced deposited oxynitride films, IR and UV transmission, appl. for electronic devices 87−18045
Ti films, magnetron sputtered, $TiSi_2$ and TiN formation during N_2 annealing 86−21401
Ti layered Al-Si metallisation, contact spiking and electromigration passivation cracking 86−28453
Ti-W fusible link for PROMs, disruption mechanisms 88−50962
W surface oxidation states, photoresist. removal, plasma stripping effects 88−71420
n-WSe_2 photoelectrochemical cell, recombination centres passivation 86−12999
$Y_1Ba_2Cu_3O_{7-\delta}$-noble metal contacts with surface resistivities in 10^{-10} Ω cm^2 range 88−44997
ZnO-B_2O_3-SiO_2 glass powders, electrophoretic deposition for passivation of high voltage transistors 85−40633
ZnO-B_2O_3-SiO_2 glasses for surface passivation 85−1513
ZnO-B_2O_3-SiO_2 passivation glasses, additives effects 85−22560
ZnO-B_2O_3-SiO_2-P_2O_5 passivation and VLSI packaging glasses 87−25114
Zn_3P_2, H_2 passivation, DLTS and Schottky diode studies 87−37918
ZnS-HgCdTe interface, surface and interface after polishing, etching and passivation *(Chinese)* 88−39199
ZnSe (001), epilayers on GaAs (001), Se passivation and regrowth 88−64403

passive attenuators *see attenuators*

passive circuits *see passive networks*

passive filters
2 m/70 cm antenna splitting filter, design 88−45794
2-frequency compensating filters modified freq. characts. *(Russian)* 88−50232
3-transducer low-loss SAW filter structure 88−51134
5 GHz range SAW filter fabricated by electron beam exposure with O_2-plasma ashing techniques 87−12028
6 kV power system reactive power compensation, chemical plant power factor improvement 86−25492
10 kVA invertor supplying loaded passive filter, design problems 85−28322
10 MW output MHD generators, filter for external circuit 86−26317
93 GHz circumferential waveguide bandpass filter with broad bandwidth and low loss 88−25438
200 kHz PCM timing tank electromechanical filter *(Japanese)* 85−911
480 V bus, harmonic high-pass filters for notch reduction 87−37438
500 MHz SAW resonator filter, 2-year space qualification study 86−2545
800 MHz band face-bonding filter using dielectricBDLS 87−5947
800-MHz high-performance SAW filter using newresonant configuration 85−50820
absorbing filters for high harmonics with step capacitors, capacity dimension optimization *(Rumanian)* 87−52701
absorptive notch filter 88−63777
AC electrified railway sections, use of power capacitors and filters *(Japanese)* 88−11437
AC supply harmonics, detrimental effects and countermeasures *(Spanish)* 87−9112
AC systems interfacing with HVDC schemes, filters comparison 86−12382
acoustic charge transport devices overview 87−67688
acoustic charge transport linear FM dispersive delay line chirp filters 88−26637
acoustic-charge-transport chirp filters, performance 87−74492
AF filter design, tasks of values 86−34955
algorithm for filter design with transformed variables 87−17209
all-zero representation of pulse functions in freq. domain, filters appl. 85−17621
analog filters CAD *(German)* 86−52615
artificial nonuniform transmission line with distortionless property, filter synthesis 87−45013
audio filter for SW reception 87−66317
balanced ring, lumped parameter components based, theoretical investig. 88−70484
band-pass, CAD of filters built with circular rods between parallel earthing plates *(Russian)* 85−28626
band-pass filters, CAD, BASIC program listing *(German)* 86−41195
band-pass filters, Chebyshev type using high-Q dielec. ring resonators, anal. and design 87−73636

passive filters continued
band-pass filters, fundamentals review and BASIC design program 86−52936
band-pass filters design, using subcritical waveguide with capacitive discontinuity *(Czech)* 87−66506
band-pass grid filter for linear polarised MM-waves, synthesis 88−25417
band-pass LC-filters with freq. dependent losses, synthesis *(Russian)* 87−5943
band-stop filter constructed in coupled nonradiative dielectric waveguide, X-band, design and props. 87−17307
bandpass audio filters 87−73518
bandpass filter using circular discontinuities in nonradiative dielectric waveguide 87−73639
bandstop filter in nonradiative dielectric waveguide using rectangular resonators, design procedure 87−73633
bandstop filters improvement 86−67300
Barker code pulse compression sidelobe suppression filters, optimisation *(Chinese)* 87−37433
beyond-cutoff waveguide-dielectric filters, analytical synthesis 85−1012
bias-T diplexer, decade bandwidth design for MIC appls. up to 50 GHz 87−52806
bilateral fin line band-pass filters, X-band realisations *(Korean)* 86−59125
bridge rectifiers, six- and two-pulse with input filter, open loop instability 86−33489
broadband band-pass harmonic reject filter, 18-30 GHz, coupled suspended stripline design 87−73637
broadband filters and contiguous channel multiplexers, design for electronic support measures appls. 87−37437
burst spread spectrum data transmission system using SAW convolvers *(German)* 87−40641
Butterworth filter module using thick-film hybrid packaging, disc drive data channel appl. 86−27442
Butterworth low-pass, CAD 86−46957
CAD, development and implementations, review *(German)* 87−37430
CAD, microwave circuit case study 85−11399
CAD facility for EMI suppressor evaluation 87−12765
CAI in filter theory 86−57915
canonical bandpass filters using dual-mode dielectric resonators 87−73617
capacitive filters for pulsed loads, using Ni-Cd batteries 86−20681
capacitor-filtered power rectifier with line impedance, harmonic anal. *(Japanese)* 88−18927
cassette tape FSK signal cleaner filter for computer software 85−11394
CATV filter and packaging for subscriber control 87−76999
Cauer elliptic filters, computer algorithm 85−34037
Cauer standard valve capacitor filter design 85−17615
ceramic, technological trends 86−9339
ceramic capacitors in switch-mode power supply filters 87−31987
ceramic filters for SMT 86−57917
channel diplexers, design 86−67301
chirp Fourier transform based on a single SAW filter implementation 87−6963
circular waveguide filter for four polarisations, design and characts. freq. reuse appl. *(Japanese)* 86−41312
classical filter, design methods 86−62674
coaxial high-pass filters with various transfer props., design considerations 87−17212
combline and interdigital band-pass filters, design aspects for economic manufacture 87−17213
combline and interdigital filters with tapped-line input, design eqn. 88−38702
common mode filter inductor analysis for power converter noise reduction 86−54319
controlled piezoelectric structures, resonators and monolithic filters 87−32779
controlled rectifiers, computationally efficient optimal input filter CAD 87−43225
coupled resonator rectangular waveguide filters, circular irises design using large-aperture formulae 85−11514
coupled stepped impedance resonators in comb-line filters, CAD model 88−56896
coupled TEM lines network with unequal electrical lengths, filter characts. 88−49989
coupled-circuit bandpass filters, exact synthesis 88−25306
coupled-circuit filters design using microcomputer 87−66314
coupled-line bandpass filters, freq. transform. design *(Japanese)* 85−6419
coupled-line filters, wave admittance calcs. 88−38602
CR-$(RC)^n$ prefilter into gated integrator system with 1/f noise source, equivalent noise charge 85−37966
cross-over filter inductors, design, construction and meas. *(Spanish)* 86−58088
cross-over filters for loudspeakers, design aspects *(Spanish)* 86−57920
crossover filters for multiway loudspeaker system, numerical optimisation 86−38126
crystal filter design and-realisation with asymmetric transmission zeros 86−1207
CW filter, design 85−40161
CW filter for Novice operator, design 85−45142
CW filter for radio amateur, design 85−28625
DC drive, 3-phase AC-DC power transistor convertor controlled, performance characts. 87−43529
DC power supply circuits, rectification and filtering aspects *(Spanish)* 87−16869
DC power system resonance anal., oscillation prevention using DC filters and smoothing circuits 87−35559
DC separately excited motor, convertor control, filter inductance calc. 86−6783
design methodology of filters with similar transmission props. *(Czech)* 85−17616
design of electronic circuits for optimal production yield 85−61047
design principles, theoretical aspects 88−859
design using transformed variables, polynomial operations concept 86−57923
dielectric filter for mobile telephone systems 87−45196
dielectric high-power bandpass filter using quarter-cut TE_{01} δ image resonator for cellular base stations 87−73616
dielectric resonator 2-section filter, transfer function improvement *(Russian)* 85−61363
dielectric resonator band-pass filter, design with high attenuation rate 85−17625

passive filters continued
dielectric resonator filters for UHF and microwave appls., band-pass and band-stop, design methods 87−17323
dielectric split-ring resonators, struct., props., filter and oscillator appls. 88−70996
dielectric waveguide band-pass filters using parallel-coupled grating, design aspects 86−58033
dielectric waveguide channel dropping filter using 3 dB couplers and bandstop gratings, multiplexer appls. 88−32376
dielectric waveguide filters, pass-band freq. adjustment method BEM anal. *(Japanese)* 87−17318
dielectric waveguide gratings, band-stop characts., field anal. *(Korean)* 88−7028
dielectric-cavity bandpass filters, attenuation band 88−63775
digital, circuit calculation methodology, physical approach to signal processing *(Italian)* 87−69090
digital regenerators with SAW filters for timing recovery, deexcitation behavior *(German)* 88−67207
direct-coupled λ/4-coaxial resonator bandpassfilter for land mobile communications 87−5945
direct-sequence spread spectrum DPSK modulation for indoor wireless communications, expt. 88−3807
dissipative filter design for power electronic apparatus 88−863
distributed filters, exact synthesis, cascade factorisation procedure 88−32398
distributed RC filters in thick and thin film techniques *(Polish)* 85−906
distribution and battery impedance effects on load circuit noise and battery charger filter performance 87−22550
distribution line communications, harmonic noise cancellation 86−32757
disturbance-free filters *(Italian)* 88−72594
dual mode canonical filter design for output multiplexer of 12 GHz broadcasting satellite transponder *(Japanese)* 87−24437
dual mode dielectric resonator filters without iris 87−73618
dual mode dielectric resonator loaded cavity filter with nonadjacent cavity couplings 85−17628
dual-mode band-stop waveguide filters, narrow-band type, crosstalk avoidance 85−40224
dual-mode longit. filters with arbitrary I/O port polarisation, synthesis and implementation 87−6046
E-plane fin line and metal insert filters with improved characts. 86−14473
E-plane metal-insert filters in microwave waveguides, CAD 87−6016
E-plane type band-pass filters in fin line, anal. and synthesis using CAD program *(Korean)* 87−24423
electroacoustic transducers for Bragg acoustooptic devices, automatic sound beam tracking, efficiency anal. 86−35959
electrode drive compensator network for soft transitions in electrolyte printing 85−40163
electronic component protection against nuclear EMP 87−68794
electronically tunable band-stop filter , design procedures and coupled microstripline realisation 88−70984
elliptic low-pass filter, COMPACT cct. anal. program 86−20687
elliptic low-pass filter anal. using Minkowski model of Lorentz space 87−846
elliptic lowpass audio filter design using miniature preferred value components 85−11398
elliptic-function six-pole microwave filter using triple-mode degenerate cavities 85−11395
EMC suppression filter inductive element design and construction 87−26874
EMI filters for surface mounting 87−12763
EMI power line filters, appl. and eval. 88−17163
EMI suppression feedthrough filter performance improvement at extreme temp. 87−26881
EMI suppression filters, design, performance and standards *(Spanish)* 88−38610
EMI suppressor CAD program for performance assessment between mismatched terminations 88−2616
EMI-line filters, pulse behaviour 85−62846
emission filters for switched mode power supplies 86−20688
EMP protection devices, low pass passive filters appl. 85−36061
EMP/EMI connector with filtering and protection features, design to military specifications 87−17469
end-coupled line filters applied to microstrip techniques 88−56739
equal-ripple LC filter synthesis, computer program 88−32302
equiripple all-pole low-pass filters, generalised, props. study 88−19258
equiripple band-pass filters, CAD procedure *(Spanish)* 86−8353
equivalent doubly terminated canonic bandpass filters, synthesis 85−17619
evanescent mode waveguide band-pass filter, Q-band operation 85−11396
evanescent mode waveguide filter with non-touching E-plane fins, anal. and design 88−25309
evanescent mode waveguide with capacitive discontinuity, microwave ccts. realisation *(Czech)* 87−52815
evanescent-mode waveguide band-pass filters, anal. and design guidelines 85−54989
evanescent-mode waveguide bandpass filter, comments and reply 85−50028
evanescent-mode waveguide dielectric resonator filters, anal. and design, MM-wave appl. 85−17624
extremal passive amplitude-phase corrector for adata channel 86−14336
ferrite filters, broadband, optimization 87−66316
filter connectors for protection against RFI, EMI and EMP, developments 85−34031
filtering and Zener diode circuits, design *(German)* 86−34949
filtration and compensation of higher current harmonics from thyristor invertors *(Czech)* 87−15859
fin. line coupled, dielectric-resonator filters, design using FEM 88−56897
fin line post, discontinuity parameters, expt. determ., band-stop and low-pass filter appls. 87−52801
fin-line strip discontinuities, appl. to MM-wave filters 88−25420
FIR filter, low-sensitive, digital communication appls. 86−67414
FM pulse compression filters, sidelobe suppression 87−68818
four polarisations filter for frequency reuse *(Japanese)* 87−37521
four polarizations filter for frequency reuse 87−73600
fourth order highpass and lowpass filters with impedance transformation properties, anal. and synthesis *(German)* 87−52705
free-standing wire grids, characteristic curves for spectroscopic perf. 88−50312
frequency-modulated oscillation 87−37435
full-response digital optical fibre communication systems, optimal receiver transfer function *(Chinese)* 85−46124
generalised maximally flat approx. for filter design 88−538

passive filters continued
generalized Chebyshev channelizing filter for satellite transponders 85−22983
grooved monoblock comb-line filter suppressing the third harmonics design and performance for UHF appls. 87−73522
half-controlled thyristor converter output filter inductor and capacitor estimation for battery chargers 87−15878
harmonic band-pass filters, planar integrated microwave components for terrestrial/satellite appls. 86−14517
harmonic current compensation with active filter 88−30900
harmonic filtering at UHF and microwave frequencies using distrib. element filters, design aspects 87−17215
harmonics based bandpass filter design 87−66315
harmonics elimination using static and active power filters *(Korean)* 88−44275
helical-resonator filter design, BASIC CAD program listing 86−8354
hexagonal ferrite tunable band-pass filter, 40-60 GHz, design and performance 86−14338
HF dielec. materials, characts. and appls. to resonators, filters and duplexers *(German)* 88−71876
HF induction power line noise from machinery, absorbing clamp positioning *(Japanese)* 86−31627
HF SMPS, ceramic multilayer capacitors for improved output filtering 87−24497
HF SMPS, output filter capacitor appl. and mounting 88−70510
HF SMPS output filters using ceramic capacitors 88−49053
high frequency SAW filters stretched overnon-overlapped electrodes for satellite broadcastreceivers 86−21936
high order low-pass filter, passive and active circuits design using elliptic function 87−66318
high speed receiver designs based on surface acoustic wave devices 85−7127
high volume TV-IF filter design, fabrication, andapplications 86−2517
high-power filters, elec. and physical characts. 87−73519
high-precision monolithic quartz crystal filter design *(Japanese)* 87−73520
high-speed AC power clock for Josephson logic circuits 87−66288
highly stable SAW devices on LST cut of quartz *(Japanese)* 88−20231
howling canceller of an adaptive filter *(Japanese)* 86−31060
HVDC convertor station interference with power-line carrier and radio systems 88−2622
iDC plug connector with planar capacitor filterarray 86−58105
IF filter in FM radio receivers, distortion meas. and calc. 85−14431
IF SAW filter, for satellite TV broadcasting *(Slovak)* 85−18536
impedance transformable filter, synthesis method using simulated nonuniform transmission line *(Japanese)* 86−14337
impulse interference filtering using power transformers 85−7674
induction motor drive fed by pulse invertor with LC-output filter *(German)* 88−75969
industrial power system harmonic distortion reduction filter design 86−44963
inhomogeneous coupled line sections, design procedure 88−66139
input filters for switching convertors, passive inductor/capacitor network 88−70891
integrating waveguide technology (INWATE) for microwave band-pass filter design 87−17327
interdigital/combline filters, tapped lines couplings design using analytical method 88−50338
inverter output filters, selection and design for UPS systems 86−67021
invertor, hybrid source type, with symmetric lattice filter for induction motor drives 86−6894
Ka-band fin-line bandpass filters, CAD 86−62806
L-C filters, source and termination loading 88−12488
ladder filter, sensitivity anal. in transformed plane 86−1210
ladder type, sensitivity performance evaluation 86−46951
lattice filters, effective attenuation calc., influence of terminating impedance depend./independ. zeros *(German)* 87−37434
lattice filters, relationship between poles and zero of attenuation and phase *(German)* 87−31983
LC, step motor chopper drive, UC3717 IC 85−16290
LC filter, design 85−6417
LC filter, video band, design. *(Japanese)* 86−1212
LC filter blocks, compound components 86−8350
LC filter design 85−22987
LC filter design for EMC engineer 86−27447
LC filter design for multiphase DC choppers 85−28622
LC filter loaded on two sides, approx. characts. influence 88−38604
LC filter optimisation for invertors with two level control and constant frequency 86−57654
LC filters, miniature, current state-of-the-art 87−842
LC filters with transverse sections, resistance compensation method *(Russian)* 85−17613
LC for SMPS, power FET stabiliser 86−34522
LC ladder filter synthesis, algebraic approach *(French)* 85−34029
LC ladder filters, design method using state-space simulation 87−73517
LC ladder filters, design using iterated anal. and computer program 86−20682
LC prototype filter node equation simulation for digital realisation technique *(Japanese)* 85−11440
LC resonant filters function meas., using portable ROMET-1a meter *(Czech)* 85−20637
LCR filter synthesis for high-freq. active RC simulation *(Japanese)* 87−5941
LCR tuning-out filter for power freq. tripler, input PF and efficiency improvement *(Japanese)* 88−17071
leaky SAW filters, equiv. cct. model for propag. loss 88−13649
line traps, carrier freq. characts. anal. and practical design method *(Chinese)* 85−34030
linear tapered cutoff waveguide filters, props. study *(Japanese)* 87−6030
lossy ladder filters, doubly terminated, design method with increased element tolerances 88−12485
loudspeaker crossover networks, optimised design using personal computer 86−38127
low-frequency range extension of loudspeakers 85−52583
low-loss SAW filter using internal reflection typesof new single-phase unidirectional transducer 86−2529
low-pass, logarithmic weakly resonant type, anal. 87−66319
low-pass, pole Q-factor comparative anal. *(Russian)* 88−12489
low-pass filters, image parameter design methods 85−6413
low-pass filters in thick film technology, design for EMI reduction in digital systems *(German)* 88−44273

passive filters continued
low-pass generalised Chebyshev odd-degree prototype filter for suspended substrate stripline 86−34950
low-pass harmonic filters, optimised design for satellite appls. 85−17631
low-pass microwave 'in-a-cable' filters design 85−910
lumped-element microwave filters, design considerations 88−32410
magnetostatic reflective array filter status 86−22028
magnetostatic thin-film layered structure with periodic corrugation, high Q filter characteristics 88−50363
magnetostatic-surface-wave band-pass filter, tunable transversal type, design and characts. 87−7032
mains filter for DP equipment interfaces *(German)* 87−37436
mains supply filters for microprocessor equipment, Arcotronics product-range *(German)* 88−44274
mains-borne interference suppression origin and suppression *(French)* 86−29439
mainsborne interference suppression for EDP installations V *(German)* 86−29420
matched four port hybrid filters 87−73620
matching of interdigital transducers with a field of surface acoustic waves in delay lines and filters 87−67672
meander-line type using parabolic tapered coupled transmission lines, design 86−20231
metal insert and fin line filters with passband separation and stopband attenuation improvement 86−27543
metal insert E-plane filters, appl. of transmission matrix formulation 87−19251
MIC filters, microstrip cct. design procedure 87−6065
microstrip band-pass filter on $BaTi_4O_9$ substrate, four-section config. for VHF/UHF appls. 86−41202
microstrip cascaded step discontinuities, rigorous anal. 88−66138
microstrip commensurate-line band-pass filters, topology, synthesis and sensitivity 88−70980
microstrip disk cavities filter using gap capacitances coupling , theoretical eval. and performance study 88−70990
microstrip filter design including dispersion effects and radiation losses 87−6060
microstrip filters, parallel coupled, construction technique 88−70981
microstrip filters employing codirectional comb resonators with attenuation poles at finite frequencies, synthesis 88−63867
microstrip low pass filter design 87−59698
microstrip low-pass filters, noncommensurate distrib. structs., image parameter design method 86−41201
microstrip rejection filter and microstriplines, bulk and thin film dielec. overlay effects 87−970
microwave *(Japanese)* 86−20809
microwave band-pass filters, design using dielec. resonators coupled to microstrip lines 86−27582
microwave band-pass filters, waveguide construction *(German)* 85−23100
microwave band-pass filters using dielec.-filled coaxial resonators, design method 85−34034
microwave band-stop filter design using dielec. waveguide grating 85−54992
microwave band-stop harmonic filter synthesis, appl. of R-transformer to design 87−66511
microwave bandpass Comb filters, slab-line resonators design optimisation 86−52933
microwave bandpass filter using electrically coupled $TM_{01\delta}$ dielectric rod resonators , anal. and design 88−70986
microwave cavity combline filter design 88−56872
microwave design with wide suppression bands 87−45017
microwave device modelling technique using efficient l_1 optimisation 87−17333
microwave directional coupler with filtercharacteristics 86−35064
microwave elliptic filters using dielec. resonators, elec. and mech. design *(Polish)* 85−34033
microwave filter implementation using waveguide and coaxial technology *(German)* 87−45172
microwave filter realisation using cylindrical dielec. resonator and asymmetric strip line technique *(Polish)* 86−35063
microwave filters, computer-aided tuning technique 87−6045
microwave filters, design using dielec. resonator 86−14484
microwave filters, narrow-band type with dielec. rod, design using numerical method 86−20792
microwave filters using coupled transmission lines, conductor losses evaluation 87−73656
microwave lumped element filters for electronic warfare systems, design and construction techniques 86−57919
microwave narrow band-pass filters using high-Q cylindrical $TE_{0m\lambda}$ resonator modes 85−17629
microwave passive components, developments 88−19334
microwave varactor tuned bandpass filters using microstrip-linering resonators 87−6123
miniature band reject filters for satellite applications, design using dielec. resonators 85−17627
miniaturised 800 MHz band channel dropping filter using TM_{010} mode dielectric resonator 85−17622
minimum phase FIR filter IDTs for SAW filters *(Japanese)* 88−26643
MM wave waveguide band-pass filters using E-plane techniques, CAD and specifications 85−61436
MM-wave band-stop filter with dielec. resonators using whispering-gallery modes 87−73634
MM-wave broadband E-plane band-pass filter, starting values estimation for CAD procedure 85−22981
MM-wave broadband E-plane band-pass filters, CAD program 85−17623
mM-wave contiguous diplexer designed with printed-circuit elements 87−45193
MM-wave double planar E-plane IC filters, design with improved stopband attenuation 85−6414
MM-wave ferrite sphere tuned waveguide bandpass filters with high off-resonance isolation 88−71007
MM-wave ferrite tunable E-plane filters using printed cct. technology, design method 88−71008
MM-wave filter design with suspended stripline 87−6020
MM-wave filter struct. using dielec. image guide resonators 87−11028
MM-wave fin-line bandpass filters, CAD 88−25419
MM-wave harmonic-reject filter, parallel-coupled line config. on suspended substrates 87−66491
mm-wave microstrip narrowband bandpass filters using grating technique 87−73640
passive filters continued
MM-wave nonradiative dielec. waveguide filter, expt. design technique *(Japanese)* 85−40228
MM-wave nonradiative dielectric waveguide filters, design technique 85−22982
MM-wave suspended striplines, gap-discontinuities freq. depend. characts. 88−72627
MM-wave two-resonator Chebyshev E-plane band-pass filters, CAD and and implementation 86−27566
monolithic crystal filter design, compensation of freq. dependence of coupling coeff. *(Japanese)* 85−41008
monolithic crystal filters and crystal units to improve cordless phone performance 85−7122
monolithic quartz filters, precision, design and manufacture 88−33463
monolithic quartz filters for clock-frequency detectionin digital communication systems 86−34948
MSW filter, microwave cct. model 88−71955
MSW filterbanks for microwave channelised receivers, config., fabrication and characts. 88−33544
MSW tunable bandpass filter 87−7034
multi-cavity microwave communication filters, sensitivity anal. and optimisation 86−62675
multi-input filter with parameter uncertainty, design algorithm 86−8352
multi-section stopband filter with 90° resonator separation, anal. and design 88−38703
multicavity output filter system for a klystron with different characteristic cavity impedances 87−45504
multicoupled microwave resonator filters, predistorted lossy design techniques 85−45221
multicoupled resonator filters, predistortion pole techniques 85−17630
multifrequency filter compensating devices with interchangeable components *(Russian)* 88−44276
multiple-grid frequency-selective surfaces as periodically loaded structures 88−44333
narrow band-pass filter using dielectric resonators 88−56879
narrow-band filters, design tool based on anal. of rectangular waveguide, discontinuity problem 87−37499
narrow-band microstrip bandpass filters with low radiation losses for millimeter-wave applications 88−38686
narrow-band SAW filters using stepped-resonatorswith tapered gratings 86−2552
narrowband elliptic filters on microstrip 85−40220
near-surface volume acoustic waves filter, characts. calc., Green's function appl. 86−68146
NEC timing tank ceramic filter, development *(Japanese)* 88−38608
network noise filters, up to 90 kHz, design criteria *(German)* 87−66313
noise filter for semiconductor equipment, effects on industrial interference magnitude *(Czech)* 86−41200
noise suppression of the RESYP convertor for the drive of a synchronous motor *(Czech)* 85−21706
nomographs in filter design 86−41203
nonradiative dielectric waveguide 87−6057
nonradiative dielectric waveguide filter, Chebyshev ripple band-pass type, design for MM-wave appl. 85−17626
nonsymmetric bandpass filters, freq. transformation considerations for selectivity parameter minimisation 88−25304
null 2-T-RC cct. analysis 85−40164
Oh-ita District AT feeder circuit resonance control using CR equipment *(Japanese)* 88−11434
one-dimensional passive state-space digital filter design 85−17709
op amp noise suppression using additional RC filters *(German)* 88−25014
optical fibre signal processing components and applications 88−67407
optimal harmonic-suppression output filter for power amplifiers 85−17620
optimal method of calculation of a filtering-compensation installation *(French)* 88−32300
oscillating quartz crystals, passive components with active role *(German)* 87−53833
output filter design for HF switch mode power supplies 87−31986
overtone filter crystals, design and fabrication 87−60719
overvoltage protection low-pass filters for vital equipment 88−56740
parallel-coupled line filters, synthesis using equiv. ccts. for inhomogeneous coupled lines 88−56411
partial discharge meas., Wiener filter for optimal temporal resolution 86−50028
partially filled waveguide integrated filters, synthesis 87−45179
PCB mountable miniature helical filter for VHF/UHF range 87−17216
phase noise in surface-acoustic-wave filters and resonators 88−57884
phase shift filters for temp. control simulation of massively walled buildings 86−700
phase-true crossover networks, series type for multi-channel loudspeaker systems, anal. 87−24308
piezoelectric ceramic filters using the edge-mode vibration *(Japanese)* 85−1811
plug-in multipath noise filter for FM car radio *(Japanese)* 87−10959
polynomial electric filters, joint approx. of amplitude-freq. and phase-freq. characts. 88−38603
power filtering and AC capacitor types and characteristics *(French)* 88−6648
power inductive-capacitive filter for power engineering, figure of merit limiting 86−12995
power line filter considerations 86−41204
power line interference filter, low-pass, multiport 85−7663
power line low leakage current filters improve equipmentprotection 85−54994
power supplies loaded by thyristor convertors, harmonic distortion reduction using resonant filters 86−66182
power supply circuits, DC output filtering 87−36953
power supply with multioutput, common core output inductor designed around control winding 85−6154
power system filter design to reduce harmonic distortion in industrial plants 87−64069
power system harmonic meas. and filtering 87−50637
power transformer voltage smooth phase control using capacitive smoothing filter 88−30762
power-smoothing filter, Γ-shaped, generalised characteristics *(Russian)* 88−50007
pulse compression filters, anal. algorithm 88−50231
PWM control techniques for rectifier filter minimization 85−5259
quadruple-mode filters 87−73619
quartz, design calcs. *(Spanish)* 88−862

passive filters continued
quartz, Rayleigh-mode SAW filters for timing recovery at frequencies above 1 GHz *(Japanese)* 87−60760
quartz, UHF low loss SAW filters for front end applications 87−67679
quartz crystal filters, configs. and characts. *(German)* 87−52699
quartz filter testing, use of spectrum analyser *(German)* 88−26628
quartz filters, tunable, trimming procedures *(German)* 85−54991
quartz SAW transducers, 3D electrostatic field anal. with closed-form formulae 87−60741
quasi-lowpass, quasi-elliptic symmetric filter 87−73615
radial-line microwave filters, calc. 88−63776
radio technology, freq. selective components *(German)* 86−8351
raised cosine tapered cutoff waveguide filters, props. study *(Japanese)* 87−52817
RC, network analysis and optimisation program 86−67341
RC filter driven by an radom binary process, moments determ. 87−27378
RC ladder filters 87−45012
RC low-pass filter, time and freq. response derivation using Fourier series 86−57925
RC oscillator synthesis 87−73363
RC two-stage low-pass band filter efficiency comparison with matched filters 85−49971
reactive power compensation, resonant frequency effects on filter-compensating device *(Russian)* 87−21870
rectangular waveguide E-plane metal-insert filters, magnetically tunable, field theory method for CAD 88−56857
rectangular waveguides with dielectric stratified enlargements, filter props. *(German)* 86−35054
rectifier/invertor reactive component minimization AC and DC side filters 88−30888
residual noise in crystal filters 87−1823
resistance compensation in shunt arm of smoothing filter *(Russian)* 86−27439
resonance smoothing filters calc. with predetermined freq. and time characts. *(Russian)* 86−46958
resonant transistor DC-DC convertor with capacitive output filter 86−26137
reverse-sequence voltage filters with transconductors at input, adjustment *(Russian)* 86−57916
rFI: focus on the standards in force *(French)* 86−29440
RFI filter design, characteristics and utilisation 87−26872
RFI filters 88−19260
RFI/EMI noise control using filter connectors 87−2309
ripple shielding coils for accurate resistivity meas. in hybrid magnets 87−52706
RLC ladder filter simulation using switched-capacitor networks and freq. domain anal. 86−27464
RTTY transmission, tone filter design 85−57712
S-band 13-channel magnetostatic wave filterbank , construction and performance 88−71956
S-band high performance combline filter, tunable unit for spaceborne appls. 87−17325
SAW, bandpass, non-iterative design 86−2519
SAW, diffraction analysis with extended angular spectrum of waves formalism 88−51128
SAW, matching cct. selecting, BASIC program appl. 87−6965
SAW, second-order parasitic phenomena *(Czech)* 86−15329
SAW antenna duplexer for 800 MHz portable telephone transceiver in cellular radio systems, filter config. 88−60041
SAW assemblies and devices, state of art *(French)* 85−24047
SAW band-pass filters, design rules, fabrication and packaging 86−21945
SAW bandpass, inhomogeneous periodic reflecting structures appl. 85−34038
SAW bandpass filters, design using new window functions 88−33486
SAW broad-passband notch filters, design and appls. 88−26640
SAW chirp waveform compression filter impulse response calcs. 88−51140
SAW diffraction effects, fast and accurate computation using asymptotic expansion techniques *(Japanese)* 87−60738
SAW filter, config. with parallel electrodes with piezoelectric ceramic polarised by IDT 87−53847
SAW filter, low-loss, design using multistrip coupler ring config. with ripple cancellation *(Japanese)* 87−60749
SAW filter, TV signal distortion meas. by group delay and phase response 87−56354
SAW filter, variable bandwidth using magnetoelastic coupling 87−1846
SAW filter anal., expansion in guided modes, admittance matrix calcs. 86−68145
SAW filter CAD, real-time system development 88−33485
SAW filter CAD, UCF-SAWCAD real-time interactive design and anal. tool 87−32819
SAW filter CAD workstation 87−60752
SAW filter design using convolution techniques, noniterative method 87−60737
SAW filter design using multistrip coupler 86−2518
SAW filter phase ageing meas. 87−67667
SAW filter phase noise 86−2522
SAW filter retiming in 432 Mb/s lightwave regenerator 86−4687
SAW filter using internal floating electrode refl. types of single-phase transducer 85−12462
SAW filter with ageing, parametric failure rate model 88−20215
SAW filter with centre frequency of 960 MHz 86−28584
SAW filter with diffraction gratings, freq. selectivity study 85−12466
SAW filters, 2.5 GHz, design with high reproducibility 87−60779
SAW filters, 3D modal anal. 87−1836
SAW filters, acoustic field investig. using fibre optic homodyne laser probe 87−1831
SAW filters, bridge method for direct signal elimination *(Polish)* 85−7126
SAW filters, characteristics and appls. 86−9348
SAW filters, combined apodized/withdrawal weighted transducers for diffraction suppression [SAW filters] 87−60748
SAW filters, design and characts. *(German)* 85−12465
SAW filters, diffraction effects minimisation using wide aperture 87−60739
SAW filters, electrode resistance effects for strongly coupling substrates 86−2531
SAW filters, GHz range step-type unidirectional low loss devices and 5 GHz IDT filters 87−60751
SAW filters, HF low-loss type using longit. double mode resonators, characts. study *(Japanese)* 87−32817
SAW filters, in situ response compensation 86−21934
SAW filters, low-loss, design using distributed acoustic reflection transducers 87−60747
passive filters continued
SAW filters, low-loss, single-bounce, reflective array geometry using hyperbolically tapered transducers *(Japanese)* 87−60750
SAW filters, low-loss, using single-phase unidirectional transducers 87−46291
SAW filters, low-loss design using distributed acoustic reflection transducers 88−12484
SAW filters, low-loss type with sidelobe suppression, weighted single-phase unidirectional transducers 88−64873
SAW filters, optimisation, unified time-domain approach 88−57874
SAW filters, phase noise, delay depend. 87−6985
SAW filters, spurious signals suppression, digital radio appls. *(Japanese)* 87−60743
SAW filters, suboptimum synthesis method 87−17210
SAW filters, transverse mode compensation 87−1838
SAW filters, wideband tuning techniques 88−71874
SAW filters for frequency control stability in crystal resonators 86−2500
SAW filters for TV IF signals, testing using microacoustic multimode oscillator *(German)* 88−26641
SAW filters using 3-transducer config. 87−12026
SAW filters with new technologies for cellular radio 86−2532
SAW filters with three bidirectional transducers 85−35283
SAW FIR equiripple digital filter design using freq. sampling 87−1835
SAW group-type unidirectional transducer design 86−2520
SAW interdigital transducer and filter, generalised transfer function *(Slovak)* 87−18457
SAW L-band slanted transducer dispersive filters, phase error compensation *(Japanese)* 87−60746
SAW linear FM pulse compensation filters, sidelobe suppression considerations 87−74485
SAW linear phase filter design using Remez exchange algorithm 86−47943
SAW microwave filters, design and fabrication using fine lithography 85−56072
SAW military-grade components from Raytheon 86−15327
SAW modules for signal processing *(German)* 85−62169
SAW monolithic 7 tap-programmable transversal filter ongallium arsenide 86−2561
SAW MSK matched filter, construction and characts., spread spectrum communication appl. 87−53850
SAW multistrip coupler filters, compensation algorithm for second order effects 87−1832
SAW programmable filter with fan-shaped interdigital transducer 87−52704
SAW programmable transversal filters, appls. and capabilities 88−50235
SAW pulse compression filters for multi-channel radar appls., Racal MESL technology 86−55362
SAW real-time programmable devices on electrostrictive substrates *(Japanese)* 87−60768
SAW resonator appl. 86−15332
SAW resonators and filters, appl. in Hewlett-Packard instrumentation 87−67680
SAW spectral shaping filters for digital radio relay systems 87−52707
SAW tap-weighted filters, generalized FIR design by optimisation techniques 86−63525
SAW transducers as generalised cct. elements, filter appl. 86−15316
SAW transversal filter ageing meas. 86−2524
SAW transversal filters for timing recovery in regenerators of undersea fibre transmission systems 85−37035
SAW transversal narrowband filters, SAW diffraction anal. by waveguide approx. 87−1839
SAW TV filter type FT-381, requirements *(Polish)* 88−32301
SAW UHF filter design for miniature antenna duplexer, in portable telephone transceiver 87−74491
SAW-FET signal processor, operational and performance characts. 86−9360
SAW/FET programmable transversal 100 MHz-bandwidth adaptive filter 87−6962
SAWFAST channeliser using planar SAW filter technology and freq. sorting technique, EW appls. 87−32824
selective filters with finite transmission zeros andarbitrary phase characteristics 86−67479
selector module filter, for nonmains noise filtration, data logger appl. 85−14740
self adaptive filtering of environmental noises fromspeech 86−16178
semiconductor drift chamber, signal pulse processing, passive filter calcs. 88−36374
short-step-stub Chebyshev impedance transformers, synthesis procedure 86−67465
shunt m-derived π filter section synthesis using Kronian synthesis tensor 85−34036
signal processing using surface acoustic waves 85−45934
simple and resonant T-type smoothing filter designs *(Russian)* 88−861
single shaping and Gaussian filters, signal/noise and rate capability characteristics 87−50150
single-phase unidirectional SAW filter in UHF range, fabrication technique 85−61362
six-pulse bridge rectifier, input filter design 86−7947
six-pulse bridge rectifier with input filter, steady state characts. 86−27064
slotted-waveguide filters using cut-off wavelengths for microwave hybrid integrated circuits 87−11018
slow-wave grating struct. for filters and resonators in MMICs 87−73733
SMPS interference suppression filters, characts. and appls. *(German)* 88−44036
spurline band-stop filters, anal. and design 86−27545
static power converter voltage distortion reduction using harmonic filter installation, design, testing 87−43261
static power triple frequency changer, power factor and power anal. *(Japanese)* 87−5676
stepped impedance-resonators for microwave bandpass filters, unloaded Q-factor study 87−17303
stepped-impedance resonator band-pass filter for mobile communication appl. 88−56877
stopband resonance freq. shift due to uncoupled length of resonator, calc. method 87−24429
straight-through blocking filter quality determ. in lightly-loaded conditions *(Russian)* 87−39814
strip-line filters, arcing, high-power microwave induced 88−71006
superconducting magnetic energy storage power system characts. 87−36178
superconducting memories, distributed filtering of memory array lines 85−7174

passive filters continued
surface mount hybrid receiver IF section using low loss SAW filters 87−66794
surface shear wave resonators for VHF rangeutilizing reflection at edge surfaces 86−2549
suspended substrate stripline lowpass filter with a very broad stopband 88−50237
switch mode power supplies with ceramic multilayer capacitor for filter 88−12219
switched capacitor, biquadratic sections realisation 85−17618
switched capacitor utilisation in integrated circuits *(Italian)* 85−28618
switched power supply, filtering characts. of Al electrolytic capacitors for output smoothing *(German)* 86−27647
tapered circular waveguide cutoff filters for TE_{01} mode MM-waves, anal. and props. *(Japanese)* 88−56874
TE triple-mode filter , design, realisation and prototype characts. 88−70987
temperature compensated L-band hybrid SAW oscillatorand resonator filter 86−2544
theory and practice 88−860
thick film planar filter connector for control of EMI 30 to 1000 MHz 86−57924
thick film VHF/UHF circuit elements *(German)* 85−1196
thin film RC notch network, dielectric loss effects *(Spanish)* 87−73524
Thomson-Butterworth transition filters synthesis *(Slovak)* 86−41205
three-phase networks with neutral conductor, filter-balancing device for non-sinusoidal voltages *(Russian)* 87−21840
three-port filter pairs with Butterworth characteristics, design considerations 87−31984
three-stage feed-through resonator filter, design 85−34039
thyristor protection at turn-off using RC filters and voltage limiters 88−26246
transfer function, shift of poles caused by inductor losses 86−14335
transmission line band-pass filter, with wide stop band 88−56738
tunable cross-shaped SC filter, 2D 87−10958
tunable filter, 0.5-4.0 GHz, design using YIG film grown by LPE 87−73635
tuned filter stops harmonics in power supplies *(Swedish)* 87−22516
tuned filters to reduce traction rectifier set induced harmonics 86−27443
tuning, sensitivity analysis calcs. 88−44272
TV IF SAW filter, design and fabrication *(Korean)* 85−22984
TV IF SAW filter, diffr. effect compensation; simulation program *(Korean)* 85−22985
TV interference filter for amateur radio 87−24310
twin-T filter, general anal. 87−52700
two path cutoff waveguide resonator filters withattenuation poles 87−6056
UHF bandpass filter using direct-coupled quarter-wavelength coaxial dielectric resonators 88−19259
UHF high-power bandpass filter, 800 MHz, TM_{110} mode dielec. resonators, cellular radio appl. 88−70890
ungrounded power filter, design using ferrite inductor and double-insulation transformer 86−27441
uniformly distributed RC (URC) notch network 86−1209
VHF FM receiver, RF filter design 86−49798
voltage pump phase-locked loops with phase frequency detector, loop filter effects 85−28419
voltage regulator input filter design, BASIC program 86−14334
voltage source invertor fed induction motor drives, DC link filter design 87−43540
VTR colour signal processing with comb filter *(Japanese)* 86−44034
waveguide filters, shunt-inductance-coupled with expanded second stopband 85−34032
waveguide filters using three-mode resonator, development 88−38692
waveguide type band-pass filter, centre freq. adjustment using dielec. rod resonator *(Japanese)* 88−7034
waveguide-type band-pass filter using dielec. rod resonator, anal. and freq. characts. calc. *(Japanese)* 85−17617
whispering-gallery mode cylindrical dielec. resonator for MM-wave use, theory and appls. 88−946
wide-band and low-loss unidirectional SAW filter 87−12027
wide-band SAW/FET programmable transversalfilter 86−1213
wideband adaptive filter using 'SAW' devices 85−62173
wideband chirp-transform adaptive filter 87−843
wideband filter with constant group delay, least-squares approximation appl. 85−22986
wideband SAW chirp filters, electrode reflections, directionality and passband ripple 85−56064
wideband timing tank filters for digital transmission systems, miniature ladder type using $LiTaO_3$ resonators 87−31985
Yaesu FT-77 transceiver, conversion for 160 m band, circuit modifications 86−17257
ZX Spectrum software for bandpass filters designs *(German)* 86−27440
GaAs MMIC, lumped-element components 86−8453
InSb-$LiNbO_3$, integrated thin film programmable signal processor 87−6973
$LiNbO_3$, 38° ZXl and YZ-cut, SAW filters, props. study *(German)* 85−7128
$LiNbO_3$ SAW filterbank 87−1840
$LiNbO_3$ SAW filters, diffraction effects minimisation using wide aperture 87−60739
$LiNbO_3$ SAW filters, improved metallisation *(Japanese)* 87−60754
$LiNbO_3$ SAW filters, in situ anal. and optimisation 87−1845
$LiNbO_3$ SAW filters, low-loss, design using distributed acoustic reflection transducers 87−60747
$LiNbO_3$, SAW transducers, 3D electrostatic field anal. with closed-form formulae 87−60741
$LiNbO_3$ YZ-cut SAW filters for GHz freq. range 86−2533
$LiNbO_3$ multifrequency pulsed injection-locked oscillator using low-loss SAW comb filter 87−67676
$LiNbO_3$ untuned low insertion loss surface leaky wave filter, design and characts. 85−50818
$LiTaO_3$ UHF low loss SAW filters for front end applications 87−67679
$LiTaO_3$ miniature-resonators and monolithic filters, characts. and fabrication using laser processing 87−60721
$LiTaO_3$ temp. stable strip resonators for ladder filter 87−60717
PZT ceramic filters, two-port, resonant frequency and bandwidth control *(Korean)* 85−1813
YIG MSW channelizer, compact S-channel filter bank config., design and S-band performance 87−7031
YIG electrically tunable filters, Ferretrac type, design for meas. in 0.5-40 GHz region *(German)* 88−63891
YIG film, LPE grown, tunable band-pass filter 88−50365
YIG film, narrow-band filtering of microwave signal 85−12496
passive filters continued
YIG filters, Ferretrac electronically tunable type for 0.5-40 GHz region measurements *(German)* 88−32381
YIG filters, fully automatic devices for 0.5-26 GHz range *(German)* 85−40162
YIG filters in microwave equipment, programmable stable current source design 88−56446
YIG planar filters, tunable design with reduced eddy current effects 85−23129
YIG six-stage filters, WJ-5900 series, design and characts. 88−38737
YIG two-sphere freq. multiplier/filter, 2-20 GHz, design and performance 88−50346
ZnO film SAW filters 88−64876
ZnO/SiO_2 thin diaphragms on Si for UHF bulk-acoustic-wave-filters 86−42075
$ZnO\text{-}SiO_2$ monolithic film acoustic resonator technology, ladder filters appl. 87−67686

passive networks

coupled line networks, period reduction of input pulse trains, theoretical expt. study 87−45015
coupling networks between resistive generator and passive load, design problem 85−17055
digital filter realisation by passive network simulation 88−63799
DIP switches, circuits integration, auto-insertable devices 85−45276
discrete-time domain multiports, stable multidimensional polynomials considerations 88−24661
distributed four-ports conservation-laws, theoretical study 85−33615
distributed RC network design, Root-Locus technique, IC amplifier appl. 86−27034
element evaluation in the resistive networks 86−57586
FIR transfer functions, implementation as passive cascaded lattice structures 86−67393
four-terminal passive networks, computer program for transfer characts. determ., BASIC listing *(German)* 87−10575
fractal resistor network, freq.-depend. impedance and Nyquist noise 86−27445
frequency independent N-port junction of passive network, wave variables correlation 86−62383
general linear nonstationary passive systems, explicit state model derivation 87−65758
GTO inverters with energy recovery by passive network, snubber configuration 88−69555
Hurwitz polynomials, multidimensional discrete reactance and immittance 86−62676
I/O devices, equivalence, three-digit Bochvar logic anal. 88−31956
IC multiterminal resistances, node admittance matrix calc. method 86−47670
impedance two-pole, noise props. determ. *(Slovak)* 86−46956
inductively-coupled circuits, energy relationship anal. during transients *(Russian)* 87−44504
integrator with fast operation 85−22988
interconnected multiport network, wave anal. of noise for LCAD program appls. microwave 87−36939
introduction to passive, linear and digital electronics, book 86−7418
K-tree topological method for producing symbolicsensitivity functions 86−62327
ladder loads, broadband impedance matching, low-pass, band-pass and high-pass network design 86−20229
ladder networks anal. *(Russian)* 87−16796
ladder structures, characteristic equation determ. *(Czech)* 86−67318
ladder-type networks, extended definition of cumulants 85−905
LC ladder networks, SC simulators 88−32319
LC non-series-parallel one-port networks, synthesis method 86−62388
LC resonator, for 300 MHz NMR expts. at cryogenic temp. 85−22989
LC transformerless ladder two-port networks of compatible impedances 86−57921
LCR ccts., time-varying nonlinear theory 88−38364
LCR two-terminal networks, meas. using balancing ccts. *(Russian)* 87−24309
line impedance stabilisation networks, config. and conducted emissions meas. appl. 86−11693
linear lumped 86−27033
linear multiport networks, computer-aided noise anal., microwave cct. appl. 87−36934
linear n-ports, energy and maximal power transfer behaviour 86−57605
linear phase emphasis networks with Gaussian function, design 87−45014

passive networks continued
linear time-invariant passive systems, charactn. using closed-loop linear gain charact. values 87−44494
linear two-ports parameter identification, low-loss meas. appl. 88−15994
lossless LC one-port ladder network, discrete time reactance functions synthesis 86−62677
lossless networks with imaginary-valued resistances of one sign, props. and charact. 87−31667
lossless reciprocal and nonreciprocal matching networks for active load, general theory/design procedure 87−31669
lossy stub unit element networks, synthesis using Z transforms 86−34490
low-pass ladder form realisations using two-variable network functions 86−8355
LRC iterated networks, spectra of renormalisable electromech. systems 86−699
lumped/transmission line elements, network design, two-variable positive real fn. algorithm 86−57541
matching network design, BASIC program listing 86−7903
maximal power transfer problem 88−49984
maximally flat matching of complex loads using simple circuits 87−45019
microstrip circuit for converting microwave low power to DC energy, object identification 85−34158
microwave 2D cots., arbitrarily shaped, anal. by finite difference time-domain method 88−38701
microwave communication techniques and microwave devices conf., Budapest, Hungary (Aug. 1986) 88−55816
microwave distributed matching networks, simplified real frequency technique and dynamic design procedure 85−23108
microwave interconnected multiport networks, computer aided noise anal., wave approach 88−56901
microwave lossy two-ports, linear time-invariant type, const. freq. synthesis 85−54993
modelling of optical thin films by electrical circuits *(Czech)* 88−56427
multidimensional passive ccts., props. of scattering Hurwitz polynomials 87−23538
multiplexing networks, simulation and sensitivity anal., design appls. 86−40869
multiport networks, broad-band matching, scattering matrix theory for lossless reciprocal equaliser 85−908
multiports, S-parameters determ., appl. of complex normalisation 87−23806
n terminal star network converted from n terminal resistance delta network *(Russian)* 86−57525
networks and systems, multivariable, design and implementation problems 86−62341
nodal admittance matrix, topological eval. of arbitrary cofactors 86−62326
nonlinear multiport with time-dependent sources, steady state and transients anal. 85−538
nonlinear networks containing capacitor-only cutset and/or inductor-only loops, geometric props; 87−23880
nonlinear one-port resistor networks, global sensitivity study 85−11397
nonlinear resistive two ports, infinite cascades, driving-point immittances 85−6416
nonuniformly-loaded ladder networks, resonances *(Russian)* 88−56736
normal family of linear time-variant n-ports 86−20684
Nyquist noise spectra meas. using SQUID 87−3738
optical thin films modelling by passive, symmetrical four-poles *(Czech)* 87−68009
optimum passive differentiators 88−56737
oscillator circuit, synthesis employing only one unity-gain amplifier 86−20342
PACS high-speed image transfer network with fibre optic transmission 88−36551
parallel LC circuit design for specific harmonicattenuation 86−1214
parameter calculations using nodal analysis and matrix equations *(Russian)* 85−17614
periodically-operated thyristor passive networks, synthesis 85−6415
π RLC circuits, realizability of third-degree rational functions 85−61057
piezoelectric filter with low-Q inductances 87−52702
probe, high speed, response characteristics 88−16041
PWM, time-domain anal. of RL ccts. 87−23877
quasi-lumped-element 3- and 4-port networks for MIC/MMIC appls., design and anal. 85−17812
RC integrated inhomogeneous ladder network, optimal type, computer-aided synthesis 86−653
RC ladder and two-port networks, computer aided synthesis 86−46954
RC linear networks, delay-time sensitivity study 87−44505
RC partial and continued fraction ccts., thermal equiv. cct. diagram transformation, computer program *(German)* 86−678
RC selective ccts., bridge types, configs. and charact. *(Italian)* 86−34951
RC transfer networks with gain greater than unity, analysis and appl. *(Spanish)* 86−34953
RC two-port ladder networks, synthesis *(Polish)* 86−34954
r.c.g. line, signal delay time eval., MOSIC appl. 87−31670
RCG networks, unique solvability and state variables *(Japanese)* 86−13947
reciprocal switching cct. realisation 87−844
resistive n-port network, realisation of tridiagonal impedance matrix 87−44448
resistor circuits, admittance meas. requirements for element value calc. 86−687
RF discharge system, impedance matching circuit for N_2 glow discharge *(Korean)* 87−73521
RL circuit subjected to PWM voltage waveforms, time domain anal. 86−40815
RLC circuit, parameter-value determination using several test frequencies 85−17608
RLC four-pole asymmetrical latticed circuit, immittance matrix, transformerless realisation 87−45022
RLC passive linear networks, automated determ. of response in complex freq. domain 86−34489
RLC steady-state networks, Roytman's network theorem, reformulation and proof using linear algebra 86−682
S-band Butler matrix feed network, design for linear array appl. 87−17340
SEN program for computer-aided sensitivity anal. of active and passive networks 86−57561
series/parallel circuits, impedance and phase shift determ. using BASIC computer program *(Spanish)* 85−6118
signal-split n-port networks with star-connection, resistively-matched, anal. and realisation 86−62673
slotted line method of measuring the large signal S-parameters *(Chinese)* 88−38599
passive networks continued
stable multidimensional polynomials, continuous case 88−6589
static single phase/three phase convertor with improved efficiency 86−57646
stray-insensitive switched-capacitor two-port network design 87−845
structure and parameter reconstruction from state describing differential equations *(Russian)* 87−5944
subcircuit, nonidentical fillings of structural graph 87−45018
switchable resistive attenuator design, CD player adaptor appl. 86−60080
switched capacitor, p-domain synthesis 86−57922
switched capacitor networks, passive type, wave variable anal. 86−62414
switched-capacitor ccts., wave variable anal. 86−1208
switched-capacitor two-ports, synthesis procedure 85−22990
switching networks, design synthesis method *(Polish)* 85−28623
symmetrical attenuators, CAD, BASIC program listings 86−52621
symmetrical quadripole transformations of bridges into T and Π-sections *(German)* 85−22979
T- and PI-type attenuator networks, resistance calcs., computer program 85−28621
third-order reciprocal cct., with three-segment piecewise-linear resistor, chaotic attractor 85−10951
three-way all-pass crossover networks 85−909
topological method for symbolic sensitivity functions *(Chinese)* 87−59051
transformerless ladder two-port networks, realisation of compatible impedances 87−23876
transformerless quasi-broadband matching networks for lumped complex loads using nonuniform transmission lines, design 88−38362
transients analysis in linear ccts., using matrix version of Heaviside theorem 87−44496
two-element type normal n-ports, canonic synthesis 87−31668
two-port lumped networks, cascade realisation of irrational immittance 85−34035
two-port network configs., noise wave correlation matrix and noise figure determ. *(German)* 87−65764
two-port networks, cascade realisation of irrational immittance 87−23875
two-terminal networks, fast immittance meas. by sampling method *(Polish)* 87−77362
two-terminal networks synthesis, combined approach *(Russian)* 85−61030
two-terminal passive network, impedance components meas. *(Polish)* 87−49887
two-wire/four-wire conversion cct. for subscriber line interface, impedance design method *(Japanese)* 86−69494
unbalanced passive networks, characterization filter design appl. 86−34488
voltmeter impedance sensitivity elimination in DC meas. in linear passive networks 86−70182
weakly-coupled and generalised n-way power dividers for CATV/MATV appls., design method 88−6963

patents *see industrial property*

path control *see position control*

patient care
see also handicapped aids; health care
artificial respirators and performance studies of fluidic artificial respirator 86−12014
artificial ventilation, mass spectrometer system for long-term continuous meas. of $\dot{v}O_2$ and $\dot{v}CO_2$ 86−38743
AUSSAT utilisation for Royal Flying Doctor Service base remote control 87−56090
battery operated electronic devices for rural health care in India 85−26783
bed-mounted mobile intensive-care unit 88−74855
bedridden patients, mobile robot system *(Japanese)* 86−32342
Burr-Brown FOT/FOR 110 fibre optic data collection transmitter/receiver module kit *(German)* 85−25867
calorimetric system for metabolic studies of newborn babies 85−38176
clinical laboratory testing in the medical office 85−31779
computer-aided automated monitoring/treatment after open heart surgery, blood press. control *(Japanese)* 86−5974
conference, engineering and computing in health care, Los Angeles, CA, USA (Sept. 1984) 85−32910
constant-flow ventilator 85−20940
coronary care units, computer-based configurable ECG-recorder 85−15337
cost considerations of medical technology 88−68443
critical care, intelligent measurement and decision support system 87−57073
critical care and pulmonary medicine use of computers 85−44395
EEG in the operating room and intensive care unit 88−54590
electronics in health care 85−38177
expert system on line building of a real time controlunit for a patient in intensive care 86−18371
fibre optic sensors, medical appls. 87−74713
handicapped aid technology, results, problems and prospects *(Italian)* 85−31863
head injury intensive care, integrated system for serial evoked pots. monitoring 88−48179
health care technology in third world countries: neuropsychiatric services in India 87−63810
image transmission, electronic spinal column for medical care *(Swedish)* 88−16754
infant incubator environments eval., elec. heated simulator using ellipsoid Cu 88−68451
intensive care, microcomputer monitoring and data-acquisition system 85−48211
intensive care microcomputer networks, universal communication infrastruct. 88−10458
intensive care unit, patient monitoring system *(Japanese)* 86−5968
intensive care unit, rationale for neuromonitoring 87−57190
intensive care units design 86−12057
intensive therapy wards, bedside monitoring units connected to host computer 85−38183
LANs, intrahospital, critical medical care and computer communications 87−48649
microprocessor-based and digital patient care equipment, in-house servicing 86−6015
neurological care unit, patient monitoring practice *(Japanese)* 86−5970
neurosurgical intensive care, evoked pot. monitoring 87−57189
nursing aid robot with two human-like arms 86−56169
nursing care and partially helping robots sensors *(Japanese)* 88−10402
old-age society in Japan, health care and electronics *(Japanese)* 88−68448

patient care continued
pneumatically powered, electronically controlled infusion pump 85−20939
pump infusions, single- and multichannel, clinical study of press. distrib. *(German)* 85−59318
Ratingen Hospital (W. Germany) air conditioning and ventilation with heat recovery *(German)* 86−6013
respiratory monitoring in respiratory care unit *(Japanese)* 86−5969
software detection of ECG baseline and QRS-complexfor coronary intensive care 86−18334
solar therapy device in public-health system 86−50625
speech synthesis application in critical care medicine 87−61810
spinal injury patients, microprocessor-controlled weight shift monitor 85−43419
technological revolution, impacts on health care 85−31864
teledialysis system, telehealth service example 88−54596
transportation system for crit. ill patients 85−20938
ventilatory parameters of neonates on assisted ventilation, computer analysis 85−31861
water-filled heated mattress, assessment in care of newborn low birth-wt. infants in Turkey 88−61402
wearable infusion pumps, development *(Dutch)* 85−48316

patient diagnosis
see also biomedical NMR; biomedical ultrasonics; computerised tomography; diagnostic radiography; electrocardiography; electroencephalography; medical diagnostic computing; radioisotope scanning and imaging
3-D display of magnetic resonance imaging of the spine 88−74822
3D boundary detection algorithm, medical scanner and seismic images appl. 87−48164
40 MHz ultrasound diagnostic system for dermatologic examination 88−61324
acoustic aneurysm detector 88−42515
acoustic radiometer for a B-mode US diagnostic instrument 88−54526
ambulatory, long term or personal monitoring, conf., London, England (July 1987) 88−60
ambulatory EEG monitoring, appl. to epilepsy diagnosis and sleep recording at home 88−61380
angiography program at Stanford 86−60694
angiology, bioimpedance method *(German)* 86−44667
angioscope design, methodological considerations of percutaneous angioscopy 86−5915
angioscopy, percutaneous, with flexible fibre optics, methodological considerations 85−38073
aperture synthesis thermography 85−15312
applied potential tomography: noninvasive technique for assessing gastric function 87−50322
applied potential tomography, appls. in respiratory medicine 87−50326
applied potential tomography, impedance imaging, clinical appls. 86−25190
applied potential tomography and elec. impedance imaging, conf., Sheffield, England (July 1986) 87−43733
applied potential tomography and localisation of cardiac related impedance changes in the thorax 87−50327
applied potential tomography evaluation: clinician's view 87−50328
arm movement disorders, microcomputer controlled expt. set-up for bioelec. activity anal. 88−48190
arterial pulse, electronic diagnoser 85−64536
arterial stenosis detection using automatic min.-flow-vel. tracking system and pulsed US Doppler vessel imaging 85−64566
atherosclerosis, identification and 3D quantification using MRI 88−36430
auditory evoked cortical magnetic fields in clinical diagnosis *(German)* 85−20916
auditory evoked potentials, brainstem, enhancement using zero-phase digital filters 88−61354
auditory evoked potentials, brainstem, eval. using dynamic time warping 88−61353
automatic stimulus threshold device, ATM-1, technical solns. 86−18348
automatic unit for perinatal diagnosis andmonitoring based on the foetal topogram 86−18291
BIDAS, microscope imaging, communications, processing and analysis system for cytopathology 85−31830
biochemical assessment of patients, using enzyme electrodes 88−16677
bioengineering conf., Philadelphia, PA, USA (March 1987) 88−46
bioimpedance measurement, microcomputer controlled, blood stream disturbance diagnosis *(German)* 86−44666
biological engineering conf., Oxford, UK (Sept. 1987) 88−37805
biomedical image, 3D and 4D, workstation for their display and analysis 87−35411
biostereometric analysis for breast cancer detection 88−68363
biostereometrics, conf., Cannes, France (Dec. 1985) 87−51703
biosystems characteristics recognition by phys. instrumentation, development of X-ray CT *(Japanese)* 87−63745
birth diagnostics, bioimpedance meas. *(German)* 86−44675
bladder function continuous stress-free meas. using portable telemetric system *(German)* 85−43346
blood cancerous cell detection by digitally capturing TV pictures 85−53039
blood cell element analysis monitoring using X-ray microanalysis 85−64569
blood flow meas. using ultrasonic Doppler techniques *(Japanese)* 86−70395
body cavity effusions, backscatter electron imaging of cells 85−43379
body-scan methods in computer-aided diagnosis *(German)* 85−38036
bone fracture and diseases, sonic diagnosis, time series and freq. anal. 87−71123
bone fracture diagnosis, noninvasive acoustic emission sensitivity improvement 87−3969
brain responses mapping by medical imaging *(Japanese)* 88−4903
brain tumour characterisation using laser-induced fluoresc. 88−61281
breast, human, data collection system for gathering elec. impedance meas. 87−50319
breast cancer detect. by microwave thermograph 86−32298
breast cancer detection, thermographic image evaluation, pattern recognition 85−31810
breast NMR imaging, surface coil design for a vertical field MRI system 87−8910
breast NMR imaging with loop-gap resonators 87−41958
breast thermography, image processing 86−50538
breath sounds anal. and detect. of upper airway obstruction 86−29940
burns diagnosis by IR instrument 87−71078
cancer detection thermoregulation diagnostics 85−31776
cancer detection using NMR to detect change in blood lipids 87−63756
cancer diagnosis by laser excited autofluoresc. *(Chinese)* 88−27340

patient diagnosis continued
carcinoma of bladder and bronchus, in situ localisation, hematoporphyrin derivative fluorescence detector 87−8916
cardiac blood pool, three dimensional display 85−38032
cardiac impedance differential loop and its clinical significance *(Chinese)* 87−8931
cardio-impedance function, heart beat determ. *(German)* 86−44669
cardiographic impedance curve anal. *(German)* 86−44668
cardiovascular disease detection, blood flow meas. using NMR imaging technique 87−29716
cardiovascular tissue, laser Raman, spectroscopy of calcified atherosclerotic lesions 88−4888
CCD colour endoscope images restoration 88−10340
CCD imaging system for ophthalmology 85−4264
cervical smears, contextual anal. in an automated prescreening system 86−50478
chemical sensor research at the laboratory of applied physics in Linkoping 85−3957
chest diagnosis assist device based on speech processing 86−32295
chest X-ray images texture anal., automatic diagnosis of pneumoconiosis 87−63759
chronic disease detection from EKG tracings, computer-aided technique 87−8937
clinical diagnostic ultrasound system, model SSA-100 A 88−16728
clinical ECG anal., input-parameter and output-diagnosis specifications 88−61358
clinical practice, new ultrasound diagnostic equipment series withenhanced diagnostic functions 86−11961
colonic blood flow meas. using Apple II+ microcomputer 85−37991
colour image processing for bronchus endoscopic image restoration 87−27636
colour use in multidimens. multiparameter medical imaging 86−70392
colour vision research, computer controlled colour displays 86−70381
composite piezoelectric transducers for US medical imaging 86−50562
Compton scatter tomography, dual energy 86−60761
computed thermography system 88−48137
computerised cell scanners for anal. of cervical smears , review 88−74800
conference on bioengineering, New Haven, CT, USA (March 1986) 87−26
coplanar waveguide short-gap resonator for medicalapplications 86−27542
coronary angiography with large size monochromatic SR beam 86−60693
coronary arteriosclerosis examination using microwaves 87−77662
costs, story of diagnostic related groups 85−59239
cranial bruit produced by turbulent blood flow, method for detect. and anal. 87−41931
CT, fast nonrecursive reconstruction algorithm for limited data positron emission tomography 86−32304
CT graphical error evaluation 87−63763
cylindrical near-field microwave imaging system for quasi-real-time tomography 86−31618
DELTAvision, medical data and image processing system 86−11952
dental diagnosis, ultrasonic imaging system, development and appl. 86−25201
dental sono-explorer, pocket-sized, for root canal length meas. 88−54528
depth-focused RF coils for NMR imaging 88−16724
diabetic peripheral polyneuropathy, electrodiagnosis multivariate analytical approach 88−74835
diagnosis imaging, medical electronics 87−42011
diagnostic reporting system with touch activated display 88−74905
DICOM-8 digital imaging computer for pseudo-3D imaging 87−29734
digital 3-D images movement analysis 85−31828
digital chest image compression through coding by synthesis 85−9134
digital image data standards 85−30278
digital image display console design issues 85−31817
digital image information systems in radiology 87−35404
digital images, influence of video components on display 87−13996
digital medical image storage on VHS cassette 86−69951
digital medical images, optical storage technology for archiving, review 87−14887
digital power drivers for a liq. cryst. light modulator, clinical image processing appl. 85−4272
disphonic voices, speech pattern recognition for laryngeal disease diagnosis *(Spanish)* 87−61616
display devices, certification test patterns 85−38045
Doppler ultrasound in cardiac diagnosis 88−10313
dual-frequency applied potential tomography technique: computer simulations 87−50320
early receptor potential recordings for clinical routine 86−32311
ECG, normal, search for normality for diagnostic purposes 85−9178
ECG, real-time algorithm for auto anal. and diagnosis 88−54561
ECG, ST segment changes, computerised detect. 85−20929
ECG analysis, signal averaging and beat to beat estimation 86−32336
ECG and EEG based diagnosis, system for obtaining more accurate information 88−4981
ECG body surface mapping, Nijmegen, Netherlands (June 1985) 87−23027
ECG diagnosis, appl. of fast Walsh transform 88−48167
ECG gated cardiac imaging using low-field NMR 86−65422
ECG signal analysis, auto-correlation function computation 85−9181
ECG signal processing methods for microcomputer-based automatic diagnostic system 87−29781
ECG ST segment and arrhythmia anal. in exercise radionuclide ventriculography, automated system 86−65436
ECG type diagnosis system based on CSS1 microcomputer *(Chinese)* 85−4323
ECG-mapping during coronary: improvement of diagnosis and therapy control 87−21580
ECGs, 1-D signal extraction and archiving 88−48154
echocardiographic tracking and meas. system, microprocessor controlled 88−48141
echocardiology, US transducer appls. 86−5925
echograph range resolution improvement using fast on-line deconvolution 86−32302
EEG, midline spikes 88−29996
EEG analysis, stochastic signal classification procedures 86−32326
electric and magnetic fields, medical appls. 86−11924
electric and magnetic fields in medicine and biology, conf., London, England (Dec. 1985) 86−19749
electric field tomography, selective read-out of peripheral nerve information 86−25251
electric impedance imaging, current topics 87−50311
electric impedance imaging, obs. on agar blocks in saline soln. 87−50372

patient diagnosis continued
electric impedance meas., theory and cardiac appls. 86−38736
electrical imaging using multi-electrode systems, phys. study of sensitivity distrib. 87−50310
electrical impedance based medical imaging system 87−50374
electrical impedance body imaging, prototype system and reconstruction algorithms 87−50314
electrical impedance imaging, characts. of linear electrode arrays 87−50321
electrical impedance imaging, hardware design limitations 87−50317
electrical impedance imaging, math. aspects 87−50316
electrical impedance imaging, review 87−35421
electrical impedance imaging, Sheffield data collection system 87−50318
electrical impedance imaging, some phys. results from an impedance camera 87−50315
electrical impedance imaging in the newborn, cerebral haemodynamics appl. 87−50323
electrical impedance imaging system applicable to objects or arbitrary but known boundary 88−61377
electrical impedance techniques in medical imaging 88−4878
electrical impedance tomography, comparison of reconstruction algorithms 87−50313
electrical impedance tomography, phase meas. importance in imaging 88−16743
electrical metrology applied to biological and aqueous systems 87−57064
electrical resistance images, fast reconstruction 87−50312
electrical resistivity images for medical diagnosis 88−23091
electrocochleography recorded non-invasively from theexternal ear 86−65431
electron microscope images, on-line archiving and enhancement 85−31826
electroneurography, quantitative, facial nerve palsy assessment 85−38142
electronystagmogram signal analysis using computer 86−18341
electrophysiological diagnosis of malignant diseases of internal organs 86−11994
electrophysiological diagnostics based on electrically active point responses 87−4008
electrostimulation, bioregulated, of neuromuscular structures, methods and instruments 88−68453
electrothermal unit and ultrasound medical instrument microprocessor control for automation 88−16699
elliptical reflector antennas for near-field applications in microwave thermography and hyperthermia 88−36467
EMF scanning, relationship between narrow and wide bandwidth filter settings 87−63769
EMG, clinical, basic problems of automatic analysis 87−3992
EMG, computerised, conf., New York, USA (April 1981) 87−2
EMG, power spectra estimators of muscle conduction velocity 87−57172
EMG, quantitative, comparison of different methods 88−30007
EMG, quantitative, diagnostic yield of automated method 87−3997
EMG, quantitative, modifications of turns anal. 88−30008
EMG, spontaneous activity, automatic anal., ischaemic test in tetany appl. 85−4334
EMG, turns anal. using mean amplitude as a substitute of force meas. 85−59289
EMG automatic analysis with ANOPS computer, monopolar electrode use 87−3993
EMG evaluation, descriptors for automatic analysis 85−31844
EMG signal parametrisation, approach based on simulated signals 85−4333
endoscope, flexible, flexural and torsional rigidity investig. 86−18313
endoscope, flexible, movements investig. 86−18312
endoscope using fibre optics for patient diagnosis *(Japanese)* 88−4906
endoscopic catheter system using image fibre, config. and appls. 87−50216
endoscopic colour images, bronchus appl., digital processing 86−5894
endoscopic fluorescence detector for clinical recognition of tumors 88−61232
endoscopic techniques using fibre optics 86−25302
epileptiform foci localisation, value of closely spaced scalp electrodes 86−50568
ERG, ganzfeld, pattern and optic fibre, scleral lens design 87−57154
evoked potentials: visual, brainstem auditory and somatosensory: clinical uses 85−48275
evoked potentials, sequential detect. of changes 85−48311
evoked potentials processing with tactile and thermal stimulation; prototype system *(Spanish)* 87−21570
exercise ECGs, online anal. and monitoring 86−32333
expert system which critiques patient workup: modeling conflicting expertise 85−26745
eye, flicker perceptive thresholds in patients with retinal disease, recording using automatic intermittent light stimulator 85−4313
eye, shape and colour quantification of optic nerve head, instrument design 85−4311
eye movement anal. system using fundus images 85−31813
eye refractometer, open view automatic, design 85−4307
eye refractometer, semiautomatic, with TV monitor, one-position meas. of ametropia 85−4308
F wave meas., recording techniques comparison, health and peripheral nerve disease 88−4946
fibre optic angioscope, chronic pulmonary arterial obstruction evaluation 85−38072
fibre optic angioscope, direct visualisation of cardiovascular and peripheral arterial systems 86−5914
fibre optic angioscopes, direct visualisation of cardiovascular and peripheral arterial systems 85−38071
fibre optic delivery and detect. system for haematoporphyrin derivative photodynamic therapy 85−38193
fibre optic pulmonary angioscopy, comparison of two prototype angioscopes 87−41951
fibre optic sensors, biomedical meas. and diagnosis appl. 88−67822
fibre optic sensors, medical appls. 87−74713
fibre optic techniques in medicine and biology, endoscopy, diagnostics and power transmission 87−41949
field focusing NMR-CT for noninvasive thermometry, temp. resolution study 87−57086
flow cytometry in cancer research 88−74799
fluorescence imaging, real time colour system for tumour diagnosis 87−77642
fluorescence photodiagnosis system for tumours using ion and excimer dye lasers 88−48114
foetal bradycardia diagnosis display using intrinsic dimensions 85−37986
foetal heart rate waveforms, contextual anal. 85−53012

patient diagnosis continued
forearm alternate pronation and supination, diadochokinesia test, microcomputer based analysis 86−5880
four-channels microwave radiometer for biological temp. retrieval 88−36469
frequency transforming stethoscope 88−4886
gait analysis, automated clinical laboratory 85−48219
gait analysis using force-plate and CCD cameras 88−68351
gastric endoscope picture detection, digital image processing method 88−36470
gnathosonic analyser 88−74817
hard copy of medical images, computer based direct digital film recording 85−9138
hearing examination using nonlinearly transformed speech signals 87−50212
hearing impaired infants, brainstem auditory evoked potentials and otoacoustic emissions 87−57143
heart potential maps dynamic display using double parallel techniques 86−70423
heart rate variability signal, autoregressive modelling 86−32335
heart rate variability signal processing, diagnostic aid in cardiovascular pathologies 87−29774
histopathologic images, hierarchical expert system for automated diagnostic assessment 88−61311
histopathology, receiver operator charact. curve analysis of super high resolution video 88−48127
Holter monitoring real time analysis using digital computer, diagnostics accuracy and clinical feasibility *(German)* 86−18328
hospital automation, radiology appls. *(Italian)* 87−71093
hospital information system using distributed processing 87−29792
human thorax, physical state determ. using impedance plethysmography, meas. instruments design 88−29942
image processing advances, conf., The Hague, Netherlands (Apr. 1987) 88−24326
image production, processing, display and archiving, conf., San Diego, USA (Feb. 1984) 85−4
images, discrete 2-D fractional Brownian motion model 88−41077
imaging, digital sequential, system design implementation 85−31827
imaging equipment digital image transfer interface standard 85−4270
imaging instrumentation, conf., Las Vagas, NV, USA (Apr. 1984) 85−32877
imaging systems, computer-aided 85−20904
imaging systems, optimal quantisation of noisy signals 85−9143
imaging techniques, conf., Pascoli, Italy (Oct. 1981) 85−34
imaging technology *(Japanese)* 87−77635
imaging tools for interpreting two and three dimensional medical data 87−57120
imaging with ionising radiations, book 87−36307
immuno-sensors development, based on evanescent wave methods using optical waveguides 88−36457
impedance cardiography in comparison with invasive andnoninvasive reference methods *(German)* 86−44670
impedance determ. using numerous simultaneous currents, system design and appls. 86−25189
impedance imaging, algorithm for electrode positioning and configuration 87−57182
impedance imaging, medical appls. 85−43410
impedance imaging, theoretical limits to sensitivity and resolution 87−50309
impedance imaging techniques, appl. to newborn at risk of intra-ventricular haemorrhage 86−32244
impedance imaging using a linear electrode array 86−32245
impedance plethysmography in peripheral vascular occlusive disorders 88−61386
impedance plethysmography in the diagnosis of arterial and venous disease 85−20913
impedance tomography, optimal reconstruction algorithm 87−50373
integrated and intelligent sensor systems, impact on medical equipment and methods 86−25179
integrated V antenna array for active microwave medical imaging *(French)* 88−48129
integrated voice analyzer for acoustic evaluation of pathological voice 87−21554
interactive case study using video and voice recognition technologies 86−24138
interactive multimodality display for M/NET on-line PACS system 85−9135
interference pattern analysis, clinical uses, effect of load, dynamic studies 87−3995
IPECAC expert system for poisoning incidents management 87−50208
IR thermogram processing system using a microcomputer *(Chinese)* 87−14848
IR thermograph processing system with microcomputer *(Chinese)* 86−5901
IR thermography, principles, techniques and appls. *(German)* 86−38282
ischemic heart disease diagnosis by ECG, multichannel PISA processor development and appls. 86−56161
knee, 3N NMR imaging using surface coils 87−8903
laser application to medicine, status in Shandong Province China *(Chinese)* 85−64622
laser applications, Ar ion laser 85−38192
laser biology and medicine 85−59342
laser pulse tomography, using streak camera 88−8389
laser scan microscopy, pot. clinical uses 87−77623
laser speckle displacement cardiography 86−60771
lasers and fibres, team use in medicine 86−44646
lasers in medicine, markets and opportunities 88−16770
left ventricular border detection echocardiography 86−50545
left ventricular edge detection from M-mode echocardiogram, PC-based system and processing algorithm *(Japanese)* 88−10335
left ventricular edge detection from M-mode echocardiogram 85−9128
left ventricular hypertrophy diagnosis, Q vectors rel. to maximal QRS vectors 86−12008
lesion detection by spatial compounding of B-mode images, specificity and sensitivity 86−5931
leukocyte analysers, high-resolution: retrospective and prospective review 87−77615
light transillumination through heterogeneous tissues, Monte Carlo model 86−32307
liquid crystal light valve, binocular pseudostereo representation of intensity images, clinical processing appl. 85−35556

patient diagnosis continued
liver, ^{131}I labelled Rose Bengal uptake, automatic processing method 86−60765
liver echotexture classification using coherent optical-digital computer 86−32300
liver US scans, joint Fourier transform tissue charact. 86−5927
lumbar nerve root lesions diagnosis, electronic comparison of toe strengths 87−3932
lumbar spine NMR imaging, comparison of circular and elliptical coils 87−3981
magnetic nerve stimulator, design, construction and performance 86−25292
magnetic resonance imaging, signal-to-noise levels, imaging pulse sequence optimisation 88−29994
magnetic resonance imaging for medical uses *(Japanese)* 88−4904
magnetic resonance imaging system, Fe yoke resistive type, Toshiba MRT-22A 87−77658
magnetocardiographic data using SQUID magnetometer and its movie display by means of spline function 85−31857
magnetocardiography based method for cardiac activity investig. 87−21522
malignant tumour diagnosis with laser photosensitisation and spectroscopic anal. *(Chinese)* 88−42503
malignant ventricular arrhythmias recognition, ECG processing and left ventricular press. gradient detect. 85−9130
mandibular kinesiograph, distorted signal correction based on self-organization method 85−38003
Masseter muscle silent period meas., microprocessor based instrumentation *(Korean)* 86−5945
mechanical sector-scan US imaging system, digital scan converter 88−54525
mechanocardiograph due to amorphous wire-coremultivibrator magnetometer 86−65401
mechanocardiography, noncontact linear displacement sensors using amorphous-core multivibrators 86−32227
medical echography, pulse-echo mode, diffr. effect anal. 85−15276
medical electronics 1984 developments review 85−31800
medical positioning devices, CAD appl. 85−38117
medical ultrasonic equip. development, recent advances 88−16704
memory testing unit, spatial arrangement, visuo-spatial memory performance assessment 85−37997
metachrome instrument for chromosome anal. 86−60721
microbubble response to finite amplitude waveforms 87−71129
microcirculatory blood flow monitor, development and clinical practice 88−42538
microprocessor TV games, exercises and evaluation procedures for physically and mentally handicapped 86−50607
microscope image array processing system, microprogramming *(Chinese)* 88−48106
microwave applications in industry and medicine, conf., London, England (May 86) 86−52152
microwave applications in medicine 88−16733
microwave applications to therapy and diagnosis 88−54493
microwave imagery methods for diagnostic applications 85−4315
microwave imaging freq. optimisation for biological tissues 85−48252
microwave radiometric systems for detectingelectromagnetic emission by a living body 86−32299
microwave radiometry for clinical applications, thermal pattern reconstruction 86−56119
microwave radiometry for medical applics., state-of-the-art 86−56118
microwave thermal imaging by passive radiometry 88−68392
microwave thermal imaging by radiometry 88−36468
microwave thermoelastic tissue imaging−system design 85−4290
microwave thermographic imaging for use during hyperthermia treatment of malignant disease 85−38140
microwave thermographic signal generation, combined thermal and EM modelling 88−54543
microwave thermographic technique for clinical medicalapplications 86−56120
microwave thermography, singular system analysis for temp. retrieval 88−23064
microwave thermography, tissue thermal and EM modelling 86−56121
microwave thermography for biomedical appls., multiprobe radiometers 87−63765
microwave thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
microwave thermography system 87−35392
microwave tomographic diagnostics, phase imaging techniques 85−46971
microwave tomography, imaging performance results 87−57131
microwave tomography, linear array arrangement 85−9171
mobile magnetic resonance scanning for improved health care at small centres 87−29746
Moire topography system using zoom lens *(Japanese)* 85−38029
motor control performance tracking accuracy quantification system 87−14845
motor unit action potential generation rel. to neuromuscular disorders, electrodiagnostic model 86−50563
motor unit potentials with varying loads, automatic analysis 87−3996
multi-input VER and ERG analysis for objectiveperimetry 86−56143
multiformat camera, laser-based, for medical imaging 86−38767
multiformat camera for medical diagnostic imaging, evolution 85−9136
multimodality image workstation, functional specifications 85−31815
multiple sclerosis, test based on somatosensory evoked pot. components 87−63776
multiplex hologram synthesis, appl. to medical objects 86−5920
multivariate tissue characterization in diagnostic ultrasound 87−42283
MUP-PET for studying metabolism, brain operation and drug uptake 87−77629
muscle fatigue, real-time microcomputerized monitor based on median freq. shift in electromyographic signal 88−54593
myocardial ischaemia studies using epicardial array ECG signals 87−8935
myocardial ischaemia studies using epicardial array ECG signals 87−8936
myocardial perfusion abnormalities assessment, ^{201}Tl scintigrams quantitative analysis, ESATS expert system 88−29977
Myopathy diagnosis, human muscle fibre cond. obs, 85−43391
neonatal critical care monitoring requirements 86−60802
nerve repair, electronic tester development for diagnosis of functional continuity of injured peripheral nerve *(Japanese)* 88−4956
neuromuscular diseases diagnosis: comparison of concentric needle EMG, quantitative EMG and single fibre EMG 85−4331
neuronal electrical activity imaging in the human brain, use of ESR or impedance meas. 86−32341
patient diagnosis continued
NIKOS, noninvasive coronary artery examination method 86−60692
NMR, double loop receiver coil for imaging at 0.15 T 87−41938
NMR, fat-water imaging with chem. shift selective presaturation 88−4917
NMR, high-quality imaging with flexible transmission line resonators 88−36461
NMR, imaging, fast, biophysical and medical aspects 88−42516
NMR, surface coil imaging, spin-echo technique at 1.5 T 88−4915
NMR breast coil, design modification 87−8906
NMR echo-planar paediatric imager 88−36462
NMR equipment, safety recommendations 85−38038
NMR FLASH imaging, multi-plane scout sequence 88−48117
NMR image reconstruction system, computerised config. 85−48249
NMR imagers, image quality and appls. of Siemens prototype *(German)* 86−44650
NMR imagery, struct. and functional, 3D display 88−68386
NMR imaging, appl. of equiv. circuit 87−50273
NMR imaging, appls. of time-varying gradients in existing systems 86−56107
NMR imaging, clinical appls. 86−50537
NMR imaging, developments 87−41963
NMR imaging, equiv. circuit for coil-patient interactions 87−50272
NMR imaging, magnetic field inhomogeneity correction including chemical shifts and susceptibility by view angle tilting 88−36439
NMR imaging, magnets with reduced stray fields, considerations in design 87−77632
NMR imaging, optical detection of respiration and heart beats 87−29742
NMR imaging, patient loading simulation using inductive damping loops 87−8898
NMR imaging, surface coil assembly with switchable field of view 88−16723
NMR imaging and in vivo spectroscopy, mag. suscept. var. effect 87−14854
NMR imaging and in vivo spectroscopy, supercond. magnet developments 85−38128
NMR imaging and spectroscopy, incremental phase shifter and freq. modulator 87−50244
NMR imaging artifacts, ferromagnetism, and mag. torque of intravascular filters, stents and coils 88−54516
NMR imaging at 0.02 T , design and eval. of RF coils with wave winding 88−74806
NMR imaging in hospitals, superconducting magnet technology development 88−48147
NMR imaging of large nonferromag. metallic implants at 1.5 T 88−4901
NMR imaging of the prostate, inflatable surface coil 88−74827
NMR imaging of vascular anatomy, flow artifact suppression and improved image depiction 88−4918
NMR imaging system stability: temporal variability in signal intensity, S/N ratio, T_1 and T_2 obs. 87−41946
NMR imaging using quadrature coil for adult human head 87−8907
NMR in biology and medicine, review 85−38127
NMR receiver coils, dedicated: simple design and construction method 86−70401
NMR spin-echo images, regional phase correction of chem. shift-based water and fat images 88−4916
NMR tomography appl. *(Czech)* 85−38096
NMR tomography appl. *(Czech)* 85−20902
NMR whole-body machines, aspects of engng. design 87−35390
non-invasive physiological monitoring with microwaves 86−70409
nonlinearity parameter imaging by US echo technique *(Japanese)* 86−5923
nonstress foetus sensorial state evaluation test, stimulation control 86−32297
oesophageal echocardiography, 5 MHz transoesophageal US probe 87−50305
oesophageal pick-up for better recording of posteriorly generated heart sounds 86−65417
ophthalmology densitometry and 3D reconstruction, image processing system 88−61338
ophthalmoscope, scanning laser, overview of uses 85−4310
ophthalmoscopes, laser scanning, safety aspects rel. to retinal temp. rise 86−65408
optical and electronic processing of medical images, book contrib. 86−25223
optical fibre techniques for medical appls., conf., San Diego, CA, USA (Aug. 1984) 85−32879
optical fibre technology in medicine 87−42003
optical fibres in medicine and biology, conf., San Diego, CA, USA (Aug. 1985) 87−36297
optical image transmission method using planar plates and rectangular fibres, medical appl. 85−29529
optical spectroscopy use in diagnosis, system design 86−44645
optical stimulator for the study of eye movements pathology, cct. *(Spanish)* 87−63750
optoelectronics rel. to medical treatment and diagnosis *(Japanese)* 88−68364
orbits, NMR imaging using a binocular surface coil 88−74808
pacemaker lead diagnostics during follow-up after implantation 86−38830
PACS, commercial challenges 85−31832
PACS network architecture, layered approach 85−31833
peripheral vascular disorders, assessment by laser Doppler flowmetry 86−38755
peripheral venous disorder noninvasive diagnostics via optical fibres 87−41954
photoacoustic microscope, cancer cells detect. appl. 86−50556
pictorial archiving and communication system, design considerations 85−31822
picture archiving and communication system, psychophys. evaluation of spatial and contrast resolution 85−31816
picture archiving and storage, hierarchical storage and imaging display system 85−4268
plethysmography, impedance and water-displacement types, comparative forearm vol. change meas. 86−60717
plethysmography, venous occlusion, interpret. using nonlinear model 86−60718
podography devices 86−18284
portable diagnostic radiometer, microwave, battery-operated with on-board microprocessor and LCD display 87−50285
positron camera, multiwire proportional chamber, development of high-efficiency cathode converters 87−21544
pregnancy diagnosis and embryoblast localisation using thermography *(Chinese)* 85−31798
programmable cardiac electrostimulator *(Spanish)* 88−61363

patient diagnosis continued
programmable visual display for diagnosing, assessing and rehabilitating unilateral neglect 87−35385
prosthetic heart valve, sounds time-domain modelling 86−29941
pseudocolour encoder for medical imaging, using microcomputer 88−10341
pulmonary obstruction diagnosis using computerised pattern-character analysis of flow-volume curve 86−65402
pulsed Doppler system, single-gate *(Korean)* 85−59253
quality assurance in medical imaging, conf., London, England (June 1986) 88−55
radiographic screen/film systems, personnel radiation exposure comparison 86−25197
radiology, use of digital visual communications and image storage *(German)* 85−38077
radiotransparent C electrode array for body surface mapping during cardiac catheterisation 88−36490
RADPLANET−a functional radiology PACS and much much more 87−62696
real-time harmonic profile estimator for clinical paediatrics, analogue processor implementation 86−29939
real-time local adaptive video processing in diagnosticimaging 86−11953
red-green colour vision defects, validation of solid-state anomaloscope for assessment 88−36429
resonator coils for NMR imaging at 6 MHz 88−61286
respiration DFT spectra, airways obstruction detection in humans 88−4883
respiration diagnostics, tunable diode laser based spectroscopic system 87−57106
respiratory gas concentrations meas. , compact monitor for clinical use 88−74789
retina disorder diagnosis, freq. anal. of human ERGs 87−77670
retinal blood flow visualisation and meas. by laser speckle photography 87−29741
retinal function tests including ERG and EOG, microcomputer anal. 88−68429
retinal imaging using a light scanning ophthalmoscope *(French)* 85−20900
retinal laser Doppler velocimetry, appl. to computer-assisted clinical use 88−48104
retinal measuring system, diagnostic possibilities 88−36420
review of diagnostic techniques for medicine and biology 88−61248
RF energy, medical uses 86−25220
RF energy appls. in medical environment, shielding techniques 86−25221
RF technology for NMR imaging spectroscopy 87−21557
rheocardiography, method for systemic and pulmonary blood flow assessment 87−50357
rheocardiography for assessment of systemic, pulmonary and coronary blood flow 88−54569
rheumatic disease evaluation, by distance meas. on X-ray photograph 88−29976
right ventricular myocardial infarction, usefulness of ECG pot. maps for noninvasive diagnosis 86−11998
rolandic mu rhythms and assessment of cerebral functions 86−70412
rule-based decision system for sensory evokedpotentials 86−56139
saccadic eye movements, anal. with a microcomputer 86−60786
satellite communication link for emergency medical consultations 88−42475
scanning system for imaging superficial organs 86−25204
scanning ultrasonic equipment for patient diagnosis *(Japanese)* 88−5225
semi-automatic medical image processing 86−25202
serial ECG anal. from myocardial infarction patients, computer program 86−18333
Siemens Magnetome for observing internal organs using magnetic resonance principles *(Danish)* 85−38081
signal detection theory in medical imaging, limitations and applications, review 85−4314
single exposure dual-energy digital radiography 88−29992
singular value decomposition of radiometric integral eqn. 86−32301
slot-line coupler for medical applications of microwaves 85−9148
snoring signals, anal. and classification 87−21527
soft tissue thermoacoustic imaging with 2.45 GHz microwave applicator 87−3974
somatosensory responses rel. to bit-mapped colour imaging of human evoked pots. 87−50332
sonography, modern image diagnostics *(Dutch)* 86−18297
speech, pitch extraction method for diagnosis and treatment problems 86−32239
speech defect diagnostic/therapeutic/prosthetic aid, interactive 88−27849
spherocardiogram: new information displayed by computerdata explication from Frank ECG 86−32338
spinal cord resonance for contrastive pictures in medical imaging *(Dutch)* 86−18323
spine, device to facilitate surface coil NMR imaging 88−74828
spine, NMR imaging at 1.5 T, technical aspects 88−29954
spine NMR imaging, surface coil with variable geometry 88−29985
spirometer system, pointer volume, for respiratory tests 87−50213
SQUID, biomed. applic. advances 85−43324
STEM, diagnostic, image compression and enhancement system 85−64582
stereotaxic radiotherapy technique for small intracraniallesions, diagnostic and therapeutic procedures integration 85−59340
stomach cancer cytology, image processing 85−20910
stomatology and neuromotor recuperation, multifunctional electronic instrument 85−9222
stroke patients, microcomputer-based assessment and treatment-planning 87−71140
sudden infant death syndrome, computerized acoustic detection of obstructive apnea 86−32251
SUMRIS−Sydney University magnetic resonance imaging system, design, construction 88−23048
superconducting MRI system from Mitsubishi, image processing *(Japanese)* 88−74819
surface coil proton NMR imaging at 2T, coil design and appl. 87−14886
synthetic focused US imaging system, image reconstruction in presence of delay noise 87−71107
teleradiology data compression using an electronic image management system 85−31818
therapeutic US system incorporating real-time US scanning 87−71128
thermal pattern recognition by correlation microwave thermography, biomedical appls. 85−15311
thermograms of lower extremities, eval. using TV image quantiser 86−18314
thermometric imaging by microwave radiometry *(French)* 88−61313
patient diagnosis continued
thoracic surface maps produced by ECG, interpretation and eval. with expert system 87−57156
tissue image region segmentation using colour texture feature 85−31811
tissue imaging with US sector scanning, spectral anal. *(Japanese)* 87−71121
tissular respiration arrest, in situ detect. by NADH laser fluorimetry 88−16721
tomographic, image reconstruction of objects from multi-incidence microwave exploration 85−59248
Toshiba SAL-35A ultrasonic diagnostic equipment for B-mode ventral tomography 85−15299
tracheobronchial tree and pulmonary arteries, NMR imaging using electronic axial rot. 87−8915
ultrasonic B-mode images, texture analysis by segmentation 85−25187
ultrasonic diagnostic equip. calibration 88−16732
ultrasonic diagnostic equipment outline *(Japanese)* 86−70394
ultrasonic equipment for medical diagnosis *(Japanese)* 88−68365
ultrasonic imaging and tissue characterisation, conf., Washington, DC, USA (June 1985) 85−54027
ultrasonic transducer vibration modes, matching layers and grating lobes 85−53008
ultrasonics medical diagnosis, signal processing techniques *(Japanese)* 86−70385
ultrasonics medical diagnosis standardization *(Japanese)* 86−70384
ultrasonics probes for medical diagnosis, development *(Japanese)* 86−70386
ultrasound, diagnostic and therapeutic appls. 85−53017
ultrasound, signal processing for spatial averaging 88−4934
ultrasound diagnostic linear/convex scanner eliminatingblind regions, Toshiba SAL-77A 86−25222
ultrathin fibrescopes for medical use, develop. *(Japanese)* 88−68375
unborn child abnormalities diagnosis using ultrasonics *(Swedish)* 87−63735
urinary sediment images, binarization, threshold selection method *(Japanese)* 85−4301
urinary stones, human, SEM morphology anal. 85−43378
US, high speed imaging with linear phase arrays, parallel processing technique 86−11949
US B-scan image anal., power spectrum approach 85−38114
US blood flow imaging system, Toshiba SSH-65A, config. and features 87−41959
US computerised tomography, breast imaging and other appls. 85−15279
US diagnosis, basis and methodological development *(German)* 86−44652
US diagnosis, slow motion display technique and appl. 88−48139
US diagnostic devices, USA Food and Drug Administration guidelines 87−3956
US Doppler colour imaging system, 2D 87−50306
US echo-Doppler systems for clinical appls. *(Dutch)* 86−56111
US echogram, image distortion, sound velocity in massive tissue 85−31790
US endoscope for medical diagnosis *(Japanese)* 86−5903
US equipment, meas. and characterisation of acoustic output 86−38760
US images, noise reduction by digital filtering 87−50238
US imaging, B-mode speckle pattern changes meas. 87−71106
US imaging, diagnostic appls. 86−50539
US imaging, dynamic focus phased arrays compared with fixed focus mech. scanners 86−11948
US imaging, Hewlett Packard 77020 A computerised system, config. and appls. *(French)* 85−26765
US imaging, medical appls. 85−15272
US imaging, principles and equipment *(French)* 85−26764
US imaging, speckle S/N ratio vs. lateral resolution 87−71105
US imaging with 16 MHz pulsed sound 86−25218
US kidney organ image recognition by two-dimens. dynamic programming *(Japanese)* 86−18324
US reflected echo signal nonlinearity parameter meas., in vivo appls. *(Japanese)* 87−63757
US RF signal analysing system for human soft tissue charactn. 88−48140
US tissue assessment for cancer therapy using computer simulation 86−32361
US tissue characterisation, review 85−15274
US transducer devices for diagnostic and therapeutic systems, safety standardisation 88−68390
vectorcardiogram shape description 88−48168
vectorcardiograms, shape anal. technique 87−50366
vectorcardiography, high quality system 87−21584
ventricular arrhythmias, detect. by fast Fourier transform anal. 85−53066
vibrotactile stimulator for use with patients suffering from hemineglect 88−42488
video components and display devices, quality control 85−38043
video displays and hard-copy cameras, test pattern 85−48254
video hard copy camera system, performance and stability 85−38042
visual current, elec. soundings 85−4344
visual diagnostic methods for biomedical appls. *(German)* 88−54501
visual electrodiagnostic testing, min. procedures 86−32310
visual evoked potential conditioning using LED stimulator, appl. to optic nerve lesion diagnosis 86−11974
visual evoked potentials, stimulation using laser speckle patterns 85−4312
visual threshold assessment, factors in colour video monitor use 86−70382
water-immersed microwave antenna array for medical imaging and therapy, local field study 85−4351
waveguide applicators for cancer detection and treatment 85−48256
white-light pseudocolour encoder for diagnostic imaging 85−48240
whole-body magnetic-resonance imaging, appl. of superconducting magnet *(Japanese)* 87−14862
wide-band picture communication system, design anal. 85−30731
X-ray image intensifier with large input format, image processing diagnostic system appls. 85−1251
zonal parametric imaging concept, renal angiography appl. 86−5907
CdTe detector based single probe system, computerized *(Japanese)* 86−44647

ECG R-wave detection software for ambulatory monitoring 85−64606
ECG signal indicator, KS-02 86−50584
ECG signals, multiple, microprocessor based real-time monitoring 88−30020
ECG ST segment, ambulatory monitoring using direct-recording Holter systems 88−68428
EEG, 24 hr ambulatory monitoring :development and appls. 87−14902
EEG, on-line monitoring, usefulness during anaesthesia and in neonatal care units 88−54589
EEG, spike-wave activity in 24 hr cassette recordings, day-by-day variations 88−10357
EEG analysis, stochastic signal classification procedures 86−32326
EEG and evoked pot. monitoring, industry perspective 88−10398
EEG compressed spectral array, correlation to Glasgow coma scale in traumatic coma patients 88−61355
EEG event oriented anal., time dependence and topographic relations 88−61368
EEG imaging of brain activity, methods and potentials 85−38160
EEG monitoring, clinical appls. 87−57186
EEG monitoring in kidney patients, syntactic metric 85−48308
EEG monitoring techniques 87−57187
EEG multi-computer based power spectra for the operating room 85−38161
electrical impedance fluid volume monitoring during intravenousinfusion in healthy subjects 86−38732
electrical impedance tomography for thermal monitoring of hyperthermia treatment by microwave diathermy 87−50324
electrocardiogram signal processing and analysis by computer 86−60787
electroneurophysiologic monitoring, intraoperative 87−41982
electrophysiologic mapping system for online analysis of cardiac activation sequences 86−44677
electrosurgical unit interference to ECG monitor, minimisation 86−56172
EMG, real-time FFT to monitor muscle fatigue 87−21565
EMG, surface, online monitoring of power spectrum median freq. 85−38147
equipment evaluation, DHSS programme 85−20880
evaluation of patient monitors 86−25174
exercise ECGs, online anal. and monitoring 86−32333
eye-position-monitoring interface, electronic 86−50479
fallopian tube, EMG and motility monitoring 88−54559
femoral fractures, healing, US scanning eval. 86−32289
femur fracture, implant deform. meas. using strain gauge instrumented nail plates 86−32370
fibre optic ECG monitoring unit for use in operating room 87−63803
fibre optic sensors, biomedical meas. and diagnosis appl. 88−67822
fibre optic sensors, fluorescence based, small diameter, for continuous clinical monitoring, preparation 88−16719
fibre optic sensors, medical appls. 87−74713
field-effect monitor, expt. design 87−71089
finger cuff blood pressure monitoring device 86−56089
fluorescence polarisation instrument for clinical use, commercial development 85−64555
foetal biophysical parameters, event timer for microcomputer anal. 85−37999

patient monitoring continued
foetal biophysical profile: antepartum assessment using a programmed microcomputer 87−21519
foetal breathing monitoring, PC controlled 88−48209
foetal continuous electronic monitoring and interpretation by Apple II microcomputer 86−70387
foetal ECG during labour: suggested standard for signal recording and processing 88−68420
foetal ECG during labour, microprocessor system 88−68419
foetal ECG enhancement from maternal abdominal lead through digital filtering and averaging 87−57192
foetal ECG heart rate monitor, real-time realisation by adaptive system 88−61388
foetal ECG signal processing for implementation of foetal monitoring *(Chinese)* 87−8932
foetal monitor, bedside, and obstetrical data system 85−31777
foetal monitoring, maternal abdominal ECG detects low-level signals 85−38145
foetal monitoring by improved data acquisition 85−31839
foetal monitors, electronic, current state 87−57081
foetal monitors, US Doppler equipment, survey of acoustic output 87−50239
fontanelle pressure monitoring in infants with Rotterdam Teletransducer, reliable technique 88−29964
for meas. and training in patient rehabilitation 85−38181
fracture movement in vivo meas. using three-dimens. movement transducer 86−32290
fracture stiffness monitoring with external fixation, transducer system 86−32235
Frank-lead vectorcardiogram, 24 hr ambulatory, computerised system for anal. of ST-T segment 88−10379
gastric pH, computer-aided technique for long-term monitoring 88−54479
gastric pH long term computerised monitoring 85−15265
generic issues in medical monitoring 87−57079
haemodialysis patients, monitoring of arterial press., stroke vol. and heart rate 88−68350
haemodynamic monitoring, from catheter to display 88−36414
HAL, brain-wave-monitoring biofeedback device 88−54551
hand assessment system, microcomputer controlled, for quantitative clinical meas. 85−31785
hand-assessment system, microcomputer-controlled, clinical applics. 86−32238
Harrington rod loading patterns, continuous intraoperative measurement method 85−38214
head injury intensive care, integrated system for serial evoked pots. monitoring 88−48179
head-injured patients, computer assessment of neurological status using EEG power spectrum anal. 87−21577
heart beat monitor using photodiode detect. 85−38093
heart block monitoring, prevention of syncopy and sudden death, pulse generator development *(Japanese)* 85−26794
heart monitors, microwave remote, adaptive filtering 86−60772
heart rate monitor, design, operation and construction *(Spanish)* 87−21571
heart rate monitor, digital, derived from arterial press. pulse 86−11926
heart rate monitor using LM339 single-chip comparator 85−20918
heart rate variations and EEG changes during nocturnal monitoring of ischaemic patients 87−21599
heart signals monitoring technique, orthogonal lead extraction 86−32319
heat and respiratory activity monitoring by impedance change using neck electrodes 87−35426
heat rate monitoring system, microprocessor-based 85−48314
Hewlett Packard monitor analog press. input adapter 88−54469
Holter monitoring: indication, anal. quality and clinical satisfaction 87−21601
Holter monitoring, computer-aided, use for S-T changes detect. 87−21617
Holter monitoring real time analysis using digital computer, diagnostics accuracy and clinical feasibility *(German)* 86−18328
home monitoring in children at risk of sudden infant death 88−61224
hyperthermia treatment monitoring, automated temp. scanning system 88−16673
ICU monitor based on multiprocessing techniques 87−63798
impedance cardiography, clinical appl. 88−10394
impedance pneumography, cardiogenic artifact cancellation 86−56156
infant's apnea, bradycardia and tachycardia monitor based on the Z-80 microprocessor 87−77603
infant bedside monitor development 85−48301
infant monitors for combatting sudden-infant-death syndrome 85−53052
infant respiration monitoring−evaluation of a simple homemonitor 86−11928
infants monitored at home, sleep state stability 87−57078
infants undergoing radiotherapy, instrument to indicate acute airway obstruction inremote anaesthesia 86−25178
input and sensor technology for patient monitoring systems *(Japanese)* 86−5972
intensive care, microcomputer monitoring and data-acquisition system 85−48211
intensive care unit, patient monitoring system *(Japanese)* 86−5968
intensive care unit, rationale for neuromonitoring 87−57190
intensive care units design 86−12057
intensive therapy wards, bedside monitoring units connected to host computer 85−38183
interface with support, phys. parameters meas., sensor performance 86−32371
intra-arterial blood pressure and ECG during orthoclinostatic test, continuous monitoring 88−54581
intracranial pressure monitor, noninvasive 85−38008
intracranial pressure monitoring unit with computerised signal processing, improved design *(Spanish)* 87−21523
intracranial pressure telemetric transducer, implantable, monitoring after cerebro-surgery operation *(Japanese)* 88−36421
intragastric pH in man, continuous 24 hour ambulatory monitoring 87−57056
intraoperative EEG monitoring, comparison of a set of power distrib. parameters 87−3999
intraoperative evoked pots., automated monitoring technique based on linear prediction 86−50599
intravascular blood gas monitoring system based on optical fluoresc. 86−44637
intravascular electrodes for blood gas monitoring *(Japanese)* 85−15268

patient monitoring continued
involuntary random body movements, quantification by Doppler radar 86−32306
IR biotelemetry, modulation scheme 85−59243
IR capnometer, sampling, microcomputer-controlled 87−41941
ISFET design advances and biomed. applics. 86−56093
knee joint movement measurement, computer aided 88−54483
left ventricular ejection fraction, continuous monitoring using a miniature NaI detector and microcomputer 87−21558
limb-load monitor, portable, utilising a thin capacitive transducer 86−25173
localised thermotherapy, monitoring changes in tumour blood flow 85−20961
low supply-voltage driving telemetering IC for biological signals, config. and operation *(Japanese)* 88−36486
lung malignancy, adrenal function evaluation by computerised IR spectroscopy 86−60757
memory testing unit, spatial arrangement, visuo-spatial memory performance assessment 85−37997
metabolic monitor, Datex Deltatrac 87−71096
metabolism monitoring by blood O_2 saturation meas., near-IR technique 87−57135
microcirculatory blood flow monitor, development and clinical practice 88−42538
microcomputer role in patient monitoring systems *(Japanese)* 86−5973
microcomputer-assisted haemodynamic and respiratory monitoring 87−29710
microprocessor-based home monitor for sudden infantdeath syndrome 87−3936
microprocessor-based noncontact heart rate/respiration monitor 85−48274
microprocessor-based pulse rate monitor 85−64533
microwave heart monitor and life detect. system 85−38133
microwave imaging by multiprobe radiometry for breast exploration, data processing problems 88−54542
microwave instrument for non-invasive monitoring ofphysiological movements 86−65427
microwave thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
modular patient monitoring system 86−18286
monitoring techniques, relationship between ECG and phonocardiogram 85−64591
motor unit action potential generation rel. to neuromuscular disorders, electrodiagnostic model 86−50563
multichannel automatic foetal movement monitoring and classification system 85−31784
muscle fatigue monitor based on EMG signal tracking 85−38151
muscle strength, endurance and range of motion measurement with computerised system 88−54482
muscle strength testing with FET system, computer aided 88−54488
muscle therapy, quadricep contraction conversion into digital signal for microcomputer system 87−50381
muscular response monitor for children with cerebral palsy, motor performance quantification 87−14840
myocardial infarction patients, ECG mapping for continuous on-line monitoring 85−53073
myocardial ischaemia, continuous measurement 86−32329
neonatal critical care monitoring requirements 86−60802
neonatal EEG recordings, spectral detect. and elimination test algorithms of ECG and EOG artefacts 87−41976
neonatal heart rate variability monitoring 88−48211
neonates with low birth weight, data acquisition system for monitoring 87−3935
neurological care unit, patient monitoring practice *(Japanese)* 86−5970
neurological intensive care, acquisition and signal processing of evoked potentials 88−48200
neuromuscular blockade monitoring using integrated electromyography 87−50336
neurophysiological monitoring in the pharmaceutical industry 85−43411
neurosurgical intensive care, evoked pot. monitoring 87−57189
neurosurgical intensive care unit, computerised monitoring system 87−21578
non-invasive physiological monitoring with microwaves 86−70409
noninvasive measurement cardiac output monitor 88−48100
oesophageal/oesophagogastric pH-monitoring, computerised system *(Italian)* 88−29943
open-heart surgery, evaluation of re-usable electrode for blood PO_2 continuous monitoring 85−64535
operating room monitoring, information integration 87−57205
operating theatre patient monitoring equipment *(Japanese)* 86−5971
ophthalmoscopy on TV monitor, compensation of random eye motion 87−41932
oxyhaemoglobin saturation monitoring in patients, microcomputer system 85−9123
PAM-FM multichannel implantable patient-monitor telemetry system 88−61342
paraplegic and quadriplegic patients, aerobic exercise trainer with physiological monitoring 86−44683
patient-support interface pressure meas. system 86−32372
perinatal bioengineering, developing countries needs, technical advances 87−41913
perinatal monitoring and diagnosis with contraction stress test, automatic unit 88−74791
phase space EEG analysis, for intraoperative monitoring 88−48198
post-operative fatigue assessment, microcomputer-based 87−29711
postoperative monitoring of conjunctival oxygen tension and temperature 88−48090
premature infants, micro-based monitoring/data acquisition system 87−14837
pressure distribution measurement on plantar surface of diabetic feet 86−32236
pressure monitor for continuous positive airway pressure systems 87−50377
pressure transducer adapter, Hewlett Packard, for Spacelabs Model 414 single-channel portable patient monitor 86−5874
pressure-rate product meas. for patient monitoring, null method using closed-loop integrator config. *(Japanese)* 88−42556
programmed pacemakers and monitoring devices, development prospects 88−36513
pulse oximetry: historical review and Ohmeda functional analysis 87−71095
pulse rate meter with visual display, cct. design using photocell/counter config. *(Spanish)* 85−15306

patient monitoring continued
pupillary reflex and eye movement monitoring using video signals, pattern recognition and feature anal. 85—4266
rectal monitor for use with afterloadingintracavitary radioactive implants 86—25334
remote physiological sensing: historical perspective, theories and preliminary developments 87—21567
remote vital-signs monitor using a dial-up telephone line 88—74798
respiration monitoring transducer for use during imaging procedures 88—68338
respiratory monitor using inductive transducers *(Japanese)* 85—64538
respiratory monitoring in respiratory care unit *(Japanese)* 86—5969
respiratory pressure data analysis for detecting breathing circuit faults in ventilated patients 87—29712
respiratory waveforms from ECG traces 87—14891
rheoencephalogram changes in patients with heart and circulation conditions *(German)* 86—44673
skin potential analyser, microprocessor-controlled multiplexed, rel. to bone healing 85—53059
sleep, human, stochastic models for monitoring based on EEG, electrooculogram and EMG 88—61346
sleep recordings, polygraphic, online scoring, Bayesian recursive filter 86—32332
sleep stage scoring, online automatic anal. with microprocessor 86—32331
sleep stage scoring by patient monitoring and expert system 86—65439
sleep states in infants, EEG monitoring 88—61372
snoring signals, anal. and classification 87—21527
software detection of ECG baseline and QRS-complexfor coronary intensive care 86—18334
solid state portable monitoring system for ambulatory patient, ECG, EEG or EMG signal processing 88—48189
spinal cord integrity monitoring, microprocessor based online system 85—48278
spinal injury patients, microprocessor-controlled weight shift monitor 85—43419
spinal somatosensory evoked pots. monitoring during surgery, microprocessor-based system 87—14901
stethoscope, wireless, for auscultatory monitoring during surgical anaesthesia 88—61398
stomach, human, noninvasive technique to monitor elec. and mech. activity 87—35422
teledialysis experiment *(Italian)* 86—5965
telemetry system, 8-channel IR band, for patient physiological parameters monitoring 88—61341
telemetry system for stimulation and monitoring of freelymoving patients 86—44638
therapeutic US system incorporating real-time US scanning 87—71128
toco-monitor for clinical obstetrics, standards and safety *(Japanese)* 86—32233
tracheal sound detector, sudden infant death syndrome monitor appl. 86—38761
TRAM, transport remote acquisition unit for patient monitoring 87—71077
transcutaneous O_2 electrodes, simple zero calibrator 88—23033
transthoracic impedance monitoring, pneumothorax detect. 88—61374
truncal stress, indirect monitoring and anal. over extended time periods 86—38739
tumor intra-operative scanning using CdTe nuclear probe 88—36501
ultrasonic scanning of patients, principle and techniques 85—26757
ultrasound scans, foetal growth evaluation, and gestation dating, computer assisted 86—50541
US hyperthermia temp. monitoring technique 87—71127
US integrated backscatter, on-line 2D eval. 88—4899
US oesophageal transducer, monitoring aspects 88—61287
US pulse wave recording digital system, foetal circulation monitoring in utero 85—38085
uterine electrohysterogram processing for obstetrical monitoring 87—29772
vascular pressure measurement with disposable dome transducer system, accuracy 86—50475
vectorcardiographic monitoring, 24 hr Frank lead system 85—59309
ventilation spectral anal., bit serial digital signal processor appl. 88—10310
ventilatory parameters of neonates on assisted ventilation, computer analysis 85—31861
ventricular assist system, permanently implanted, nonpercutaneous monitoring 86—56199
video EEG telemetry using an ambulatory EEG cassette recorder 88—4945
virtual leads for ambulatory ECG monitoring, arrhythmias computer detection 85—31838
vital life signs detection using microwave energy and digital signal processing 88—10342
vital signs monitor, noncontact EM instrument 88—10337
walking and ECG, computerised system for 24 hr simultaneous recording and anal. 87—21528
wheelchair user, pressure relief monitoring device 86—25184
X-band microwave life-detection system 86—70393
O_2 saturation level monitoring and analysis in patients, using oximeter and IBM PC 87—71076
O_2 sensor, differential paramag., for patient respiration monitoring 88—74788

patient treatment

blood clotting, electronic antihaemocoagulation 87—50379
blood pressure management, microcomputer manipulation of patient generated blood pressure data 86—50615
blood pressure regulation by computer-controlled infusion ofvasodilators *(German)* 85—59316
blood pumps, impeller type, nonpulsatile and pulsatile, haemolysis test 88—61393

patient treatment continued
blood vessel coagulation after RF aided balloon dilation *(German)* 88—54595
bone healing and elec. phenomena, orthopaedic stimulator comparison 86—25290
bone healing enhancement by exogenous magnetic field 85—43415
bone nonunion, DC stimulation use, clinical approach 86—25291
bubble oxygenator, independ. control of blood gas PO_2 and PCO_2 88—61392
cancer hyperthermia, monolithic flexible thermometer arrays 85—38015
cancer therapy, capacitive heating and radiative heating in hyperthermia *(French)* 85—20960
cancer treatment using RF techniques 87—29789
capacitance RF hyperthermia, model for impedance determ. and power deposition charactn. 87—41985
capacitive RF hyperthermia, model for impedance determ. and power deposition charactn. 87—41984
cardiac arrhythmia diagnosis and treatment, 2-channel stimulation device with integrated ablation control unit *(German)* 88—30023
cardiac defibrillation, obtaining uniform cardiac fields 87—50398
cardiac defibrillation by crossed shocks, decrease of energy required 87—50397
cardiac pacing, bioelec. phenomena 88—36498
cardiac pacing and defibrillation, external, optimal electrode configs. 88—10400
cardiac preexcitation syndromes, book 87—22976
cardiopulmonary resuscitation, chest movement dynamics and haemodynamics, computerised data acquisition system 88—10405
circulation assist device for use under electrocardiostimulation conditions 86—18369
computer-aided automated monitoring/treatment after open heart surgery, blood press. control *(Japanese)* 86—5974
contingency transcutaneous stimulator for patients with unilateral tactile and proprioceptive neglect 85—26785
cuff electrode nerve stimulation, 2-part model 87—57202
deep tissue localised hyperthermia using paired coils, eddy current distrib. cubical model 88—61416
defibrillating current waveforms, fundamental criteria underlying efficacy and safety 85—31867
defibrillator-pacemaker, automatic external, clinical rationale and engng. design 86—60803
dentistry, alignment inclinometer in tooth prep. 87—63805
dentistry applications of lasers 87—21650
diathermy forceps for sealing blood vessels *(Swedish)* 87—77672
drip-feed unit, microcomputer-controlled 88—61395
drug administration using nebulisers, effect of electrostatic charge on aerosols 88—36497
drug infusion pumps 87—14915
drug release kinetics from colloidal particles determ., automated device 87—71153
Dynaray-CH 6 linear accelerator, for radiotherapy treatment, service experience 85—4346
ECG signal anal. using combined syntactic and decision making methods 88—48197
education, interactive videodisc library 86—49857
EEG analysis, stochastic signal classification procedures 86—32326
EEG auditory bio-feedback system, features *(Japanese)* 88—16753
EEG biofeedback, instrumentation for CNS studies 87—50399
EEG biofeedback of SMR and beta for treatment of attention deficit disorders 85—20935
electric Ag antisepsis 85—53088
electric and magnetic fields, medical appls. 86—11924
electric and magnetic fields in medicine and biology, conf., London, England (Dec. 1985) 86—19749
electrical accidents, first-aid and immediate therapeutic measures *(French, English)* 86—38802
electrical heart stimulation, examples and overview 88—42568
electrical metrology applied to biological and aqueous systems 87—57064
electrical stimulation open-loop control of human knee during swing 87—14923
electrical stimulation unit, custom designed liq. cryst. display *(German)* 86—70032
electro-spinal instrumentation: implantable muscle stimulators for scoliosis treatment in children 88—74862
electro-stimulation, scientific basis, bone fracture/disease treatment appl. 87—41987
electrocardiostimulators, development of fourth generation 86—38801
electroconversion and defibrillation, method and apparatus *(Swedish)* 86—18365
electrode, Pt stimulating, mapped on limit-voltage plane, charge injection in vivo 86—60822
electrode, Pt stimulating, mapped on limit-voltage plane, corrosion in vitro 86—60823
electrodes, implantable, for permanent electrocardial stimulation, classification 86—25309
electrodes, implantable stimulating, in longit. and transverse direction to skeletal muscle, long-term threshold behaviour 88—16784
electrodes, optimal design for electrosurgery, defibrillation, and external cardiac pacing: finite-element computer model 87—4015
electrodes, recording and stimulating, for biological research 87—29785
electrodes, what one does and doesn't know about them, stimulation appl. 86—50620
electromedicine, historical review of therapeutic uses of electricity 85—48318
electrostimulation, bioregulated, of neuromuscular structures, methods and instruments 88—68453
electrostimulation and bone grafting of nonunions with bone defects 88—61396
electrostimulator, Eliman 206 two-channel therapeutic 86—50613
electrotactile communication, artificial, decoupling intensity variations from freq. variations 86—25272
electroteniometer: feedback device to control hip overflexion 88—16755
electrotherapy, appl. to Fournier's gangrene 88—61401
electrotherapy, Mediterranean origins 85—9221
electrotherapy for accelerating wound healing 86—25265
EMG as a control signal for functional neuromuscular stimulation: autoregressive modelling 88—42564
EMG as a control signal for functional neuromuscular stimulation: signature discrimination 88—42565
EMG pattern mapping for controlling elec. stimulation of paraplegics to facilitate unbraced walker-assisted walking 88—68447

patient treatment continued
EMG study of side step for development of elec. stimulation patterns 87−14906
EMG-activated feedback alarms for the treatment of nocturnal bruxism: current status and future directions 88−30022
environmental therapeutic device design, impact of technology 88−30025
epilepsy, treatment by EEG feedback 85−15344
epimysial electrical stimulation: short-term therapeutic applications 88−61413
epimysial electrodes used to elec. activate paralysed lower extremities, characts. 88−61458
extremities, functional control, selection of stimuli, computer-controlled system 85−48325
ferromagnetic thermoseed materials for tumor hyperthermia 87−63808
fertility and infertility, biomedical engng. technologies appl. 88−54600
fibre optic sensors, medical appls. 87−74713
flaccid paralysed muscles, functional training by electrotherapy 85−48317
flexible sensor arrays fabricated by monolithic Si technology, biomedical appls. 85−58665
for meas. and training in patient rehabilitation 85−38181
fractional inspired oxygen controller, criteria for 88−68459
fracture fixation by using vibration absorber 86−18361
functional electrical stimulation, conf., London, England (Jan. 1986) 86−33945
functional electrical stimulation, develops. *(Japanese)* 87−77673
functional electrical stimulation, posture obs. 85−38184
functional electrical stimulation, principles and methods 87−50393
functional electrical stimulation, sensors for use with 86−44631
functional electrical stimulation, thermal effects, IR thermography obs. 86−38804
functional electrical stimulation by transcutaneous transducer garments: advanced system of surface electrodes 88−48206
functional electrical stimulation for the prevention ofpressure sores 86−56171
functional electrical stimulation systems, external, eval. protocol 88−48205
functional electrostimulation rel. to fibre excitation modelling 88−61400
functional neuromuscular stimulation, myoelec. signal vs. force optimisation 88−48202
functional neuromuscular stimulation, portable system for paralysed upper extremities 87−57199
functional neuromuscular stimulation exercise, electrical stimulator 88−61409
functional neuromuscular stimulation rel. to thumb EMG anal. 87−57173
gait correction two-channel orthotic stimulator *(Slovenian)* 87−14930
gastric electrical stimulator, portable, eval. 88−61404
gelled-pad cardiac pacing electrode, current-density distrib. anal. 88−42567
grasp control during functional neuromuscular stimulation, force/position feedback 87−14924
hand rehabilitation instrument 88−48210
healing electrical enhancement 86−12017
heart, programmed stimulation, real time data collection 87−21628
heart stimulation, continuous elec., using seamless electrode 86−18367
helical percutaneous electrode implanted in lower extremities of paraplegics, stimulation experience 86−25277
hemiplegic rehabilitation therapy, strain gauge platform, real-time biofeedback 86−32348
hospital information system using distributed processing 87−29792
hyperthermia, noninvasive temp. mapping by applied pot. tomography 87−50325
hyperthermia, noninvasive thermal sensing, comparison of active and passive microwave imaging 88−68391
hyperthermia, VLF induced heating 87−29790
hyperthermia cancer treatment 86−50614
hyperthermia high-temp. region increase using ferromagnetic seed implants *(Japanese)* 87−42004
hyperthermia system, 500 KHz current field, used with ophthalmic plaque radiotherapy 88−4985
hyperthermia therapy, automated temp. scanning 88−42569
hyperthermia treatment devices, RF matching circuit for conversion of electrosurgical units or laboratory amplifiers 85−38178
hyperthermia treatment monitoring, automated temp. scanning system 88−16673
hyperthermia treatment of neck tumors, microwave phased arrays capabilities 86−60735
hyperthermia with localised current fields, tissue thermal profiles manipulation 88−68457
hyperthermic treatment, EM heating, absorption and nonlinear thermal models 86−32359
hyperthermic treatment of cancer, pathology characterization, US scatt. 86−32358
imaging tools for interpreting two and three dimensional medical data 87−57120
infusion control instrument evaluation, DHSS programme 85−20945
infusion control instruments, DHSS evaluation programme 87−21621
infusion devices employing microcomputers, safety problems, injection pump example *(German)* 85−59317
insulin control system, microprocessor-based 87−57203
insulin treatment for diabetics, continuous infusion instrumentation 87−21622
intelligent robotic system for rehabilitation of joints and estimation of body segment parameters 88−36495
interstitial capacitive hyperthermia device using thin flexible coated-wire antennas at 27 MHz 88−61403
intracortical stimulation microelectrodes, tip geometric area definition by plasma etching of Parylene 87−21624
intravenous infusion devices, safety considerations, IVAC approach 86−50612
iontophoresis of insulin, pulse mode, blood glucose levels control in rats' obs. 88−10406
IPECAC expert system for poisoning incidents management 87−50208
leg systems, meas. of functional elec. stimulation feedback parameters with accelerometers 87−57201
LV electric shock effects and treatment *(Spanish)* 86−32346
magnetic field sensomotoric effects in man, objective and quantitative investig. *(German)* 86−50604
magnetic nerve stimulator, design, construction and performance 86−25292
mandibular dysfunction, EMG and clinical effects in biofeedback training 85−20936
medical electrical stimulation and shock applications 86−25255

patient treatment continued
microcomputer based generator of medical therapy currents *(Croatian)* 87−14914
microcomputer based system for acoustic analysis of voice characteristics 87−19492
microprocessor controller for respiration and anaesthesia 85−15345
microprocessor TV games, exercises and evaluation procedures for physically and mentally handicapped 86−50607
microwave applications in medicine, conf., London, England (Apr. 88) 88−49386
microwave phased array system for deep hyperthermia through layered tissue 87−47419
mixed LCD/LED display for electrotherapy instrument *(German)* 88−36142
mobility of aged and handicapped in India, therapeutic aids and techniques 88−54598
MP-31T intravenous infusion pump, design concept *(Japanese)* 88−16752
multichannel portable functional electrical stimulation system for spinal cord injured persons 87−14926
multifunction electronic medical apparatus, optimal wave form output, nervous system physiotherapy appl. *(Chinese)* 88−30024
muscle, paralysed, electrically stimulated exercise, tetanic endurance and twitch moment 88−61412
muscle fatigue, real-time microcomputerized monitor based on median freq. shift in electromyographic signal 88−54593
muscle therapy, quadricep contraction conversion into digital signal for microcomputer system 87−50381
muscles, selective activation using peripheral nerve electrodes 85−48321
natural walking with an electrical stimulator *(Swedish)* 87−21625
nerve stimulation system using Janus receiver 88−16750
neuroelectric therapy: appl. to intractable pain, multiple sclerosis and hearing disorders 85−9220
neuromuscular stimulation, functional, role of sensors 85−38186
neuromuscular stimulation system, portable, for spinal cord injured persons 86−56167
neuromuscular system functional/therapeutic elec. stimulation, developments 86−18359
neuropsychiatry, therapeutic devices 88−54597
operating room patient burns 86−60805
optoelectronics rel. to medical treatment and diagnosis *(Japanese)* 88−68364
organ preservation for transplantation, dielec. props, of cryopreserved tissue, microwave warming 86−56173
orthodontic analysis and treatment planning, programs suite for performing centroid cephalometrics 88−61247
orthopaedics, elec. stimulation: past, present and future 85−53089
orthosis, shoulder zero-position functional, biomechanical considerations, clinical results 85−31876
osteoporosis due to disuse, effect of functional neuromuscular stimulation 88−61410
oxygenators; bubble and membrane, complement activation 87−57053
paediatric patients with hypotonia, use of functional elec. stimulation 86−56168
paralysed fingers, improvement of movement by elec. stimulation of intrinsic muscles 88−48201
paraplegia, functional neuromuscular elec. stimulation of the lower extremities 88−48203
paraplegic and quadriplegic patients, aerobic exercise trainer with physiological monitoring 86−44683
paraplegic electrical stimulation control via EMG-based posture-mapping 85−38180
paraplegic EMG-controlled elec. stimulation, critical review 88−42562
paraplegic males, electrically-induced leg and voluntary arm crank exercise, haemodynamic response 88−61407
paraplegic patients, compact of feedback in neural stimulation 85−48324
paraplegics, elec. stimulation, EMG posture mapping-based control 86−56166
paraplegics, functional elec. stimulation, elec. current distrib. anal 88−74861
paraplegics, micturation induction by nerve trunk selective stimulation, dog and toad expts. 88−54602
paretic muscle, voluntary strength gains after hybrid exercise training 88−61408
pasture rehabilitation, sensorized platform-based computerized system 88−68455
peroneal stimulators, functionality, comparative study 88−61411
pneumatic compression device for treatment of swollen limbs 87−50380
pneumatic generator, programmable, for intrathoracic press. manipulation 88−10399
portable infusion devices, development and appl. 87−21623
pressure monitor for continuous positive airway pressure systems 87−50377
pressure sore prevention by functional electrical stimulation of gluteus maximus muscle 87−21645
programmable activity time switch to promote exercise in physical therapy 87−21641
programmable visual display for diagnosing, assessing and rehabilitating unilateral neglect 87−35385
pulmonary oedema treatment chamber temp. and pressure control improvements 87−63799
pump infusions, single- and multichannel, clinical study of press. distrib. *(German)* 85−59318
pyroelectric thermal imaging protein system, microcomputer-aided, development and applic. to pain management 86−50532
quadriceps and hamstrings, stimulation with surface electrodes 86−25275
quadriceps muscle, elec. stimulated, input-output response in paraplegic patients 86−25276
quadriplegia, sensory feedback in functional neuromuscular stimulation by shoulder skin electrostimulation 87−57200
radio oncology irradiation parameters, monitoring and documenting using Dynbaver systems 85−4348
radioactivity definition, applications in medical, industrial and biological fields *(French)* 85−9122
real-time analysis of intracardiac electrograms, automatic arrhythmia diagnosis and electrical stimulation therapy 88−4959
Rehabilitation R&D Progress Reports 87−14934
rehabilitation R&D progress reports (1986) 87−50413
rehabilitation R&D progress reports (1987) 88−61453
rehabilitation technology, conf., Memphis, USA (June 1985) 86−19746
respiratory therapy, HF hardware 86−32344

patient treatment continued
retarded and autistic individuals, vocal shaping using speech synthesis and recognition 88−68456
RF hyperthermia, unbalanced elec. applicator 85−64612
scleral applicator for irradiation of choroidal melanoma 88−61414
scoliosis in children, treatment using implanted electrical stimulators 85−38232
scoliotic patient treatment, real-time biofeedback 86−32349
sequential pulse defibrillation in man: thresholds in normal subjects and cardiac disease patients 88−30027
Single Patient Hemodialysis System *(Japanese)* 86−5995
Sinus VK apparatus for assisted blood circulation during cardiac failure therapy 86−18366
skin conductance feedback and panic attacks 88−4984
soft heating system design for local hyperthermia 88−61417
spark erosion selective recanalisation, sensing methods 88−36426
spastic cerebral palsy, therapeutic effects of elec. stimulation 86−25264
spasticity control in spinal core injury through spinal core stimulation 88−54601
spinal and cerebral spasticity: modifications by elec. stimulation 88−74860
spinal cord injured patients, effects of surface elec. stimulation on spasticity 88−48207
spinal cord injury, pulsed subcutaneous elec. stimulation treatment 87−50378
spinal cord stimulation in multiple sclerosis 85−31862
spinal spasticity modification, effects of elec. stimulation parameters 87−63802
spinal spasticity treatment by elec. stimulation 88−68446
stimulation circuits, isolated const. current, for neuroscience applics. 88−74856
stimulation electrode, Pt, in vivo ϕQ diagram 86−50611
stimulation with capacitor electrodes 87−57194
stomatology and neuromotor recuperation, multifunctional electronic instrument 85−9222
stroke patients, microcomputer-based assessment and treatment-planning 87−71140
syringe driver, portable: design and appls. 85−15342
syringe pump design 87−21620
teledialysis experiment *(Italian)* 86−5965
teledialysis system, telehealth service example 88−54596
tetraplegia, tendon transfer control by functional neuromuscular elec. stimulation 88−48204
THERAPLAN-L radiation therapy treatment planning system 85−4347
thermocouple system for continuous thermometry in RF hyperthermia 85−26742
three-electrode capacitive hyperthermia system 88−61399
thyroid disease management, model-based measurement in physiology and clinicalmedicine 86−60716
tinnitus, treatment by external elec. therapy 87−21626
tissue coagulation and destruction, use of elec. *(Swedish)* 86−18364
trachea noise biofeedback device to help reducebronchospasm in asthmatics 87−4017
TRANS'CARE: an ambulatory device for dental treatment 88−61405
transcutaneous stimulator, HV linear, design strategy 87−63814
transoesophageal cardiac defibrillation, preliminary obs. on dogs 88−36499
transoesophageal pacing using Pill Electrode, clinical testing 87−50396
tumour heating using induction method *(Japanese)* 88−16751
ulcerated tissue healing, enhancement by electrical stimulation 88−61406
ultrasonic and focused-shock wave lithotrites, bladder-, kidney- and ureterstones treatment 88−61333
uniform current density electrodes for transcutaneous electrical nerve stimulation 85−38185
upper limb electrostimulation: programmed hand function 87−57198
urinary incontinence treatment, miniaturised device for long-term intravaginal elec. stimulation 88−74859
urinary incontinence treatment using elec. stimulators *(Slovenian)* 86−5964
US hyperthermia, stacked linear phased array applicator 86−5930
US hyperthermia applicator, multielement, heating of perfused tissue phantom 86−5929
ventilatory therapy, feedback controller 86−25305
ventricular fibrillation, 60 Hz, thresholds for large-surface-area electrodes, animal expts. 87−4019
ventricular tachyarrhythmias, treatment using implanted devices 87−42021
vibrotactile stimulator for use with patients suffering from hemineglect 88−42488
volume-controlled infusion pump/Apple IIe microcomputer system for patient-controlled analgesia research 86−44684
walking using long leg braces or functional neuromuscular electrodes, relative energy cost 87−21681
weight transfer training using biofeedback andelectrical stimulation 86−25266
O_2 concentrator technology, current developments 87−71150

pattern classification *see pattern recognition*

pattern recognition

adaptive pattern analysis system for isolating EMI 86−68792
adaptive pattern recognition applied to an expertsystem for fault diagnosis in telecommunicationsequipment 86−10683
adaptive real-time pattern recognition using a liquid crystal TV based joint transform correlator 87−54121
adaptive US sensor for object identification 87−71465
adjacency detection using quadcodes 87−48103
advances and research activities in China 87−48070
AE signal analysis, pattern recognition appl. 87−73186
AE testing, source information analysis 86−34428
aerial images, model based matching of line segments 87−19894

pattern recognition continued
affine invariant matching for object recognition 88−73324
affine transform determ. from object contours with no point correspondence information 86−16559
affine-transform-invariant curvature fn. 87−62356
airborne image analysis using an optical pyramid 86−4064
airborne target feature extraction and tracking for gate size maintenance and terminal aimpoint determination 85−31077
aircraft classification algorithms, survey 85−36407
algorithms, construction using convolutions algebras *(Russian)* 87−69345
algorithms for realtime component labelling of images 88−28030
aligned component orientation detection method 86−59344
alignment system for semiconductor chips, stored pattern comparison using digital matched filter 86−31290
analog optical processing and computing, conf., Cambridge, MA, USA (Oct. 1984) 86−13263
anamorphic Fourier correlator, shift and scale-invariant, using multiple circular harmonic filters 86−3961
angle coding appl. 87−48196
angle coding for arbitrary geometric configuration recognition *(Chinese)* 88−34555
apparent symmetries in range data 88−34770
area of figure components, labeled medial line approach 87−75919
artificial intelligence in image processing 86−23155
artificial intelligence technology *(Japanese)* 88−28037
aspect graphs for convex planar-face objects 88−28105
aspect representation for 3D object recognition 87−62375
ASPEN parallel computers, speech recognition and parallel dynamic programming 87−61712
ATE CAD, using CONFIDANTE optimisation-based model 85−31373
atmosphere temperature retrieval from satellite data 85−59475
attribute aggregation, new function forms 86−37156
attribute aggregation solving by consistency criterion 88−52504
attribute expansive graph grammar and problem-reduction representation 88−59328
auto triple correlation method 88−28046
autocorrelation function of a bar code system 88−21297
automated assembly and visual inspection, pattern recognition 85−55260
automated visual inspection of uniformly textured flat surfaces using correlation analysis 88−46311
automatic 3-D coordinate meas. machine for workpieces, image processing *(Japanese)* 88−53859
automatic classification of the welding defects 87−58672
automatic codes selection, avoiding explosive search 86−49011
automatic edge extraction using locally adaptive threshold 88−52509
automatic signal classification, principles 86−64318
automatic target recognition algorithms evaluation 88−54830
automatic target recognition appl., multisensor imagery, segmentation techniques evaluation for prescreened areas 86−69193
automatic target tracking, unsharp masking technique 88−41724
automatic testing, conf., Washington, Aug. 1983 85−16810
automatic verification of seal impression 87−2648
automatic visual pattern inspection method, circular feature extraction filter appl. 87−17478
autonomous route planning through nonuniform terrain 86−3936
AUTOSCOPE P from Leitz for automatic particle analysis 87−56490
average conditional error rate estimators comparison 88−8832
average image of similar optical signals, appl. to signal processing and recognition 85−57449
Bayes classifier, multistage, separability problem 88−46268
Bayes error estimation using Parzen and *k*-NN procedures 88−3166
Bayes error rate estimator, asymptotic distribution 85−7913
Bayesian type, conditional allocation and stopping rules 86−69132
Bezier approximation for design of operators in image processing 88−14831
binary curve linear/spatial representation in multiple resolutions 87−48231
binary digital pictures, theory 86−23098
binary hologram recording on small supports for pattern recognition 88−65913
binary images, accuracy of consistent perimeter estimates 88−52539
binary images, deviation of parameters displaying object shape *(Japanese)* 88−28079
binary images, segmentation using third-order Markov mesh image models 87−48090
binary object recognition using magnification/interpolation algorithm for digitised multi-valued pictures 85−30402
binary phase-only filter reconstruction using Hughes liquid crystal light valve 87−46598
binary phase-only filters 85−30295
binary phase-only filters, multiplexing capabilities 87−47874
binary phase-only filters using Fourier and Hartley transforms, optical correlator performance 88−3140
binary pictures and image thresholding complexity, depth-first expression approach 87−48222
binary tree classifier design with a permutation statistic 86−54551
binary tree design using fuzzy isodata 86−43334
binary-phase-only-filter for distortion-invariant pattern recognition 88−66659
binocular stereograph based on structures of edgelines *(Japanese)* 87−62220
bioacoustic research methods applic. to acoustic imaging and pattern recognition 88−27944
biological signal processing, pattern recognition 86−25235
biomedical tissue image region segmentation using colour texture feature 85−31811
biovisitrons networking for high level pattern recognition 87−33821
bipolar joint transform image correlator for multiple object identification 88−59231
bit-data compression method using pattern extraction *(Japanese)* 88−14722
blob detection as textons in natural images 88−3279
block coding technique for two-tone image compression 87−27605
block detection in normalized Kolomogorov metric space 85−30443
blur identification, iterative identification and restoration of images 88−66713
book 88−31282
bootstrapping for error estimation 87−48108
boundaries extraction using local measures driven by rules 87−19877
boundary detection by minimising functionals 86−10554
boundary detection in digital images, Markov model 87−62154
boundary images segmentation, selection and use of image features 87−2635
pattern recognition continued
brainstem auditory evoked pot., statistical pattern classification 88−23077
branch-and-bound nearest neighbour classifier 88−34766
breast cancer detection, thermographic image evaluation, pattern recognition 85−31810
bridges in forward looking IR images, detection 87−49576
bright-spot detection in pyramids 87−48230
CAD of power system 87−57600
camera rotation invariance of image characteristics 87−2628
categorical shape theory and pattern recognition 88−34767
category decomposition of remotely sensed image data 88−42676
causality law 87−33820
cellular-complex topology appl. 88−14838
centrohermitian matrices solution appl. 86−69192
centroid location of nonoverlapping objects 87−75851
centroid tracking scheme in weighted coordinate system 86−10580
chemosensors with pattern recognition 86−55632
Chinese handprinted characters classification, stroke complexity distribution appl. *(Japanese)* 85−41897
chord distributions, distortion invariance and parameter estimation 85−46898
chord functions, weighted shape recognition appl. 88−59257
Chrestenson functions, applications in logic design and data processing 86−16520
chromosomes, zero feature correlation assumption effect on max. likelihood based classification 87−33796
circle manoeuvre classification for manoeuvring radar targets tracking 85−47581
circular harmonic phase filters for efficient rotation-invariant pattern recognition 88−66608
circular-Fourier-radial-Mellin transform descriptors forpattern recognition 86−59329
circular-harmonic filters, expansion centre determ. and sidelobe level prediction 88−3184
city block distance characterisations 88−8833
classification, input data standardisation by descent vector method 88−52540
classification algorithms, universal restrictions *(Russian)* 87−27626
classification and data analysis *(Japanese)* 86−46168
classification error rate for lin. discriminant fns., resampling estimators for nonGaussian populations 88−31618
classification in fuzzy environment 86−10482
classification of bounded line classes 87−48139
classification of partial 2-D shapes using Fourier descriptors 88−3169
classification of patterns with missing information and random orientation, combinatorial approach 86−69131
classification statistic with dependent training observations, asymptotic error rates 87−19872
classification techniques *(Japanese)* 86−46169
classification using relative constraints 88−73336
classifier performance evaluation, bootstrap and other resampling techniques appl. 85−51727
classifiers accuracy comparison using statistical technique 88−73205
closed planar boundary Fourier encoding 85−36355
closed planar curves, transform encoding scheme 85−30413
cloud field image texture anal., time series modelling, climatology appl. 85−36455
cluster anal., bootstrap technique 87−75885
cluster anal., combinatorial and probability problems *(Hungarian)* 87−65337
cluster anal., L_1 norm appl. 87−72914
cluster anal., multigraph concepts 88−56157
cluster anal., potential function approach *(Bulgarian)* 88−21305
cluster anal. under Markovian dependence, image segmentation appl. 88−59330
cluster analysis, branch and bound algorithm evaluation 85−33305
cluster analysis based on nonparametric tests 88−56114
cluster partitioning algorithm for graph theory problems 86−46173
cluster pattern points, distances probability distribution 86−23165
cluster validity, theoretical framework 85−30450
clustering, limited branching appl. 86−10481
clustering, seed point selection, fuzzy measures 87−2589
clustering, suboptimal estimation of density functions and derivatives 85−30453
clustering by means of medoids 87−72913
clustering for ordinal data, linear programming formulation 87−47886
clustering method by bipartite graph theory 87−48156
clustering optimisation formulations 87−47885
clustering procedures, fuzzy, objective functions appl. 87−55344
clustering tendency problem in pattern analysis 85−57517
clustering using nonparametric approach 87−55343
clustering with relational *c*-means partitions from pairwise distance data 87−75872
coded-spectrum diffraction interferometry, phase object characts. recognition and imaging 88−52537
coding methods for two tone graphics, comparative study 87−2446
coherent optical imaging systems, orientational scale invariant shape recognition algorithm *(Russian)* 86−23092
coherent optical pattern recognition, review 85−36370
coherent pattern recognition using a two-stage spatialprefiltering procedure 86−30002
color edge detection 85−51731
color image correlation using a magneto-optic spatial light modulator 88−58276
colour image edge detection based on histograms of differences 87−48150
colour image recognition by spectral-spatial matched filtering 85−25168
colour image segmentation and reflection anal. 88−66666
colour image statistical pattern recognition filter using incoherent optical correlator 87−69250
colour object identification by monochromatic binary correlation 88−46145
colour pattern recognition, real-time, using correlator, matched filter and spatial light modulator 85−13588
colour picture segmentation using recursive clustering technique 88−73334
colour recognition in video signals without movement indicators *(German)* 85−26019
colour recognition using spectral signatures 87−62187
colour representation using statistical pattern recognition 88−8808
colour textures models 87−48123
communication signals, anal. and classification 86−36995

pattern recognition continued
communications and image processing, conf., Cambridge, MA, USA (Oct. 1987) 88−37821
compact clustering using fuzzy ISODATA 87−13158
compact objects detection and delineation using intensity pyramids 88−59242
complementary signals, recognition using optical correlator system 85−51714
complex contours reconstruction and Fourier coding 86−64332
complex object recognition, special processing system 86−3944
complex tree dimensional objects recognition using three dimensional moment invariants 85−46905
component combining features from multiple image frames 86−37157
composite edge detection with random field models 87−62358
composite matched filter for image recognition with inexact processing 87−19954
compound rotation-invariant filter using circular harmonic expansion 88−3137
compound rotation-invariant spatial filtering technique 88−33845
computational stereo using color 88−34816
computer generated hologram appl., review 86−10015
computer generated hologram for diffraction-patternsampling 86−9994
computer generated holograms in pattern recognition, review 86−3343

conference, St. Andrews, Scotland (Sept. 1985) 87−16240
connected components, linear time algorithm for finding 85−51698
connected line drawing extraction from perspective view of polyhedron 85−57474
connected speech recognition, sequential pattern learning system appl. 86−16242
connected spoken word recognition algorithms by constant time delay DP, 0(n) DP and augmented continuous DP matching 85−2770
connectivity analysis of multidimensional multivalued images 87−62311
connectivity issues in 2D and 3D images 87−2630
consensus-based partitions in space of ordered partitions 88−59251
consistent labeling problem, solution algorithm using structure of constraints 87−48080
consistent labelling problem, constraint synthesising algorithm 85−30407
consistent labelling problems with separation prop., soln. using divide and conquer algorithm 85−30408
constellation matching of points on two isometric metric spaces 87−48142
CONTAM: an edge-based approach to segmenting imageswith irregular objects 86−4040
context dependent edge detection 88−73312
context dependent smoothing of figures represented by medial axis transform 87−48095
continual original information, evaluation calc. algorithms *(Russian)* 85−36392
continuous speech, dynamic programming for pattern matching, segmentation and feature extraction model 86−16247
continuous speech understanding system, lexical stress detection, pattern recognition approach 87−19606
contour classification, Hough transformation *(German)* 88−46265
contour classification using invariant moments 87−19969
contour coding for image manipulation and compression 87−48201
contour identification through Hough transform and simplified interpretation strategy 87−48133
contour images, defocusing computer modelling 87−19913
contour line regions segmentation method 87−48089
contour processing method for fast binary neighbourhood operations 88−28050
contour recognition, syntax-directed approach 87−27642
contour sequence movements for classification of closed planar shapes 87−69302
contour-edge optimal detection, recursive algorithm *(French)* 88−21342
contour-line surface model conversion to mesh surface model 87−48148
contours matching, token based shape description 88−46223
contrast fn. singularities in scale space 87−62355
contrast-invariant pattern recognition using circularharmonic components 85−57456
convergence rate of k-NN classification rules 87−48138
convex binary patterns, compact contour chain codes 85−41855
corner detection algorithm based on chain-coded plane curves 87−69305
corner detection using the generalised Hough transform 87−7862
correlation based technique for shift, scale, and rotation independent object identification 87−62231
correlation filters, distortion-invariant, iterative technique for synthesis 87−55265
correlation filters, low noise, construction 87−39944
correlation ˊfilters, rotation invariant, iteratively designed, expt. use 87−75852
correlation filters for distortion-invariance anddiscrimination 86−10535
correlation response parameters with change of scale and rot. of correl. images 85−51711
correlation synthetic discriminant functions, advanced filters 86−69103
correlation transform feature extraction 85−2896
correlator using Fresnel hologram and extended source 88−20774
Cox-Lewis method for testing multidimensional data, extension to more than 2 dimensions 88−28047
Cramer-Rao bounds for means estimation in clustering problems 88−73204
cross-angle transform for viewer-independentrecognition of 3-D objects 86−4039
cultural vegetation type/growth identification using Landsat data 85−30281
curvature primal sketch 86−43305
curve fitting, two-step method based on polygonal approx. 87−44217
curves with concatenated arcs, piecewise representation via break points detection 88−66759
data compression, adaptive asteroid zonal filter 86−64244
data compression of multispectral images 88−59284

pattern recognition continued
decision tree classifier, definition, optimisation and performance measure *(Chinese)* 88−36679
decision true classifier design, automated approach, comments 86−69139
degenerate view quantification 88−8868
degrees of adjacency and surroundedness 85−41976

depth map reconstruction from intensity maps 85−30444
depth maps, dense, incremental estimation from image sequences 88−73327
depth maps, use of intrinsic and extrinsic surface characteristics 86−10581
depth of field information 87−69275
depth recovery from blurred edges 88−73340
descriptive classifier for silhouetted pictorial patterns 88−73333
developable surface matching algorithm 88−73288
development and published work in Italy, survey 87−75922
diagnostic problems appl. 85−2899
differentiating spatial light modulator based on nematic liquid crystal, for optical preprocessing and pattern recognition 87−68218
diffuse clusters, detection in noise background 86−43338
diffuse edges extraction by edge focusing 88−46193
digital approximation of moment invariants 86−4052
digital curves and contours, simplicity conditions 87−48096
digital image processing appls., conf., San Diego, CA, USA (Aug. 1984) 85−27916
digital image recognition from cover values 85−30341
digital images under additive noise, restoration using quality measure of restored images 87−48200
digital optical iterative pattern recognizer 88−66657
digital signal processing, conf., Florence, Italy (Sept. 1984) 85−44394
digital straight segments 87−7809
digital waveforms, string representation and appl. to waveform recognition *(Chinese)* 88−27989
digitised curve recognition and charact. 87−47944
dimensionality reduction and spectral estimation appls. of reducible matrix structures 87−47848
direct problem of image processing, Wiener's method 85−2892
directly unobservable random events, recognition 86−37117
discontinuities in images, 2D local structure 86−10556
discontinuity detection scheme 86−10484
discrete linear basis transforms, analytical comparative study 87−44102
discriminant anal., Δ-transform appl. 85−51725
discriminant surface anal. using polar coordinates 87−69316
discriminating textured surfaces in natural imagery 88−46217
disphonic voices, speech pattern recognition for laryngeal disease diagnosis *(Spanish)* 87−61616
displacement meas., feature-based, in image sequences, precision 87−49951
displacement vector fields estimation for image areas, smoothness constraints 85−30365
distance functions using density estimates 85−30449
distance transformations computation in convex and non-convex domains 88−14789
distance-weighted k-nearest neighbour classification rule 88−8821
distances defined by neighbourhood sequences, general props. 86−52352
distortion invariant recognition using iteratively designed optical correlation filters 87−39940
Doppler spectra, autocovariance estimation for radar signals classification 85−46821
dot matrix display recognition using critical feature enhancement 88−4569
dot patterns perceived orientation strength, quantitative measure, concept 86−49032
dynamic clusters algorithm in automatic classification *(Rumanian)* 85−2881
dynamic programming appl. 86−16518
dynamic scene anal., optical flow field determ. 88−3192
ECG pattern recognition by relational matching of significant points 87−50363
ECG waveform description, attribute grammar approach 85−38159
echocardiogram recognition by dynamic programming matching method *(Japanese)* 88−61705
eddy current nondestructive testing, automatic classification and recognition of defects 87−16767
edge angle meas. using averaging Sobel edge detector and 3-pixel square convolver 87−62183
edge contours in images, detection and smoothing by 1D Kalman techniques 88−66728
edge detection, computation approach 87−19849
edge detection, edgel-aggregation and edge-description 87−48153
edge detection, estimation and accurate localisation 88−3287
edge detection, improved localization in generalized Hough scheme 88−14775
edge detection, localisation and estimation 88−3289
edge detection, Miller regularisation of differentiation 88−34831
edge detection, multi-scale, Gaussian filtering 87−2641
edge detection, optimal algorithm using recursive filtering 87−62357
edge detection, real time, of echo image of school of fish by 2D exponential smoothing 86−69160
edge detection, step or jump, using extrapolation 87−48117
edge detection, surface fitting approach 87−19850
edge detection, template mask design constraints 86−59343
edge detection and segmentation based on Hilbert transform 88−66748
edge detection by cost minimization 88−34830
edge detection by LoG operator, refinement 88−73309
edge detection by zero crossing of Laplacian-Gaussian operation, error probabilities 87−48152
edge detection from negative maximum of secondderivative 86−4053
edge detection in fingerprints, image enhancement 87−75882
edge detection in gray-scale image 87−48151
edge detection on the basis of piecewise linear models 88−14832
edge detection through residual analysis 88−73311
edge detection using generalised threshold selection 88−59245
edge detection using the directional derivatives of a correlated random field model 87−55320
edge detection with subpixel precision 86−4050
edge detectors, hybrid, for noisy situations 85−25157
edge detectors, Laplacian zero-crossing operator compared with 2nd directional derivative edge operator 86−3918
edge detectors based on linear and median operators 87−48158
edge enhancement using order statistic Laplacian 88−34832

pattern recognition continued
edge extraction using statistical classifier approach 87−69278
edge focusing, coarse-to-fine tracking 88−14764
edge orientation computations, noise effects 88−14799
edge point estimates in noisy data across step edge 86−10555
edge recognition, 2D optimum method using matched and Wiener filters 87−62350
edge separation and orientation texture measures 86−4022
edge-based image segmentation 88−41063
edge-detector resolution improvement by image interpolation 88−3288
edge-detector resolution improvement by image interpolation 87−47913
edge-to-edge visibility in polygon, shortest path approach 87−2590
edges, diffuse, extraction by edge-focusing 88−3224
edges, fingerprints of 2D models 88−46158
EEG feature extraction by optimally approximating power spectrum *(Japanese)* 85−31854
ego-motion complex logarithmic mapping 85−46900
electric power systems, fast transient stability assessment 88−5243
Electricite de France, public opinion survey multivariable data analysis *(French)* 85−26944
electricity supply, automatic detection of anomalous load data for households 87−42544
electrocardiogram 85−31860
electromyography, motor unit potentials, automatic detection and classification *(French)* 88−4961
electron beam lithography, focussed, pattern recognition techniques for calibration and registration mark detection, modelling 88−26125
electronic speckle pattern image fringe minima identification 87−63312
ellipse detection by use of recursive least-squares estimator 85−57487
EMG pattern analysis and its classification for aprosthetic arm 86−56136
EMG pattern recognition: comparison of 3 muscle site configs. 86−56138
eMG variation in spatial pattern recognition for prostheses 85−43445
entry-exit method of shadow boundary segmentation 86−4057
epileptic spikes, pattern recognition based on correlation of mag. field recordings 88−61335
epipolar-plane image anal. generalisation on spatiotemporal surface 88−73291
error control coding relationship 85−57518
error probability estimation for pattern recognition algorithms, appl. to geophysical obs. 86−6074
ESM data processing, appl. of pattern recognition techniques 88−52498
Euclidean distance approx. using distance transformation; 87−48110
Euclidean distance transformations and model-guided image interpretation 87−39926
event related potentials, component and interval detection algorithms 87−21566
event set distance for texture classificationand cluster analysis 86−49030
event-covering method for probabilistic inference 87−47940
evidence combination for edge detection 88−3223
expansion center choice influence on correlation rotationally invariant filters performance 88−52568
expert system for planimetric feature extraction *(Spanish)* 87−69394
exploratory pattern analysis using sparse decompositions 87−48109
extraterrestrial intelligence detection, anal. of variance approach to pattern recognition and motion detection 85−30334
f-1 spectrum spatial patterns with tree struct., theoretical study *(Japanese)* 88−59323
facial recognition using eye spacing meas. 87−19701
fair copy reproducing algorithm from roughly sketched diagrams 87−48129
Faraday effect light modulator for digital/optical computing 88−8020
fast *k* nearest neighbor finding algorithm based on the ordered partition 87−19856
fast codebook search algorithm for nearest-neighbor pattern matching 87−19754
fast digital image processing technique for objectrecognition and classification 86−30066
fast Hough transform for multidimensional signal processing 87−27447
feature detectability from curvature estimation 88−73314
feature detection from local energy 88−14798
feature evaluation, intraclass and interclass ambiguities 85−7914
feature evaluation of similar images by modified andconstrained average method 86−16502
feature extraction, nonparametric algorithm 85−30452
feature extraction, real-time invariant, image domain processing appl. 86−10531
feature extraction and terrain matching 88−73377
feature extraction by correlation transform, pattern reconstruction method *(Japanese)* 85−25146
feature extraction by uniform structure threshold logicnetwork 87−2561
feature extraction considerations for high resolution radar signals 88−3128
feature extraction for high dimensional problems, experimental study of Kittler's two stage Karhunen-Loeve method 86−43336
feature extraction for recognising solid objects with US range sensor 86−37128
feature extraction from intensity images 88−41066
feature extraction from range imagery using mathematical morphology 88−41078
feature extraction using extended Fisher criterion, Malina's method and its problems 85−19505
feature identification for hybrid structural/statistical pattern classification 88−46155
feature point detection, correspondence in presence of occlusion 88−28123
feature point matching in image sequences 88−34771
feature selection method based on Mahalanobis distance 85−30387
feature selection procedures, comparison 86−30048
feature selection scheme for discriminating weakly stationary processes 85−30388
features selection and possibility theory 86−30009
ferromagnets, nondestructive inspection, mag. noise, pattern recognition methods 86−62292
filamentous processes detection in images 87−69391
filtering moving-target trajectories in interference from irrelevant measurements 88−3201
fingerprint, tree system approach 86−54537
fingerprint identification system for personal identification *(Japanese)* 85−25106
fingerprint identification using feature lines attributes 87−55352
fingerprint image segmentation using directional image 87−69315
fingerprint images, ridge struct. restoration algorithm with grey-scale compensation *(Japanese)* 85−57513
pattern recognition continued
fingerprints, recognition method *(Chinese)* 85−2879
flexible 3-D vision system for robotics 85−36412
flexible pattern anal. method 87−48076
flexible template matching for automatic target classification 87−13138
flow routing algorithm to solve maximum concurrent flow problem, application to cluster analysis 86−49174
Foley-Sammon transform for image classification 86−64352
form recognition using moment invariants for 3D perspective transformations 87−62200
form-invariant linear filtering, theory and appls. 87−19658
forward/backward contour tracing with feedback 87−47912
Fourier description method by group representation theory 86−10563
Fourier transform matched filtering, acoustooptically addressed 85−36312
fractal feature and texture analysis *(Japanese)* 87−62223
fractal image models and object detection 88−41083
frame sequences segmentation by moving observer 85−13598
Freeman's generalized chain coding scheme, improved version *(Japanese)* 87−2451
Freeman chain code generation from edge coordinates using connecting type segments *(Japanese)* 86−49025
fringe anal., Gabor filter approach 87−48143
fuzzy, membership function 86−49028
fuzzy c-means algorithm, local convergence 87−19874
fuzzy c-means algorithm, optimality of solutions and effective termination 87−19875
fuzzy c-means clustering algorithms, efficient implementation 86−48979
fuzzy c-means/ISODATA algorithms, convergence and consistency 88−3168
fuzzy cardinality concept, counting measures 86−66695
fuzzy classification in partially supervised environment, adaptive algorithm 87−48067
fuzzy clustering, L_1 methods 87−72912
fuzzy clustering procedure 87−48154
fuzzy data sets clustering, loose-pattern process approach 85−51694
fuzzy geometry of image subsets 85−7918
fuzzy hierarchical scheme 87−13159
fuzzy image description by convex hull technique 87−48229
fuzzy ISODATA clustering algorithms, local optimality 86−48983
fuzzy pattern matching with extended capabilities 87−13161
fuzzy patterns, fuzzy degree for describing relative position 88−46323
fuzzy set, perimeter definition 85−41972
fuzzy set theory and possibility distribution appl. 86−10469
Gaussian classifiers, asymptotic performance 85−7941
general and gray-scaled structural operation *(Chinese)* 86−37112
generalised Hough transform appl. to corner detection 88−21168
generalised matched filter orientation variability 86−16533
generalised synthetic discriminant function 88−41047
generalized cone descriptions from sparse 3-D data 87−2627
generalized cylinders, invariant properties of projections 87−62376
generalized distance measures and error bounds 86−49027
geo-graphic code representation of 3D objects from drawings 88−66667
geometric image transformations, group structure, cross-correlation and symmetry 88−66692
geometric matcher for recognizing and positioning 3-D rigid objects 85−46910
geometric moments from Hartley transform intensities 87−47957
geometric predicates recognition, committee separator function appl. 85−7911
geometric shape detection in Daedalus ATM data 87−4164
geometrical shape code and optical recognition scheme for language alphabets and phonemes 86−54541
geometry guided segmentation of outdoor scenes 88−66673
glass bottles, electro-optical inspection system using adaptive spatial filtering 88−45220
glossy object recognition, model-based, using polarimetrical props. 88−46143
Goldfarb's approach from graduate student's viewpoint 86−64373
graph optimal isomorphism algorithm 85−28134
gray level images, effects of asymmetric fuzzy membership functions 87−13160
gray-level thresholding algorithms 87−48192
greedy matching on a grid 88−38062
grey-tone images topographic description, segmentation and tracking appls. 88−52571
group representation theory appl. to picture recognition 87−69261
guided propagation inside a topographic memory 88−59183
Haar transform appl., properties and fast algorithms 85−7919
Haar-transformation and its application *(Hungarian)* 87−13078
handwritten drawings, figure recognition method *(Japanese)* 88−46161
handwritten time drawing, image enhancement method *(Japanese)* 88−46160
harmonic shape decomposition 87−48125
Hartley optical transform intensities to compute geometric moments of image 88−59230
heterogeneous data anal., variable type transformation 87−48155
heuristic classification algorithms, correction, symmetric and functional constraints 88−52538
heuristic classification algorithms, correction problem, completeness and universal constraints 88−41049
heuristic search technique using algorithm SA 87−48193
hexagonally sampled images and detection of edges *(Slovak)* 86−43299
HF signals automatic classification, digital signal processing and pattern recognition methods 87−55314
hierarchical clustering methods, Monte Carlo comparison on random data 86−30011
hierarchical clustering technique 85−51728
hierarchical contour coding, principles and strategies 85−36440
hierarchical contour coding simplifies real time pattern recognition 87−55291
hierarchical Fisher and moment-based pattern recognition 85−30310
hierarchically encoded image recognition by technical and biological systems 88−41009
high capacity scanning correlation system, correlation plane displacement anal. 88−27995
histograms distance, appl. 87−48242
historical perspective on optical computing 86−3994
holographic, using resonance atomic media 87−39257
holographic filter, phase-only, synthetic, for multiobject recognition 88−34168

pattern recognition continued
holographic mapping filters for geometric coordinate transforms., resolution limits 88−34136
holographic match filtering with high diffr. efficiency 88−34784
holographic optical element appls. 85−29942
holographic processor, astigmatic, for local pattern recognition 88−40360
holographic processor for recognition of 3D targets viewed from any direction 88−72186
holographic recognition system modelling using theoretical-numerical convolution transform. 85−7554
horizontal motion matching algorithm, moving object tracking appl. 87−48216
Hotelling trace criterion as metric for system performance, psychophys. validation 88−23061
Hough transform, adaptive, for 2-D shape detection 88−3170
Hough transform, generalised, for object detection, prop. anal. 87−62180
Hough transform modifications for lines 86−4060
Hough transform of parametric curves and its use for picture processing *(Slovak)* 87−75858
Hough transform optical implementation by matrix of holograms 87−27560
Hough transform-template matching hybrid 88−3233
Hughes Image Understanding Project 86−23151
human area recognition in video signal 88−21335
human visual system and planar pattern recognition by invariant features 87−48205
hybrid, using Fraunhofer diffraction 85−7935
hybrid classifier with appl. to remote sensing 86−48990
hybrid cross-correlators, optical and digital, computer simulation 86−29971
hybrid image processing, conf., Orlando, FL, USA (Apr. 1986) 87−36303
IC production and testing, TV imaging systems for positioning and inspection appls. *(Slovak)* 85−28040
iconic indexing by 2-D strings 87−47910
identification and one-pass coding of objects by image analysis *(French)* 87−69341
identification and restoration using parallel Kalman filters 88−46295
identity independent object segmentation in $2^1/_2$D sketch data 87−19972
ignorance-based signal estimation given multiple noisy realizations 87−27429
image anal., conf., Stockholm, Sweden (Jun. 1987) 88−54
image anal. and processing, morphological filtering appls. 87−27643
image anal. by methods of moments 88−66627
image analysis by the methods of moments 88−73350
image blurring, Gaussian convolution computing 87−48181
image boundaries, regression-induced, invariant quantities under special linear transformation 87−69312
image classification, spatial information appl. *(Chinese)* 87−27557
image compression using nonuniform samples withcontrolled compression ratios 87−7854
image correlation comparison, input pattern geometric distortions effect 85−46941
image description based on quantum-mechanical harmonic oscillator wave functions 88−28112
image detection from piecewise linear contours 85−36326
image edge segment based stereo matching 86−16545
image enhancement and edge detection median based algorithms 88−14825
image feature classes discrimination for image data with large spectral dimensions 87−4161
image feature description and segmentation, finite prolate spheroidal sequences 88−41031
image identification and restoration, survey 88−46293
image information transmission, storage, and acquisition using an acousto-optic cell and optical matched filters 87−13053
image matching, stereo triangulation techniques 88−28125
image matching by a probabilistic relaxation labeling process 85−30406
image matching/classification, relaxation technique *(Chinese)* 85−2880
image motion estimation, anal. of weak solution approach 87−47937
image normalization by complex moments 85−36353
image pattern recognition methodologies, overview 86−30060
image processing, edge detection based on multi-edge models 88−52569
image processing and appls., conf., London, England (June 1986) 87−34
image processing and perimetric sampling for pattern recognition 87−69299
image processing based on image organization 87−7855
image processing system (IPS) for recognition and analyzing objects 87−48047
image processing system for analysing objects 87−2661
image processing using three inhibition models 88−34823
image registration, piecewise cubic mapping functions 87−75883
image registration using a fast adaptive algorithm 87−69331
image registration using multidimensional LMS adaptive filters 88−66703
image representation in biological/machine vision, Gabor scheme 88−66624
image representations, conversion and combination 87−55351
image resegmentation using generic shape, general cultural object location appl. 87−47948
image restoration, adaptive minimum-error minimum correlation criterion 88−59278
image restoration as an identification and filtering problem 87−48083
image restoration filter evaluation for machine classification 85−25179
image segmentation: a comparative study 87−27369
image segmentation, fuzzy integral appl. 87−13163
image segmentation, image quantisation approach 87−7856
image segmentation algorithms 86−30027
image segmentation by semantic method 87−75881
image segmentation by syntactic method 87−39920
image segmentation using an optimum thresholding technique 87−62201
image segmentation with multiple components, multi-resolution feature reduction 88−73352
image segmentation/recognition, syntactic method, SAR radar appl. 85−36462
image sequence analysis for object tracking 87−75944
image sequence regularisation for 3D motion parameter robust estimation 86−69129
image space transforms for detecting straight edges inindustrial images 87−2592
image symmetric/radical structure detection 87−48185
image understanding, use of knowledge *(Korean)* 87−33757
image-plane processing of visual information 85−2874
image-space and accumulator-space linking, object-recognition approach 87−62320
images, texture descriptions development 85−13650
images similarity measurements in optical correlatorsystems 86−3946

pattern recognition continued
imaging tactile sensor with magnetostrictive transduction 85−47851
imperfectly supervised classification using fuzzyprototypes 86−10569
imprecise sequency processing problems *(German)* 87−39907
incoherent optical sampled Fourier transforms for pattern recognition and counting 85−36314
incoherent optical sampled Fourier transforms for pattern recognition and counting 85−63082
individual quality estimation and reliability forecasting using pattern recognition 88−56062
inductive inference of pattern recognition rules which are capable of a linguistic interpretation 88−63160
information additivity conditions 85−7851
information fusion problem and rule-basedhypotheses applied to complex aggregations of imageevents 87−2623
information integration from multiple views 88−28104
information theory in the Benelux, conf., Deventer, Netherlands (May 1987) 87−65094
infrared images, treatment *(French)* 88−46180
infrared radar range imagery, automatic object recognition using appearance models 88−28985
infrared tracking algorithm, simulation study 87−8352
integral transform invariances and Lie group theory, pattern recognition appl. 88−52534
integrated optical processors, appl. 86−3984
integrated semantic-parametric model matching for image anal. 87−48180
integrated sensor for discrimination of chem. species and functional groups by pattern recognition *(Japanese)* 88−53673
intermediate parameter relaxation scheme and appl. *(Chinese)* 88−27990
intra-frame differential pulse-code modulated picture coding 87−48199
invariant analogical image representation 85−7916
invariant feature extraction, construction of nonlinear absolute invariant feature spaces *(Japanese)* 87−39902
invariant feature extraction, under blurring transformation *(Japanese)* 87−39903
invariant image processing based on multipurpose low-level visual processing 85−30395
invariant linear feature extraction theory *(Japanese)* 87−33752
invariant planar shape recognition using dynamic alignment 88−59248
invariant recognition class for machine vision 87−47974
invariant relational structures in object recognition 87−7859
invariant representations use 85−57333
inverse texture problems, sampling schemes, use of Markov random field models 87−62167
IR and optical target recognition systems, signal/image processing techniques 87−55256
IR systems and components, conf., Los Angeles, CA, USA (Jan 1988) 88−49342
IR target recognition algorithm *(Chinese)* 88−73176
isolated word recognition, maximum likelihood classification, vector quantisation code book distortion features 85−41884
isolated word recognition, pattern compression 85−25061
iterative segmentation method based on contextual colour and shape criterion 85−30438
k-nearest neighbour branch and bound rule anal. 86−59338
kinematics of rigid object from sequence of noisy images, batch approach 87−2619
knowledge aggregation methods survey 87−48088
knowledge directed, syntactical description precompilation 86−64354
knowledge-based methodology in pattern recognition and understanding 88−41107
knowledge-based multi-spectral image classification for surface materials 85−30314
Kolmogorov complexity program for image recognition 88−28083
labeled point pattern matching by Delaunaytriangulation and maximal cliques 86−30007
labelled Voronoi diagram, digital realisation and closed boundary detection appl. 85−36400
labelling problem, confidence-based approach 88−28097
Landsat data classification, watershed algorithm approach 87−62182
Landsat-4 and Thematic Mapper data quality andinformation content analysis 85−64716
Landsat-4 multispectral scanner and thematic mapper data classification accuracy, expts. 87−50548
Laplacian-Gaussian edge detection, error probabilities 86−49035
Laplacian-of-Gaussian masks for fast image convolution 87−69280
large power systems, online transient stability analysis by pattern recognition techniques 85−64791
layered neural nets for pattern recognition 88−66328
layered track chambers, global pattern recognition method 87−29543
learned pattern recognition using synthetic-discriminant-functions 87−39939
learning structural descriptions of shape 86−10561
least desirable feature elimination 87−69309
lemniscate transform for shape coding and representation 87−62234
lensless intensity correlator, scale change and signal rotation *(Chinese)* 88−59199
line drawings of objects recognition, rule-based system 87−47975
line drawings understanding, planar surface and perspective projection props. 87−62207
line drawn three-dimensional objects, pattern classification 85−25193
line filtering method, appl. to stroke segmentation of handprinted Chinese characters 85−30417
line images, invariance and uncertainty *(French)* 87−13155
line pictures, curvedness measurement algorithm 87−69303
line segmentation by optimal clustering 85−30454
line-drawing interpretation, math. framework 88−73293
line-drawing interpretation, straight lines and conic sections 88−66628
linear brightness variation, correction using Hough transform 85−51729
linear discriminant anal. with stochastic supervisor 87−69310
linear discriminant functions, optimal 86−16532
linear discrimination with symmetrical models 86−30012
linear quadtree image representation, geometric props. computation algorithm 85−41959
linear separability, monotonicity under translation 85−51692
linear textures in line drawings, segmentation methods 87−48119
liquid crystal television for optical correlation 88−45227
liquid crystal TV as spatial modulator for optical data processing 87−12270
liver, US tissue differentiation by digital signal anal. and pattern recognition 88−10346

pattern recognition continued
LMFBR, filtered RMS, pattern recognition and array processing techniques for acoustic surveillance 88−72967
local edge direction calc., integrated directional derivative gradient operator 87−69282
local motion sensing and local flow anal. 87−19908
local objects of visual space, invariant representation *(Polish)* 86−29874
local structure of image discontinuities in one dimension 87−47905
localization of objects from range data 88−73376
logic circuit diagrams written in freehand, pattern recognition *(Japanese)* 86−27246
low-level vision representation 87−55271
LSI chip image processing/recognition, inference techniques 87−46090
luminescent screens, image perception, fluctuation theory 87−21154
machine vision, fuzzy reasoning for object classification *(Chinese)* 87−75955
machine vision sensors quality evaluation 88−53724
man-made objects, dynamic recognition using gray-level corners 87−19909
maneuvering target tracks detection 87−20590
manipulator 3D shape recognition using ultrasonic distance sensor 87−50603
Markov mesh and nonsymmetric half-plane Markov chain comparison 87−55273
matched filter image correlator appls. to IR, SAR and visual target data 86−16535
matched filters, conventional and composite, with error correction, for pattern recognition 88−8807
matching boundary-representations of stereo images *(Japanese)* 88−73235
matching images for dynamic recognition of moving objects 87−48190
matching of images, survey of techniques 87−19910
matching perspective views of a polyhedron using circuits 87−47908
matrix partitioning for optical computing 85−7934
matrix symmetries results appl. 87−7819
maximum a posteriori approach to object recognition with distributed sensors 88−66621
maximum likelihood discriminant anal. on multivariate data, Markovian model 86−3987
mean squared difference template matching systems, local accuracy *(Chinese)* 86−64320
medial-axis-based shape smoothing 85−30411
median-based edge detectors, struct. and performance 87−69356
medicine, measurement and sorting *(Japanese)* 88−42469
Mellin transform and its utilisation *(Slovak)* 86−57301
mesh-connected processor array, pattern matching in binary trees, VLSI implementation 86−21731
meteorological imagery textural features classification 87−4140
methodologies survey 87−39918
microchannel spatial light modulator having the functionsof image zooming, shifting, and rotating 86−68326
microscopic images, nonresolved cellular structures classification 88−59331
microwave image fidelity improvement through diversity techniques 85−62790
microwave radio relay equipment, knowledge-based systems for fault diagnosis 88−3840
mincut partition algorithm improvements 88−24912
minimum error thresholding 86−30008
minimum error thresholding and implementations 88−52546
minimum variance synthetic discriminant functions, constraint phase optimisation 88−34736
MIS devices for optical information processing 86−24429
mixture distributions using fuzzy c-means and EM algorithms, comparison 86−23172
mobile robot position-finding algorithm using ultrasonic sonar rangefinder data 87−49196
mobile robot vision, planes inferring by hypothesis prediction and testing 87−48238
mobile robot vision planes identification for world model construction 87−48074
mobile robots, adaptive navigation algorithm 88−3246
model-based recognition and localization from sparse range or tactile data 85−25149
model-based shape from contour and point patterns 86−10562
model-based silhouette recognition 88−28101
modelgraph, hierarchical decomposition/synthesis of relational descriptions 87−48220
models and primitives from point sets 85−46911
modified composite filter for pattern recognition, noise with nonzero mean, experimental results 87−75876
modulation classification based on statistical moments 87−39975
moire contouring technique, small-angle 88−52560
moment invariants evaluation 85−19518
moments method, aspect ratio normalisation for classification accuracy 88−52485
monocular image sequence, feature points trajectories location 87−39893
morphologic edge detection 88−14824
morphologic edge detection 87−48116
mosaic image with controllable correlation 88−59195
motion anal., two view, under small perturbation 86−16561
motion detection in out-of-register pictures 88−73365
motion detection in spatio-temporal space 88−28130
motion estimation, finding 3-D point correspondences 87−48100
motion image structure synthesis using reconstruction and reprojection technique 88−28128
motion information, integration along contours 87−55350
motion parameters, 3D, from contours using canonic differential 86−16558
motion parameters determination using intensity guided range sensing 86−49010
motion parameters recovery using optical flow 88−59272
motion patterns generated by moving shape, correspondence detection 86−23139
motion problem, decomposition-based soln. 86−10576
motion recovery from images sequence 88−59271
motion stereo using ego-motion complex logarithmicmapping 87−2620
motion-compensating field interpolation from interlaced and non-interlaced grids 87−33782
motion/structure estimation from line correspondences 88−73344
motions and pattern anal., numerical transforms 87−55322
motor vehicle re-identification for traffic management/control, pattern recognition system 85−36294

pattern recognition continued
moving edges detection in image sequences using maximum likelihood framework 88−28081
moving image sequences, local motion estimation with the dynamic pyramid 87−48233
moving object detection using line image sequence 85−36410
moving object location determ. in 3-D space, binocular model TV cameras use *(Chinese)* 85−2878
moving object recognition using motion enhanced Houghtransform 85−51811
moving objects recognition using feature signatures 86−23124
moving targets, image tracking system, target position estimation 85−30366
multi-spectral images adaptive classification using local uniformity *(Japanese)* 85−41980
multicategory information processing, a priori class probabilities estimation 86−48732
multicategory information systems, relationship between efficiency measures 87−75665
multichannel filtering methods for color imagesegmentation 86−4051
multiclass Fisher feature selection algorithms 88−14797
multiclass nonparametric partitioning algorithm 86−43337
multiclass pattern recognition using invariant Fourier-Mellin descriptors 86−59324
multiclass stochastic images buried in additive noise, classification using optimal correlation filter 87−39904
multidimensional data clustering, efficient algorithms 86−48961
multidimensional morphological edge detection 88−41082
multidimensional object state estimation based on weighted Mahalanobis distance 87−69313
multidimensional observations, determining hyperspherical classes 86−43335
MULTIEDIT algorithm sampling rate 86−43333
multifactorial fuzzy sets and degree of nearness 86−62024
multilayer perceptron understanding using pattern recognition approach 87−55274
multimachine power system transient security assessment by statistical pattern recognition 87−21887
multimode predictive coding algorithm with motion compensation 87−33774
multiple aperture lenslet arrays, optical image pre-processing 86−9642
multiple degree of freedom object recognition using optical relational graph decision nets 88−52503
multiple object motion estimation, edge relational structure matching approach 87−69378
multiple resolution imagery and texture analysis 87−39919
multiple target tracking using sensor arrays, algorithm using eigenstructure anal. 88−41725
multiple views estimation of outdoor terrain modelled by stochastic processes 87−62194
multiple views object detection, in presence of clutter 88−59228
multiple-alternative adaptive recognition with parameter estimation, Bayesian soln. 85−51733
multiply connected figures, contour characterisation 88−8835
multiprocessor architecture using dynamic programming 87−19465
multislice image texture edge detection by local vector mapping 88−66744
multispectral data clustering using sequential simplex optimisation technique 85−30455
multispectral high resolution image classification, hierarchical method 88−28058
multispectral image classification 86−23154
multispectral images, low-level segmentation via agglomerative clustering of uniform neighbourhoods 88−59250
multistage Bayes classifier decision rules 88−59166
multitarget tracking, probabilistic data association logic 87−8360
multitemporal-multispectral scanner data, hierarchical classification 86−18541
multithreshold element for pattern dichotomies, Takiyama's anal., comment 87−19855
multivariate data clustering/anal., mixed-mode, statistical knowledge synthesis 88−14769
multivariate data representation and analysis by facepattern using facial expression characteristics 86−30010
multivariate empirical Bayes classification with nonstationary priors, decision-directed learning strategy 88−3167
multivariate normality of data set, Friedman-Rafsky test 86−3937
multivariate tissue characterization in diagnostic ultrasound 87−42283
multiwavelength Fresnel holographic filter, colour-image correlation 88−59236
myocardial infarction detect. from QRS body surface pot. maps or standard ECG 85−53072
myocardial tissue characterization using pattern recognition procedures on backscattered ultrasonic signals 87−41961
narrowband signals, role of spectral decomposition 86−10521
natural resonance estimation using aircraft measurements 86−18480
natural scene image segmentation, split and merge algorithm 85−30403
natural scene segmentation via recursive region splitting and merging 87−75880
natural scenes, characteristics related to fractal dimension 88−3164
natural scenes, fuzzy functions and generalised cylinders 87−48176
natural texture structural anal. 86−43311
natural textures, nonhomogeneous, third order model 87−48122
nearest neighbour and Bayes methods of pattern classification, error rates 87−47903
nearest neighbour classification, bias of error estimates 87−39896
nearest neighbour extensions to time series analysis 86−49029
nearest neighbour method, training sets and a priori probabilities 88−73206
nearest-neighbor non-iterative error correcting optical associative memory processor 87−39938
nearest-neighbour and quadratic classifiers, bootstrap techniques for error estimation 88−3165
nearness estimations for objects with complex structure 87−19882
NEC automatic optical inspector for PWB *(Japanese)* 88−50485
neighbourhood structures, three basic formulae 88−14837
neocognitron, biocybernetic approach to visual pattern recognition 87−33758

range image understanding 86−4036
range imagery analysis, parallel fitting of quadric patches 88−41065
range imagery enhancement, mathematical morphology appl. 87−62236
range images, segmentation and classification 88−3163
range-finding algorithm using stereo intensity images 86−4019
rapid transform appl. 88−73335
real object, acquiring 3D spatial data 85−19501
real-time deformation invariant optical pattern recognition using coordinate transformations 87−47875
real-time image recognition by partially coherentlight 86−69106
real-time joint Fourier transform image correlation by partially coherent readout illum. 88−3141
real-time pattern recognition using modified liquid crystal TV in coherent optical correlator 86−37115
real-time polychromatic signal detection by matched spatial filtering 86−29999
real-time polychromatic signal detection using colour liquid crystal television 87−60986
real-time quadtree to raster conversion algorithm 86−37165
real-time region detection based on algorithmic decomposition 88−3249
recognition by parts 87−62373
recognition reliability in matched filter systems, improvements 88−46150
rectangular polyhedra image constraints, interpretation techniques 86−69128
rectangular window projection curves and Hough transformation relationship 88−3194
recursive scene matching using pyramids, fast correlation technique 86−23140
reduced resolution images, rapid recognition of object outlines 86−30006
region adjacency, object detection appl. 86−49009
region extraction method using a distancefunction between images *(Japanese)* 86−10493
region grouping from range image 88−73315
region growing, parallel and hierarchical algorithm 86−4055
region growing and edge detection integration for image segmentation 88−73310
region segmentation according to motion based criteria 88−28080
region symmetry analysis through Cantor number strings 87−48126
region-based image segmentation method 87−48092
regions and volumes, comparison of regular and irregular decomposition 87−69307
registration technique for partially covered image sequence 87−48215
regularized edge detection 88−66727
regularized solution to edge detection 88−59161
relational graph matching tasks, reduction to integer programming problems 88−3232
relative neighborhood graph for mixed feature variables 85−41975
relative neighborhood graphs in the L_1-metric 86−26734
relative neighbourhood graphs in 2-D Euclidean space, calcs. 86−52351
relaxation labeling process, simplex-like algorithm 87−48078
relaxation labelling in the correspondence problem 86−59342
relaxation matching techniques, comparison 86−10474
remote sensing, advanced interpretation techniques for Earth datainformation systems 85−59456
remote sensing, multidimensional-image classification *(Japanese)* 86−50725
remote sensing, results from SLAR mode of dual-mode radar with very low PRF 87−63904
remote sensing by radar imagery, detectability index for SAR image features 88−5150
remote sensing classification algorithms evaluation 87−4165
remote sensing pattern classification, linear structured covariance estimation appl. 86−43332
remotely sensed multispectral images, adaptive area division, classification errors reduction 85−57528
representation scheme for local rotational symmetries 87−2637
representation system, part models 87−2625
research problems *(Japanese)* 86−3871
Reseau mark detection by hill climbing, cognitive heuristic algorithm 86−23130
RF bearing evaluation using cluster anal. *(German)* 85−36145
rigid body motion estimation using straight line correspondences 87−48101
rigid body motion from depth and optical flow 88−73330
rigid object motion understanding 87−62210

pattern recognition continued
rigid object point correspondences location and motion determination from two weak perspective views 88−73331
rigid objects, pose detection, comparison of paradigms 88−46202
rigid smooth space curve, reconstruction from multiframes 87−48102
road-finding algorithms, intermediate level heuristics 87−27666
robot manipulator, tactile sensor, freedom descriptions for approximating shape from collected points 85−13622
robot vision, views planning for incremental construction of body models 87−48073
robotic hearing, binaural model 88−3105
robotics, pattern recognition systems appl. *(Polish)* 86−30016
robotics database, graphical organisation 88−3247
rooted acyclic digraph grammars and parsing algorithms 88−56155
rotated checker-pattern projection and its crossing-point extraction-and-tracking for 3-D object profilometry *(Japanese)* 88−59324
rotated images registration 87−69330
rotating machinery condition diagnosis system using acoustic emission techniques *(Japanese)* 88−23868
rotation and hidden parts in pictures, registration by dynamic programming method 87−48172
rotation and scale invariant recognition using optimum feature extraction 86−10534
rotation invariant composite filters 87−12288
rotation invariant image recognition based on circular harmonic coeffs. 86−3943
rotation invariant texture classification, model-based method 86−69130
rotation method for raster image using skewtransformation 87−2629
rotation- and scale-invariant object recognition using circular harmonic functions 87−48062
rotation-invariant 2D-filters matched to 1D-features 86−10571
rotation-invariant operators as filters in pattern recognition 87−48211
rotation-invariant pattern recognition 85−25171
rotation-invariant pattern recognition and some of its limitations 87−13120
rotation-invariant pattern recognition using optimum feature extraction 85−25143
rotationally invariant images, fragment identification algorithms *(Russian)* 85−30288
SAR classification, textural anal. appl. 85−63086
SAR images anal., thin line detection using Hough transform 87−62186
scale, rotation, and shift invariant image recognition 86−69102
scale change versus scale space representation 87−62369
scale space and edge detection using anisotropic diffusion 88−28092
scale-rotation invariant pattern recognition applied to image data compression 88−73211
scene anal./recognition, peripheral visual perception simulation approach 85−36420
scene descriptions reasoning 86−68954
scene matching using edge direction histograms 87−47962
script recognition using hidden Markov models 87−27644
sea clutter signals suppression by pattern identification method *(Japanese)* 88−74001
sea ice, Bayesian classification of surface-based ice-radar images 88−36673
second directional derivative zero-crossing detector usingthe cubic facet model 86−4062
segmentation, combined decision-theoretic and syntactic approach 88−3228
segmentation, multi-modal, using Markov random fields 88−8873
segmentation algorithm, hierarchical 87−48186
segmentation of pictures, robust method based on split-and-merge algorithm 86−64325
segmentation of textured images using Gibbs random fields 86−69115
segmentation processes for use with spoke filter 87−55276
segmentation techniques, comparative study 88−3226
segmented descriptions of 3-D surfaces 88−34750
seismic interpretation, multidimensional attribute anal. 86−18525
seismic Ricker wavelets classification, syntactic pattern recognition 86−23109
seismic stratigraphic traps identification, Bayes classification 86−18530
seismic waves, order samples nonparametric clustering method, earthquake prediction appl. 85−38332
seismogram feature extraction and description of stratified structure *(Chinese)* 86−12138
seismograms image processing, pattern detection and thinning processing, Hough technique 86−18528
self-adaptive edge detection scheme, appl. to picture coding 87−2652
semantic net models for patterns and pattern classes representation 85−46913
semantic-syntactic approach to pattern analysis andimage processing 85−57516
sequential, dynamic programming approach 86−54536
sequential Bayesian classification, stopping rules with thresholds *(Japanese)* 88−72966
sequential edge detection in correlated random fields 86−10553
sequential fuzzy ISODATA, dissimilarity criterion 87−19845
sequential technique for 3D object recognition 87−13110
sequential thinning of binary pictures using distance transformation 87−48098
shadow boundary segmentation, entry-exit method 88−3162
shallow water acoustic signal sources, automatic classification using pattern recognition 88−73281
shape anal. using orthogonal polynomials 88−46194
shape analysis of three dimensional objects usingrange information 86−4037
shape analysis using optimal filter based on fast piecewise-linear transform 88−46135
shape characterisation method 86−10485
shape classification, 2D, CARMA model method, eigensystem vs. LP norm 87−62252
shape correspondence detection using generalised Hough transform 87−48149
shape decomposition by mathematical morphology 87−62374
shape description using associative memory mappings 87−39937
shape discrimination using Fourier descriptors 86−54538
shape discrimination using shape vector 87−2594
shape distance between open curves, quantification methods 85−30451
shape estimation from shading using light source coordinate system 85−46886
shape estimation using calibration object, comparison with photometric stereo method 88−52559
shape from random planar features 88−46157

pattern recognition continued
shape from shading algorithms, method for enforcing integrability 87−62321
shape from texture using Wigner distribution 88−73343
shape information from rotated scans 86−23126
shape invariants from elliptic Fourier descriptors 87−75884
shape matching using curvature processes 88−66709
shape preprocessing unit 86−62776
shape recognition from single silhouettes 87−62354
shape recognition using simple measures of projections 88−66767
shape reconstruction on varying mesh 88−8878
shape representation method for discrete planar objects 87−48127
shape sequence correspondence detection using generalised Hough transform, expts. 87−75920
shape smoothing using medial axis properties 86−69133
shift, rotation, and size invariant recognition, number of templates for efficient recognition 88−59246
shifted binary patterns, discrete transform coeffs. *(Slovak)* 85−19504
ship targets, structural classifier using IR imagery 85−36406
ships classification and aimpoint maintenance 88−53379
signal detect. with data fusion, distributed cell-averaging const. false-alarm rate method 88−46116
skeletal maturity, fuzzy grammars for syntactic recognition from X-rays 87−21533
skeletons in derived grids, props. and algorithm 85−30410
skew symmetry figure, axes determ. 85−30409
smart sensors and dynamic stare 87−77279
SMD boards, real-time X-ray process control for solder joint integrity 88−12828
solid objects, cylindrical representation generation from surface representation 85−46914
sonar system for object identification in FMS 88−61715
space curves and 3-D objects, multi-scale description 88−73322
space-invariant and rotation-invariant, filter design *(Chinese)* 86−10327
sparse decompositions for exploratory pattern analysis 87−69277
spatial filters, modified, matched, optimality considerations 86−15545
spatial frequency filtering in an optical imaging system with anextended incoherent light source 86−69104
spatial minimum average correlation energy filters 88−3138
spatial randomness test based on k-NN distances 85−36325
spatial uncertainty estimation and representation 87−47918
spatial-sensitivity models, discrete anal. 88−52535
spatial-temporal correlation filter for in-plane distortion invariance 87−26135
spatiotemporal patterns, nearest matched filter classification 87−55249
speaker recognition and reln. to speech recognition 87−19418
speech recognition, computer vision techniques 86−4066
speech recognition, statistical modelling and dynamic programming 85−46733
speech recognition analysis 86−29780
speech recognition processor using fuzzy pattern matching 88−70843
speech signals, pattern recognition using Prolog *(Japanese)* 87−2462
speech signals, pitch detection, fast and accurate method using pattern recognition and time domain anal. 87−19454
spherical dual images, 3D representation method for solid objects 87−2624
spiral sampling technique for pattern recognition 88−41062
spline-based algorithms for shape from shading [for robot vision application] 88−52558
split and merge segmentation, use of compound predicates 86−4058
split-merge-merge segmentation capability 87−2636
stamped patterns in electronic parts, automatic defect detect. algorithms *(Japanese)* 88−70153
static-diagnosis models for fault pattern recognition, syndrome-decoding algorithms 87−69146
statistical approach to pattern recognition problems 87−48141
statistical pattern recognition decision rules 87−27598
statistical pattern recognition models, optimal linear feature selection 85−51726
statistically stable image recognition 88−59196
step signals with Gaussian noise, detection algorithm using cluster anal. 88−46299
stereo algorithms, wide baseline, approx. and refinement 88−73308
stereo correspondence, accurate, for 3D surface determ. 88−3270
stereo correspondence and surface reconstruction problems, concurrent solution 87−48202
stereo correspondence using dynamic programming technique 88−34815
stereo images for depth calculations using optical flow 87−2595
stereo matching by hierarchical, microcanonical annealing 88−3271
stereo matching of edge segments using prediction and verification hypotheses 86−4059
stereo matching using contextual line region primitives 87−48189
stereo matching using Viterbi algorithm 88−8879
stereo vision theory formalisation 88−48091
stereovision regions matching process 87−75928
stochastic dependence entropic measure appl. 87−19873
straight light detection in 2D images, Hough transform performance prediction 87−7829
straight line extraction algorithm 85−36394
straight line extraction in intensity images 86−69127
strain measurements, optical method using point recognition picture processing *(Japanese)* 86−11726
stripe pattern projection technique for surface props. determ. 87−48212
structural, sequential inference of Markov networks by dynamic programming 87−39927
structural analysis of regularly arranged texture images, Fourier transforms *(Japanese)* 85−22299
structural and statistical pattern recognition for signals with morphological structures 87−47852
structural description of texture structures using topology space of torus surface *(Japanese)* 85−22335
structural image anal. using distance transformation methods 87−55353
structural image analysis, methodological justification of hierarchical approach 87−48115
structural pattern recognition, instruction samples *(Russian)* 87−27625
structural shape matching method 87−48124
structural target anal. using hierarchical recognition process 85−30311
structure and motion from line correspondences 88−59273
structure and motion interpretation from correspondences of 4 lines in 3 images 87−48209
structure detection Glass patterns, simplified method 87−2596
pattern recognition continued
structure detection in random image fields with syntactic pattern matching appl. 86−43346
structure from motion, correspondence problem using true motion invariants 86−10577
structure-from-motion acceleration-based 88−73325
sugar-cane seedeyes detection, machine vision techniques 86−4056
supersonic wave systems appl. 87−50608
surface, 3D, description using curvature properties 88−46201
surface classification, hypothesis testing and parameter estimation 88−73317
surface curvature as measure of image texture 86−23128
surface information and object models in recognition 87−7860
surface map computation from stereo pair of images 87−48136
surface objects orientation determ., photometric approach, vision system appl. 87−48245
surface orientation from projective foreshortening of isotropic texture autocorrelation 88−73342
surface orientation from texture 87−39984
surface point triangulation with cameras and pattern projectors 88−52484
surface position and orientation calc. using photometric stereo method 88−73339
surface structure and three-dimensional motion fromimage flow kinematics 86−29989
surfaces, 3D, data acquisition and display 88−47681
surfaces, fractal dimension estimation, variation method 88−41079
symbol recognition algorithm based on image vectorisation techniques, counter reading appl. *(Spanish)* 88−59222
symbol strings, pattern representation 87−55267
symbolic description of edges using a geometric relaxation technique 88−46192
symbolic pixel array for representation of spatial knowledge 85−13647
symbolic scene matching, tree search approach 85−36421
symbolic signal representation using nonlinear filtering 88−66707
symbolic substitution, higher-ordered rules 88−41051
symbolic substitution logic, optical implementation using polarisation for coding 87−7798
symbolic substitution logic for digital optical computing 87−7797
symmetry feature extraction approach 85−36436
syntactic and statistical unification approach 86−54539
syntactic pattern recognition, algorithm for tree acceptor synthesis *(Polish)* 86−30015
synthetic discriminant function filters, computer-generated and phase-only 87−12285
synthetic discriminant function for image correlator 88−41055
synthetic discriminant functions determ., hyperplane projection method 87−62195
synthetic discrimination function, optical implementation 86−15813
synthetic range image generation for cylinder detection and meas. 87−13127
synthetic seismic training data generation, statistical modelling, feature selection 86−18529
system identification from unsupervised samples 88−3257
systematic designs of buffers in macropipelines of systolic arrays 88−32142
systems and components, conference, Los Angeles, CA, USA (Jan. 1987) 88−18306
systolic array for linear discriminant function classifier 86−20420
systolic arrays, design methodology 87−55132
systolic matrix and vector multiplication methods for signal processing 85−961
tactile object recognition, feature-based, technique 88−14767
tactile similar objects recognition 88−46220
tandem component filter for pattern recognition, performance eval. 88−40044
target detection, clutter effect, quantitative expt. 85−46752
target detection and recognition, role of colour television 86−11332
target recognition algorithms 86−49725
target recognition and tracing from visible or thermal imagery, optical processing system 85−51745
telephony, dual-tone multifrequency receiver, polynomial classifier *(German)* 86−55050
template generation, Fourier transform magnitudes 87−33737
template matching and image sensor noise anal. 88−28119
template matching in rotated images 85−51691
temporal edge-based image segmentor 87−69304
tensor differential scale space systems 87−69373
terrain and obstacle avoidance for tactical aircraft, sensor blending algorithms 85−7946
tessellation graph characterization using rosettas 86−57341
test set minimisation problem 86−7662
text retrieval by character matching circuit 87−607
text-independent speaker identification under variableconditions 86−3831
textons and texture boundaries detection in natural images 87−62334
texture, contour, shape, and motion concepts 87−55269
texture, representation and 3D interpretation 87−62349
texture anal., basic concepts 88−14840
texture anal., cooccurrence matrices and subspace methods appl. 87−48121
texture anal., digitised figure set adjacency graphs 85−36454
texture anal., local linear transforms 85−36451
texture anal. by self-organization method 85−36453
texture analysis 85−41946
texture analysis, hybrid technique and appl. to defect detection and classification 88−46310
texture analysis, min-max techniques appl. 86−23127
texture analysis, spatial filtering approach 85−51730
texture analysis algorithm inspired by preattentive vision theory 86−3934
texture analysis based on local standard deviation ofintensity 87−2639
texture analysis of diagnostic X-ray images by use of fractals 87−50284
texture and intensity edge detection with random field models 88−28094
texture classification, sum and difference histograms 86−43314
texture classification using Gaussian Markov random fields 86−10472
texture classification using Hough transform 87−39935
texture description, visual perception approach 86−30062
texture discriminants from spatial frequency channels 87−33817
texture discrimination based on an optimal utilization of texture features 88−59241
texture discrimination by 2-D AR model *(Japanese)* 88−16502
texture discrimination by projective invariants 87−55277
texture feature extraction from cooccurrence matrix 88−8837
texture field, nonstationarities tracking 88−34793

pattern recognition continued
texture images with structural characteristics, anal. *(Korean)* 88−46176
texture imperfections, concept 87−62184
texture measurement by pattern recognition using interactive optical vision systems 88−36082
texture perception, convolution operators as basis for objective correlates 88−41037
texture recognition using final-prediction-error criterion 87−62250
texture representation by adaptive vector quantization 87−55355
texture segmentation, adaptive computational model appl. 88−41035
texture segmentation, stochastic model based technique 85−36450
texture segmentation using Gabor modulation/demodulation 88−8836
texture segmentation using linear prediction model *(Japanese)* 86−10498
texture synthesis, multispectral, using fractal concepts 88−3173
textured and noisy images, modelling and segmentation using Gibbs random fields 87−39892
textured image recognition using hidden Markov model 88−66742
textured image segmentation, unsupervised, Markov random field approach 88−66687
textured images, fast technique for automatic segmentation and classification 88−66743
textured images classification and segmentation, using 2D stochastic models 88−46218
textured surface classification based on reflection data 87−13129
Thematic Mapper classification accuracy, spatial, spectral and radiometric factors 85−64717
thermal pattern recognition by correlation microwave thermography, biomedical appls. 85−15311
thermal sensor for object shape and material constitution, robot appls. 88−35953
thinned binary image, line shape recognition 85−36397
thinned binary scenes, segmentation with good connectivity algorithms 85−30404
thinning algorithm, pattern adaptive 88−14791
thinning algorithm for binary images 87−48194
three dimensional contours' invariants 88−73320
three dimensional digital pictures, properties recognition 86−23123
three dimensional object recognition, iterative Hough procedure 85−13621
three dimensional objects recognition using intensity guided range sensing recognition 86−23116
three-dimensional information extraction using cone-shaped light beams, image processing *(Japanese)* 86−16544
three-dimensional object recognition using general moment-invariants/attributed-graph method 86−43302
three-dimensional shape description using symmetric axis transform 85−41958
three-dimensional symbolic descriptions matching for multiple views of scene 86−4047
threshold selection using clustering criteria 86−16512
threshold selection using moment preserving principle 85−41949
thresholding and image enhancement by optimisation of fuzzy compactness 88−34768
time-frequency anal. using Wigner-Ville distrib. SVD 88−41056
time-varying corners detect. 85−30364
top-down recursive partitioning algorithm fornonparametric classification 86−4032
traffic data acquisition system for motorways, object recognition and modelling *(German)* 85−63032
traffic data acquisition system for road network, concept and realisation *(German)* 87−51532
training sequence in pattern recognition, simplifications limiting method 88−3142
translated and rotated images, registration using finite Fourier transforms 88−3172
tree classifier, large, with heuristic search and global training 87−39895
trinocular vision using edge continuity and local features *(Japanese)* 88−14819
tumour edges detection method, in X-radiographics *(Chinese)* 85−4263
tunable facet model likelihood generators for boundary pixel detection 88−28095
two dimensional objects recognition using hypothesis integration technique 88−28103
two-bit correlation 86−3956
two-class discrimination problems 86−69138
two-dimensional objects recognition 88−34818
two-dimensional recognition range model 88−53378
two-dimensional shape dilation, synthetic approach 85−30379
two-dimensional spatial patterns analysis using probabilities, IC manufacture appl. 86−28393
two-dimensional system synthesis dedicated to pattern recognition, theoretical and practical results *(Rumanian)* 85−2882
two-layer memory network pattern classifiers, config. selection 86−3967
two-level cartoon extraction from moving gray-level images, visual communication appl. 85−51739
two-level classifier for use in moment-based optical/digital processor, image segmentation and real image tests 85−7936
two-stage Bayes decision-tree classifier 87−48072
two-stage template matching, first stage 86−23122
underdetermined data cluster preservation, fast dimension reduction 87−55282
underwater transient noise patterns, recognition techniques 85−36295
underwater transient signals, automatic recognition, review 86−16416
unified approach, part geometry anal. 85−2887
unified description and recognition of continuous contours and regions 87−48218
uniform region extraction with noise point effect minimisation 87−13140
unique object identification in high resolution aerial images 85−57494
unitary transformation invariant pattern detection performance 87−69245
unsupervised Bayesian model-learning with application to textured and polynomial image segmentation 87−62382
unsupervised classification algorithm with Euclidean distance for remote sensing 86−18539
upsilon invariants: a uniform set of moment invariants 85−30313
US kidney images recognition by 2D dynamic programming method 87−15116
US materials testing, pattern recognition 85−482
Vander Lugt correlator, appl. to industrial inspection 87−47010
variable region vector quantization, extended algorithms, speech and image processing appls. *(Japanese)* 88−34711
pattern recognition continued
variable resolution representation of three-dimensional objects, hierarchical boundary model appl. 87−48084
vector and syntactic approaches 86−23099
vector and syntactic approaches, unification 85−30442
vector quantisation, fast search algorithms 87−47538
vector statistical patterns, local analysis 88−73178
vectorcardiogram data, covariance estimation appl. 86−11993
vectorcardiograms, shape anal. technique 87−50366
vectorcardiograms classification using Walsh and cosine orthogonal transforms 85−43397
vertex space anal., model-based object recognition appl. 88−73375
VHV grid planning model, cluster anal. of results from French HV grid *(French)* 88−23410
vibroacoustic diagnostics based on pattern recognition, multivariate correl. and regression anal. appl. *(German)* 87−77470
visible-surface representations computation 88−66622
vision, spatial frequency charact. corresponding to appearance of figures with different polarities *(Japanese)* 85−41963
vision camera location determ. from 2D/3D line and point correspondences 88−73298
visual communications and image processing, conf., Cambridge, MA, USA (Sept. 86) 87−43753
visual detection of differential movement, robotics appls. 88−34788
visual maps building by noisy stereo measurements combination 86−59375
visual motion detection and measurement 87−55270
visual undersampling in raster sampled images 86−16513
VLSI architecture for dynamic time-warp recognition ofhandwritten symbols 86−64253
VLSI implementations and parallel algorithms for new approach 86−57813
voiced/unvoiced silence classification of spoken words 85−62996
volume/surface octree, generation from range data 88−73316
volume/surface octrees computation from contours and silhouettes of multiple views 87−2626
Voronoi tessellation for image representation 88−73319
water and waste water treatment, image recognition techniques *(Japanese)* 88−43518
waveform matching using multiresolution dynamic programming 85−7923
waveform recognition using signal processor and learning system 87−47851
weather forecasting appl. of pattern recognition and extrapolation techniques 86−10468
wedge filter technique for convex boundary estimation 85−51689
weight coeff. optimisation with representative sets *(Russian)* 87−75902
weld penetration recognition, macro model controlled method and sampling pitch estimation *(Japanese)* 87−5558
white light optical signal processing with programmable magnetooptical device 86−15529
Wigner distribution function based detect. methods, performance 85−25176
Wigner distribution function optical prod., Radon transform. appl. 85−25177
Wigner distribution in image representation analysis 87−48195
wire frame objects matching from two dimensional perspective projections 85−13620
wood block shape identification for automatic centring in peeling machine 88−36084
wooden boards image segmentation using Hough transform method 87−48091
workpiece visual recognition in grey-level images 87−48244
Au wire thermocompression bonding *(Japanese)* 86−13834
C fibre reinforced epoxy matrix laminates, AE signal, pattern recognition analysis, autoregressive modelling 87−73187
SAW device, coating responses, rel. to solubility and chem. struct., pattern recognition 87−25743
a-Si:H devices, electron irrad. using SEM EBIC mode, charge collection memory effect 86−58273
ZnS, ZnSe interference filters, simultaneous optical bistable switching on adjacent pixels, pattern recognition 87−33311
ZnS interference filters as nonlinear decision-making elements for three-spot pattern recognition and associative memories 88−51629

data communication network simulation, terminals response time evaluation 86−4348
data communication protocols, performance evaluation 86−37201
Data Glove, computer controller device for quantification of hand function 88−54484
data network performance prediction by distributed discrete-event simulation 86−43372
data network performance prediction by distributed discrete-event simulation 86−30103
data network simulation based on aggregate approach 87−28028
data network status reports for management and planning 85−44453
data networks, verification/validation of performance simulation using ANSI X3.102 measurements 88−3626
data teletransmission security management, relative channel capacity *(Slovak)* 87−61542
data transmission, simulation software for performance evaluation 85−25297
Databridge, hub node evaluation in star network 86−31058
Datagram networks, packet impatience 86−17012
DECnet applications and protocol performance, case study 88−59671
DECNET internet protocols efficiency 88−52959
design tradeoffs in microprocessor system, automated evaluation 85−33973
digital communication systems using single parity-check code, performance eval. 88−53035
digital filter processor design for spaceborne scatterometers 86−6084
digital networks, analytic modelling, terminal-to-computer communications example 85−19579
digital telephone exchanges, adaptive load allocation models 87−13189
diode laser optical communications link 87−68525
directory scheme for resources in computer network 88−52973
Dirichlet rotated polar quantisers, asymptotic performance 86−3769
discrete cosine transform, use in image data compression 86−16521
discrete time $G^{[X]}/D/1$-S queueing system analysis, appl. in packet switching 88−52649
discrete-time analysis for the interdeparture distribution of GI/G/1 queues 87−40453
distributed computing and communications, book 87−16265
distributed databases, mutual consistency management, comparative network strategies 87−48671
distributed file system resource access modelling using queueing networks 86−62010
distributed loop computer networks, performance evolution using SLAM 87−62699
distributed operating system, Dragon Slayer, real-time performance 87−34198
distributed processing, adaptive load-sharing strategies 86−43366
distributed real-time nuclear reactor safety system, design 86−39405
distributed routing algorithms, performance 85−19880
distributed routing strategies free of ping-pong type looping, perform. anal. 87−34122
distributed systems performance modelling through simulation 88−9175
distributed systems workloads characterisation 88−59670
double-loop computer network, simulated performance 88−52953
DS-CDMA asynchronous system for VSAT satellite networks 88−53238
DS-CDMA spread spectrum, performance analysis 87−56103
dual-channel LAN, performance analysis 88−3592
dynamic RAM, fault tolerant, on-chip error control coding, cost anal. 87−66196
ECG, computer measurement programs, precision evaluation method 88−68412
elbow prosthesis dynamic behaviour in manual tasks 88−54641
electronic mail, large system design 88−66920
emulation based testing of bus structured boards, second-generation performance tester 86−24291
equivalent network, load dependent servers, and perturbation analysis: an experimental study 87−31388
error control in high speed computer networks, performance comparison of end-to-end and link-by-link schemes 88−52937
ESS, common memory access contention anal. with nonpreemptive priority discipline 87−2999
Ethernet, performance monitoring 88−52906
Ethernet and MAP networks, simulated performance 88−15146
Ethernet controller chip, Intel 82586, user programmable operational parameters 86−69433
Ethernet MAC-level protocol, bounded packet delay time, performance 88−3622
Ethernet performance 85−42300
Ethernet performance characts., expt. study 86−10789
Ethernet performance simulation, single-server single-queue model 88−15167
Ethernet protocol models using DISS language 85−19870
Ethernet with segmented carrier, protocols 88−67051
Ethernet-based image transmission protocol, performance study 88−15168
Ethernet-like computer communications protocols 86−59679
execution time meas. for elementary computer operations on PEARL systems *(German)* 88−74602
exponential networks with limited queues and lockouts, multiplicative form of soln. 85−25195
Expressnet, performance with voice/data traffic 88−59667
Expressnet protocol, performance analysis using Markov model 88−15140
fault simulation, concurrent hierarchical, performance model, 400 gate multiplier example 87−37228
fault tolerant token-bus LAN for MAP network architecture 87−28187
FDDI, fibre distributed data interface, performance analysis 87−49125

performance evaluation continued
fiber optic LAN based on FDDI standard, reliability and performance 88−3620
fibre optics LAN architectures, timed Petri net performance model 88−3634
file server for bulk file transfer, analytic model 86−23486
file transfer in LAN, performance study, connection oriented protocols 86−4342
finite capacity communication and queueing systems perform. 88−59459
flexible networks of tightly and loosely coupled processors 87−40456
flight simulation, real time, computer performance optimizing 86−50694
floorplanning by annealing on a hypercube multiprocessor 88−24901
flow control in integrated voice and data local areanetworks 86−69440
flow control in local-area networks of interconnected token rings, book contrib. 87−20254
FMOSSIM, concurrent switch-level fault simulator 86−21895
FMS computer network performance modeling 88−9111
formal description oriented performance evaluation of protocols 88−8903
frame caching in menu-driven videotex systems 87−34090
FTAM protocols in Unix environment, implementation 88−67048
functional and performance analysis using extended time Petri nets 88−304
functional concept for the analysis of queueing networks and optimisation of performance 88−49629
$G/M/1/\infty$ discrete queueing system, optimal priority assignment with constraints 87−44113
GaAs-based microprocessor architecture for real-time applications 87−59537
General Motors MAP using IEEE 802.4 token bus, performance bound 88−35097
GI/D/1 priority queue 86−40615
give-up-based protocol for token passing 87−39999
go-back-N ARQ with limited receiving buffer, performance analysis 88−45826
H-network, performance evaluation through simulation 86−43599
heterogeneous distributed system, file server performance model 87−20215
heterogeneous local network, token passing ADMA system 87−34180
hierarchical ring networks, performance anal. 88−14873
high speed RAM, solid-state device considerations 86−52844
high-speed modems, buyer's guide 88−53075
HSLAN slotted ring protocol, performance modelling 88−59374
hybrid simulation/analytic approach 88−21382
HYPERchannel LAN using multichannel architecture, analytic performance model 86−10602
Hyperchannel/50 simulation model 88−21731
IEEE 802.4, simulation and performance evaluation 88−3631
IEEE 802.4 token bus emulator 86−23531
importance sampling in analysis of detection systems 88−34723
IMS T800 transputer, performance eval. and Whetstone benchmark program *(German)* 88−6893
industrial programmable electronic systems, assessment architecture, performance and safety 86−57178
inference and transient response for M/G/1 models 87−31387
information systems, state identification *(Polish)* 86−49042
information systems, state identification *(Polish)* 86−49044
information/computer systems, storage problems involving finite capacity and loading protocols 85−57571
insensitivity in two-node blocking models with applications 87−40053
Instanet, real-time LAN for sensor fusion appl., performance 88−67056
integrated performance models for distributedprocessing in computer communication networks 86−23471
Integrated Services Digital Networks−basic performance modelling and traffic engineering 88−41433
integrated voice/data CSMA/CD network performance 86−10648
integrated voice/data services on burst-switched networks 88−66803
integrated voice/data services TDM system, performance trade-offs 88−41424
Intel 80386 microprocessors 86−27321
interconnected high-speed local networks, gateway congestion anal. 88−73590
international standard transport protocol simulation 86−54941
Internet link, 56 Kbit, performance obs. 87−76319
IP Locus and protocols for a transparent, internet, distributed operating system 88−52970
ISDN, cut-through switching 88−53039
ISDN local network on D-channel 88−28508
ISDN moveable boundary multiplexing 87−40229
ISDNs, voice and data integration 88−67110
ISO class 4 transport, performance improvements 86−54942
ISO transport protocol class 4, performance study 88−15134
Jacksonian network, performance modelling and optimal flow control 85−36467
knockout packet switch: principles and performance 88−15161
LA565LWL 565 Mbit/s long haul fibre-optic transmission system, installation and performance 88−53304
LAN, availability drives computer network architectures, simulation expts. based on several protocols 88−3612
LAN, delay analysis of a window tree conflict resolutions algorithm 88−59669
LAN, fault tolerance evaluation 86−17026
LAN, flow control techniques 87−55820
LAN, Hybrinet, hybrid CSMA/CD and token ring network 85−46991
LAN, multiple-ring token-passing networks, performance *(Japanese)* 87−62673
LAN, packet transfer delays 86−10773
LAN, performability modelling tools 86−23527
LAN, simulation model, decomposition of large interconnected LAN 88−3618
LAN, technology and performance 86−10772
LAN, testbed design for contention networks 86−43567
LAN, token ring high-speed networks, file transfer, perform. eval. by approximate anal. and simulation 88−73587
LAN, transport layer performance tools and measurement 87−69659
LAN, WAN, end to end delays in a catenet environment 88−41340
LAN equipment performance evaluation 87−76370
LAN evaluation criteria and performance benchmark 88−52897
LAN of personal computers and minicomputers 85−57807
LAN performance eval. and testing 88−9161
LAN performance eval. architecture 88−15169
LAN performance evaluation using computer modelling, Ethernet and HYPERbus 86−49331
LAN performance meas. using a software monitor *(German)* 87−62643

performance evaluation continued
LAN performance metrics and meas. for terminal communications 87−20268
LAN protocols, connection-oriented versus connectionless, performance study 86−30091
LAN selection criteria issues 88−52828
LAN simulation for performance prediction andevaluation 86−64711
LAN simulation tool, Ethernet Measurement System 87−8064
LAN station capacity with deterministic access 85−25196
LAN token ring/bus protocols simulation 88−52983
LANCET: local area network comprehensive evaluation tool 88−52972
LANs, analytic round-trip delay evaluation for Ethernet and Cambridge Ring 88−21591
LANs, Apple Talk, STARLAN, and Ethernet, performance evaluation 86−30390
LANs, comparative evaluation of CSMA/CD and token-passing rings *(French)* 85−47214
LANs, distributed algorithm for performance improvement through replication and migration 87−34188
LANs, hybrid CSMA/CD-token bus protocol 88−21701
LANs, isolated and interconnected token-bus types, performance evaluation 85−13914
LANs, logical connection anal. 87−33857
LANs, multiple token-ring performance anal. 88−8921
LANs, online multilevel-multilayer control, hierarchical adaptive algorithms 88−21657
LANs, user-oriented design *(Czech)* 86−4296
LANs of interconnected token rings 88−41287
LCR: a linear conflict resolution algorithm for local/metropolitan area networks 88−52974
link-level protocols, throughput analysis 88−45825
livelocks in slotted ring networks 88−52920
load balancing is distributed system, approximate performance model 88−52946
load index for dynamic load balancing 87−34161
loadsharing among independently owned processors 88−67044
local area network protocol performance evaluation using simulation 86−4349
local multiaccess networks, resource scheduling 86−30090
local networks, conf., Minneapolis, MN, USA (Oct. 1984) 85−44397
logarithmic no. system processor, 20 bit design 88−32247
logic simulation, parallel 87−65980
logic synthesis and optimization benchmarks 87−5598
LYNX distributed programming language, message-passing system, performance study 88−15141
M/G/1 queue with class dependent balking (reneging) 87−34047
MAGNET's testbed environment, optical fibre based integrated LAN 86−55313
magneto-optic recording 86−2877
magnetooptic device reliability 86−2878
Main-Kraftwerke AG power systems, W. Germany, hardware description and perform. *(German)* 88−54892
MAP, performance measurement of data transfer services 88−66993
MAP and PROWAY critique 88−15145
MAP network adapter, performance anal. 88−66994
MAP networks performance evaluation 86−49321
Markovian access to collision channels 88−21047
Markovian functionals in teletraffic analysis 87−40228
Maxemchuk's integrated voice/data LAN protocol, throughput anal. 88−35241
MC68020, instruction cache and 32-bit data bus increase its speed 85−28559
mean message waiting times in symmetric multi-queue systemswith cyclic service 86−23198
mean value anal. of closed CP-terminal system 86−26715
mean waiting times in nonpreemptive priority M/G/1 queues with server switchover times 87−40454
measurement, modelling and evaluation, conf. Erlangen, West Germany (Sept. 1987) 88−37847
media access protocols for integrated LAN, performance evaluation on MAGNET network testbed 86−69436
medicine, control systems for upper-extremity prostheses, quantitative functional assessment by simulation 88−54643
mesh networks, sharp models of adaptive routing 87−34177
message-switched network with local and global window flow control, perform. anal. 88−52932
Metropolitan Area Network performance analysis 86−69434
metropolitan-area networks, design and anal. of two-centre tree net 87−34181
microprocessor real-time emulation 88−38560
microprocessor selection for optimum response time *(Russian)* 87−44898
microprocessor-based VLSI boards, emulation techniques and performance testing 86−1129
microprocessors performance evaluation, with Intel architecture 88−12441
MIPS 32-bit processor architecture, measurement and evaluation 88−71812
mixed-vendor Ethernet, performance measurement 87−76328
mobile automatic telephone systems, radio signalling design and discrete channel modeling 85−63567
mobile telephone system access channel, throughput-delay characts. and stability 85−14142
modelling, conf., Paris, France (May 1984) 86−26499
modem performance testing laboratory 87−28264
modulo-3 residue checker, performance and cost, when providing concurrent self test for pipelined serial multiplier 88−44262
movable-slot TDM protocol, simulation studies 88−3632
moving mesh control, performance analysis 85−44665
MSAP/CSMA-CD: A hybrid protocol for a local areanetwork 86−49315
MSK computer network node, performance evaluation using Sitwa 86−30418
MSK network, node traffic intensity 86−64737
multi-access packet broadcast channels with acknowledgement feedback, distributed control, stability 85−57572
multi-buffered packet switching interconnection networks in multiprocessors 88−73417
multi-destination flow banyan networks−modelling and performance analysis 87−33869
multi-station packet-radio network 88−41139
MULTIBUS algorithm 88−41136
multichain queueing network for window flow control, performance anal. 88−21410

performance evaluation continued
multichain queueing networks with state-dependent service rates, approx. soln. 85−33270
multiclass preemptive priority queues, approx. numerical soln. 86−7603
multiclass queueing networks with population constrainedsubnetworks 86−7602
multiclass queueing networks with state-dependent routing 87−76359
multimedia information network, high-speed packet-switching architecture 87−34187
multimicroprocessor system communication structure static mode characts., comparative anal. *(Bulgarian)* 88−21658
multiple access protocols, performance analysis, book 87−2929
multiple bus LANs, performance models via Markov process 87−27734
multiple bus networks, communication interface design, analytical model 85−47258
multiple chain queueing networks, numerical soln. 85−33275
multiple computer disk system reliability, fault tolerance and improved performance 87−58734
multiple-bus communication systems, performance anal. 85−36465
multiple-class queueing networks, bound hierarchies 86−52337
multiple-ring LANs, performance anal. 87−34183
multiplexers, all-packet integrated voice/data types 88−21858
multiprocess protocols, performance modeling 88−52654
multiprocessor computer systems in case of collisions in block-structured common memory 87−27673
multiprocessor switching system simulation using model aggregation 85−36846
multiprocessor-based packet switch in networks with link-level sliding-window flow control 88−3293
multiprocessor-based packet switches, modelling and perform. eval. 88−59376
multiserver queues with locking 87−36574
multistage cube type interconnection networks, performance comparison 88−59723
multistage nonrectangular interconnection networks 86−59402
mutual exclusion distributed protocols, performance evaluation via Markovian modelling 87−28221
mutually synchronized fault tolerant clock systems, design and performance evaluation 87−831
MVS systems and SNA network performance 87−34162
nearly completely decomposable Markov chains 87−36587
NETBIOS and APPC/PC functional and performance comparison 88−52965
network and protocol modeling tools 85−47262
network architectures, impact on performance 85−25503
network development life-cycle, integration of executable models 87−34184
network efficiency index 85−30685
network management products, system usability process 87−2874
network management software usability test design andimplementation 87−2875
network performance evaluation and modelling software *(French)* 88−49973
network traffic measurements 85−13653
networks, fault tolerant packet switching, performance 87−20255
noise-margin analysis, used with K105-D logic analyser to reveal circuit problems 85−8757
NOM, software tool for optimal design and perform. eval. of routing strategies 88−59390
nonlinear optimization methods, performance evaluation via pairwise comparison and fuzzy numbers 86−13664
nonpreemptive reservation priority discipline, queueing anal. 86−64669
ODEs, integration by transformation 88−43841
offset quadrature PSK, symbol rate detectability by delay-and-multiply receiver 88−52332
OMNINET LAN, efficiency and time-response characts. anal. 88−21679
one moment model for telephone networks withdependence on link blocking probabilities 86−30271
operational formulae, sensitivity 88−41124
optical hypergraph, resource sharing, open loop locking 88−3628
optical symbolic substitution architectures, performance analysis 88−51627
optical videodisk system for visual performance testing with stereoscopic TV displays 87−34821
optimal multiplexing of heterogeneous traffic with hardconstraint 86−64381
optimistic concurrency control protocols, modeling effects of data and resource contention on performance 88−34879
Orwell basic access mechanism, performance modelling 88−66955
ORWELL ring protocol study 87−40455
OSI transport performance over ACCUNET and IBERPAC, concatenated X.25 networks 88−52936
p_i-persistent protocol for unidirectional broadcast bus networks 88−289
PAC system concept, network simulation studies 87−14961
packet access protocols for mobile data communication systems, performance *(Japanese)* 85−25778
packet broadcast network with priority-free capture schemes 86−64404
packet buffering and protocol performance 86−69243
packet network simulation, edge to edge protocol performance 88−3621
packet radio networks, canonical approx. of performance anal., book contrib. 87−19994
packet resequencing in reliable transmission over parallel channels 88−3299
packet routing strategies for different traffic conditions, comparison 87−55816
packet switched networks, performance parameters 86−49067
packet switched networks, selective load redistribution 88−52656
packet switched systems, random access, with intelligent central node, performance comparison 87−48305
packet switches with sliding window flow control, performance anal. 85−63142
packet switching, virtual cct. protocol with local control, performance anal. 87−13184
packet switching, virtual cut-through technique for multipacket messages, delay anal. 85−19557
packet switching computer communication network, iterative method 85−30507
packet switching interconnection networks for multiprocessor systems 88−66800
packet switching networks, node efficiency evaluation *(German)* 86−30367
packet switching networks, perform. anal. and design 88−46358
packet switching node characts. estimation for two flow control algorithms 88−28146

performance evaluation continued
packet switching throughput increase method, anal. and implementation 88−28143
packet-switched computer communication network, channel queue limit flow control method 86−30112
packet-switched computer communication network hop level flow control 88−14864
PACS image storage component, traffic load 88−36569
PACS system, signal detection theory applics. in medical imaging 87−14964
PACS system, simulation in hospital environment 87−14962
parallel 3D Poisson solver on a hypercube multiprocessor 88−26448
parallel discrete event simulation: a shared memory approach 88−56099
parallel logic simulation, circuit partitioning 88−19093
parallel logic simulation fundamentals 87−5828
parallel processing of tree-like computations 85−25551
partitioning PDE computations, methods and perform. eval. 87−65441
PC board visual inspection algorithm 85−34337
Petri-nets, inhibitor D-timed, performance analysis of communication protocols 87−7887
Playthrough rings, perform. model for concurrent message transfer 88−52919
PM 8853/00 performance analysis board for Philips logic analyser PM 3551 A *(German)* 85−64064
PMX: a hardware solution to the VLSI modelavailability problem 86−46737
polled and packet-switched performance comparison using ANSI standard techniques 86−54625
polling analysis of multipoint network performance 85−47259
power line disturbances, effect on computer and power-line conditioner perform. 88−24071
priority acknowledgement schemes for 1-persistent CSMA-CD systems 88−3300
priority protocol for PC based LANs supporting large file transfers 88−3624
priority queueing network anal. 87−31386
processor-to-processor communications system with high speed optical token ring *(Japanese)* 86−64683
product form queueing networks, derivatives and moments of queue lengths 88−73397
product-form type queueing networks with blocking and deadlock, approximate analysis 88−41137
production customer information control system network, end-user response time 86−54940
protocol architecture, run-time specification 87−28224
protocol performance analysis using image protocols 88−73404
protocol performance prediction from FAPL based meta-implementation 86−69241
protocol performance specification using timed Petri nets 86−23472
protocol services, performance specification 86−10837
protocol simulation technique for formal specifications based on SDL 86−69240
protocol verification, analytic method 86−23176
protocols, extended timed Petri net models 88−28162
protocols, multi-layered, performance evaluation 87−48721
protocols, performance evaluation from timed Petri net models 85−7950
protocols performance anal. using image protocols 88−21523
public packet switching networks, performance testing 87−28055
query scheduling is common channel signalling network 88−52657
queueing loop of two general servers, matrix-algebraic soln. 86−52338
queueing network model anal. with population size constraints and delayed blocked customer 85−13672
queueing network models to analyze computer communication network, performance 85−8150
queueing networks, time delay distribution, pair-wise analysis of servers 86−26699
queueing systems, approx. method 85−36466
radar systems with hardware implementation and software packages, performance anal. 86−37933
radio network performance, layer protocols 87−48708
random access systems with intelligent central node, performance anal. 88−9391
random-access communication system, nonhomogeneous user population 88−40772
real-time message scheduling algorithms, eval. tools 87−55794
real-time signal processing with cornerturning transfers, processing bounds and fast allocation 86−43280
reconfigurable fault-tolerant parallel computer−wafer scale implementation approach 87−52662
redundant and distributed detection system performance 88−73135
regenerative stochastic Petri nets 87−10275
Regulus minicomputer architecture, optimum perform. 88−26466
relaxation times for queueing systems 87−5319
rendezvous type protocols without acknowledged packets 88−52952
request response protocol in V distributed OS on Ethernet, network measurement 88−59668
reservation protocol for fibre-optic network, anal. 87−13187
resolvable-contention ring, access control for ring-typed LANs 88−3304
resource sharing queuing systems 86−62006
resource sharing systems, performance 87−34172
response time distribution in a multiprogrammed computer with terminal traffic 88−41138
response time estimation of real-time networks 88−28441
retransmission control algorithm for slotted CSMA/CD LANs, Markovian model 87−62641
ring structured LAN, performance study 85−36697
ring traffic monitor for Cambridge ring 88−73600
ring type LAN, analytic modelling 86−10774
RLL 2/7 and MFM encoding techniques for disc drive testing, comparison 88−45908
round-robin scheduling of services, exact anal. 88−18554
SAR, performance evaluation and architectural implications of convolution back-projection image reconstruction 86−64289
satellite channels for distributed data systems 85−14150
scheduling algorithm in Bell Labs Network, simulation 88−3619
schematic capture, CAE front-end selection using benchmarking 86−52612
SCORE project, real time local networks design, validation and performance evaluation *(French)* 88−59582
Segnet LAN protocol performance, simulation study 88−15059
shared memory multiprocessor, domain partitioning impact on performance 87−65443
shared-response systems, book contrib. 87−20166

performance evaluation continued
shipboard integrated processing and display system, performance eval. 88−46639
shout-echo networks, optimal algorithm for selection in distributed sets 86−30102
shuffle-exchange networks 86−49070
signal processing, VHSIC performance in high-throughput appls. 86−41000
signal-to-noise ratios, performance criteria and transformations for QC 88−43732
signature analysis, multi-input structures for burst error detection 88−34720

alumina, high-purity ceramics, high-temp. dielectric meas., W-band complex permittivity data 88−26560
amorphous compensated semiconductors with pot. fluctuations, AC band cond., freq. temp. depend. 85−11937
anisotropic thin film multilayers, design anal. 88−2670
anisotropic waveguides with arbitrary tensor permittivity, vector finite element soln. 86−42272
asymmetric coplanar waveguides, characteristic impedance and dielec. const., theoretical and expt. study 85−17777
asymmetric coplanar waveguides, theoretical and expt. study 85−24902
asymmetrical coupled microstriplines, effective dielec. constants, dispersion 86−68812
bis(tetramethylammonium) tetrachlorocobalt, incommensurate phase, dielectric dispersion 85−40980
bis(tetramethylammonium) tetrachlorozincate, incommensurate phase, dielectric dispersion 85−40980
cable insulation props., semiconductor shielding influence *(Slovak)* 85−43629
capacitor motor, magnetically-suspended rotor dielectric coating material selection *(Russian)* 86−56757
capacitors, electric field intensity anal. allowing for nonhomogeneous dielectric conductance *(Russian)* 86−62858
capacitors polymer Z 85−34216
carnauba wax, dielec. const., elec. cond. hysteresis effect 85−56033
cellulose thin films, dielec. const. rel. to sorbed water, capacitive sensor mechanism 88−42046
cements, optical, dielectric props., appl. to electro-optic image recording device 85−45908
ceramic, polycryst., internal boundaries role in elec. props. and device development 86−40796
ceramic capacitor dielectrics, rapid firing 86−34400
ceramics, dielectric characts. and HF appls. 87−46245
ceramics meas., using microwave meas. apparatus for temp. to 2300K 86−60322
charge plane-parallel dielectric, field strength calc. *(Russian)* 86−3422
circular waveguide with dielectric insert, dispersion props. 88−924

permittivity continued
coaxial lines charactn. using impedance shifts props. *(French)* 87−53751
composite ceramic capacitor dielectric constant and loss meas. *(Korean)* 86−47102
composite dielectric materials for microwave devices 85−54536
composite insulating materials, ageing under combined stresses, elec. and microstruct. studies 86−68115
composite materials multilayered struct., elastic, piezoelectric and dielectric constants calc. 87−67629
concretes, radiowave absorbing, complex permitt. meas. 87−47148
conductive polymer technology appl. to multilayer capacitor 87−52914
conductors, circular cross-section, capacitance computation *(Slovak)* 86−28591
conductors, cylindrical, electric field in nonhomogeneous media *(Slovak)* 86−41357
coupled coplanar waveguide with anisotropic substrate 86−15999
crustal regions shallow sounding using EM surface waves 87−7523
cycloaliphatic epoxy resin, ageing, irradiation environmental conditions effect 87−18430
cycloaliphatic resins for outdoor insulation systems, environmental ageing 85−40999
cylindrical multiconductor transmission lines, anal. using iterative technique 87−47252
cylindrical waveguide immersed in medium with nonlinear dielec. const., TE mode propag. 86−10158
deionised water electrolyte, EHD effect on dielectric constant 88−26558
dielectric cylinder, complex scattering matrix 88−27493
dielectric filled waveguides, permittivity determination from EM wave reflection 88−56835
dielectric image guides, propag. losses calc. using effective dielec. const. method 88−27568
dielectric layers, thickness, permittivity and electrostatic charge determ. 85−35965
dielectric resonator with arbitrary permittivity profile, natural frequency calculation 88−38694
dielectric resonators, cylindrical, for MM-wave monolithic IC, theoretical props. 88−25421
dielectric structures, elec. stress. distrib. in cavities 86−47877
dielectric tubes, higher-order mode growth 87−61430
dielectric waveguides, low-loss, approx. anal. *(Polish)* 87−39429
dielectrics, props. review *(Korean)* 86−9315
diffused optical waveguide with harmonically modulated permittivity, diffr. emission of surface waves 86−36168
directional couplers, 3 dB type with vertically installed planar cct. struct., characts. study 88−56859
discontinuities in fin-line on semiconductor substrate 87−6011
double-layered dielectrics, props. analysis using computer *(Slovak)* 86−2446
effective dielectric constant technique to analyse cylindrical dielectric resonators 87−52798
effective dielectric permittivity method, laser diode anal. 85−7432
electro-optic waveguides, electric field, permittivity and strain distribs. induced by interdigitated electrodes 87−60963
electrostatics in homogeneous medium with applied axisymmetrical electric field *(Russian)* 85−56941
EM scattering, dielectric constant effect on bodies of revolution using different formulas 86−42838
EM wave propagation in screened helical line 88−40614
EM wave scattering form dielectric cylinders, with special class of permittivity 88−27475
epoxy resin, thin encapsulant films, dynamic cure and diffusion monitoring 88−63396
epoxy resins, complex permitt., freq. depend. 86−68113
ethylene carbonate, Kerr electro-optic field mapping meas. 85−40951
ethylene-propylene rubber, effect of molecular structure on dielec. props. 88−26624
fin line structures on insulator-semicond. substrate, discontinuities study 87−17366
fin lines, full-wave anal., dispersion, asymmetry, loss, thickness and discontinuity 88−25363
fin lines, insulated type, anal. eqns. and synthesis technique 85−24890
forest slab, relative permitt. and cond. eval. from lateral wave attenuation const. data 87−12710
forest slab permittivity and conductivity estimation by inverse method 86−68757
fused quartz meas., using microwave meas. apparatus for temp. to 2300K 86−60322
Gaussian beam anomalous diffr. by sinusoidally-modulated layer 86−68719
glass ceramic capacitors for high voltage applications 86−1411
glass cloth/epoxy laminates, elec. props. of interface, expt. study 86−68090
glass fibre reinforced plastic, dielectric loss tangent and AC dielectric strength rel. to mech. and thermal stresses *(Korean)* 86−21904
grounded fin lines on anisotropic substrates, transmission props. anal. 87−75500
guided waves, nonlinear TM-polarised, solutions 85−29932
heavy oils, dielectric processes, cooperative behaviour among polar species 88−51046
heterojunction band offsets determ. by C-V profiling, role of nonuniform dielec. permitt. 86−8866
hexamethyldisiloxane films, plasma polymerised, dielec. props., complex permitt. 87−18356
hexamethyldisiloxane films, plasma polymerised, dielec. props., effect of absorbed H_2O mols. 87−18361
hexamethyldisiloxane films, plasma-polymerised dielec. props. 85−29356
hexamethyldisilozane films, plasma polymerised, dielec. props., effect of absorbed H_2O mols. 87−18361
HF heated dielectrics, FEM for temp. distrib. calc. 88−11491
IC packaging materials with very low permittivity, sol-gel prep. 87−52212
inhomogeneous layered media, one-dimensional, inverse scattering method 88−40535
injection semiconductor laser, waveguide properties of resonators, with arbitrary permittivity distrib. 85−62627
insulating material, inception voltage of discharges in voids 87−25656
insulating materials, surface flashover in vac., influence of electron impact energy and dielec. permitt. 85−40961
insulating oils, long-term charge injection effect on dielec. props. 85−41000
insulators, surface flashover in vac. 85−40962
insulators in air and vacuum, electric breakdown, spark conditioning 85−23999

permittivity continued
interdigital transducer, SAW in cryst. classes 4 and 6, closed form expression for Green's function 87−6974
intrinsic slowed waves of dielectric waveguide, num. method 88−34384
junction detectors, high-frequency rolloff in response 86−24538
kraft paper sheets, impregnated with phenyl xylyl ethane, dielec. props. 88−64858
lossy anisotropic materials reflecting characts. in rectangular waveguides 87−73584
lossy media, inverse scatt. problem soln. by discrete coupled eqns. 86−68728
low-permitt. multilayer glass-ceramic substrate with Ag-Pd wiring for multiple VLSI packages 88−38945
maser, travelling wave, with comb-type slow wave system in pump waveguide *(Russian)* 85−41300
Maxwell eqn. general solution for excitation by slotted aperture source in conducting cylinder with concentric layering 87−39287
media characterization from boreholes comparison of approximate solutions 87−75397
mica-epoxy composite dielectric strength obs. 87−32746
microstrip, dispersion formula satisfying CAD requirements 88−66143
microstrip, generalised on dielec. sheet, capacitance determ. 88−58911
microstrip, signal propag. along three-layered region, theoretical study 88−58916
microstrip antenna design rel. to bandwidth 85−13334
microstrip dipole antennas on elec. thick substrates, efficiency/gain improvement 86−36835
microstrip dispersion formulas testing, comparison with expt. data 88−40632
microstrip dispersion including anisotropic substrates 87−68830
microstrip line, effective dielec. const. rel. to relative dielec. const. of substrate *(Japanese)* 87−24403
microstrip line, modified for high power transmission, charact. impedance and effective permittivity 87−59818
microstrip line on anisotropic substrate, transient anal. in 3D space 88−27561
microstrip linear on anisotropic substrates, dynamic 3D transmission-line matrix anal. 85−62867
microstrip lines, open type, dispersion characts. study 87−39436
microstrip lines on ferrite substrates analysis and expt. verification 87−45157
microwave ferrite, complex dielec. const., saturation magnetisation, linewidth meas. *(Russian)* 85−20696
microwave reflectometry, frequency-domain, image reconstruction, parameter identification, simulation tools appl. 87−35179
microwave strip line on ferrite substrate magnetised perpendicularly, permittivity and permeability 85−17814
microwave stripline appl. 88−7012
microwave transmission lines, quasi-TEM anal. using finite-element method 87−19235
millimetre-wave materials, dielec. meas. techniques and expt. study 85−26467
modified microstrip lines, characts. and appls. *(Polish)* 86−53001
moisture gauge for powder processes, inductive-capacity type *(Japanese)* 87−63362
multi-layered insulation structures, field grading 88−44920
multilayer ceramic chip capacitors, elec. props. 86−1410
multilayer ceramic circuit board, dielec. const. effect on transmission line characts. *(Japanese)* 88−50295
multilayer ceramic substrate, low temp. fired, for hybrid technology 85−34406
multilayer multiconductor strip-like planar transmission line topologies for microwave 88−56976
multilayer struct., Rayleigh-wave modes amplification, computational technique 87−67689
multilayer surface-mounting chip-type ceramic capacitors *(Spanish)* 87−37601
multilayered dielectric medium filled symmetric stripline, anal. 87−39440
Na Cl electrolyte, EHD effect on dielectric constant 88−26558
nonhomogeneous plasma cylinder, wave scatt., diffractional field description, approx. methods 86−3539
nonisotropic materials with built-in conducting strips using nodal method, electric field problems 85−50784
nonlinear slab-guided waves, asymm. config., dispersion relations anal. 85−35856
nonreciprocal coupled image lines, anal. using effective dielec. const. method 87−61427
one-dimensional inhomogeneous layered medium, EM inverse scatt. regularisation 86−68727
open optical and microwave guide, arbitrary transverse permittivity profiles, anal. 85−7266
open-ended coaxial lines, quasi-static anal. 88−20970
optical materials, optical and physical data, book 85−10321
optical waveguide, strip-loaded, with arbitrary index profile, guided mode calc. 85−12586
organic insulators, elec. resist., permitt., and dissipation, 0.1 to 60 Hz, 21 to 105°C 85−40949
PCB, low dielec. constant substrates 88−1122
Perspex non-planar dielec. samples, complex permittivity meas. 87−77375
PET films, uniaxially drawn, dielectric props., orientation effect *(Korean)* 86−47881
photoelastic modulated ellipsometry on magneto opticmultilayer films 86−42157
piezoelectric ceramic-polymer fired composites 87−53787
planar waveguides with arbitrary permittivity distrib., natural modes 85−29590
plane wave diffr. from metallic gratings with arbitrary complex permittivity *(Japanese)* 88−27489
plane waveguide, randomly irregular, mean-field modes 87−26058
PMMA-hexachloroendomethylenetetrahydropthalic acid 1,2-propanediol systems, dielectric props. 88−71831
polar ice sheets, radar echo sounding computer simulation, variable permittivity effects 88−16924
poly-4 methyl-pentene-1, dielec. meas. in MM-wavelength range 86−28529
poly-p-xylylene, dielectric materials, phys. and elect. props. 88−26561
polyester, Ag coated glass sphere filled composite, dielec. const. rel. to filler content 85−17000
polyester fibre-epoxy resin insulator, prebreakdown space charge injection meas. 87−18383
polyester foam mech. and dielectric characteristics *(Italian)* 86−9338
polyethylene, dielec. meas. in MM-wavelength range 86−28529

permittivity continued
polyethylene, dielec. props. degradation under combined γ-irrad. and thermal stresses 88−26605
polyethylene foam insulation, permittivity analytical description *(Russian)* 85−62135
polyimide, transient current, dielec. relax. and elec. cond. meas. 88−51086
polyimide copolymers, heat resistant dielectric film appls. 88−71832
polyimide dielectric for multilayer hybrid cct. fabrication 87−1119
polyimide dielectric layers for multilayer hybrid ccts. 86−53266
polyimide film, interlevel dielectric, props., selective LPCVD of W 88−64811
polyimide films, dielec. props., effect of equal biaxial stretching 86−68020
polyimide films for multilayer interconnects, stability and performance study 88−1190
polyimide for advanced logic/memory double metal devices, material and processing technologies 88−19840
polyimide high resolution ion implantation masks, thin film surface morphology and dielec. props. study 87−38074
polyimidesiloxanes, diglyme soluble, dielec. props. and appl. 88−18770
polymer tape dielectrics, development and design parameters for flexible supercond. cables 88−55029
polymeric heat-resistant dielectric films for capacitors *(French)* 88−33413
polymers, filled, dielec. props. modification rel. to insulation appls. 88−64801
polymers, highly conjugated, dielec. props. 86−63478
polyphenylene sulphide resin props. 88−38280
polypropylene, dielec. meas. in MM-wavelength range 86−28529
polypropylene, electron radiation effects on electrical and mechanical props. 88−26572
polypropylene films, impregnated with phenyl xylyl ethane, dielec. props. 88−64858
polypropylene films, multifactor stress ageing 87−74471
polystyrene film, cylindrical conf. with air gap, dielectric study 85−56034
polytetrafluoroethylene, dielec. meas. in MM-wavelength range 86−28529
polyvinylidene fluoride-PZT composite materials with high dielec. constants 88−39744
porcelain, dielec. permittivity and loss factor 85−56045
porcelain bodies, dielec. and mech. props., elec. insulation appl. 85−41004
potting and encapsulating materials for electronic components 88−18503
powder core dielectric waveguides 85−17778
precision millimetre wave meas. in birefringent and ceramic materials 87−14490
PZT ceramics, hot pressing or sintering, dielec. and piezoelec. props. 86−53838
quartz, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
quartz cryst., nonlinear fundamental constants 88−20188
quasioptics of axially symmetric wave beams, lossless medium propagation along permittivity gradient 88−40547
rectangular dielectric-filled waveguide, EM wave refl. by modulated medium 86−10159
refractive index profile reconstruction for stratified medium 85−51418
relative dielectric constant dispersion at low and super-high frequencies, determ. 87−29253
resonant frequency of triangular microstrip patch antenna, formula 88−66189
reversals in electrical current and other anomalies in insulating polymers 87−18427
ring resonator in free space, finite permittivity correction 85−6493
rubber, anisotropic sheets, complex permittivity tensor meas. and refl. characts. study 87−18429
rubber cylinder microwave irradiation and thermal runaway criteria *(French)* 86−63476
sand and dust, complex dielectric const. at 11 GHz, depend. on moisture content 85−57025
sand minerals, resist., dielec. const. meas. during electrostatic separation 86−36647
sapphire IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
Schottky barrier form., Fermi level pinning, band struct. considerations 86−14937
Schottky diodes, photocurrent polariton peak, optical const. effects 87−60174
semiconductor classical superlattices, effect of screening on nonlinear properties 85−23529
semiconductor laser, transitions between size-quantisation levels, separate electron and optical confinement 85−35788
silicone oil filled transformers *(Italian)* 86−45477
SiO_2 films, hot wall atmospheric CVD using $CO_2(N_2O)$ oxidant 88−458
skin, in vivo complex permittivity meas., open-ended coaxial line sensor technique 88−61364
SMT laminates, resins and reinforcements for ideal 88−32574
spectral inverse technique for reconstruction of complex permittivity profiles 88−45660
spin-on glasses, interlayer dielectrics, material characteristics 88−26019
split cylindrical condenser, nonuniform dielec., boundary condition evaluation 85−50055
static fringing capacitance of a dielectric loaded coaxial termination 88−71148
stratified dielectric layer, permittivity profile reconstruction, TE polarised wave scatt. 85−51401
stripe nonlinear surface waves, iteration process anal. 88−52182
sulfolane-based electrolytes for rechargeable Li batteries, characteristics 86−26267
surface grating formation on absorbing condensed matter under laser irradiation, effect of medium permittivity 85−41448
surface polariton metal-optical waveguide, prism coupling theory 86−36216
suspended and inverted microstrip lines, elec. performance, manufacturing tolerance effects 86−8415
suspended microstripline, dispersion modelling 87−75509
symmetric dielectric slab waveguide with Kerr like nonlinear permittivity, TE wave propag. 87−46976
TGS crystals, doped, dielec. and pyroelec. props. 86−68073
TGS crystals grown by cooled sting technique, elec. props. 86−13731
thermistor materials, complex permittivity at low temp. *(Czech)* 85−40946
thermistors, negative temp. coefficient type, freq./voltage dependence of complex permittivity *(German)* 86−14547
thick film capacitor dielec. materials for hybrid appls. 85−34389
thick-film capacitor dielectrics with permitt. up to 100 85−11607
thin dielectrics for ULSI appls. 88−71717

$(GeS_2)_x(Sb_2S_3)_{1-x}$, glassy, phys. props. 86−1736
HfO_2-based ultra-thin dielec. films, deposition and props. 88−6516
$Hg_{1-x}Cd_xTe$ solid soln. thin films, dielec. props. investig. 86−28532
$Hg_{1-x}Cd_xTe$ thin films, photoelec. and dielec. props. 85−56402
HgI_2 solution-grown crystals, X-ray and γ-ray irrad. effect on elec. props., radiation detector performance 87−32274
$In_{1-x}Ga_xAs_yP_{1-y}$, permitt., comp. depend. 86−14866
InP/metal Schottky contacts with interface oxide layer, barrier heights 88−71350
InSb-anodic oxide layers, dielec. props., chem. comp. 86−63124
KNO_3, thin monocrystalline layers, melt growth, permittivity, pyroelec. coeff. 88−44894
$KNbO_3$ single crysts., growth and doping, dielec. and optical props. 87−53805
$KTa_{1-x}Nb_xO_3$ ceramic discs, prep. by sol-gel processing and hot pressing 87−52219
$KTaO_3$ UHF dielectric resonators, mechanical pressure effects on permittivity and dielectric loss 87−6988
KVO_3, dielectric hysteresis props. of sintered discs, ferroelectric Curie temp. 88−33431
$Li_2B_4O_7$, crystal growth, piezoelec., dielec., elastic, and acoustic props. 87−53803
$Li_2B_4O_7$, temp. compensated piezoelectric cryst. SAW study 87−6937
$LiNbO_3$, electrostrictive and third-order dielec. constants 86−47901
$LiNbO_3$, nonlinear constants determ. *(Japanese)* 87−67633
$LiNb_{0.1}Ta_{0.9}O_3$ single cryst., piezoelec., pyroelec., dielec. and elastic consts. 87−23611
$LiVO_3$, dielectric hysteresis props. of sintered discs, ferroelectric Curie temp. 88−33431
$MgOAl_2O_3$ spinel IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
MnTe high temp. elec. transport props. 88−50629
$(Na,Li)NbO_3$ system, sol-gel processing and dielec. characteris. 86−62266
Ni-Zn ferrites, prep., microstruct., microwave charact. 86−13839
$Ni_{0.65}Bi_{0.35}Fe_2O_4$-$Mn^{3+}$ ferrite, stress-intensive square hysteresis loop, suitability for microwave applications 86−58671
$NiFe_2O_4$, Trans-Tech 2-111, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
PLZT ceramics, research programme at Shanghai Institute of Ceramics 87−53780
PLZT dielectric for characteristic X7R multilayer ceramic capacitors 85−35240
PLZT, hot-pressed, pyroelectric charact., appl. for IR detectors 87−63421
PLZT piezoelectric ceramic, fabricated by atmospheric sintering, electrical charact. and optical transmittance *(Korean)* 85−1784
PLZT transparent ceramics, photoelec. hysteresis and optical memory props. *(Korean)* 88−14014
PLZT-PZN electro-optic ceramics, elec., opt. and switching props. 87−1804
PZT ceramic-air composites for hydrostatic sensing 88−22524
PZT ceramics, SiC whisker reinforced, elec. and mech. props. 86−2465
PZT ceramics, low temp. dielec., piezoelec., and elastic props. 87−53793
PZT fibrous piezoelectric particles, synthesis and elect. props. *(Japanese)* 88−26596
PZT films, growth and charactn. by reactive sputtering of metallic targets 87−52209
PZT piezoceramics, modified, dielec., piezoelec., and SAW props. 87−53802
PZT piezoelectric ceramic prop. meas., applied compressive stress parallel to polar axis 87−25739
PZT, pyroelec. ceramics and devices, additives influence on props. and IR detector use 86−42008
PZT synthesis through combination of spray decomp. with solid phase reaction *(Japanese)* 88−12089
PZT:Ni, modified, sintered, dielec. props., comp., struct. 85−56021
PZT-epoxy 0-3 composite, piezoelec. props. rel. to ceramic particle size *(Korean)* 88−13615
PZT-polyethylene composites, prep. and piezoelec. props. 87−53788
PZT-silicone rubber composites, dielec. and piezoelec. props., stress stability 87−53783
PZTN, MnO_2 doped piezoelec. ceramics, low sintering temp., mech. quality factor, dielec. props. 86−28573
Pb $(Mn_{2/3}Sb_{1/3})_{0.08}Ti_{0.495}Zr_{0.425}O_3$ sintered powders, electrical properties *(Korean)* 87−74463
$(Pb,Ca)TiO_3$ ceramics, electromech. props. 87−53794
Pb perovskite synthesis for high-permittivity multilayer capacitors *(French)* 88−31867
PbBa perovskite Y5U dielec. for multilayer ceramic capacitor 88−26573
$(PbCaCoWTi)O_3$ ceramics, electromechanical anisotropy mechanisms 87−67626
PbF_2, dielectric constants and thermoelastic parameters, volume depend. calc. 88−71830
$PbFe_{0.5}Nb_{0.5}O_2$, positive temp. coeff. of resist. effects charact. study 87−45630
$Pb(Fe_{1/2}Nb_{1/2})O_3$, thin films, sol-gel prep. and dielec. props. 87−65579
$Pb(Fe_{0.5}Nb_{0.5})O_3$-$Pb(Fe_{0.66}W_{0.33})O_3$, thick film capacitor material, prep., props. 85−28843
$Pb(Fe_{1/2}Nb_{1/2})O_3$-$Ba(Cu_{1/2}W_{1/2})O_3$ low temp. fired high permitt. ceramics for multilayer ceramic capacitor 85−28258
$PbFe_{1/2}Nb_{1/2}O_3$-$PbFe_{1/2}Ta_{1/2}O_3$ perovskite ceramics, sintering, dielec. props., capacitor appls. 88−56318
$Pb(Fe_{1/2}Ta_{1/2})O_3$ ceramic, dielec. props. under press. 87−46259
$Pb(Fe_{2/3}W_{1/3})_x(Fe_{1/2}Nb_{1/2})_{0.86-x}Ti_{0.14}O_3$-$Bi_2O_3/Li_2O$ system, low firing thick film dielec. pastes 88−7760
$Pb(Fe_{2/3}W_{1/3})_x(Fe_{1/2}Nb_{1/2})_{0.9-x}Ti_{0.1}O_3$-$Bi_2O_3/Li_2O$ low-firing temp. Z5U dielec. for MIC capacitors 88−26554
$Pb(Fe_{2/3}W_{1/3})_x(Fe_{1/2}Nb_{1/2})_yTi_zO_3$-based thick film capacitor materials, low temp, firing 86−52535
$Pb(Mg_{1/3}Nb_{2/3})O_3$-$Pb(Zn_{1/3}Nb_{2/3})O_3$-$Pb(Fe_{2/3}W_{1/3})O_3$ ceramics, dielectric props. 86−47903
$PbMg_{1/3}Nb_{2/3}O_3$, low firing dielectrics 85−50802

permittivity continued
$Pb(Mg_{1/3}Nb_{2/3})O_3$-$Pb(Co_{1/3}Nb_{2/3})O_3$-$PbTiO_3$-$PbZrO_3$ ceramics, piezoelec. props. and microstruct. 87−53798
$Pb(Mg_{1/3}Nb_{2/3})O_3$-$PbTiO_3$-MnO relaxor ferroelec. ceramics, dielec. ageing effects 87−53817
$Pb(Mg_{1/3}Nb_{2/3})O_3$-$PbTiO_3$-$Pb(Ni_{1/2}W_{1/2})O_3$ ceramic, dielec. props. investig. 86−47902
$Pb(Ni,Nb)O_3$-$Pb(Mg,W)O_3$-$PbTiO_3$ system for multilayer capacitors 86−68017
PbO-P_2O_5-V_2O_5 glasses, DC elec. cond., temp. depend., hopping mechanism, dielec. const. 86−8813
PbO-ZrO_2-based ceramics, dielec. props. at microwave freqs. 88−26556
$(PbSmTM)O_3$ ceramics, electromechanical anisotropy mechanisms 87−67626
$PbTiO_3$ ceramics, modified, dielec. props. 87−53801
$PbTiO_3$, ferroelectric, epitaxial growth on $MgAl_2O_4$/Si substrates 86−46367
$PbTiO_3$ ferroelectric thin films, prep., basic props. and device appls. 86−2462
$PbTiO_3$ films, epitaxial growth on $MgAl_2O_4$-Si substrates 87−52150
$PbTiO_3$ films from metallo-organic precursors 87−53792
$PbTiO_3$ gels and films, hydrolysis conditions effect on charact. 87−23754
$PbTiO_3$ thin film, dielectric and pyroelectric props., application as IR sensors 86−55738
$PbTiO_3$ thin films, elec. props. study 86−47899
$PbTiO_3$ thin films, prep., crystallographic, dielec. and pyroelec. props. 86−62224
$PbTiO_3$-polymer composites, poling study, dielec. and piezoelec. props. 87−53785
$PbTi_xZr_{1-x}O_3$ piezoceramic, annealing in gaseous media with controllable comp., effect on electrophysical props. 87−329
$Pb(Zn,Nb)O_3$ perovskite Y5S dielectric for multilayer ceramic capacitor appls. 86−58637
$Pb(Zn_{1/3}Nb_{1/3})_x(Fe_{1/2}Nb_{1/2})_{0.7-x}(Fe_{2/3}W_{1/3})_{0.3}$:Al, ceramic capacitor, sintering and dielec. props. 86−20864
$Pb(Zn_{1/3}Nb_{2/3})O_3$-0.1$PbTiO_3$ single crysts., growth, dielec., and pyroelec props. 87−53806
$Pb(Zn_{1/3}Nb_{2/3})O_3$-$BaTiO_3$-$PbTiO_3$ ceramic electrostrictors for micropositioner appls. 87−53816
$Pb(Zr,Ti)O_3$ ferroelec. thin films, metal target sputtering prep. 88−24799
$Pb(Zr,Ti)O_3$-polypropylene composite, charging and discharging currents, dielec. props. 85−1785
$PbZrO_3$-based piezoelectric ceramics containing$Pb(Zn_{1/3}Nb_{2/3})O_3$ 87−1805
Pd/Ag thick film multilayer dielectric materials, parameters, DTA and SEM *(Slovenian)* 86−15286
Pd/Au thick film multilayer dielectric materials, parameters, DTA and SEM *(Slovenian)* 86−15286
$PrMnO_3$ black dielectric material for AC thin-film electrolum. display 88−22111
Pt/Pd/Ag thick film multilayer dielectric materials, parameters, DTA and SEM *(Slovenian)* 86−15286
$RbVO_3$, dielectric hysteresis props. of sintered discs, ferroelectric Curie temp. 88−33431
SF_6-impregnated polymer films for insulation of HV apparatus 86−68088
Si TiO_3 based ceramic boundary-layer capacitors for miniaturisation 85−45261
Si, compensated with pot. fluctuations, AC band cond., freq. temp. depend. 85−11937
Si epitaxial film growth on porous Si layers, oxidation and etching rates, Rutherford backscatt. and TEM studies 86−62223
n-Si, heavily doped, screening effect and electron mobility 86−1683
a-Si:H, charge transport and relax., luminesc. long-time tail distribs. anal. 87−17734
a-Si:H, glow discharge thin films, deposition rate, optical props., influence of substrate temp. 87−31569
a-Si:H thin films, elec. and optical props., H content and film thickness depend. 88−7319
a-Si:H thin films, elec. and optical props., thickness depend. 87−24808
a-Si:P^+, heavily doped samples, low temp. cond. study 86−21153
Si-Al struct., cond., transverse elec. field depend. 87−11429
Si-Ta_2O_5 interface, magnetron-sputtered, transition layer, crystallographic orientation dependence 85−12026
SiBN amorphous films, plasma-enhanced CVD, dielec. props. 87−52185
a-SiC:H, photosensitive film, high rate deposition, C_2H_2 carbon source 88−24782
a-SiC:H, void fraction determ., effect on photoconductivity 88−33859
Si_3N_4, Si-rich, injection layers in dual electron injector struct. for floating gate memory device 87−45926
Si_3N_4 films, comparison of dielec. charact. obtained by different methods of deposition *(French)* 88−13608
Si_3N_4 fluorinated films, plasma-deposited from SiF_4, N_2, H_2 source gases, elec. props. 85−29053
Si_3N_4 formed by low energy ion implantation 85−12185
Si_3N_4, plasma enhanced CVD, film props. rel. to plasma charact. 85−6015
Si_3N_4, reaction bonded, appl. of dielec. props. meas. technique 85−4081
Si_3N_4, sintering, mech. and dielec. props., radome appl. 85−57171
SiN_x thin films, plasma-enhanced CVD and elec. props. 88−38246
SiN:F films by low temp. plasma-enhanced CVD 88−12063
p-SiN:F, low temp. plasma deposition, elec. props., bonding and stability 87−65549
SiN:H, plasma CVD, on-chip capacitors, for GaAs IC fabrication 87−18284
SiN_x:H,B(P) films, amorphous, doped and undoped, plasma enhanced CVD prep., phys. charact. 85−54502
Si_2N_2O, sintering, mech. and dielec. props., radome appl. 85−57171
SiO_2 MIS and MIM struct., elec. props. and IR spectra, RF sputter deposition 86−28015
SiO_2, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
SiO_2 film for SiO_2-InSb hysteresis free MIS diodes, capacitance-voltage charact. 85−40530
SiO_2 films, low temp. CVD, dielec. const., dissipation factor 87−32350
SiO_2 films produced at low temps., elec. cond. 88−39083
SiO_2 films, thermal nitridation for VLSI appls. dielec. props. 86−21430
SiO_2 glasses, prep. by sol-gel technique, dielec. props. 87−23762
SiO_2 hollow microspheres filled glass-ceramic low-permitt. thick-film material, charactn. 87−73925
SiO_2 thin film. technological parameters effects on dielectric props. obs. *(Slovak)* 87−65562

permittivity continued
SiO_2 thin films by UV arc lamp photochem. CVD, deposition and charactn. 88−39220
SiO_2 thin films, low temp. growth by double excitation photo-CVD 87−58974
SiO_2 thin films, thermal nitridation at 1150°C 88−33042
SiO_2 void nanocomposite films with low permittivity 87−25529
SiO_x Ny films, prep. by plasma nitridation, material and elec. props. study 86−20110
SiO_2-B_2O_3-Al_2O_3, evaporated insulating layers for thin film circuits 86−66843
SiO_2-Si, laser deposited, effect of surface irradiation, substrate temp. and annealing 85−10763
SiO_2-Si_3N_4-SiO_2 stacked films, MIS structures, elec. props. 88−44599
SiO_xN_y films, rapid thermal nitridation prep., elec. and struct. charact. 85−50437
SiO_xNy thin films, plasma enhanced CVD, deposition rate and props. depend. on N_2O conc. *(Slovenian)* 87−44373
$(Sr,Ca)TiO_3$ base ceramic varistor, elec. props. investig. 86−47098
$Sr_{0.5}Ba_{0.5}Nb_2O_6$:Pb, ferroelectric props., appl. for uncooled IR detection 88−9982
$Sr_{1-x}Ca_x[(Li_{1/4}Nb_{3/4})_{1-y}Ti_y]O_3$, dielectrics for microwave appls. 85−1762
SrF_2, dielectric constants and thermoelastic parameters, volume depend. calc. 88−71830
SrO films, MBE heteroepitaxial growth on Si, permitt., breakdown field 87−58931
Ta_2O_5 MIS capacitors, dielec. charact., effect of SiO_2 at Ta_2O_5-Si interface 87−59920
Ta_2O_5 film, prod. by photo-CVD, VLSI dynamic memory appl. 86−52522
Ta_2O_5 film, sol-gel derived, charactn. 87−25628
TaO_x films, photo-CVD and dielec. charact. 88−18755
TaO_x films, photo-CVD growth and elec. props. 88−49872
Ta_2O_5-Al_2O_3 mixed films, MOCVD prep., optical and elec. props. rel. to ion sensitive props. *(Japanese)* 86−26877
Ta_2O_5-Si interface, RF magnetron sputtering 85−23586
Ta_2O_5-Si, reactive sputtered films prep. and charact., DRAM appls. 88−39167
Ta_2O_5-SiO_2-Si double layer structure, dielec. props. 87−37991
Ta_2O_5-based ultra-thin dielec. films, deposition and props. 88−6516
V_2O_5-P_2O_5-Bi_2O_3 glass, conductivity minimum 87−74029
V_2O_5-P_2O_5-Sb_2O_3 glass, conductivity minimum 87−74029
W-HfO_2-W high dielec. capacitor struct., thermodynamic approach 87−32115
Y_2O_3/SiO_2 dielectr. struct. for VLSI/ULSI cct. appls., fabrication and elec. charact. 88−39151
ZnO ceramic, elec. props., high-temp. annealing effects 87−45575
ZnO ceramic, grain growth kinetics during synthesis, optimum elec. props. 87−23752
ZnO, piezoelectric, RF magnetron reactive sputter deposition, position and press. effects 85−22524
ZnO-based ceramic semiconductors, dielec. behaviour 88−44893
ZnS IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
ZnS:Mn^{2+}, dielectric film, electroluminescent display panels *(French)* 85−4054
ZnSe IR window material, millimetric-wave permittivity and losses, 23 to 1000°C 88−20479
ZrO_2 for MOS capacitors in DRAM 86−46800
$Zr_xTi_ySn_2O_4$, processing, dielec. props. and microwave resonator applics. 86−40795

permittivity measurement
9 GHz dual sample cell for high loss liquids 85−31572
100 GHz, new method using groove-guide resonator 88−42260
admittance of measuring cell with a dielectric sample 88−4590
alumina, by mm-wave technique 88−16438
anisotropic dielec. optoelectronic substrates, complex permitt. meas. technique 86−44390
anisotropic homogeneous materials, dielectric const. meas. in microwave region 85−64248
anisotropic rubber sheets, complex permittivity tensor meas., reflecting characteris. 87−77370
apparatus to meas. dielectric constants and dissipation factors using resonance technique 87−35173
automated dielectric measurement instrument for audio and sub-audio frequencies 86−31597
automated dielectric spectrometer for freq. range 10 kHz to 10 GHz 86−65258
automatic phase meas. technique for VLF/LF sinusoidal signals, dielec. const. determ appl. *(French)* 85−43063
biological and aqueous systems meas. 87−57064
biological substances, dielectric props. meas. using open-ended coaxial line resonator method 88−29587
biomaterials electrical props. meas. 88−54481
bone, dielec. props. meas. using microstrip line config. 88−54549
brake fluid boiling point determination using relative dielectric 85−37805
broad-band permittivity measurements using thesemi-automatic network analyzer 86−24700
broadband analysis of a coaxial discontinuity used for dielectric measurements: solutions of direct and inverse problems 87−21209
broadband cell for automatic meas. of material permittivity *(French)* 88−29589
calorimetric microwave loss measurements of granular materials 85−37729
cavity perturbation method 87−14492
cavity perturbation method, transmission line anal. 86−50200
chemical reacting materials, microwave processing and dielec. diagnosis in single-mode cavity applicator 88−29609
coaxial line excited monopole probes for in situ permittivity meas. 88−16070
coaxial line sensor, open-ended, for medical and industrial dielec. meas., assessment 86−55725
coaxial resonator for dielec. permeability inspection of IC bases, calibration charact. 87−73914
coaxial resonator for mag. permeability and permittivity meas. *(Chinese)* 85−4086
common polymers at millimeter wavelength range 86−11681
complex dielec. const., meas. systems 86−50202
complex dielec. const. meas. technique using H-plane dielec.-loaded cavity with three layers *(Japanese)* 85−48068
complex dielec. constant. at MM-wave freqs., meas. system *(German)* 88−60881

permittivity measurement continued
complex dielectric constant, automatic meas. at microwave frequencies 85−8938
complex dielectric constant, meas. technique using H-plane dielec. loaded resonator *(Japanese)* 85−4080
complex permittivities, dynamic meas. of temp. dependence at microwave frequency 87−14482
complex permittivity, dynamic meas. of temp. depend. at microwave freqs. *(Japanese)* 85−52846
complex permittivity and permeability, simultaneous meas. using broadband automated strip line technique 86−44406
complex permittivity and permeability of materials at microwave freqs., broadband meas. method 88−60899
complex permittivity and temp. depend. of dielec. during microwave heating, automated meas. method 86−11683
complex permittivity instrumentation for high-lossliquids at microwave frequencies, improvement 85−64245
complex permittivity meas. of curved dielectric specimens using open resonator 87−56816
complex permittivity meas. of lossy liquids and biological tissues, at 35 GHz 87−70761
complex permittivity meas. of semiconductors, $TE_{01\delta}$ mode dielectric resonator appl. 87−14488
complex permittivity measurement, time-domain reflectivity techniques 85−4083
complex permittivity measurement at microwave freqs. 86−55821
complex permittivity measurement method, scalar network analyser appl. *(Russian)* 88−47661
complex permittivity measurement of dielectric materials 86−24699
complex permittivity of liquids with low dielectric loss, automatic meas. 85−58845
complex permittivity tensor meas., rectangular waveguide standing-wave method 87−63493
computer-aided, moistened and pyrolysed materials in strong RF fields meas. 85−37727
concretes, radiowave absorbing, complex permitt. meas. 87−47148
conductivity transducer for aqueous medium *(Russian)* 88−47488
constitutive parameters of materials meas. using monopole antenna 88−10099
cylindrical dielectric resonators, dielec. const. meas., higher resonant modes 86−11682
cylindrical microwave imaging system, temperature and permittivity meas. 88−29593
Debye dielectric, computer-based permitt. meas. and microwave power absorpt. anal. 87−49890
dielectric constant meas., error calc., scattering matrix elements 88−39743
dielectric laminates, layer thickness, permittivity, complex refl. coeff., Fourier transform., RF interf. 86−5486
dielectric meas. in infra-low frequency band 87−56806
dielectric properties of brine in sea ice at microwave frequencies 85−48063
dielectric props. meas. at 100 GHz using groove-guide resonator 88−29592
dielectric resonator props., crystals with uniaxial anisotropy investig. 88−50344
dielectric spectroscopy using monopole antennas of general electrical length 87−29257
dielectric spectroscopy using monopole antennas ofgeneral electrical length 86−70197
dielectric waveguides use as sensors for dielec. consts. 87−3555
digital spectrometry at MM-freq. 86−38522
digital spectrometry meas. of dielectric constants at millimetre freqs. 87−3719
dispersed systems monitoring at water purifying stations using dielectric method *(Russian)* 87−63982
dispersion meas. by time-domain spectroscopy appl. to dielec. relax. study *(Japanese)* 87−3717
dust particles complex dielectric constant meas., at 11 GHz 88−60876
dynamic dielectric meas. of microwave frequencies, polymerisation process appl. 86−5487
EHF hybrid HEM_{11p}-mode dielectric resonators for filter applications at short millimeter wavelengths 88−71004
elastic, fibrous and porous materials, meas. of permittivity and resistivity *(Czech)* 87−35172
electrodeposited oxide films, dielec. meas., automated impedance analyser 85−64251
EM hyperthermia, temp. meas. technique using refl. method 87−57225
EM testing using RL- and RC- multivibrators 85−39830
epoxy resin/mica insulation, dielec. props. 88−64865
ethanol heated by microwaves, power adsorption instabilities anal. and permittivity measurements 85−60559
extracting dielec. permitt. from data obscured by electrode polarisation, techniqu. 88−68001
ferrites, MM wavelength meas., free-wave method 88−29613
ferroelectrics meas. at microwave frequencies, under uniaxial compression and low-temp. 86−44397
field-portable dielectric meas. system 88−5144
films, on dielectric substrate, permittivity meas. by microwave transducer 86−18077
films and sheets, dielec. parameter meas. at microwave frequencies 85−26455
fluids in pipes capacitance and conductance determ., internal and external electrodes use comparison 85−52842
Fourier computerised technique and improved cavity perturbation method 85−4081
free space permittivity meas. of lossy dielectrics 87−14491
free-space permittivity meas. of lossy dielectrics 88−16439
frequency tuned microwave TE_{01} cavity resonator appls. 85−26454
gas dispersometer for the millimeter range 86−24702
geological measurements of dielectric constant 85−15400
geological probing of ground layers using bistatic radar 85−9367
ground electrical props., in-situ meas. using monopole antenna 88−4586
Gunn diode based autodyne frequency convertor use for contactless meas. of dielec. parameters at SHF 86−60320
hair moisture meter HC-100 *(Japanese)* 86−31743
HF ground wave propagation, Earth electrical props. estimation using CW and FMCW 88−20902
high-loss liquids, 9 GHz complex permittivity meas. technique 88−22748
humidity meas. at temp. above 100 °C 87−70898
ice, dielectric const. and conductivity, meas. instrumentation *(Spanish)* 85−43071

permittivity measurement continued
inhomogeneous open-ended resonators as microwave sensor elements 85−20698
insulating liquids, dielectric props. testing 88−33439
insulating materials, accurate practical measurement system 87−77391
insulating oil, assessment of insulating liquid deterioration by laser measurements 88−33454
insulating oils, dielectric constant, laser meas. 88−33457
insulating oils, dielectric constant meas. using linearly polarised laser beam 87−38621
insulating oils, gamma-ray effects on elec. props. 87−25714
ionised gas boundary, complex permittivity, electric field and conductivity determ., using AC bridge 85−20697
IR materials at MM waves, complex permittivity meas. 87−56826
laminated dielectric, parameters determ. near min. of absolute refl. coeffs., variable freq. radio-interference method 87−31603
laminated dielectric with losses, parameters determ. in broad freq. range, inspection method 87−31602
liquid crystals dielectric and elastic props. determ., semiautomated capacitance meas. 87−70760
liquid dielectric const. meas. using discontinuity of cylindrical post in waveguide 85−48062
liquid materials, complex dielectric constants, wide range measurement in microwave region *(Japanese)* 85−31574
liquid materials complex permittivity, broad-band meas. equipment for 1 MHz to 1 GHz range 85−4078
liquid relative complex permittivity meas. using waveguides, in microwave freq. region *(Japanese)* 87−77373
liquids, in microwave region, using two- and three-layer dielectric resonators 88−60875
liquids, orthogonal phase-filter flow cell 85−14984
liquids with low dielectric loss, automated method using inclined X-band waveguide 86−24706
lossless stratified dielectric, dielec. const. profile determ., inverse EM problem solving appl. 85−37730
lossy anisotropic sheet, complex permittivity tensor meas. using standing-wave method *(Japanese)* 87−3721
lossy fibres and rods meas. at microwave freq. 87−56809
lossy materials, using open-ended coaxial-line probe 87−70758
lossy materials meas. using waveguide-fed series slot array 86−5488
low-loss casting resins at MM-wave freqs., complex dielec. const. meas. 85−20699
material permittivity meas. using nondestructive microwave reflectometry 86−55813
measurement techniques for voltage, current, conductivity permittivity etc *(Japanese)* 88−9856
MIC substrates, inhomogeneities and permittivity distrib. meas. 87−66566
mica crystals, water film content determ. using dielectric methods *(Russian)* 88−57845
microbiological objects dielectric props. monitoring, use of microwave bridge *(Slovak)* 87−35171
microdielectrometry, permittivity meas. of thin films 88−53827
microprocessor-based microwave dielectric measurementof liquids by waveguide plunger technique 86−31593
microstrip, effects relative permittivities meas. 87−45153
microstrip substrates, permittivity meas. using ring resonator, computer-aided method 87−17326
microstrips, dielectric constant meas. of substrates for microwave and VHF circuits *(Spanish)* 87−3720
microwave 87−77392
microwave broadband simultaneous complex permitt. and permeab. automatic meas. 88−74574
microwave characterization by the variable impedancemethod 86−18094
microwave complex permittivity meas., coaxial line technique 85−4076
microwave conductivity and permitt. by cavity perturbation method 85−52852
microwave county perturbation method 87−41590
microwave dielec. substrate meas. method 88−74575
microwave diffraction tomography for dielectric constant distribution meas. 87−29251
microwave ferrites, effective resonance linewidth and permittivity determ. 85−58863
microwave freq. charactn. of dielec. materials *(Chinese)* 85−58844
microwave frequencies, automatic material characterising instrument 87−70766
microwave interferometry for permittivity measurement up to 2500K *(French)* 86−31594
microwave meas. apparatus for temp. to 2300K, ceramics and fused quartz meas. 86−60322
microwave radiometry, inverse problem solution, regularisation 86−70209
microwave six-port reflectometry, quasi-optical, for dielec. meas. 86−55824
microwave substrate dielec. const., meas. methods 87−63494
microwave system for complex permittivity meas. 87−29255
microwave tomography, active, for dielec. props of body determ., cylindrical system and image reconstruction 88−54544
microwave using short-circuited waveguide method, elimination of ambiguity 88−4600
millimetre-wave materials, dielec. meas. techniques and expt. study 85−26467
mineral oil products, A/D convertor for precision meas. *(German)* 85−64321
minerals, dielectric constant and loss tangent meas. at microwave frequencies, report 87−49894
MM wave permittivity meas. at elevated temps. 86−18095
mm-region, simultaneous meas. of complex permittivity and permeability, frequency-domain technique 85−20711
MM-wave complex permittivity/permeability meas. by Fabry-Perot resonator 86−38523
MM-wave dielectric properties of materials 85−8947
MM-wave direct meas. of complex permitt. and complex permeab. of mag. materials 88−29619
MM-wave materials, dielec. props. meas. 85−20700
mm-wave meas. of birefringent crystalline sapphire and ceramic alumina 88−16438
moistened and pyrolized materials in strong RF fields, computer-aided permittivity meas. 87−29252
moisture meas. using microwaves *(French)* 85−31635
molecules relaxation time and dipole moments meas. in weak solutions, using cavity resonator 85−8935
monopole antenna appls. 86−44398

permittivity measurement continued
monopole probes for in situ permittivity meas., coaxial line excited 87−70765
multifrequency method of parameters determ. of dielectrics, data processing effectiveness 87−77401
multilayer dielectric structures testing by multifrequency methods 85−44817
multiple angle of incidence meas. for permittivity and permeability of lossy materials 88−4591
non-planar dielec. samples, complex permittivity meas. technique using open resonator 87−77375
noncontact measurement of smooth convex target, bistatic radar technique 85−4079
nonplanar dielec. samples, relative permittivity and loss tangent meas. using open resonator 88−29588
parallel-disk sample holder for dielec. permittivity meas. 88−16887
parallel-plate coaxial sensor for meas. at RF and microwave frequencies 86−44263
permittivity and conductivity profiles reconstruction, radially inhomogeneous slab, anal. 86−68668
PET films, very low freq. response using analog electrometer and microcomputer 86−34404
piston attenuator as calculable signal vernier for microwaves 87−29269
plane dielectrics with arbitrary thickness, permeability, nondestructive local UHF meas. 88−10102
polar solute containing solns., dielectric loss and permittivity meas. by 8 mm interferometry 85−8936
polymer film, relative permittivity and dissipation factor meas. using fixed noncontacting electrode system 86−70199
polymers, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
polymers, permittivity, loss tangent and refractive index meas., mm-wave technique 87−14486
polymers dielectric charact. meas., in mm wave range 85−48064
porous inorganic material dehydration and permittivity meas., microwave power heated 88−60877
PTFE laminates, test fixtures modification for dielec. const. determ. 88−60879
pulse and fluctuation methods, time dielectric and correlation spectroscopy 86−60323
Q band interferometer for high temperature measurements of solid and liq. permittivity 85−31571
radiometric ellipsometry method of surface layer thickness and dielec. props. meas., error calc. 87−73168
rectangular waveguide, complex permittivity tensor meas. by standing wave method 87−24406
relative dielectric constant dispersion at low and super-high frequencies, determ. 87−29253
relative permittivity meas., rapid method 87−70763
resonance curve for meas. dielec. parameters at microwave frequencies 88−68002
resonant microstrip technique, permittivity calc. using BASIC home computer program 86−5489
RF and microwave freq. techniques, comparison of meas. methods 87−49893
rubber, anisotropic sheets, complex permittivity tensor meas. and refl. charact. study 87−18429
rubber sheet, lossy anisotropic, meas. methods for complex permittivity tensor, reliability study *(Japanese)* 87−70764
RX high-mol.-wt. high-fire-point liquid dielec., dielec. props. 88−26623
sand complex dielectric constant meas., at 11 GHz 88−60876
sapphire, birefringent crystalline sample, by mm-wave technique 88−16438
semiconductors, photo-induced complex permittivity meas. 85−14983
shielded open-circuited coaxial lines as sample cell., error analysis 86−65256
short-circuited line method appl., uncertainty analysis 86−44381
six-point reflectometer meas. of complex dielectric constant 88−16437
six-port reflectometer for meas. complex dielectric constant 87−14487
skin, in vivo complex permittivity meas., open-ended coaxial line sensor technique 88−61364
snow, dielectric properties meas. in 3 to 37 GHz range 87−14483
snow, microwave dielec. charact., meas. 86−65254
soil, dielec. const. meas., four-probe method 86−38520
solid dielectric, relative permittivity and loss tangent meas. w.r.t. thickness, helical cavity use *(Chinese)* 85−4074
strip-centred microminiature coaxial cable, fabrication and performance 85−23174
submicron films, frequency dependences of dielectric constants and losses meas. 85−48065
substrate materials, dielectric measurements, microwave cavity perturbation technique 88−47662
teflon, six-point reflectometer meas., comparison with resonant cavity meas. 88−16437
thermosetting resin systems, dielectric props. meas. for cure process monitoring and control 86−65255
thickness-mode piezoelectric transducer constants, automatic meas. and calibration system 87−4188
thin-slab substrate, dielec. const. meas. using patch antenna resonant freq. method 87−8714
time domain reflectometry apparatus, ionic conductivity and permittivity meas. at high temp. 88−36179
time domain spectroscopy of layered dielectricmaterials 86−24707
time-domain reflectometry, single-reflection, conductivity limitations 87−29256
torsion pendulum appl. 87−70762
transmission technique for dielec. meas. of packaging materials in rectangular waveguide 88−13607
triple-enclosed cylindrical compartment for dielectric loss and permittivity meas. *(Russian)* 88−60873
tubular shaped dielectrics, permittivity meas. using surface waves 87−17302
vegetation, microwave dielectric spectrum meas. 87−63996
W-band free-space and waveguide dielectric prop. meas. 88−29591
waveguide sensor for nondestructive inspection of sheet dielectrics by freq. props. analysis 87−73169
waveguides, complex permittivity determ. from amplitude meas. 85−64246
wet soil permittivity obs. at 3 to 37 GHz and −50° to 23°C 85−64249
wideband dielectric spectrometer for liquid dielectrics meas. 86−5491
X-band, improvement in dielectric measurement technique ofopen-ended coaxial line resonator method 86−44389

permittivity measurement continued
X-ray dielectric constants meas. with coherent transition radiation 87−14485
$BaLaGa_3O_7$ piezoelectric crystals, charact. meas. 86−2475
BeO, between 100 and 300K and 9.3 GHz 85−43074
C filled anisotropic rubber sheets, refl. charact. and meas. of complex permitt. *(Japanese)* 86−29345
Co-Al_2O_3 composites, dielec. response 88−26626
H_2, liquid, density measurement system, dielec. const. meas. *(Chinese)* 88−68044
Li-ferrite thick-film ferrimagnetic pastes, prep. and characterisation 85−50122
Si_3N_4 fine powder, dielec. charact. determ. method 86−18078
ZnO varistor materials, dielec. response 88−26626

blood pH, pCO_2 and pO_2, online monitoring system using 2-way cyclic pumping of lactate Ringer 87−35382
blood pH monitoring system, microprocessor-controlled, performance in vivo 87−35383
blood plasma purification using affinity chromatography, pH monitoring dye 85−8989
borazon-gate pH-sensitive FET, expt. study 87−53537
catheter electrode, solvent polymeric membrane, for intraluminal meas. in gastrointestinal tract 87−63721
chemical transducers, based on semiconductor technology and fibre optics, pH and chemical compositions measurements *(Swedish)* 85−20586
continuous esophageal pH monitoring in babies 86−24822
cyclovoltammetric meas. using metal-metal oxide-based sensors 87−8770
data acquisition system selection, pH monitoring example *(Spanish)* 88−60611
EISFET pH sensor, electrolyte-insulator-semiconductor device 86−31361
electrode with FET differential amplifier *(French)* 88−53652
electrodes, low-drift, based on neutral carrier in PVC overlayered metallisations 86−44261
enzyme FET, diffusion-kinetic model and expt. verification 86−55666
enzyme mediated pH sensitive FET, nonlinear response problems 88−35959
enzyme modified pH sensitive ion-selective device 87−56895
fermentation plant monitoring *(French)* 87−49993
fiber optic pH sensor using LED source 88−36044
fibre optic pH sensing devices 87−46510
fibre optic pH sensor for seawater monitoring 88−36677
fibre optic sensor design, with rapid-response 87−54014
fibre optic sensor using liquid optrode joint 88−7908
fibre optic sensors, fluorescence based, small diameter, for continuous clinical monitoring, preparation 88−16719
fibre optic sensors for temperature and pH meas. in medicine 88−10351
fish farm, pH control system *(Russian)* 85−26500
foetal tissue pH meas., solid state spectrophotometer 86−60775
gastric pH, computer-aided technique for long-term monitoring 88−54479
gastric pH long term computerised monitoring 85−15265
glass electrodes, for high temp./pH appls. 85−26208
glass electrodes checking, meas. channels switching, pH meter testing appl. 85−48140
implantable ion-sensitive transistors for long-term pH sensing 85−43335
inorganic-gate pH sensitive ISFET, role of buried OH sites 85−14750
input amplifier for precision pH-meter *(Polish)* 85−4151
insulation, acidic gas emissions, influence on electronic components 88−64855
Integrated Lake-Watershed Acidification Study database documentation 87−29955
intelligent acidity/ion/temp. meas. instrument, computer-based *(Chinese)* 88−67670
intracellular pH determ., stainless steel as an electrode material 88−68345
intraoral plaque pH, telemetry meas. system 85−48220
intravascular electrodes for blood gas monitoring *(Japanese)* 85−15268
ion selective device, enzyme-modified, response, effect of buffering capacity of analyte soln. 85−52904
ion sensitive field effect transistors, pH sensitivity *(Japanese)* 86−47566
ion-sensitive FET, pH-selective, glucose oxidase modified 86−24512
ion-sensitive FET for ionic concentration and pH meas. 85−14796
ion-sensitive FETs, monolithic probe development for pH and ionic conc. meas. appls. 85−23811
ion-sensitive-FET sensors, struct. and characts. *(German)* 85−47927
ISFET, pH calibration curve, automatic meas. system *(Japanese)* 85−64141
ISFET, sensitivity control by chemical surface modification 86−31405
ISFET, theoretical bases *(German)* 86−31705
ISFET biosensors development and appl. 85−53087
ISFET incorporated in a differential amplifier 88−53605
ISFET microliter titrator, chemical sensor-actuator integration 86−55665
ISFET pH sensitive FM transmitter using hybrid fabrication techniques 86−55719
ISFET pH sensor, sealing techniques and operating characts 88−4404
ISFET pH-microprobe development for in vivo ion conc. meas. in blood *(Korean)* 86−60713

pH measurement continued
ISFET sensor for dental plaque meas. 88−48093
ISFET temperature characteristics, theory and expt. verification 87−56894
ISFET with SiO_2 gate as pH selective membrane 87−6726
ISFET-based microlitre titrator for pH measurement 86−31400
ISFETs with Si_3N_4 and BSG insulators for pH sensing appls. 87−70564
JP-1 microprocessor based ionometer, development *(Polish)* 85−43124
Kraft paper manuf., continuous pH measurement and control in tall oil production 85−22023
laboratory pH meter with microcomputer anal. of meas. *(Slovenian)* 86−50242
lake acidification meas., integrated palaeoecological approach 87−35503
medicine, ambulatory pH recording system with computerised anal., 24 hr recordings 85−9129
meter for acidity/alkalinity meas. 85−43024
micro ISFET for biomedical research 87−57057
microelectronic pH sensor hybrid, fabrication 87−29348
microelectronic sensors, $Si_3Ni_4/SiO_2/Si$ electrodes stability obs. 85−42951
miniature chemical optical fiber sensors for pH measurements 88−36045
model TM 20 BG pH analyzer with online self-diagnostic testing *(Japanese)* 88−60956
multi-biosensors enzyme-immobilised membranes fabrication, based on pH-selective ISFET 88−35956
multi-enzyme electrode using hydrogen-ion-sensitivefield-effect transistors 86−32226
multiple ISFET integrated with CMOS interface ccts. *(Japanese)* 88−47504
oesophageal and gastric in vivo pH meas., Ir/IrO_2 electrode 85−20885
oesophageal pH monitoring, 24 hr, with monocryst. Sb electrodes, accuracy and choice of procedures 87−14829
oesophageal/oesophagogastric pH-monitoring, computerised system *(Italian)* 88−29943
online measurement developments 85−14975
online sensing systems 86−44249
optical fibre pH sensor model, physiological range 88−16711
optical fibre sensors chemical sensing, particularly in biomedical field, areas for use and techniques 87−18603
optoelectronic prototype meter 86−38604
parylene gate ISFET sensor, surface modification with crown ether compounds 86−55685
PH81/82/83 portable microprocessor-based pH meters *(Japanese)* 87−63409
pH-ISFET, interfacial potential between ion sensitive film and electrolyte solution *(Chinese)* 88−60668
pH-ISFET, temp. characts. and comp. *(Chinese)* 88−60669
pH-ISFET performance rel. to process conditions of pH-sensitive Al_2O_3 films 88−53924
power plant boilers, pH measurements of high-purity water 85−58935
practical points for pH and redox monitoring 87−29346
precipitation pH electrometric determ., theory and practice 87−50549
probe simulation for development/repair purposes *(German)* 85−52724
seawater pH determination, shipborne flow-through system 88−48329
sensors and actuators, solid-state, conf., Philadelphia, PA, USA (Jun. 1985) 86−26480
single-unit pH-sensitive double-barreled microelectrodes for extracellular use 85−15266
solar pond instrumentation system develop., meas. system for pond perform. eval. 88−22478
standardisation, NBS practices 88−67631
thick-film hybrid pH sensors 87−70603
transducers for pH and pX meas. *(French)* 85−8822
twisted pair optical fiber pH sensors, design and construction 86−55716
UNILOC 1054, conductivity and pH meters *(Spanish)* 88−22670
Z80-EMUF measures voltage and pH-value using ADC ICL-7109 *(German)* 85−28581
ZrO_2 gate pH-sensitive field effect transistor 85−37557
Na_2O-CaO-SiO_2, soda lime glass-metal contacts in solid state glass pH sensors, temp. depend. AC impedance studies 87−77444
Pd-PdO film potentiometric pH sensor, medical appl. 86−44622
SF_6 acidity determ. using dry indicator powder, appl. in electrical equipment 87−67618
SO_2 removal plant for coal-fired power stations, control technology study *(German)* 88−62157
Sb pH microelectrodes, recessed and unrecessed, O_2 sensitivity 88−74796
Si ISFET, differential type, pH responses *(Japanese)* 88−71604
ZrO_2 pH sensors, high temp. stabilised, performance improvement 86−11544

phase angle meters *see phase meters*

phase changers *see phase convertors*

phase changing circuits
see also phase convertors; phase shifters
AC voltage phase-control circuit, with interphase variable-ratio autotransformer 85−27478
adjustable phase delay cct. with 650° max. 86−14079
automatic phase changer for electronic music appl., design and construction *(Spanish)* 86−49900
control signal phase shifting in 90° steps 85−23064
discrete phasing of standard RF pulse trains 88−16029
three-phase induction motors, phase changer for single-phase supply operation *(German)* 86−66070
TLE 3102 phase-splitter for small AC motor speed control *(German)* 87−65813
wideband phase-splitting networks, switched capacitor realisation 86−8375

phase comparators
adaptive phase comparator cct. 88−50226
adaptive phase comparators, novel cct. design and implementation 87−52452
all digital phase-locked loop with nonlinear multilevel quantized phase comparator 85−33726
biological objects, images, phase comparator at 2.5 GHz 86−50489
circuit design for phase difference meas. *(Spanish)* 85−48054
different protection scheme stability, effect of current transformer core transients *(Russian)* 86−70717
fractional-horsepower motors, PLL speed regulation using phase comparators 85−5127
K-3 VLBI 26 m antenna system delay time calibration equipment *(Japanese)* 86−37970
measuring instruments and tools at 1985 Electric Installation Show *(Japanese)* 86−56504

phase comparators continued
PCB parasitic line detection 85−1131
phase meas. assurance and reference standards 88−22398
quadrature detection, circuit based on bistable switch 86−841
relay protection, phase comparison protection by ferrite-cored current transformers *(Russian)* 86−56490
static impedance relays, metering characts. for maintaining impedance of power transmission lines *(Spanish)* 85−43662
tan-lock phase detector, choice of structure parameter 85−44934
underwater sound velocity meter calibration and accuracy 88−5195

phase conjugation (optical) *see optical phase conjugation*

phase-contrast microscopy *see microscopy*

phase control
2-phase servomotor, microprocessor-based inverter driven, phase control method *(Korean)* 87−72480
3-phase convertor pulse-phase control microprocessor system *(Russian)* 88−50290
4-quadrant convertor, asymmetric, anal. and control, for supply DC current 85−32617
5MJ SMES, active and reactive power control 88−75961
110 kV distribution networks, automated load regulation using centralised telecontrol transmitters *(Czech)* 87−35615
130 kHz 7.5 kW current source invertors using static induction transistors, control for induction heating 87−22580
400 W tristate switching controller for reciprocating linear motors 87−22413
450 KHz multi-kilowatt resonant power supply with phase-shifting regulation technique 88−11310
AC electric motor vehicle, microcomputer based control system development 86−6700
AC locomotive, VL80R, amplitude-phase control simulation *(Russian)* 86−7251
AC motor selection and solid-state control for varying applications, book 87−72681
AC power control circuit using switcher technology 85−54664
AC power phase control using triac cct. 85−22638
AC rolling stock thyristor phase controlled rectifier harmonic current reduction 86−33786
AC voltage phase-control circuit, with interphase variable-ratio autotransformer 85−27478
AC voltage regulator using PWM technique 87−52352
AC waveforms digitisation, improved methods for timing 88−16249
active filters, variable charact. input current harmonics 88−63794
air cooled condensers, fan speed control methods using thyristor invertors *(Japanese)* 85−27294
asynchronous cascade rectifiers, subordinate control system *(Russian)* 85−60279
atomic clock, frequency and phase control by external reference, estimation and loop design 87−63209
automatic phase control systems, interference analysis 86−68804
BR Class 91 25 kV electric locomotives, power and control equipment 87−79113
bridge convertor phase currents harmonic composition, influence of control-pulse balancing 86−45522
bridge thyristor convertor, asymmetric regimes due to pulse-phase control system malfunction 87−64690
cavity vircator amplifier, priming and phase locking study 88−50586
chopper fed single phase induction motors, characts. 86−45432
communications systems, automatic phase control devices, with equiprobable opposite signals 87−48317
constant-frequency phase-controlled resonant power processor with HF AC link, realisation using phase modulation 87−43236
converter using thyristors and phase control IC (TCA 785), cct. 86−20296
crane drives, convertor control *(German)* 87−16075
cycloconvertor, CVVF type, control scheme development 87−4795
dAC lends digital control to phase-shifter 86−52974
data demodulation scheme using decimation phase control 87−23997
DC drives with microcompressor control 86−26341
differential-current electronically-variable current-mirror phase-shifter 88−56817
dimmers for lighting control, types 85−29204
dimmers for lighting using phase control, operation and applications 85−21923
disc rotor synchronous machine control with PLL synchronisation and phase shift 86−6717
doubly-fed induction motor digital control 87−22375
EHF TWT, octave bandwidth, control of phase and gain deviations 87−45533
electric locomotives nonsinusoidal supply voltage load performance anal. *(Russian)* 86−61784
electric motor supplies, phase control *(Russian)* 87−72157
electronic light regulator with sectoral phase control *(French, German)* 86−33843
FM synthesizer, jitter-free, based on frequency/phase-locked loop 87−14355
GTO AC-DC converter with input displacement factor and output voltage control 88−30892
GTO PWM invertors using centre-tapped reactors for parallel running 85−49010
gyrotron oscillators, phase locked, 10-85 GHz range, NRL SDIO/IST programme 88−50579
HV phase-control thyristors, manufacture 88−64547
HV phase-control thyristors, manufacturing technology 88−26244
HV transmission lines, controlled and self-compensating, using phase-regulator *(Hungarian)* 87−57604
HVDC transmission system, digital simulation of pulse-phase control circuit 87−30157
induction drives, low-power controlled, mech. characts. formation *(Russian)* 85−65244
induction furnace with phase control of alternating voltage, current calc. *(Russian)* 86−66495
induction machine phase balancing by unsymmetrical thyristor voltage control 85−27427
induction motor soft wye-delta starting by three-phase pre-excitation 87−43038
induction motors, performance anal. 85−5103
inductor-convertor bridge, three phase, simultaneous phase and frequency control 86−12942

phase control continued
industrial phase control, capacitor bank calc. and selection for power factor correction *(Italian)* 88−68730
integral cycle switching controller for 3-phase induction motors 88−48950
inter-injection locking−a novel phase control technique for monolithic phased arrays 88−27678
inter-injection-locked oscillators, radiation coupling 88−19378
interferometer heterodynes, interferometric phase synchronisation 87−34691
inverted rectifiers, microprocessor based phase-pulse control system *(Russian)* 88−49034
ion laser power source, controlled, operating principle and characts. 87−9654
Josephson oscillators, voltage tunable, phase-locking in distrib. arrays 87−67876
Josephson tunnel junctions, mutual phase locking of oscills., expt. study 87−67877
L-band FET phase/amplitude control module, construction and performance 85−17860
LEP accelerator, RF synchronisation using feedback phase control system 87−63603
lighting, FET phase controlled dimmers, comparative study 86−45813
line-commutated cycloconvertors with compact μP-based controller 87−43250
linear induction motor, positioning characts. 85−65280
linear induction motors, phase angle control of repulsion/drive force 85−32487
linear two-phase servomotor with disc armature, phase control 86−61532
machine tool electric feed drives improvement 88−62669
MAGLEV linear synchronous motor supply, cycloconvertor construction and control characteristics 86−66441
magnetron atomisation system, regulated inductive-capacitive converter based power source with phase control 86−45515
magtronic regulators for rectifier/inverter phase control appls. 86−61636
maximum likelihood receiver for an orthogonally-multiplexed QAM system 85−13578
microprocessor based controller for phase controlled rectifier connected to weak AC system 86−45581
microprocessor-based controller for phase-controlled rectifier, performance and stability anal. 87−43198
microwave oscillator, synchronised type with supplemental external feedback, phase stabilisation technique 87−45251
microwave solar interferometer of Beijing Observatory, local oscillator system using two path method *(Chinese)* 85−20283
MM-wave linear/digital phase-lock ccts., techniques 86−35080
modem receiver using CCITT V.29 16 ASK/PSK modulation system *(German)* 87−40530
motor control with smart starter for soft start and soft with power savings 87−51163
motor phase locked speed control system with a sample-and-hold phase detector 88−55279
multi-pole rectifier convertor ccts. using thyristors and TCA 785 IC phase control 86−34526
multiphase control-pulse generators DE 87−554
multiphase convertors, universal microprocessor controller for thyristor phase control 87−36021
noninductive load, current taken from sinusoidal voltage source control *(German)* 88−17717
optically controlled coplanar waveguide phase shifter, semiconductor substrate, expt. anal. 88−25411
parallel-resonant converter, freq. domain model 88−55461
permanent magnet synchronous machines, 180° inverter fed, phase control 88−5666
permanent magnet synchronous motors, current phase control methods considering saliency 88−75595
phase-pulse control of thyristors using microprocessors *(Russian)* 86−21529
photovoltaic optocouplers and phase control 87−46707
power feedback linac, adaptive optimal phase-following system under freq. stabilization 88−54054
power system, control stabilisation using Lyapunov function 86−32653
power systems, closed loop control of phase angle regulators using programmable controllers 85−59613
power systems, phase shifter distribution factors and lineload alleviation 85−59607
programmable four-channel generator of sinusoidal signals *(Czech)* 87−14353
pulse convertor in bridge connection, possibility of phase control *(Slovak)* 86−61593
pulsed DC convertors with frequency-phase control, anal. *(Russian)* 86−19365
PWM HF resonant invertors using static induction transistors and thyristors, phase difference angle control mode strategy 87−73321
quad 3200 Hz oscillator frequency/phase synchronisation 87−5710
quadrature digitiser system, fast calibration 88−12465
rectifier converter systems anal., phase regulator for AC machine representation 87−78603
rectifier convertors, dynamic model of pulse-phase control system 85−44101
regenerative thyristor induction propulsion system for funicular railway applications 85−27738
relativistic magnetrons, phase locking expt. 88−50582
semiconductor laser, frequency stabilised, automatic phase control of returned light 85−29819
series resonant convertors with phase shift control, computerised perform simulation 88−55504
series resonant DC-DC convertor with paralleled power modules, phase staggering control 87−78797
series-resonant DC-DC converter with paralleled power modules 88−55458
shaded-pole induction motors, thyristor phase control 88−17579
single-phase induction motor control, integral-cycle switching approach 88−17598
single-pole autoreclosure`ultra-high-speed phase selection for 500 kV transmission networks 86−51801
six-pulse bridge convertor, external commutation on DC side, operation and control characts. *(German)* 87−22511
small UPS using phase control 88−30862
SQUID, four-junction, amplification by phase locking, microwave operation 85−18602
squirrel cage motor, converter thyristor control system, freq. and phase control 87−58073
SRCI induction motor drive, angle control 88−31089

phase control continued
starting-regulating device using reversing commutator and squirrel-cage motor, thyristor control algorithm 87−58071
static compensation of the reactive power component, phase angle correction *(German)* 86−32668
static compensator using programmable controller for load, voltage and phase control 88−23333
static VAr compensators with individual load control, harmonic performance 86−12323
steel contact testing US phased array control instrument 87−374
superconductive magnetic energy storage, three-phase inductor-convertor bridge cct. 85−49130
switch mode convertors with frequency-phase control systems 87−22514
synchronous motors, automatic control using microprocessors *(Romanian)* 88−23878
tape materials production line, phase control of multimotor electric drives *(Russian)* 86−66379
testing device for phase control electric contacts *(Rumanian)* 85−40278
three phase GTO converter with PWM, asymmetrical pulse pattern 88−69578
three-phase automatic reconnection efficiency improvement *(Russian)* 88−5399
three-phase bridge convertor operation in AC network, short-circuit current response *(Slovak)* 86−45504
three-phase controlled rectifier, digital phase control circuit *(Korean)* 87−72266
three-phase electronic voltage regulators for high-power-factor industrial heating *(French)* 88−62784
three-phase invertors, incremental method of PWM 87−43232
thyristor contactor with switching phase control for asynchronous motor generator braking *(Polish)* 87−22338
thyristor convertors, phase control systems, majority redundancy *(Russian)* 85−10006
thyristor convertors, phase controlled, 3-phase, 6-pulse, regenerative control range extension 87−15919
thyristor phase control IC TCA 785, config. and AC-DC power convertor appl. *(French)* 87−44530
thyristor regulators for three phase supply systems for single phase installations 87−9660
thyristor-switched reactive power compensator, cybernetic model of phase control system *(Russian)* 88−30302
timed phase control ccts., 0.5-2 hr, 60 w, using SAB 0529 timer, appls. 87−961
TLE 3102 phase control IC, motor control with electrical isolation of operator module and power unit 88−37180
transformer tap settings for optimal load flow control 85−59594
triacs, phase-controlled circuits *(French)* 87−6684
TRISTAN 508.58 MHz RF reference line, phase stabilization 88−54063
TRISTAN main ring, low-level RF system, parameters and control aspects 88−54062
two-field-winding alternator, with flux decaying, transient stability control *(Chinese)* 85−32454
two-phase sinusoidal digital generator, with automatic ratio and phase control 87−14359
universal motor speed control using real-time microcontroller 86−51867
UPS systems, PLL method for freq. and phase control 88−69595
variable resonator cct. for wide-band control of signal phase *(Russian)* 86−67476
variable-speed constant-torque induction motor with microcomputer-controlled cycloconvertor 87−43016
vector analyser, adaptive control of frequency and phase 87−3536
VL 80R electric locomotives, EM processes for continuous voltage regulation, modelling of operation 86−26365
voltage source invertor-fed permanent magnet synchronous motor drive anal. 85−44220
VSB multilevel transmission, automatic phase control circuits using equaliser tap weights 85−13457
VTR automatic phase control cct., config. and operation *(Spanish)* 85−58392
VTR servo phase control IC design *(Korean)* 86−44030
AlGaAs-GaAs DFB-TJS external-cavity laser with optical phase control loop, spectral linewidth 87−12467
GaAs FET low-noise amplifier for E/F band, externally controlled attenuator and phase shifter 87−24484
Na high-press. lamp, phase-control ballast 86−26400

$AgInS_2$, semicond., cryst. growth and chem. composition 85−16910
AlGaInAs layers on InP, LPE growth 87−16622
$AsSe-As_2Se_3-TlAsSe_2$, polythermal cross sections, eutectic equilib. 85−1327
Au-Fe-Ni permanent magnet alloys, mag. props., microstruct., ornamental appls. 85−56124
Au-Si mixture films, oxidation behaviour, appl. for integrated circuits 87−60316
$AuGa_2$-GaSb interface, metal film MBE growth, AES, LEED, EELS, SEM, X-ray microprobe anal., Rutherford backscattering obs. 86−1812
B_xC_y CVD phase diagram, amorphous and cryst. phases 85−54521
CdHgTe layers, liquid phase epitaxy and phase diagram determination 88−11991
Cu-Cr alloys, arc melted, as contact materials for vacuum interrupters 88−62526
Cu-In-Se system phase relations, growth of $CuInSe_2$ single crystals 86−57429
$CuInSe_2$-CdSe system, phase diagram and flux cryst. growth 85−16913
Ga-As-Sb system, phase diagram, LPE growth of GaAsSb 86−46328
GaAs, MBE, surface phase diagrams, appls. 87−36707
GaAs, metallisation, phase equilibria, thermodynamic anal. 87−60356
GaAs, undoped, liq. encapsulated Czochralski growth, non-stoichiometry effects 86−52435
GaAs/GaPAsSb, double heterostruct., LPE, lattice matching, X-ray diffr., luminesc. 87−32306
GaAs/metal interfaces, stability, phase diagram anal. 88−44588
$GaAs_{1-x}P_x$, precipitation of solid solutions, partial-pressure diagrams 86−26884
$Ga_{1-x}In_xAs_ySb_{1-y}$ LPE layers lattice-matched to GaSb (100), photoluminesc., 1.71 to 2.33 μm 86−13755
$Ga_{1-x}In_xAs_ySb_{1-y}$ system, low temp. phase equilib. 87−23652
HgCdTe, infinite-melt vertical LPE from Hg-rich solns. 88−31758
$In_{1-x}Ga_xAs$, mixed crysts., diffusion limited LPE growth 88−38156
In-Sb, optical disc medium, write-erase mechanism 88−13787
InAl(Ga)As, MBE grown, photolum., minority carrier lifetimes and DLTS 88−49809
InAs, MBE, surface phase diagrams, appls. 87−36707
InGaAs layers on InP, LPE growth 87−16622
$In_{0.53}Ga_{0.47}As$ LPE growth on InP, In-Ga-As phase diagram 85−60961
InGaAsP on GaAs, phase diagram and LPE 87−52132
$In_{1-x}Ga_xAs_yP_{1-y}$/(100)InP, lattice matched, LPE, phase diagrams, miscibility gap 85−5980
$In_{1-x}Ga_xP$ layers, LPE, low temp. growth, thermodynamic props. and photolum. 86−7795
n-InsB surface barrier diode, phase diagrams of oscillation processes *(Bulgarian)* 86−2102
$LiNbO_3$:MgO, melt growth and charactn. 87−31475
Li_2SO_4-$LiNbO_3$, binary system for solid state battery appls. 88−55577
Mg-Ge, p-T-x diagrams, vapour press. at boiling point 85−1349
Mg-SI, p-T-x diagrams, vapour press. at boiling point 85−1349
Mg-Sn, p-T-x diagrams, vapour press. at boiling point 85−1349
Nd-Fe-B permanent magnet, properties and fabrication procedures *(Japanese)* 86−42145
Nd-Fe-B permanent magnets, mag. props. and prep., review 87−60789
Ni-Si, lateral diffusion couples, two polymorphs, microstructure 86−28042
PLZT ceramics *(Japanese)* 87−331
Pb-Sn solder, Sn content from phase diagram, DSC obs. 85−28257
$Pb_{1-x}Cd_xS$ solid solutions, cryst. growth studies 86−383
PbS-CdS, region of solid solutions 85−11962
$Pb_{1-y}(Se_{1-x}Te_x)_y$, single crystal growth, solidus surface coordinates 86−34279
$Pb_{1-x}Sn_xTe$, Bridgman-grown single crysts., precip. study by TEM 87−45632
RuO_2-Bi_2O_3-PdO system phase equilibria, possible reactions during firing of thick film ccts. 88−71250
Si-SiO_2 phase diagram, O_2 metallurgy in Czochralski grown Si crystals 85−60941
Si_3N_4-Ti, reaction under rapid thermal annealing 87−18031
SiO_2 glass, CVD, F implantation 86−52515
Sm-Co-Cu-Fe-Zr magnet alloys, phase diagram, high temp. transformation, coercivity 88−51192
Sm-Zr-Co permanent magnet, phase stabilisation and coercivity rel. to Zr addition *(Japanese)* 88−51243
$SmCo_{5-x}B_x$, rapidly quenched alloy ribbons, struct., hard mag. props. 88−51197
$Sm(Co_{1-x}Fe_x)_4B$, rapidly quenched alloy ribbons, struct., hard mag. props. 88−51197
SnTe-ZnS, limited reciprocal solubility 85−11964
Ti:$LiNbO_3$ optical waveguide fabrication, characterisation of TiO_2, $LiNb_3O_8$, $(Ti_{0.65}Nb_{0.35})O_2$ compound growth 85−62310

phase diagrams continued
Ti-Al-V (6, 4 wt.%) bars, US inspection, noise levels rel. to texture and microstruct. 85−44806
$TlAsSe_2$-Se-TeSe, polythermal cross-sections 85−1328
$TlInSe_2$-$TlSbSe_2$ system, physio-chemical props. and photoconductivity *(Russian)* 88−51659
$TlInTe_2$-$TlSmTe_2$, electrophysical props. 85−11963
$ZnSe_xTe_{1-x}$, thin films, decomposition of solid solutions 85−1303

phase diagrams, magnetic *see magnetic transitions*

phase equilibrium diagrams *see phase diagrams*

phase-locked loops
1 Mbit/sec CMOS data separator and write precompensation cct. for floppy disc drives 86−67294
4-MHz CMOS continuous-time filter with on-chip automatic tuning appl. 88−56744
10-20 MHz double loop PLL synthesizer, anal. and design 86−40956
16 QAM carrier recovery PLL with control mode selection function, design and charact. *(Japanese)* 85−47416
18/60 MHz system, carrier frequency generation and derivation for TV transmission 85−63801
24 GHz transmit-receive system, phase locking of Gunn diodes 86−64873
35 GHz phase-locked Gunn source based on current humpphase detection 86−52713
250 MHz test system's timing and automatic calibration 88−12282
350 MHz bipolar monolithic PLL 88−70605
350-GHz phase/frequency locked loop for use with a carcinotron backward wave oscillator 87−13811
450 KHz multi-kilowatt resonant power supply with phase-shifting regulation technique 88−11310
500 MHz dual modulus prescaler, ultra low power 86−8062
700 MHz monolithic phased-locked demodulator 86−14075
3200 series MIC oscillators, PLLs steady microwave DROs 87−52847
4046 B CMOS IC chip 85−28418
A/D convertor system PLL *(German)* 88−6706
AC magnetometer, microcomputer-controlled, with phase locked data acquisition system 85−37433
AC voltage controller, linearly controlled three-phase firing cct. using PLL 85−54649
acoustoelectronic convolver 87−44688
acquisition performance measure 87−23995
adaptive control method of a digital signal processing DPLL FM demodulator under fading environment 88−45858
adaptive digital signal processing type PLL, config. and operation *(Japanese)* 88−44098
adaptive filtering of moving spectrum signals *(Czech)* 86−48896
adaptive phase comparators, novel cct. design and implementation 87−52452
adaptive phase locked loop for clock extraction inequipment complex of Iskra-PCM 30 *(Slovenian)* 86−17168
adaptive PLL using freq.. and phase processing technique 87−24003
AFC system, phase-locked, harmonic frequency divider, vertical cycles anal. 85−22728
AFC system with harmonic frequency divider 87−44689
AFC systems, programmable microprocessor calc. 87−59257
AFC systems, pulsed phased-locked, variable control period, stability anal. 85−22727
AFC systems, two-path phase-lock, anal. 85−36592
AGC-aided PLLs, lock-in, tracking and acquisition 85−54744
all digital phase-locked loop with a wide lockingrange 86−67113
all digital phase-locked loop with nonlinear multilevel quantized phase comparator 85−33726
all digital PLL for digital signal processing 88−38426
all digital PLL with wide locking range 87−73369
all-digital PLL design 88−70608
AM radio receivers, high dynamic range PLL system for synchronous detection 86−11240
AM/FM radio, PLL, microcomputer control *(Italian)* 88−60394
amplitude-comparison monopulse radar system, interfering second target influence 85−42656
amplitude-linear PLL using 2 V supply, implementation in 4 μm CMOS 87−16945
analogue electronic circuits, book 86−57080
analogue ICs with PLL, automatic capture range meas. 87−3411
analogue phase detector without lock breaking in PLL cct. *(German)* 86−843
angle modulation, system assessment theory, book 87−36310
antihangup circuitry phase-acquisition aid 86−8060
approximation frequency-network synthesis 88−25039
asymptotic analysis methods 88−45848
ATV-FM driver for the 13 cm band 88−47304
automated microwave sweep-frequency system using klystrons and backward-wave oscillators 87−52863
autonomous and nonautonomous ccts., chaotic phenomena study 88−38366
bandwidth noise inputs 87−65950
BASIC program for analysis 86−57725
BiCMOS low-power 128-MHz VCO for monolithic PLL ICs 88−50050
BiCMOS PLL IC, low power dissipation design with 128 MHz clock 87−59260
binary phase-locked loop, Markov model *(Polish)* 87−52462
binary quantised digital, aided-acquisition technique, performance improvement 85−17217
binary quantized first-order DPLL, modification, performance *(Korean)* 85−660
bipolar integrated circuit for fast automatic alignment of TV tuners 88−15759
bit synchroniser for digital transmission of a video signal *(Slovak)* 88−34941
burst mode operation in presence of noise 88−617
CAD, software modelling and packages 88−56523
cageless reluctance motor design and load-angle feedback control strategy 86−45385
capacitance meter with PLL chip VCO 86−18016
carcinotron oscillator, 1000 GHz, using quasi-optical harmonic mixer 88−57267
centimeter, millimeter, and submillimeter wavelengthfrequency synchronizers 86−46631
centralised telecontrol transmitters for 110 kV distribution networks, automated load regulation *(Czech)* 87−35615

phase-locked loops continued
charge-pump summing network for +5 V PLL supply, peripheral storage devices appl. 85−561
Chinese power-dispatching microcomputer-based remote control device *(Chinese)* 87−50878
circuit CAD *(German)* 88−70596
circuit emulation 87−37089
circuits, design *(German)* 85−33728
clock and recovery cct. with high input jitter tolerance 88−70606
clock generation cct., PLL-based; design, performance and CMOS implementation 87−44994
clock recovery cct., optimum parameter determ. 88−44094
clock recovery from high speed data 87−31768
clock recovery scheme for ternary duobinary AM/PSKsignal 87−2504
CMOS 2 V amplitude linear PLL 87−16959
CMOS CPU chip, dynamic control of MCU current usage 86−52859
CMOS integrated continuous-time filters for video frequencies 87−73538
CMOS integrated transceiver with analog PLL, design for 32 Mbit/s optical fibre data link 87−3207
coherent lightwave communications, modulation and detection 86−64978
coherent optical receivers, pilot carrier, PLL anal. 86−17370
complex zeros, phase-plane behavior 86−14073
computer aided anal. and design, parameter software tool 87−37087
constraint condition of the loop filter for the convergence of random jitter accumulation in digital repeater chain 88−46841
Costas loop, lock detector performance, effect of gain and phase imbalance 88−619
Costas loops, 4-phase modified, in-phase and quadrature channels reversal 86−17349
Costas loops, data-related false lock phenomenon 88−52356
cross-coupled PLL interference canceller performance 87−37083
crystal oscillator phase-locked to standard freq. station, freq. stability considerations 87−550
CSSL-IV appl., analog charge-pump phase locked loop, modeling and simulation 88−50065
CW interference effect on synchronisation capabilities, time delay incorporation 88−50066
CW interferer, performance 85−39970
cycle slip rate, synchronisation loop with arbitrary phase detector charact., asymptotic expression 85−22719
data transmission on radio, modulation theory, FM sidebands and carrier shift data 87−19379
DC micromotor control *(German)* 87−64636
DC motor electric drive, high-performance, with phase-locked loop regulation 85−44217
DC motor speed control using a phase-locked loop 85−16046
DC-DC convertors in hysteretic current mode, frequency stabilisation 87−22585
DCF77 receiver, 10 MHz timebase clock with PLL for frequency counters 85−36902
decision and clock recovery circuits for gigahertz optical fiber receivers in silicon NMOS 87−46202
delay integrator 85−33727
delay sampled PLL, stability criteria *(Chinese)* 85−54738
delay-locked loop for pseudorandom noise sequences with bit errors, performance anal. *(Japanese)* 85−28423
delay-locked loops with different correlator charact., pull-out freq. calc. 87−566
delayed PLL, pull-in charact. 87−564
delaying feedback, stability 87−10738
demodulation, pseudonoise, accurate tracking in adverse SNR conditions 85−57217
demodulation of angle-modulated signals with PLL, nonlinear distortion *(German)* 88−8656
Derived Rate Rejection PLL, theory, modified type *(Chinese)* 88−25059
design 85−54740
design aspects *(German)* 88−616
design program, for HP 9825 85−10926
design techniques 88−56522
design verification, open-loop checkout 87−37088
digital, 2nd order, with imperfect integrator, design and implementation 87−44703
digital, performance in tracking NRZ coded binary signals 86−62496
digital and analogue first-order PLL comparison 85−652
digital bit synchronizer with pattern jitter compensation *(Spanish)* 87−65954
digital delay lock loop variable structure control techniques 87−52463
digital freq. mixer, phase locked type *(Chinese)* 88−56517
digital frequency dividers with fractional variable division factor, phase stabilisation 85−6478
digital frequency synthesizer with pulse frequency-phase discriminator, dynamic processes 85−6203
digital multiplexing method for stationary digital audio tape recording system *(Japanese)* 86−44066
digital phase locked loop cct. anal. *(Chinese)* 88−56516
digital phase sync system, transients study, state space method 85−11110
digital phase-lock freq. synthesizer, settling time improvement 87−24294
digital PLL, appl. to symbol timing in high-speed data modems *(Korean)* 85−3256
digital PLL, design *(Japanese)* 87−52456
digital PLL, first order type with linear phase detector *(Japanese)* 85−61171
digital PLL, loop delay compensation method *(Japanese)* 87−31761
digital PLL, optimum digital filters appl. 87−52464
digital PLL, third-order type with improved lock-in range and stability *(Japanese)* 88−44097
digital PLL, VLF tracking 87−5724
digital PLL applied to local digital transmission system for timing recovery *(French)* 86−49131
digital PLL at low SNR, model *(French)* 86−57724
digital PLL concepts for the demodulation of FM signals 87−569
digital PLL config. for PCM network synchronisation *(Japanese)* 88−46426
digital PLL for non-harmonic signals, first-order system, acquisition and steady-state study 86−845
digital PLL for tracking MRZ signals, design and performance study *(Japanese)* 86−14070
digital PLL freq. synthesizers, practical design approach 87−37045
digital PLL lock detection cct., config. and appl. 88−63574
digital PLL with negligible and binary quantisation effects, acquisition behaviour 85−28422

phase-locked loops continued
digital PLL with sawtooth characteristics, pull-in range anal. 87−65947
digital PLL with wide locking range, design using digital VCO *(Japanese)* 86−46632
digital PLL with-rotational freq. comparator, improved design and phase error anal. 85−22729
digital PLLs, PLLSIM BASIC program for transient response simulation 88−38423
digital radio link, 22 GHz radio subsystem design using direct-division PLL 88−73802
digital radio links transmitters, PLL techniques utilisation 87−34733
digital regenerators chain, max. tolerable input filter anal. 87−37071
digital signal processing type adaptive phase-locked circuits controlling loop-orders 88−46097
digital signal processing type PLL, linear phase detection range extension technique *(Japanese)* 86−20387
digital tanlock loop performance improvement 87−44691
digital transceiver equipment, PLL technique for jitter suppression, LAN repeater/interface unit appls. 85−36821
digital tuning and display system with a onechip microcomputer *(German)* 86−67108
dimensional design techniques *(German)* 87−59259
direct sequences receiver synchronisation aided by LMS adaptive filtering 88−28667
direct-digital power-law controller for thyristors 87−64696
disc controller for 68000 family, Signetics SCN68454/SCB68459 85−11387
disc rotor synchronous machine control with PLI. synchronisation and phase shift 86−6717
discrete PLL, phase slipping, chaotic oscill. 86−67111
discrete PLL freq. synthesizers, spectral charact. 88−598
disk controller design using Signetics SCN68454 and SCB68459 ICs 85−6398
Doppler ultrasonic flowmetry, signal analysis using PLL 87−29987
downconvertor, microwave sampling effective for ultrabroadbandfrequency conversion 86−53024
DPLL, digital FM receiver design and optimisation 86−11249
DPLL, dual-loop, digital signal processing appl. 85−39971
DPLL behavior with clock and sampler quantization 85−61165
DPLLs, non-Gaussian noise, performance improvement using robust estimators 88−12258
DSP PLL using high performance DSSP-1, implementation 87−24002
DSP type phase synchroniser, least squares method based design 88−73003
dual digital PLL 87−556
dual digital PLL, design and performance *(Japanese)* 85−39968
edge-triggered phase detectors PLLs, demodulation behaviour model and expt. verification 88−6696
electronic tuning address systems 85−6226
elliptic continuous-time CMOS filter withon-chip automatic tuning using PLL control system 86−34968
equidistant pulse PLL generator with large-range phase shift, design and operation 87−31753
EWSD exchange, clock generator unit 87−40572
fading channels, statistical analysis 85−25081
false lock equilibrium in PLLs 87−10740
fast digital phase-locked oscillator 85−11083
fast frequency synthesis by PLL using a continuous phase divider 88−32038
fast PLL design 86−27161
fast switching frequency synthesizer employingadaptive phase locked loop 86−20343
fast-response double-loop PLL 86−40974
FDDI, clock recovery, timing extraction 88−47075
feedforward *(Chinese)* 85−54739
fixed point implementation of cross coupled phase lock loops 87−37084
flowmeters, ultrasonic, using single-channel PLL 85−44944
Fluke 6060A frequency synthesized signal generator 86−11614
FM, fractional division frequency synthesizer used fordigital modulation *(French)* 85−54749
FM demodulators design using quasi-linear model and digital simulation 87−31763
FM noise meas. system using delay line discriminator *(Chinese)* 87−41599
FM signal shaper for digital PLLs 86−27155
FM signal synthesis using variable-frequency PLL 85−17186
FM synchronous homodyne receiver with sensitivity and selectivity using tanlock loop *(German)* 88−60395
FM synthesizer, jitter-free, based on frequency/phase-locked loop 87−14355
FM-PLL detector IC for sensitivity improvement in car radios *(Japanese)* 85−31178
forced PLL, third order differential eqn. description Lagrange stability of local cycles 87−73372
fractional-horsepower series and universal motors, PLL speed regulation design criteria and stability 85−5127
France Inter radio program for frequency standard and time code signal emission *(French)* 87−8174
frequency adder, phase-locked loop based 86−47037
frequency back-push, false lock and rejection to acquisition *(Chinese)* 86−14062
frequency difference meas. at low frequencies, using frequency multiplication stage 85−43060
frequency dividers and phase locked loops handle higher-speed circuit functions 86−67103
frequency meas., extension to IR region 86−24661
frequency multiplier for low-freq. wideband appls. *(Chinese)* 85−17763
frequency offset in far echo, compensation 88−41452
frequency offsetter for near-equal frequencies comparison 88−36088
frequency range, extn. using nonlin. load 87−59253
frequency sweeping, experimental study 85−658
frequency synthesis techniques, instrument's performance optimisation 85−614
frequency synthesizer, high speed, transient control problems 88−44084
frequency synthesizer, transient anal. 85−33702
frequency synthesizer Model 5155A, design charact. for optimum performance 85−31495
frequency synthesizers, operation and charact. *(German)* 88−63555
frequency synthesizers, phase fluctuation calcs. 88−70581
frequency synthesizers, phase sync systems based design 85−33701
frequency synthesizers, pulse phase-locked AFC system for high resolving power 85−39953

phase-locked loops continued
frequency synthesizers, pulsed phase-locked AFC systems based, comparative anal. 86−27119
frequency synthesizers, wideband second-order PLL type, anal. and design consideration 88−56496
frequency synthesizers appl., common denominators in 'fractional N' 85−11071
frequency synthesizers design for meas. appls. 86−70152
frequency synthesizers for radio receivers *(German)* 86−11243
frequency/phase detector for master horizontal oscillator 86−20385
frequency/phase detector for reading encoded data channels 85−61164
GPS, ranging errors due to multipath wave, reduction method using multipath suppression cct. *(Japanese)* 88−22237
Gunn oscillators used in radioastronomy and laboratory spectroscopy, phase-lock system 86−35088
handportable private mobile radio equipment, freq. generation 86−37804
heterodyne for microwave transceivers in radio relay station 88−44353
high resolution angulation coding system based on a phase locked loop, design *(Chinese)* 85−650
high speed charge-pump 85−44938
high-order nonlinear PLLs, simulation packages 88−12261
high-order phase control ccts. theory, noise voltage influence *(German)* 85−662
high-speed freq. synthesizers based on sampled PLL, transient props. study 87−537
high-speed PLL and frequency synthesizer for low frequencies 85−6232
homodyne optical PLL 86−43815
homodyne receiver for phase-modulated laser radiation at 10.6 μm 87−56168
homodyne receiver for subnanowatt 140 Mbit/s data at 10.6 μm, using DC-coupled PPL 86−11104
hybrid analogue/switched-capacitor type, anal., design 86−67112
hybrid system of frequency synthesis 86−27132
IBM token ring timing jitter removal, clock recovery, phased locked loop design 86−37474
imbalanced phase detector, acquisition behaviour 85−54743
induction heating inverter using power MOSFETs and PLL control, operation and anal. 88−43264
induction motor drives, current invertor fed, with PLL digital torque control *(Hungarian)* 86−13102
induction motor efficiency improvement by constant slip frequency and voltage control loop *(Korean)* 87−35942
injection-locked pulsed microwave oscillators, pulse-to-pulse incoherence noise, phase-locking dynamics 85−23105
integrating filter, statistical charact. 88−6707
Intel 82072, floppy-disk controller 87−761
interference in frequency-locked Doppler tracking loops 85−14333
ISDN subscriber loop transmission, line terminating LSI using echo cancelling 88−50996
ISDN synchronisation, use of microprocessor controlled digital PLL *(German)* 85−47058
ISDN user network interface, physical and electrical charact. *(Japanese)* 87−40092
isolated optically coupled VCO 88−63571
jitter attenuation phase locked loop using switched capacitor controlled crystal oscillator 88−70604
LAN, token-ring design, engineering aspects 86−43577
laser probe resolution improvement, 3/2-order PLL design 86−31364
lasers, Pointing alignment by orthogonal phase-lock feedback loops 87−39187
LF digital lock-in amplifier 85−33693
limiter phase detectors in PLLs, charact. description using serraphil functions 86−3847
lock frequency range of PLL with CW interfering signal, numerical anal. *(Japanese)* 85−17221
lock range of PLL with interfering signal, numerical anal. 86−67104
lock-in amplifiers and computer control 85−39964
lock-in amplifiers and measurement techniques 85−39963
lock-in frequency calc. using cycle-slip criterion 87−16944
long-loop phase locked-receivers, synchronisation loss in presence of large interf. carrier 86−37709
long-loop phase-lock receivers, interference 88−66465
long-loop phase-locked receivers, CW interf. effect, performance study 86−30614
loop delay effect on pull-in range, generalised second order PLLs 88−6708
loop filter DC drift correction using phase frequency detector 87−31767
loop gain compensation 86−57729
loop integrator cct. 88−19001
LSI, echo canceller based on digital signal processing 88−2603
LSI codec series with self-contained PLL 85−13983
machine testing appl. *(German)* 85−8965
magnetic disc controller/PLL chip set for rigid and floppy drives 85−40151
mains synchronous sampling using phase control loop *(German)* 87−35701
mains-conductor two-way interphone *(Spanish)* 87−62541
mathematical model for PLLs with rectangular signals 87−567
MC145146 PLL IC 180-MHz synthesizer from a $10 CMOS chip 86−57708
measurement data acquisition synchroniser *(German)* 88−9902
MIC up- and down-convertors, design using phased-locked oscillator, 30/20 GHz bands appl. 85−28720
microprocessor-based linac main oscillator and beam stabilization using the phase-locked trigger *(Japanese)* 87−14792
microwave correlated-line FM signal generation, solid-state source *(Chinese)* 87−37530
microwave frequency dividers using injection-locked oscillators 88−50348
microwave frequency synthesizers, book 87−65054
microwave frequency synthesizers, indirect, use of digital techniques 87−24486
microwave phase-locked oscillator using Gunn VCO with FET sampling-phase detector 85−17859
microwave PLL system, pull-in range and acquisition time improvement using injection locked VCO 88−19396
microwave VCO, tuned, low noise bias, 8 GHz 85−17875
microwave VCOs for freq. synthesizer appls., controlled tuning considerations 87−32107
mirror, charged-large-array-flexible, control by electron beam 85−51015
MM wave radio, digital, using wideband PLL under microprocessor control 87−40735
MM-wave and microwave PLLs lock indicator cct. design 88−71024
MM-wave freq. synthesizer based on freq. translation loop 86−27140

phase-locked loops continued
MM-wave Gunn oscillator, varactor tuned two-port harmonic design for phase locking appls. 87−11069
MM-wave linear/digital phase-lock ccts., techniques 86−35080
MM-wave miniaturized phase-lock source for low noise receiver applications 87−5729
MM-wave orotron oscillator, phase-locking 88−19612
MM-wave phase locked oscillators from 26.5 to 1000 GHz 87−6066
mobile multipath environments, tracking performance of narrowband phase-locked loop 85−36945
mobile radio, 800 MHz frequency synthesizer using intermittent operation of dual-PLL circuit 88−35419
mobile radio channels, first order digital PLL performance 85−47439
modem design for *F*1, *F*3, *F*6, and *F*9 signals using a digital PLL AFC system 87−55880
modified four phase Costas loop used in TFM system, smooth phase function choice 88−620
modulation tracking loop with varactor detectoras a synchronous FM-receiver at 12 GHz *(German)* 86−17188
modulator and processor applications for cable TV 87−49325
monolithic 1.3 GHz PLL, SDA 3202, design with I^2C bus, TV digital tuning appls. 86−40980
monolithic video frequency filter using NIC-based gyrators 88−879
monolithic video frequency filter using NIC-based gyrators 88−32313
monopulse radar systems, angle-tracking performance in presence of interfering second target, anal. 87−70124
motor phase locked speed control system with a sample-and-hold phase detector 88−55279
motor speed control systems, sample-and-hold phase-freq. detector 86−6810
motors, speed control, PLL, by PID feedback of phase difference 88−37208
multi-frequency I-band source using phase locked VCO, ruggedised design and performance 87−32106
multi-level quantised digital PLL, design and performance *(Japanese)* 87−16952
multichannel frequency-agile RF modem designs 85−36805
multidimensional PLL systems, beat-frequency estimation 86−46630
multiple beam fibre optic holography with fringe stabilisation 88−39942
multiple frequency data clock using phase-locked loop 87−817
multirate processor, adaptive digital pump controller for phase-locked servo systems 87−30610
multisampling digital tanlock loop 88−618
murine vocalizations, phase locked tone decoding detector 85−38363
mutually synchronised network, using complete digital PLLs, delay and jitter 87−69558
mutually synchronised network using digital PLLs, anal. of transmission delay and jitter charcts. *(Japanese)* 88−46335
mutually synchronised system using digital PLLs, quantising jitter study *(Japanese)* 85−11112
National Synchrotron Light Source, phase II, high precision power supply 88−55485
NE565/567 chip range 88−25063
NE567 tone decoding/switching IC, appls. 88−25064
NEC single chip microcontroller for low voltage digital tuning system *(Japanese)* 88−791
NMOS 1.2 GHz single-chip NMOS PLL 86−14076
nonautonomous phase locked AFC system, investig. 87−44690
nonlinear dynamics of PLL systems, computer anal. 87−565
nonlinear wideband systems, design 86−40978
one-track tachometer, multipurpose high resolution 85−37767
operating modes and pull-in range of system with AGC cct. 88−19000
optical, stabilised PSK transmitter with negative electricalfeedback to a semiconductor laser 85−56626
optical communication, carrier recovery at optical frequencies, minimum required power 86−48741
optical Costas phase-locked loop, sensitivity analysis and performance optimisation 87−49064
optical homodyne receiver, balanced PLL, performance, design and laser linewidth 86−43830
optical homodyne receivers based on decision-driven PLL, performance anal., laser linewidth requirements 86−30798
optical phase locked loop using laser diodes, for feeding phase array radars 85−41542
optimal design using two separate phase detectors 85−6231
optimal PLL circuit for a revolution counter *(German)* 87−560
optimal PLL circuits for speed measurement *(German)* 86−57726
oscillators with delay lines, carrier noise sidebands 86−27136
oscillators with delay lines, fundamentals 85−33703
oscillators with delay lines, module for 2 m band 86−14046
oscillators with delay times, digital frequency tuning 87−52444
parameter self-tuning of 2-order digital PLL *(Chinese)* 86−67102
performance 86−850
phase controlled rectifier connected to weak AC system, microprocessor based controller 86−45581
phase discriminators with linear discrimination characteristics 88−38424
phase locking of mm-wave two-port Gunn oscillator bybias tuning 87−991
phase noise power in PLLs, integral measure 88−6697
phase noise prediction from oscillator data 87−52459
phase-detector gain, control and automate 87−5726
phase-freq. detectors, output anal., control appl. 86−8067
phase-sum term modelling 88−6699
picture transmission by underwater acoustic channel *(French)* 88−23213
PLACE 2.0. interactive program for PLL anal. and design in C language 85−49683
PLL, first order, using linear phase detector 86−67105
PLL, synthesizer switching, digital control 87−52458
PLL frequency synthesizer, crystal oscillator warp 87−23979
PLL IC, limited selection suffices 88−63573
PLL open-loop gain meas. using floating voltage 87−52457
PLL performance in presence of loop propag. delay 87−56167
PLL phase detector uses 3-state buffer 85−34107
PLL-based frequency synthesizer, design 86−46597
PLL-based tone detection in a multipoint transmission network 86−37001
PLL-FM modulator, reference freq. switched, config. and charcts., mobile transceiver appls. *(Japanese)* 87−37077
PN code acquisition and tracking, improved DLL configurations 85−57273
polarography, AC, higher harmonic, phase-locked loop generation of reference square waves 87−44684
polygon mirror scanner motor drive cct. *(Japanese)* 88−23987
portable microwave spectrum analyzer with phase locked SAW based frequency synthesis 88−50058
phase-locked loops continued
portable radio communications, Rayleigh distributed multipath fading effects on carrier recovery perform. 87−3090
power frequency deviation monitoring for power system control 85−21092
power system PLL interface for microprocessor based meas. 86−61202
precision frequency-to-voltage converter/demodulator 86−67109
principles and appls. *(German)* 86−54409
principles and cct. appls. 88−6705
pseudo-random noise spread spectrum equipment for satellite communications, PLL demodulator *(Japanese)* 87−28490
PSK loops, false lock avoidance scheme 85−11113
PSK-signal detection, local oscillator phase noise degradation *(German)* 85−7857
pull-in range anal. by Galerkin procedure 87−557
pull-in range component tolerances and cct. performance anal. 85−22722
pull-in range of a second-order pulsed phase-lock AFCsystem 86−34626
pull-in range of PLL with interfering signal, numerical anal. *(Japanese)* 88−38425
pull-in range of PLL with time-delay, numerical anal. using Galerkin's procedure *(Japanese)* 86−14071
pull-in range study, computer-aided 85−33723
pull-out frequency of phase-lock loops with sawtoothphase detector 86−14063
pulse, with divider in feedback loop 87−44696
pulse phase lock AFC system with two control channels, dynamic charcts. 85−36169
pulse phase-locked AFC system with integrated PWM in frequency detection mode 86−30198
pulsed phase lock AFC systems, critical parameters 87−44698
PWM HF resonant invertors using static induction transistors and thyristors, phase difference angle control mode strategy 87−73321
PWM invertor using phase-locked loops, modulation technique 85−49011
Q-band harmonic mixer using printed circuit technology 85−6512
quad 3200 Hz oscillator frequency/phase synchronisation 87−5710
quadrature receiver with AGC and PLL functions 88−53140
quasi-linear anal. *(Chinese)* 86−62493
quick-response phase-shifter using digital phase-locked loops *(Japanese)* 85−6234
quick-response phase-shifter using digital phase-lockedloops 86−67435
radio receiver ccts. realisation using monolithic ICs *(Czech)* 85−8326
radio receiver frequency synthesisers and standards , book contrib. 88−70593
random noise in digital gates and dividers 88−19020
receiver sensitivity anal. for synchronous coherent optical fibre transmission systems 87−56165
receivers, second-order loop filters with independ. adjustment of freq. and damping 87−10734
reciprocating linear motors, 400 W tri-state switching controller 88−30743
rectangular pulse-frequency multiplier using phase-lockedloop, design and charcts. 86−67448
remote control of power systems, phase-conform keying of parallel transmitters *(Czech)* 88−35000
resonant frequency meas. with phase-modulated feedback loop 88−22730
resonant load MOSFET invertor frequency tracking *(Korean)* 87−15883
resonant oscillation of mechanical vibrators, technique using phase-locked loop IC 86−57705
RF accelerating voltage shaper for ring injector, initial-frequency generator 87−70946
RF and digital technologies integration, equipment and component considerations 87−59281
RF generators, subsidiary PLL, 0.1 MHz-2.4 GHz *(French)* 87−8643
RF synthesizers, PLL noise prediction using graphical anal. routine 88−591
RF technology, conf., Anaheim, CA, USA (Feb. 1987) 87−36340
RF/microwave synthesizers, automated phase synchronization and control of multiple signal generators 87−70666
S-band PLL frequency synthesizer for agile radar 88−35589
sampled, noise bandwidth *(Chinese)* 85−44935
sampled, with sequential phase detector, large signal anal. 86−27151
sampled data, PSK carrier recovery appls. 85−44943
sampled PLLs for frequency synthesizers, loop configs. and anal. 85−11105
sampling convertor PLL, anal. *(Chinese)* 87−59252
sampling PLL, phase/frequency detector anal. 85−54750
SAW oscillator for PLL appl. low noise VCO 88−51113
SC implementation 85−11107
scrambler counter as a phase-locked oscillator 86−8059
SECAM coder PLL IC design *(Russian)* 88−56524
SECAM/PAL decoder in a portable colour televisionreceiver *(Slovak)* 86−30976
second-order, synthesizer analysis appl. 86−847
second-order analog type, random noise effect study *(Korean)* 87−23996
second-order costas digital PLL 87−44705
second-order discrete automatic phase-lock system, dynamic charcts. 85−39967
second-order PLL, cct. config. with fast acquisition time and freq. locking 85−61166
second-order type, pull-in range anal. using Galerkin method *(Japanese)* 85−39969
second-order type operating as FM demodulator, chaotic dynamics study 88−70597
shear-wave impedance meas. of liquid samples, in MHz region 87−56797
SHF generator for stable high-frequency signals based on a type G4-109 88−592
SHF generator frequency stabilizer 85−47993
SHF PLL freq. multiplier using harmonic phase detection, design and performance 88−19395
Siemens SDA 3202 PLL IC for up to 1.5 GHz 86−52739
Siemens TBB 200 CMOS PLL chip for 900 MHz transmitter equipment *(German)* 88−32295
simulation by means of digital computer *(Czech)* 85−11111
single-chip high-speed clock recovery 86−34924
software-controlled PLL for power converter controller, low freq. 88−55447
split-loop phase-locked receiver, freq. tracking charcts. study 87−33686
spread-spectrum systems, ranging and data-modulated systems, delay lock loop 86−17199
stability, practical way to test PLL stability 87−56789
stability and response study at phase step, Z transform appl. *(French)* 85−49782
static and dynamic phase errors, anal. *(German)* 88−63577
stepping motor, PM type with PLL servo system, dynamic charact. and stability improvement *(Korean)* 87−51258

phase-locked loops continued
stepping motor closed-loop control, switching angle optimisation 87−64630
stereo AM MW broadcasting in Europe 87−63109
sub-Nyquist sampling-frequency range limits 87−44704
superheterodyne single conversion receiver front end, 10 kHz-30 MHz 87−55964
SW VFO from 5 to 6 MHz, PLL-oscillator with delay lines appl. 85−49778
Swiss digital communication network , clock cycle generators *(Czech)* 88−73460
switched capacitor based design *(Polish)* 85−654
switched capacitor PLL realisation in monolithic IC form *(Japanese)* 87−10739
switched-capacitor blocks as phase-locked loops, state-of-the-art *(Polish)* 85−49788
switching voltage regulators, design concepts 85−10985
symbol synchronizers, cycle slipping, phase-dependent loop noise influence 86−29671
symmetric PSK of tunable generator, investig. 87−59256
synchronisation determ., use of quasi-stationary method *(Polish)* 88−12257
synchronised optical PPM communication systems, performance 87−20499
synchronised splitter of signal cycle times using phase-locked loops *(Slovak)* 85−6227
synchronization techniques for digital networks 86−64432
synchronizer chain failures 86−54410
synchronizing band of the rational harmonicinjection locking *(Chinese)* 86−839
synchronous data recovery in RF communication channels, CMOS ccts. implementations for transceiver appls. 88−21911
synchronous phase-lock loop detector for integrated AM radio 85−656
synthesized signal generator, 6060A, PLL config., features and performance 85−37639
T1 SLIC IC 87−62738
tamed FSK signal generation 88−45857
tan-lock phase detector, choice of structure parameter 85−44934
tangent type second-order digital PLL, anal. and N-ary PSK and 16-QAM demodulation ccts. *(Japanese)* 87−31762
TBB 146 CMOS PLL chip for freq. synthesis *(German)* 86−28485
TDMA systems, PLL design 86−29928
theory, design and appls., book 85−49258
third order, with tangent discriminator characteristic, qualitative anal. 85−49785
third-order digital phase-locked loop with improvedstability, config. and characts. *(Japanese)* 87−5728
third-order digital phase-locked loop with improved stability 88−12255
third-order time optimal PLL, design method 87−568
thyristor rectifier, control using phase lock loop 86−2142
time-delay effect minimisation, design 85−33724
time-optimal PLL without response overshoots *(Japanese)* 85−54752
timing clock recovery ccts., PLL jitter anal. for baseband signal 88−6702
timing extraction cct. design for ping-pong transmission system appl. *(Japanese)* 87−69755
tracking loops, lock loss induced by Doppler or code rate mismatch 88−19002
tracking loops, simulation using IBM PC 87−65953
tramcar induction motor, invertor and chopper control expt. 86−71111
transient anal., Fokker-Planck equation, analytical solution 87−65938
transient response prediction with computer simulation 85−61170
tuning of nonstandard TV picture carriers 86−69909
TV, horizontal scanning, cct. examples *(German)* 87−76969
TV decoder with scan line coupling, chrominance demodulation *(German)* 87−49291
TV ICs, 1.3 GHz PLL I^2C-bus 86−11260
TV signal descrambling circuits with PLL 87−563
TV tube deflection circuit, TDA 8180 LSI device incorporating PLL ccts. *(Italian)* 85−20316
two-loop phase-locked automatic frequency control system, digital frequency mixer 86−14065
Type II PLL frequency synthesizers, extension of sampling methods 85−28409
type two with loop configs. pull-in range study 85−22718
UPS systems, PLL method for freq. and phase control 88−69595
US cleaning, piezoelectric transducer, constant vibr. amplitude method using PLL 86−15310
VCO system, phase-noise reduction 87−65939
VCO using phase-lock system with asymmetric phase characts. 87−44695
VCXO, with good stability and linearity 85−41005
VDS-M PLL radiofrequency synthesizer 87−5708
vector analyser, adaptive control of frequency and phase 87−3536
VHF FM radio receivers with DPLL demodulator, design and optimisation *(German)* 86−43982
video image stereo matching, robot vision appl. 86−59355
voltage controlled oscillator, frequency locked loop with digital signal processing *(Slovak)* 88−56498
voltage pump phase-locked loops with phase frequency detector, loop filter effects 85−28419
voltage-controlled phase-locked oscillator charge pump 87−5703
wideband frequency multiplier 88−63828
wideband low distortion microwave PLL power amplifiers for analog and digital communications 87−532
wideband quartz crystal synchronisation of microwave generators 88−70588
XR-2207/2208 precision units *(Spanish)* 86−40979
Yaesu FT-77 transceiver, conversion for 160 m band, circuit modifications 86−17257
GaAs MMICs, VCO, freq. divider, power splitter for X-band PLL-stabilised local source 86−58051
GaAs monolithic VCO, 14 GHz band, appl. to microwave PLL *(Japanese)* 86−27617
GaAs monolithic digital phase/freq. discriminator, design and performance, PLL appl. 86−34629
GaAs monolithic dynamic divider for microwave PLL oscillators 88−63885
GaAs variable modulus frequency divider chip for 1.2 GHz frequency synthesizer 86−14077
HCN lasers, plasma beat frequency stabilization by phased locked loop 87−68681
InGaAsP-InP diode lasers, 1.3 μm, wide-waveguide interferometric phase-locked arrays 87−46864
$LiTaO_3$ resonators and voltage-controlled oscillators 87−1863

meters, orthogonal with clipped signals, noise error statistical charact. 87−35165
microwave, exchange places method for precise phase shift measurement of large microwave systems *(Chinese)* 87−63499
microwave dual-channel phase shift meas., mismatch error cancellation 86−24667
microwave phase determ. method using Kramers-Kronig transforms 87−77385
microwave phase noise measurement techniques for pulsedsignals 86−24668
microwave pulse phase meter 88−53815
microwave reflection coeff. phase angle meas. 86−65264
microwave remote sensing techniques for measuring thin surface films 88−29628
millimeter-band phase meter with rotary grating 87−63479
mobile TV reception, ghost flutter meas. using stable time standard *(Japanese)* 87−41188
mode phase lags meas. device for planar optical waveguides 88−72129
modified three-antenna technique for improved polarisation meas. 88−72664
multielement antenna, amplitude-phase distribution meas., algorithm for probe optimisation 86−54377
multiport homodyne detection near the quantum noise limit 87−28597
multiport junction, simultaneous phase and amplitude meas. on optical signals 85−8973
multiscale phase measuring system, maximum likelihood estimation 85−4071
NBS 50 kHz phase angle calibration standard 87−14453
near zone amplitude-phase meas., standard-antenna method, radiation pattern reconstruction 88−14483
Nitella cell US phase fluctuation meas. using interdigital transducer system 87−3973
noise, spectrum estimation method appl. 86−38545
noise and freq. stability meas., numerical techniques 86−38502
noise in coincidence and pulse phase meters 88−16407
noise performance study of sample/hold cct. and switched low-pass filter type phase meters 86−18011
noise resistant phase meas. using compensative phase meters *(Polish)* 88−29582
noise-proof phase meter with switched lowpass filters 85−58818
noise-resistant digital phasemeter with phase compensation 85−58819
nonlinear microwave two-ports, magnitude and phase meas. method 88−70498
offset compensation technique suitable for automation 88−22735
Omega navigation system, Marine Security Agency *(Japanese)* 87−76886
optical cable location tool 88−4010
optical fibres phase shifts meas., thermodynamic limitations 88−10150
optical quadrature demodulator, fibre optic interferometric sensors 86−68298
optical sensors, high-resolution, microprocessor-based phase determ. 85−20739
optical signal phase meas. error when passed through multimode optical fibre 87−19114
overlap factors selection of errors *(Russian)* 86−18013
periodic signals meas., A/D convertor quantisation errors effect 88−15978
phase detection technique using ultrasonic transducers, undergraduate demonstrations 87−71451
phase detector authors errors 88−6704
phase digitising for spread spectrum meas. 88−74495
phase meter calibration, phase angle standard 88−67993
phase meter for phase shift meas. between pulse sequences, errors and charact. *(Russian)* 86−38505
phase retrieval in a lossy medium 88−22746
phase shift, wide freq. range meas. using ROM, technique and cct. implementation 88−36175
phase-amplitude error evaluation and correction *(Russian)* 88−4529
phased array radars with correlated phase errors, pointing accuracy 88−15619
phase measurement continued
phased-array radar elements, relative gains, tuning phases and RF phase shifts estimation 85−41768
pLL circuit with analogue phase detector without lockbreaking *(German)* 86−843
power network meas., universal multifunction meas. convertor and voltage transducer *(Russian)* 86−56507
power system state estimation using voltage phasor meas. 86−50836
power system state estimation using voltage phasor meas. 86−56371
power system transient frequency and phase, problems and meas. 86−39252
power systems, frequency and phase meas. of transients, problems and methods *(Russian)* 85−65002
power systems, sampling technique for phase difference measurement at power frequencies 88−68836
power transmission line meas. using phase angle meter *(Russian)* 86−32863
power transmission lines, phase angle meas. using pulse signals *(Russian)* 86−32752
precision phase measurement in the design of scientific instruments 85−14974
profilometry, automated phase-measuring of 3-D diffuse object, using deformed grating images projected by interferometer 85−4108
quadrature digitiser system, fast calibration 88−12465
radiowave propagation meas., using automated dispersion interferometer-polarimeter 88−68634
remote signalling of phase angle and speed in motors *(Russian)* 86−33273
RF error statistics for power, voltage and phase measurements 87−20827
RF medium-power amplifier phase shift, automatic meas. using ATE program technique 85−58521
RF phase-shift measurements in a standards laboratoryenvironment 86−38504
RLC VF circuits, phase freq. characteristics, computerised meas. *(Chinese)* 88−22731
sampled data phase meas., error analysis 86−24664
sampled-data phase-meas., errors 86−18064
sensor power supply 87−78762
shift between ULF signals meas. using double-beam storage oscilloscope 87−63477
shift measurement method for fund. harmonics of elec. transients *(Polish)* 88−22736
shifts in phase, meas. in induction heating systems *(Russian)* 85−14973
ship tracking test results from Motorola Eagle GPS receiver 88−9683
shipborne GPS kinematic positioning for hydrographic applications 88−74071
signal processing networks, phase distortion index for performance meas. 86−65092
single phase phasemeter, appl. to resonant circuit phase shift meas. *(Rumanian)* 85−64182
sinusoidal waveform, phase and freq. distortion meas. 86−64316
SIRIO activity, Deutsche Bundespost Research Institute results 87−62875
spurious crystal resonances, group delay meas. as sensitive detection method 87−32807
square wave quadrature phase detector 87−31759
square-waves with equal mark/space ratio, phase difference meas. 87−14451
SSB microwave system meas., using network/spectrum analyser 85−63525
standards certification for phase shift angles meas., using program meas.-computing complex 88−4578
substations, voltage-phasor meas. for static state estimation 86−18898
switched mode power supply measurements by DFT *(German)* 85−49732
switching power supply measurements using discrete Fourier transforms *(German)* 85−48030
synchronous motors, automatic control using microprocessors *(Romanian)* 88−23878
telephone channel phase characteristics, fast algorithm analysis using Hilbert transformer 87−69570
telephone channel phase characteristics, fast measurement 87−69569
television ghost waves, phase variation measurement *(Japanese)* 88−29080
time scales, high-resolution phase intercomparison, using automated data acquisition system 86−24800
time transfer via geostationary satellites , high-accuracy, preliminary results 88−74605
tissue noninvasive temp. meas. by US phase shift technique 87−3976
torquemeter, phase-measuring, electronic system for calibration and testing *(Polish)* 87−41615
transmission line discriminators for phase noisemeasurement 86−14074
transmission lines, long, dynamic power angle meas. 86−44970
ultralow-frequency phase meter 87−63444
video op-amp IC meas. method 88−32014
video sync signals, freq. and place deviation meas. techniques *(Japanese)* 86−24104
VLBI work at HF freqs., method for phase fluctuation processing 86−30930
VLF/LF sinusoidal signals, automatic meas. technique for dielec. const. determ. *(French)* 85−43063
VLSI signal processing systems appl. 88−47658
Warkworth II satellite earth station antenna polarization meas. 88−22025
waveguide devices, loss and phase shift measurement 88−7916
wideband frequency-invariant phase meter with lead-lag indication 87−29237
wideband optical phase detector, using the He-Ne lasers 86−68650
zero-phase-difference check synchronizer employing a microprocessor 88−60550
Zn-AgO reserve-type batteries, quality anal., using capacitance and phase angle meas. 88−5824
ZnO sputtered films, elastic consts., determ. using ultrasonic technique 88−53953

phase meters
AC system, frequency invariant phase-difference and power-factor meter 85−14867
accurate digital phase meas. scheme, comments and reply 85−48638
analog self-excited phase-frequency converter 88−16016
attenuator, phase-stable, for radio unit phase-amplitude response meter 87−70696
audio power and phase angle meter *(German)* 88−15848
audio program channels, dynamic phase meter 88−60505
auto-ranging phase meter with 10 Hz to 100 kHz range 86−24581
automatic frequency control of phase meters with frequency convertors *(Russian)* 86−5363
averaging digital phase meters, high-frequency sampling error 88−29500

phase meters continued
averaging error of phase meters with phase difference-to-voltage-to-code conversion 85−48052
broad-band amplitude-independent phase measuring system 88−10097
calibration, phase angle standard 88−67993
calibration, statistical approach 88−16404
calibration of phase meters with linear response characteristic 87−70706
capacitor loss angle meter for use at higher frequencies *(Polish)* 87−77310
clamped phase meter without galvanic mains connection *(Polish)* 85−43033
compensating phase meters with signal time scale conversion *(Russian)* 85−14870
compensative type with lock-in detection, performance anal. 86−5351
delta-sigma modulation correlator model for phase angle meas. *(Polish)* 86−12523
detector with expanded meas. range, Doppler shift meas. appl. 87−65962
digital, using dual-slope principle 88−22733
digital angle of torque meter for synchronous machines *(Spanish)* 87−77431
digital phase meter for monopulse radio signals 85−20650
digital phase meter using discretely orthogonal input processing algorithm 88−67992
digital phase shift meter *(Czech)* 88−36129
digital phase/time meter, design and construction *(Polish)* 85−4012
digital ultralow-frequency phase meter, magnetic recording appl. 85−48049
digitally controlled phase shifter *(Polish)* 88−12542
dual-slope phase meter , microprocessor-based 88−74505
duration meter with internal periodicity test *(German)* 86−44350
dynamic multicycle phase shift measurements 88−29581
eddy current testing, phase meas. of higher harmonics, using full-wave phase meter 88−491
error compensation suitable for automation, based on erroneous phase angle meas. 86−44376
errors and charact. of phase meter for phase shift meas. between pulse sequences *(Russian)* 86−38505
fine setting of phase shift angles usingfrequency-shifted signals 87−3709
harmonic phase meter, distorted signal *(Russian)* 87−29173
HF magnetic meas. by phase method 88−4595
indicator system for specified freq. component of distorted elec. signals 85−58751
instruments for measuring phase shifts *(Polish)* 85−37707
integrated phase meter for measuring phase shifts between signals of different frequencies 87−63476
lead/lag indicating phase meter, design performance and appls. 86−11627
LF digital meas. instruments 87−3544
load phase angle and recovery time measuring device for resonant thyristor invertors 86−18003
machines load angle meas. in dynamic regime *(Spanish)* 87−63474
microprocessor phase meter for distorted signals 85−58821
microwave pulse phase meter 88−53815
millimeter-band phase meter with rotary grating 87−63479
multichannel digital duty-factor phase meter, low-frequency error calc. 88−4579
multimachine power system during transients, phase detect. system *(Japanese)* 86−32649
noise in coincidence and pulse phase meters 88−16407
noise performance study of sample/hold cct. and switched low-pass filter type phase meters 86−18011
noise resistant, with synchronous detection 85−14864
noise resistant phase meas. using compensative phase meters *(Polish)* 88−29582
noise-proof phase meter with switched lowpass filters 85−58818
noise-resistant digital phase meter design 88−16241
noise-resistant digital phasemeter with phase compensation 85−58819
overlap factors selection of errors *(Russian)* 86−18013
phase-amplitude error evaluation and correction *(Russian)* 88−4529
power transmission line meas. using phase angle meter *(Russian)* 86−32863
precision phase measurement in the design of scientific instruments 85−14974
quadrature phase shifter, precision, microwave study 87−32058
random error of analog-digital phase meters 87−63475
rectangular pulse meas. *(Polish)* 85−43034
sampled-data phase-meas., errors 86−18064
shift convertor with calculator struct. *(Polish)* 88−67946
signal stabilisation, using amplifiers with automatic amplitude control 85−8891
single phase phasemeter, appl. to resonant circuit phase shift meas. *(Rumanian)* 85−64182
standard for VOR air navigation aids, report 86−17533
synchronous phase meter controlled by microprocessor *(Polish)* 87−77313
ultralow-frequency phase meter 87−63444
undergraduate physics laboratory apparatus 86−7413
wideband frequency-invariant phase meter with lead-lag indication 87−29237

blast furnace burden level meas. using FM radar based phase modulation method *(Japanese)* 87−41638
bunched ion beam detection in ATLAS accelerator, improved RF modulation 86−55947
burst error characteristics of narrowband digital mobile-radio 87−8185
burst spread spectrum data transmission system using SAW convolvers *(German)* 87−40641
carrier phase tracking decoders for continuous phase modulations 86−29692
cellular radio, speech transmission, partial response CPM and DPCM coding 87−20420
chirped ultrafast pulses, phase modulated, effects of filters 86−58809
coded continuous phase modulation, parameter tradeoff and comparison to coded QAM 87−54846
coherent heterodyne systems, integrated-optic phase modulator, signal fading elimination 88−41696
coherent multiplexed interferometric fibre sensors, reduction of excess noise 88−67818
constant amplitude continuous phase modulation schemes for satellite communication 85−25010
constant envelope modulation, effects of band-limited filtering 88−2944
constant envelope signals, degradation due to band-limited filtering 85−51656
constant-frequency phase-controlled resonant power processor with HF AC link, realisation using phase modulation 87−43236
continuous, optimum waveforms 88−2928
continuous phase modulated signals, carrier phase and clock recovery 88−8667
continuous phase modulated signals, decision-directed synchronisation system *(Chinese)* 88−40776
continuous phase modulation 86−64172
continuous phase modulation, decomposition approach 87−54845
continuous phase modulation, discriminator detector with decision feedback, error probability 88−59015
continuous phase modulation, effect of filtering and hard limiting 85−36171
continuous phase modulation, in presence of cochannel interf. and AWGN, performance anal. 88−27730
continuous phase modulation, M-ary full and partial response, communication system design 88−27740
continuous phase modulation−discriminator detection 86−29708
continuous phase modulation detection on two-ray multipath fading channel 88−8666
continuous phase modulation signals, coherent detection, average matched filter perform. 85−41932
continuous phase modulations, low complexity algorithm for demodulation 88−8655
continuous phase modulations, low complexity phase tracking decoders 85−19314
continuous phase modulations under extreme filtering, free distances 86−64178
continuous PM, mean-square error optimum receiver filter calcs. 88−72733
continuous PM direct sequence spread spectrum carrier modulation using noncoherent demodulation 88−2946
continuous PM signals, sequential detector calcs. 88−72732
continuous PM with discrimination detection in land mobile radio channels 88−72730
convolutional coded continuous phase modulation with plural modulation indices 88−34578
convolutional coded multi-*h* continuous phase modulation 87−69042
convolutional codes for phase-modulated channels 86−68970
convolutionally encoded CPM schemes, bounds 88−8697
convolutionally-coded CPM optimization 87−69043
Costas loops, data-related false lock phenomenon 88−52356
CPM, convolutional codes, modulation process memory use 88−45948
CPM, decomposition approach 88−66269
CPM, differential detector anal. 87−27547
CPM, joint carrier and phase synchronisability 87−27154
CPM, MSK-type reception, cochannel and adjacent channel interference anal. 87−39585
CPM, noncoherent detection, error probability 85−41838
CPM, partial response, adjacent channel interference and Gaussian noise presence, performance 87−12886
CPM, partial response, error performance, adjacent channel interference and Gaussian noise presence 87−27153
CPM carrier recovery analysis of the power loop 88−45860
CPM data transmission, joint carrier phase estimation and data detection algorithms 87−7734
CPM data transmission, simulation *(German)* 87−54837
CPM data transmission systems, multi-h, practical environments, computer aided performance anal. 87−40221
CPM detection, partially coherent dynamic programming algorithm 88−45863
CPM discriminator detection, examples 87−12887
CPM schemes, new representations 88−40777
CPM signals, synchronisation 86−64182
CPM with linear detection, error probability anal. 88−14663
decision directed adaptive demodulation 86−59202
decision-directed feedback carrier synchronisation system, bandwidth efficient modulation, performance anal. 85−41832

microwave ferrite phase modulator operation, magnetisation dynamics effect 85−62205
microwave links, AM-to-RM phase modulation conversion meas. technique 85−15015
microwave phase modulator with nonideal elements, characts. 88−50330
microwave phase modulators 85−61167
microwave radio component nonlinearities, AM-AM and AM-PM measurements using the PM null technique 87−66512
microwave scanning superheterodyne receiver, 0.5-18.5 GHz, microprocessor-controlled, CS-2002 system from Condor 86−17193
microwave signals, arbitrary modulation in amplitude and phase using instantaneous values 87−33587
mine communication system using EM propagation of phased modulated carrier 88−53126
minimum distances of continuous phase modulated signals transmitted in a microwave fading radio channel 88−60012
MM wave modulation in Si waveguide using diode laser illum. 85−17831
mobile radio, signal plus noise and distortion perform. and spectrum efficiency for real zero SSB 86−69681
modem IC, Thomson TSG 7515 *(French)* 88−3707
monomode waveguide, light pulses compression by self-phase modulation *(French)* 88−58065
multi-h continuous phase modulation signals, practical receiver struct. 88−8660
multi-h CPM data transmission, joint carrier phase estimation-data detect. algorithm 86−3754
multi-octave phase modulators, reflect. cct. design for microwave freqs. 85−17858
narrowband coded digital modulation schemes with constantamplitude 86−64179
narrowband modulation methods for land mobile radio 86−30662
NASA 30/20 GHz test transponder using multi-h phase coded modulation 86−64940
nematic liquid crystal film, spatial self-phase modulation of laser beam, field-curvature effect on diffr. ring pattern 85−19003
new universal all-digital CPM modulator 87−37073
noise compensation system when receiving FM signals, actual efficiency determ. 88−27719
noise immunity of incoherent reception with single phase-difference modulation 87−54841
noise immunity of multiposition-signal reception 86−37082
noise immunity of signal reception in channels with Rayleigh fading 88−35353
noise meas. methods, assessment 88−10118
noise resistance of electrooptical systems with amplitude-phase modulation *(Russian)* 86−22206
noise-immune algorithm for reception of discrete noise-like signals with frequency-phase modulation in a background of structural interference 88−40905
nonlinear amplifier AM/PM conversion coeff. meas. *(Japanese)* 85−22686
nonlinear propagation of phase-modulated optical pulses in optical fibres 85−41172
nonlinear waveguides, optical soliton formation, initial phase modulation influence 88−26854
nonorthogonal phase-frequency modulated signals, reception efficiency improvement *(Russian)* 88−72724
normalised signals, significance of phase and magnitude 88−3245
Nyquist 3 phase shaping in continuous phase modulation 87−33597
optical communication phase modulators using lithium niobate *(Swedish)* 87−76799
Optical fibre coherent transmission at 400 Mbit/s and 1 Gbit/s data rates, expt. study 86−23851
optical fibre communication system using index nonlinearity, transmission capability 85−29528

phase modulation continued
optical fibre video distribution network, analogue heterodyne detect. 86−43851
optical fibres, frequency broadening by self-phase modulation 85−62329
optical fibres, induced phase modulation of stimulated Raman pulse 88−2359
optical fibres, multisoliton pulse interaction, FM influence 87−25985
optical fibres, nonlinear, single-mode, picosecond steps and dark pulses 87−60923
optical fibres, PM-AM conversion of CW laser light 86−42247
optical gigabit range modulation produced by direct phase modulation of DFB laser diode 88−47031
optical phase conjugation for removing dispersive self-phase-modulation effects 85−2410
optical phase modulator using electric-field sensitive fibre with coaxial electrodes 87−68094
optical phase modulators, electro-optic, waveguide PIN junction, anal. and design criteria 85−56364
optical single-mode fibre device overview, polarisation-preserving props. 85−2050
optical waveguides, soliton formation, influence of regular phase modulation 87−74706
optoelectronic digital processor using spatially discontinuous discharge sections, structure *(Russian)* 85−26246
Pan European digital mobile telephone system, use of adaptive digital phase modulation 87−56012
parametric amplifier and frequency multiplier system, modulated pump spectrum restoration 88−50039
partial response continuous phase modulation; performance 87−19383
partial response continuous phase modulation, serial MSK-type detection 85−25090
partial response continuous phase modulation using class of reduced-complexity Viterbi detectors 85−13551
partial response continuous phase modulation with MSK-type receivers, adjacent channel interference 86−68966
partial response CPM, perform. eval. of differential and discriminator detection 87−19376
partial-response continuous phase modulation, frequency discriminator detection 85−62954
phase detector response to a sinusoidal signal in narrow-band noise 87−61899
phase-modulated holography for detection of phase and absorpt. gratings 87−54431
PMP, CPM free Euclidean distance and noncoherent detectability optimisation 88−45864
post-disaster mine communication system, using through-the-earth EM propagation 85−25746
pulsed laser radiation with stationary PM during thermal blooming, coherence and intensity fluctuations 88−2347
PWM phase modulator, low-cost design *(German)* 86−8058
quantum magnetometer plateaus, phase signal coding 88−42253
quasi-optimal demodulation of a PM signal in non-Gaussian noise 88−21060
radar signal interfering reflections, space-time correlation function 88−35574
radio pulse, spectrum width anal. 88−72949
radio signals, acoustooptical space-parametric principle of phase modulation 87−46608
radio transmitter, multi-mode architecture 86−38008
radio waves, ionospheric reflection close to critical frequencies, FM and PM signals structure 85−36029
random bi-phase modulated CW radar that copes with range-Doppler ambiguity difficulty *(Japanese)* 88−74032
randomly phase-modulated cosines for random processes illustration in undergraduate/graduate courses 86−40414
recovery in interferometric fibre optic sensors 88−7903
relative PM signals, noncoherent reception, noise immunity, phase errors influence 87−39793
resonant frequency meas. with phase-modulated feedback loop 88−22730
resonant power conversion techniques for HF link inverters 87−30775
resonant power conversion techniques for HF link inverters 86−45571
RF TV scrambling system using phase modulation 88−60451
rhodamine 6G laser, hybridly mode-locked CW, self-phase modulation 85−29785
ruby laser, passively mode-locked, pulse compression 85−51151
Sagnac interferometers, coherence, modulation and phase-noise effects 88−39938
SAW phase modulator using magnetostrictive thin films 85−56065
second harmonic generated signal, induced phase modulation 88−20741
self-contained voltage invertors using phase-pulse modulation, output voltage spectra *(Russian)* 88−55480
serrodyne phase modulators for fibre optic sensor 88−45125
SHG, high efficiency, phase matching limitations 85−7525
single-mode optical piezoceramic phase modulator, anal. 87−68121
smooth limiting of a sum of signals 87−47481
solid laser pulse compression, self-phase modulation in graded-index fibres 85−35882
sound synthesis algorithm using phase modulation 85−7846
speech peak/RMS ratio reduction by amplitude compression and quadratic phase dispersion 88−40866
symbol error probability behaviour for continuous phasemodulation with partially coherent detection 86−29831
symbol timing recovery in multi-h phase coded systems 88−45872
synchronous generator torsional interaction countermeasures, phase modulation analysis 87−22285
synchronous generators, torsional resonances interaction with network resonances 85−60156
synthesis by phase modulation and its implementation in hardware 88−47384
tanh limiter for AM and PM signals 86−43131
TF channel, noise immunity of UPS-4800 in case of phase jitter and random phase discontinuities 88−66241
time and frequency meas., standard signals transmission using phase modulation 85−4125
transmission system with multiplicative and additive noise, dynamical system model and filter simulation 86−16348
trellis codes with multilevel AM, error probability criterion, optimisation 87−2428
trellis phase codes, algorithm for minimum distance parameters evaluation 85−30176
phase modulation continued
trellis-coded modulation with redundant signal sets, introduction 87−39628
trellis-coded phase modulation on Rayleigh channels 88−2932
tuned single-sideband tube amplifiers, parasitic phase modulation anal. 87−59188
UHF mobile radio, decision feedback and Viterbi equalizers 88−28738
ultrafast event measurement techniques with mode-locked dye laser, phase modulation role 85−62705
ultrashort laser pulses, coherence props., study by nonlinear method 85−51249
ultrashort pulse generation by laser balancing self-phase modulation, group-velocity dispersion, saturable absorption and gain 85−29874
ultrashort pulses, phase modulated for relaxation time meas. 85−41474
varactor analogue phase modulator, 35 GHz, integrating waveguide technology 86−58050
vector modulation and demodulation, theoretical considerations *(Italian)* 88−27731
Viterbi decoding modem using dig. PM 87−40535
wavefront determination in optical reception system with multichannel phase modulation 87−75450
waveguide devices, loss and phase shift measurement 88−7916
X-band injection locked Gunn oscillator, AM-PM conversion 88−25504
zero-synchronous modulation for embedding data in DSB-AM 87−61558
AlGaAs/GaAs optical waveguide phase modulator using carrier depletion, design and characts. 86−36246
AlGaAs/GaAs waveguide phase modulators, wavelength depend. 87−25951
GaAs FET amplifier, AM-to-PM conversion *(Japanese)* 87−66565
GaAs IC nonlinear transmission line for picosecond pulse compression and broadband phase modulation 87−32590
GaAs multiquantum well phase-locked laser arrays using pulsed current injection, high-power picosecond pulse generation 85−12862
GaAs/AlGaAs quantum-well optical waveguide LV phase modulator 88−21056
GaAs-$Al_xGa_{1-x}As$ double heterostruct. phase modulators, performance comparison 88−14053
GaAs-$Al_xGa_{1-x}As$, p-n junction waveguide, phase modulation, orientation depend. 87−32928
GaAs-GaAlAs system, electro-optic modulation at microwave freqs. 87−74867
GaInAs-InP, phase and amplitude modulation by free carriers injection at 10.6 μm 87−74868
GaInAs-InP waveguides, amplitude and phase modulation by free-carrier injection 88−13942
Ge_xSi_{1-x}/Si strained-layer superlattice, linear electro-optical effect 86−63688
InGaAsP-InP high-efficiency electro-optical phase modulators 86−9623
InP material system single-mode optical waveguides and phase modulators 86−2702
$LiNbO_3$ optical parametric oscillators, superradiant picosecond 85−41512
$LiNbO_3$:Ti integrated optic strip waveguide phase modulator driven by SAW 87−46609
$LiNbO_3$:Ti optical fibre-coupled phase modulator, design, fabrication, performance 86−37873
$LiNbO_3$:Ti serrodyne optical frequency shifter with sideband suppression 88−33724
$LiNbO_3$:Ti waveguide phase modulators for coherent systems, eval. 87−56158
Na spectral broadening during laser pulse propagation, self phase modulation 85−12958
Nd:YAG laser, CW mode-locked, subpicosecond pulse generation using two-stage optical compression technique 85−56599
Nd:YAG mode-locked laser, intracavity self-phase modulation pulse compression 85−41362
ZnO bulk wave transducer struct. for acousto-optic phase modulation of single-mode fibres 87−67664
ZnO piezoelectric film deposition on single-mode filters and appl. to phase modulators 87−65570
phase modulation, optical *see optical modulation; phase modulation*
phase regulation *see phase control*
phase sequence indicators
digital detector with means to detect failure in detector cct. 86−39254
indicator system for specified freq. component of distorted elec. signals 85−58751
VDE regulations, affects on users *(German)* 85−43019
phase shift circuits *see phase shifters*

400 Mbit/s optical heterodyne DPSK system experiment with inline 1.5 μm amplifiers 88−35481
600 b/s quasiphase modem using power-line carrier upper AF sideband *(Chinese)* 87−3035
2400 baud DPSK modem for packet radio appls. 86−69497
2400 baud packet and bit error rate 86−69498
active broadband high-speed phase-shift keyers 87−17277
adaptive array behavior with periodic envelope modulatedinterference 86−22825
adaptive arrays, Gaussian interference effects assessment 88−14522
adaptive baseband equalizers for narrowband TDMA/FDMA mobile radio 88−41546
adaptive chirp modem 87−28280
adaptive filters for ASK, FSK and PSK demodulation 86−853
adaptive generation of decision fns. for digitally modulated signal classification 88−66277
adaptive quasi-coherent demodulator, statistical anal. 85−6235
all digital demodulator using off-the-shelf VLSI technology 87−37082
amplitude and phase keying modulation, satellite and terrestrial appls., tutorial review 86−64173
amplitude-weighted quadrature phase shift keying using SAWtechnology 86−10244
anti-multipath modulation, double phase-shift keying 88−21058
APSK and BPSK error rate levels analysis and comparison *(Polish)* 87−39579
ARQ transmission scheme involving zero-crossing channel eval. 88−53121
artificial delay insertion diversity to extend anti-multipath capability of DSK in mobile radio 87−27208
Audiodat, new system with higher data rate *(German)* 87−49244
automatic homodyne network analyser with phase shift keying and baseband data sampling 85−14734
automatic signal estimation of modulation type, carrier freq. and symbol rate *(Japanese)* 88−46079
AWQPSK technique using SAW modulator 86−2538
band-limited filtering, constant-envelope signals degradation eval. 87−27543
bandlimited nonlinear satellite channels, coded PSK modulation performance 88−22016
baseband demodulator for DPSK 87−39602
BER calculation for digital radio signal transmission 87−68934
binary differential detection for coherent lightwave communication 86−30754
binary DPSK, clock frequency fluctuation, optimum reception 85−25122
binary DPSk signal receiver, digital circuit of devices, expt. investig. 86−29913
binary DPSK signals, differential detection with intersymbol interference and noise correlation 85−19480
binary PSK coherent receiver, interf. cancellation technique *(Japanese)* 85−19312
binary PSK coherent receiver, interference cancellation method 86−69575
binary PSK correlation system, performance anal. *(Japanese)* 85−28423
binary sequence ensembles, optimum properties 88−40945
biphase PSK signals, phase-regeneration method using three-mode oscillator *(Japanese)* 86−68964
bit error rate performance of fading BPSK system with sounder in the presence of cochannel interference 87−40765
bit-rate limitations, intersymbol interference and fading 88−45702
block codes for the 2^n-PSK channel 87−54939
block demodulation system with timing extraction and carrier estimation *(Japanese)* 88−56525
block division slot setting for improvement of intermodulation effects *(Japanese)* 88−72726
board burst mode QPSK demodulation: an experimentalinvestigation for optimal configuration 86−55074
BPSK detection, decision directed differentially coherent 88−21219
BPSK modulator, low-loss design using variable phase shifter 87−59258
BPSK modulator for 3.7 to 4.2 GHz and having high carrier rejection 87−37536
BPSK modulator for high carrier rejection at 3.7 to 4.2 GHz 88−25067
BPSK system anal., simulated system aspects of convolution coding forGaussian and pulsed noise 86−29744
BPSK system with sounder to combat Rayleigh fading in mobile radio 86−43751
BPSK/QPSK timing error detector for sampled receivers 86−54432
broadband QPSK reflection modulator for digital satellite communication, design using finline techniques 85−8370
broadcast and cable TV, compatible digital audio format 88−15737
BSE, NTSC colour TV signal digital transmission experiments by DPCM-PSK *(Japanese)* 86−37844
burst mode 30 GHz high-power amplifier with helix TWT, QPSK BER performance *(Japanese)* 87−66515
C-band 120-Mbit/s TDMA QPSK modem for on-board satellite appls. 88−3899
cable television system, NABU Network use, Ottawa launch report 85−37301
carrier frequency estimator for modem signals 88−73004
carrier phase recovery for BPSK using maximumlikelihood estimation theory 86−54748
carrier recovery, transient probability response of cycle slip 85−13462
carrier recovery by means of remodulation with decision feedback from binary phase-shift keyed (BPSK) signals 87−68951
CD 900 digital cellular radio system using QPSK and TDM, mobile telephone equipment config. *(German)* 85−58010
cellular direct sequence and hybrid spread-spectrum radio networks, throughput and packet error tradeoffs 88−9462
clock recovery scheme for ternary duobinary AM/PSKsignal 87−2504
CMA-based interference suppressors, tone capture properties 86−10351
CMOS single-chip DPSK/FSK modem, design with Bell 212A and CCITT V22 compatibility 86−37630
CMOS single-chip modem, TSG 7515, FSK and DPSK operation, design and characts. *(French)* 87−62743
co-channel interference in an on-board processingsatellite 86−15966
CO-OQPSK, power and bandwidth efficient modulation for satellite communications 88−3938

phase shift keying continued
cochannel interference cancellation techniques for onboard processing satellite 88−2617
cochannel interference cancelling effects of MSE processing and Viterbi decoding in onboard processing satellites 87−19394
cochannel voice-modulated signals separation, experimental results 85−30236
code-division multiple access for wireless LANs 87−48311
coded 16-PSK, imperfect carrier recovery and phase ambiguities resolution 88−8698
coded 16-PSK signal, filtering effects 88−27807
coded 8 PSK modem with Viterbi decoder, performance, simplified metric calc. 87−48756
coded 8-DPSK modulation with differentially coherent detection, fading appl. 88−45861
coded M-PSK systems, effects of filtering 87−39601
coded octal PSK system performance disturbed by imperfectrecovered phase reference 86−68960
coded phase/frequency modulation 86−54411
coded/uncoded PSK transmission over satellite channel, two carrier phase recovery ccts. 88−22053
coherent digital communication, effect of oscillator phase instability, model 86−64481
coherent heterodyne optical receiver, effect of non-Lorentzian lineshape of semicond. laser 88−15452
coherent hybrid DS-SFH spread-spectrum multiple-accesscommunications 86−10596
coherent lightwave communications 86−30752
coherent lightwave transmission over 150 km fibre lengths using DPSK modulation 86−49692
coherent lightwave transmission technology *(Japanese)* 88−73914
coherent M-ary PSK systems in hyperbolic impulsive and Gaussian noise, BER perform. bounds 87−39578
coherent M-ary PSK with Gray code bit mapping, BER calcs. 86−54412
coherent optical communication systems, polarisation problems 88−45856
coherent optical communications systems with DPSK and PSK modulation 88−41694
coherent optical detection, phase-insensitive zero IF DPSK technique using phase switching 88−67349
coherent optical homodyne systems, optimisation methods 88−67367
coherent optical receivers, phase diversity techniques 87−56164
coherent optical receivers, pilot carrier, PLL anal. 86−17370
coherent optical transmission system, probability density function and bit error rate 85−58110
coherent optical transmission system, self AM 86−43853
coherent optical transmission system using robust PSK method 86−23934
coherent phase and amplitude digital modulations with carrier recovery noise, perform. degradation 88−8662
coherent PSK demodulator with optimum clock synchronisation device and ideal detector, noise immunity 87−44687
coherent receiver noise immunity, deviation from ideal 88−45850
coherent reception of PSK signals in fading channels 87−68936
coherent self-homodyne detection, use of nonlinear dispersion in optical fibre 86−54207
combined coding and modulation, theory and appls., 16-PSK and 32-PSK codes 88−66292
combined convolutional encoding and binary CPFSK modulation, performance improvement *(Korean)* 87−27145
communication channel, line-of-sight, amplitude and group delay distortion, time domain simulation 86−17055
communication systems with PSK signals, pauses protection 88−66796
companded PCM, Gaussian and Rayleigh fading channels, transmission errors anal. 85−2734
complete code partitioning for PSK signals into contiguous classes, correlation properties 86−37055
concatenated codes, performances on a DPSK channel 86−29749
constant envelope M-ary PSK signals, generation 85−57206
constant-envelope signal generation using sine-wave crossing technique 86−828
continuous phase power and bandwidth efficient encoded modulation schemes, CPFSK and error probability 85−25017
convolutional code performance in impulsive or burst noise channels 87−39668
convolutional codes with MPSK on Rician fading channels, perform. evaluation 87−39627
convolutional coding for BPSK system with orthogonal sounding tone on fast Rayleigh fading channel 87−20413
convolutional encoder and Viterbi decoder implementation, modem appl. 88−45930
Costas loop BPSK demodulation for spread spectrum system 87−47478
Costas loop PSK homodyne and heterodyne coherent optical receivers, anal. 86−43813
Costas loops, 4-phase modified, in-phase and quadrature channels reversal 86−17349
cross-product AFC with devices feedback for DPSK signals, noise performance 86−43412
crosspolarized, performance in presence of depolarization crosstalk 86−22891
CSMA with priority acknowledgements on intrabuilding power line LAN, performance 88−67036
CW pseudo noise BPSK radar with SAW convolver for signal processing 88−35587
CW X-band radar, integrated BPSK transmitter-receiver module 88−53373
data radio, transmission procedures and software possibilities *(German)* 86−4508
data relay satellites, four phase remodulation demodulator *(French)* 88−67284
data transmission system modelling *(Hungarian)* 85−7861
data transmission with vestigial-sideband-4-phase-shift-keying (VSB-4-PSK) 88−34922
DCTPSK, differentially detected controlled transition PSK 87−39586
DCTPSK for differential detection 86−16119
decision-directed diversity combiners, principles and simulation results 87−48903
delay-throughput comparison for coded channels in mobile fading environment 88−2933
demodulation techniques 85−2730
demodulator implementation for adjacent radio-channel interf. noise reduction 86−27162
differential decoder output error calcs. for DPSK signals 87−61584

phase shift keying continued
differential detection of MSK and QPSK, receiver structs. 87−75688
differential detection using multiple detectors, interleaving 88−72769
differential offset-QPSK modulation/demodulation technique for point-to-multipoint radio systems 88−45852
differential phase shift keying demodulator using a shear horizontal wave device 88−32056
differential PSK modulation signal processing devices using SAW technique *(Japanese)* 88−46754
differentially coherent forward error correction block coding 88−52335
differentially encoded QPSK satellite modem perform., baseband predistortion effects at transmitter 88−53209
digital communication coded systems in impulsive or burst noise, predetection and postdetection nonlinear processing techniques 86−29702
digital data transmission over the power mains using FH/PSK *(German)* 87−13553
digital data transmission system with indirect error detection, efficiency 86−23278
digital discriminators of PSK signals, statistical charact. analysis 87−44686
digital fibre optic transmission system, telemetry channel with DPSK 85−58109
digital group demodulation system for multiple PSK carriers 88−67306
digital group demodulation system for multiple PSKcarriers 86−64813
digital land mobile communication adjacent channel interference rejection method 86−69662
digital mobile communication using linear modulation method 87−68928
digital mobile radio, multipath distortion charact. for BPSK, QPSK, OQPSK, and MSK modulation techniques 86−37765
digital mobile radio, multipath fading channel, sample timing effect on BER perform. 87−28422
digital mobile telephony, modulation method *(Swedish)* 87−69944
digital mobile transmission, comparison of multipath delay and BER perform. 88−72559
digital radio, 11 GHz high capacity QPSK system perform 86−30635
digital radio, low capacity system, LR4 series using OQPSK modulation 86−23694
digital radio equipment with high spectrum-utilization, design *(Japanese)* 86−10954
digital radio link performance on long overwater path, meas. 86−17225
digital radio links, modulation and perturbations *(Spanish)* 85−25014
digital radio receivers performance, noise and jamming presence 87−40693
digital radio relay systems, honeycomb constellation, 90 Mbit/s 68 APSK modem 88−73747
digital radio relay systems of medium and high capacities, props. over selective fading channel *(Slovenian)* 88−35373
digital radio systems, general state of the art 86−37721
digital satellite communication expts. in 11/14 GHz band with Orbital Test Satellite 85−25825
digital satellite system, PSK signal transmission performance 88−53202
digital signal processing, frequency modulation procedures *(German)* 85−51600
digital signals reception, impulse interference presence 85−7891
digital signals reception with frequency-PSK, structural interference 87−55090
digital transmission on electric subcarriers in optical fiber videocommunication systems 88−3998
digital variable-delay, sine/cosine noncoherent detector 85−54742
digitally based modulation system for data transmission over telephone lines *(German)* 85−33730
direct broadcasting by satellite, D-MAC system, IBA franchise, UK 88−47257
direct fiber optic microwave wideband multicarrier transmission to satellite earth station antenna 87−74800
direct LOS communications, coded interleaved PSK modulation optimal performance 88−28691
direct microwave demodulation for data radio links *(French)* 85−57953
direct sequence differential PSK spread spectrum systems, performance in multiple tone interference 88−21065
direct sequence LPE spread spectrum signals design, confidence levels 87−40677
direct sequence MPSK receiver, M-ary large sample receivers design 86−16361
direct-phase-count digital demodulator for satellite communication systems, design and performance *(Japanese)* 88−46975
direct-sequence spread spectrum DPSK modulation for indoor wireless communications, expt. 88−3807
direct-sequence spread spectrum with DPSK modulation and diversity for indoor wireless communications 87−40646
direct-sequence spread-spectrum radio for indoor wireless communications 87−69925
direct-sequence structures, pulsed interference performance 86−30604
discrete composite frequency phase shifts keyed signal, combined processing 87−47475
discrete differential PSK system performance 87−69174
dispersion of systems of periodic phase-keyed signals with fixed number of blocks 87−19360
distortion of convolution spectra of PSK signals in frequency multipliers 85−11485
distribution function of the zeros of a mixture of a PSK signal and narrowband Gaussian noise 87−47750
diversity reception of PSK signals, noise stability of algorithms with solution feedback 88−28651
diversity reception of PSK signals, optimisation and noise immunity of recurrent algorithms 87−61903
DLL performance for PN sequences with bit errors 87−2403
DmB1M code and its performance in a very high-speed optical transmission system 88−72741
Doppler scattering environment, instantaneous frequency effects 88−8452
DPCM-AQB speech encoder, self-orthogonal convolutional coding 85−2757
DPSK 565 Mbit/s coherent transmission expt. with phase diversity receiver 88−47164
DPSK binary transmission over terrestrial and satellite links 86−48738
DPSK channel with memory, nonideal sync., coding efficiency 86−36934
DPSK communication systems, appl. of double-jump spectrum *(Japanese)* 86−3751
DPSK data demodulation based on SAW convolver using multiple waveguide *(Japanese)* 87−21807
DPSK encoder for high bit rate systems 87−61582
phase shift keying continued
DPSK heterodyne optical systems, LD nonLorentzian lineshape influence on bit-error rate floor 88−41668
DPSK signals, autocorrelation reception noise immunity, carrier detuning effect 88−34696
DPSK transmission on 800/900 MHz mobile radio channels with measured charact., error rate calcs. 88−41576
DPSK-2 carrier-invariant demodulator, noise immunity calcs. 88−27738
DQSPK burst-format transmission over satellite channels, fast carrier recovery scheme 85−47485
DS and FH spread spectrum systems, compatibility 87−40667
DS intercept receiver, transform domain processing, finite bandwidth interference performance 87−40670
DS spread-spectrum systems, multiple narrow-band interference rejection 87−34363
DS spread-spectrum systems, periodic pulsed multiple-tone interference, coded error probability 86−10961
DS-CDMA system using wideband noncoherent MFSK 88−46373
DS-spread spectrum receiver implementation with adaptive narrowband interference exciser 87−40737
DS-SSMA communications in impulsive channels, hard-limiting correlation receivers 88−28646
DS-SSMA with DPSK modulation and diversity for indoor wireless communication 87−28378
DS/DPSK receivers, soft decision decoding metrics 88−21934
DS/DPSK spread spectrum receiver, bit error rate performance 86−30580
DS/DPSK spread spectrum receiver, imperfect code synchronisation effects on narrowband interference rejection 87−40738
DS/SSMA communications in impulsive noise, performance, linear correlation receivers 88−15317
DSK anti-multipath modulation technique 86−54425
dual-mode modulator, QPSK/16-QASK, cct. design, architecture 87−5725
dual-polarised satellite communication link, prediction method for link quality calc. *(Japanese)* 87−28491
embedded multilevel trellis codes, construction 88−34565
ENCAP-4: a new cost-effective modulation techniquefor digital radio 86−29711
ENCAP-4, OQPSK-type modulation technique for digital radio 88−28643
encoded 16-PSK, simulation study for receiver design 88−45942
equivalent complex baseband notation for a QPSK/TDMAchannel 87−2677
error probability for differential detection in fast Rician fading and Gaussian noise 88−40995
error probability of PSK with intersymbol and adjacent channel interference 88−34550
Euclidean distance combined coding/modulation systems, algebraic construction 87−54920
external cavity semiconductor laser phase noise effect on DPSK heterodyne optical receiver 88−51805
fading mobile satellite channel, 4800-9600 bit/s transmission, trellis coded modulation 87−34483
fast hopping coherent multifreq. synthesizer using instantaneous phase/freq. detector 87−59218
FDM and PSK signals, power spectra and necessary bandwidth 86−10389
feedback communication systems, signal structure optimisation 88−21257
FH/DS spread spectrum communication system, multiple-access interference, BPSK *(Chinese)* 87−69886
FH/DS spread-spectrum communication system, multiple-access interference, DBPSK *(Chinese)* 87−69887
fiber-optic transmission of microwave 8 phase-PSK signal 88−28884
fibre optic transmission, high power, suppression of stimulated Brillouin backscattering by PSK 86−69772
fibre optic transmission of microwave 8-phase-PSK and 16-ary QAM signals at 1.3 μm 88−35498
FIR switched-capacitor modulators for discrete QAM, realisation 86−62497
frequency hopping channels using diversity and coding 86−64181
frequency hopping spread spectrum multiple access system, signal design 87−55967
frequency selective fading, differential detection of PSK, improvement by hard-limiter 88−35352
frequency selective fading channels, perform. of binary DPSK communications 88−28645
frequency-hopped multiple-access DPSK spread spectrum systems, multiple-user interference 86−30082
full duplex 1200/300 b/s single-chip CMOS modem design for QPSK/FSK operation 86−17103
full duplex 1200/300 bit/s single-chip CMOS model with Bell 212A compatibility 86−37626
Gardner timing error-detector derivation maximum likelihood principle 87−61851
Gaussian channels, frame synchronisation 87−75686
generalized multiple trellis coded modulation (MTCM) 88−2969
gHz band monolithic model ICs for QPSK 87−73741
gigabit QPSK modulator 87−75702
GMSK modem for digital portable transceiver 85−3372
GMSK modulator, quadrature-type, CMOS LSI single-chip baseband waveform generator, mobile radio transmission appls. 85−3375
group modem, algorithm and hardware implementation 87−39600
group modem for satellite communications 87−56047
hard limited satellite channels, perform. of coded MPSK in presence of interference and noise 88−46976
hard limited satellite systems, MSK and OQPSK, combined effects of adjacent channel, intersymbol and CW interference 87−40813
heterodyne differential PSK optical communication systems, laser phase noise effects 85−42616
heterodyne/coherent optical transmission systems, improved polarisation diversity method 87−76805
HF channels transmitted trellis-coded data signals, receivers performance 88−46874
HF communication, optimal signalling rates 87−40682
HF interference model, data transmission appl. 86−22709
HF single-tone data transmission with 2.4 and 4.8 kbps modems 88−46789
high precision/high isolation planar MM-wave PSK/AM modulator 88−25066
high-level-modulation data signals, synchronisation techniques 87−19385
high-speed data transmission, comparison of 16 PSK/ASK, 16 QAM and 16 PSK modulation methods *(German)* 87−39588
ideal DPSK channel with memory, coding efficiency 86−36932

phase shift keying continued
INTELSAT satellite using PSK/FDMA system, multichannel digital TV transmission at 15 and 30 Mbit/s 87−34487
INTELSAT system, 120 Mbit/s coded 8PSK modem with soft-decision Viterbi decoder 87−34514
INTELSAT TDMA network, 120 Mb/s QPSK modem use 86−4587
INTERCHAT SCPC terminal equipment for satellite telecommunication 87−48773
INTERCSAT: channelizing equipment for the international telecommunication system Intersputnik *(Hungarian)* 87−20441
interference, error probability computation 86−3747
interference immunity of a digital demodulator of complex signals 88−18999
interference in QPSK, OQPSK and MSK hard-limiting satellite systems, error analysis 86−43772
interference rejection in BPSK and QPSK DS SS systems 88−35351
interference suppression using adaptive array antennas 88−14518
intermodulation effects in PSK, MSK and QORC modulation systems *(Japanese)* 87−27148
intermodulation noise anal. due to harmonic transmission in PSK communication system using TWT amplifier 85−41652
IR/RF hybrid transmission system with common modulating cct. 85−8406
ISDN, secure satellite communications 87−28519
ISDN transmission over mobile radio channels 88−15215
JUK-110 series small-capacity PCM-4PSK multiplex radio equipment 88−41507
K-band (18-26.5 GHz) temp. stabilised Gunn VCO for digital radio systems 88−53166
Ka-band 180° PSK/ASK modulator, E-plane type with planer fin line cct. 88−56998
laboratory demonstration circuit for signal processing education 88−55873
land mobile satellite channels, comparison of data modulation techniques 87−48980
light route digital radio, LR4 series, field-tunable, implementation techniques 87−28368
line-of-sight communication channels with reflection, optimal reception 87−75810
low-complexity coding methods for high-data-rate channels 87−39619
LPI performance evaluation and parameter optimization for time-hop spread-spectrum systems 87−40678
M-ary DPSK in fast Rician fading and Gaussian noise, error probability formula 88−8663
M-ary DPSK on Rayleigh fading channel, error probability 88−45831
M-ary DPSK signal in satellite aircraft multipath channel, matched filter detection, performance 87−69995
M-ary DPSK with intersymbol interference and noise correlation, differential detection 87−33695
M-ary PSK and DPSK on a Rayleigh fading channel, probability of error 88−59004
M-sequences, increase of clock freq. 88−2922
Manchester-coded PSK, anti-multipath modulation technique 88−8673
MAP criterion synchronization method for HF modem 4ϕFDPSK *(Chinese)* 87−69779
maritime satellite channel, influence of multipath propagation on PSK-modulated systems 85−42499
matched digital filter for processing discretecombined frequency phase-shift keyed signals 86−35017
matching of nonbinary majorant codes with multiphase modulation 87−61559
maximum-likelihood trellis decoding of convolutional codes, error performance 88−14585
microprocessor controlled parallel modem with FDPSK 85−25624
microwave digital link equipment using PSK and QAM *(German)* 87−69903
microwave digital radio, direct digital synthesis of bandwidth limited PSK signals 87−28383
microwave line-of-sight channels, comparison of QPSK, SQPSK, QPR and SQPR systems perform. 85−36921
MILSATCOM, slow-fading nuclear-distributed channel, forward error correction and spatial diversity 88−22030
minimax binary PSK signals, regular method of pairs synthesis 86−29909
minimum mean square error equalizer for nonlinear satellite channels 87−48978
MM-wave QPSK modulator, design using fin line/IC techniques, satellite earth terminal appl. 87−6108
MM-wave subscriber loop for point-to-point digital and video communication, transceiver design 86−30646
mobile channels, use of repetition coding with binary digital modulations 87−68973
mobile communications, digital signalling technique using tone calibration 87−76582
mobile packet radio system, computer simulation 88−35389
mobile radio, antimultipath modulation PSK-RZ scheme, appl. of linear digital modulator 87−68939
mobile radio channels, packetised data communication system, perform. anal. 88−73412
mobile radio systems, binary phase shift keying system to combat fading 85−36942
mobile radio systems, digital technique for speech transmission *(Croatian)* 85−42485
mobile radio systems, fade margin calculation for channels impaired by Rician fading 85−36943
mobile satellite communications, four receivers, digital implementations comparison, BPSK, DPSK and SS modulations 85−47493
mobile satellite receiver, dual pilot tone calibration technique for multipath fading reduction 87−3133
modem, digital AGC 88−67166
modem design and implementation 87−69778
modem design for *F*1, *F*3, *F*6, and *F*9 signals using a digital PLL AFC system 87−55880
modem receiver using CCITT V.29 16 ASK/PSK modulation system *(German)* 87−40530
modified coded octal PSK with improved carrier-phase tracking 87−39599
modified PSK, line code for digital subscriber loops 86−36912
modulated coherent states, cut-off rate performance 88−8668
modulation, error probability anal. 85−2737
modulation instability, optical loss effects in PSK modulated coherent fibre systems 85−12600
modulation techniques for digital cellular systems 88−73826
modulators and demodulators using digital signal processing 85−63430
phase shift keying continued
MPSK, bit error rate reduction performance using compressed coding *(Japanese)* 85−62978
MPSK for trellis codes 85−41834
MPSK signals, coherent detection, bounds and approximations for error probability evaluation 85−36266
MSK carrier recovery cct. for deviated-frequency-locking detect. *(Japanese)* 86−10395
multi-mode modulator, design with 8 voice/data modes and broadband operation 86−40970
multi-speed PSK modem design *(Chinese)* 86−10877
multicarrier system, TDMA/PSK, error probability variation due to nonlinearity caused by on-off bursting 85−14095
multichannel limiters of phase shift code modulated signals, normalised characts. 87−45129
multidimensional coded PSK systems using unit-memorytrellis codes 86−64206
multidimensional normal probability integral, asymptotic value 88−346
multilevel channel coding system using binary convolutional codes 87−75701
multilevel CPFSK systems availability with modulation pulse shaping during multipath propagation 86−3748
multilink system, noise, cochannel interference and hardware imperfections, anal. 86−4571
multipath radio propagation, effects of delay spread on timing recovery 88−28650
multiphase demodulator with ideal classifier, noise immunity 86−36904
multiphase DPSK signal in satellite-aircraft multipath channel, matched filter detection performance *(Japanese)* 86−23078
multiphase spread spectrum signals, energy spectra 87−47482
multiple access direct sequence PSK spread spectrum system, error probability eval. *(Polish)* 87−55962
multiple differential PSK with Doppler, open loop frequency synchronisation 88−2924
multiple PSK/convolutional code bit error probability calcs. 88−2967
multiple trellis coded modulation 88−45887
multiple trellis coded modulation (MTCM) performance on a fading mobile satellite channel 88−45866
$(n-1)/n$ codes with soft decision decoding, implementation and simulation 87−69047
N-ary PSK and 16-QAM demodulation ccts., tangent type second-order digital PLL design *(Japanese)* 87−31762
narrowband BPSK system protection with adaptive array 88−8665
negatively correlated diversity branches using variousmodulation methods and maximal ratio combining 86−30561
NMOS QPSK full duplex modem, 1200 bit/s 85−30775
nonGaussian broadband and narrowband interference, locally optimum and sub-optimum detector performance 86−16487
nonlinear bandlimited channels, max. likelihood sequence detection for QPSK 87−19669
nonlinear channels, perform. eval. of combined coding and modulation schemes 88−8683
nonlinear interf. canceller for small signal detection, binary PSK/spread spectrum receiver appl. *(Japanese)* 87−26816
nonlinear intermodulation effects in PSK, MSK, and QORC modulation systems 88−2938
nonlinear repeater system error probability calcs. 88−27962
nonlinear satellite channels, equalisation for QPSK signals 88−47005
nonlinear satellite channels, M-ary transmission, simulation 85−14193
nonlinear satellite channels, minimum mean square error equaliser 87−34505
nonlinear satellite channels with bandwidth limitations, PSK signals transmission characts. *(Japanese)* 86−69722
nonlinear satellite communication systems, performance assessment, piecewise-linear models 85−25826
nonlinear transponders, 80 MHz, coded 8-PSK system for 140 Mbit/s information rate transmission 87−40792
octal encoded PSK modem with Viterbi decoder, performance evaluation using metric calc. *(Japanese)* 86−22922
octal encoded PSK system disturbed by imperfectly recovered phase reference, performance study *(Japanese)* 85−19351
offset quadrature, adjacent channel interference effects on hard limited satellite systems 86−55233
offset quadrature PSK, symbol rate detectability by delay-and-multiply receiver 88−52332
offset quadrature PSK modulation technique for digital radio 88−2945
offset-binary modulation, satellite communications appl. 85−20168
onboard modems, design 87−34260
optical binary PSK signals, homodyne detect. performance 86−43246
optical communication, carrier recovery at optical frequencies, minimum required power 86−48741
optical communication, coherent, BER degradation due to spectral spread of transmitter and local oscillator 85−37062
optical correlators, time-integrating coherent differential demodulation 87−47954
optical Costas loop self-homodyne experiment for a diode laserreceiver 86−55290
optical DPSK demodulation using in-place and quadrature detect. 86−4634
optical DPSK heterodyne detect., 400 Mb/s, using DBR laser diode with external feedback 86−43860
optical DPSK heterodyne detection using DBR laser diodes with external optical feedback 86−17366
optical DPSK heterodyne transmission expt. using external fibre cavity DFB laser module 88−53253
optical FDM system intermodulation interference 88−60175
optical fibre, video distribution networks, ASK, FSK, and PSK receiver sensitivities using heterodyne detect. 86−11102
optical fibre communication systems, recent advances, review 87−34568
optical fibres, power limits due to stimulated Brillouin scatt. in optical communication systems 88−51455
optical fibres, single-mode, in PSK coherent optical transmission system, bandwidth 88−35501
optical four-diode polarisation diversity coherent receiver, excess sensitivity 88−35482
optical heterodyne communication, phase noise influence on performance *(German)* 86−37907
optical heterodyne detection technology for long span transmission *(Japanese)* 87−40911
optical heterodyne DPSK receivers with post-detection filtering 87−56157
optical heterodyne DPSK system with quantum phase noise 85−14250

phase shift keying continued
optical heterodyne transmission systems using DFB/DBR laser diodes 87−13722
optical heterodyning versus optical homodyning, comparison 85−41827
optical homodyne receiver with a six-port fibre coupler 88−3973
optical homodyne system with balanced phase locked loop 88−41651
optical hybrid receiver, 90°, 140 Mbit/s ASK and DPSK, in-phase and quadrature detect. 88−60146
optical PLL, stabilised PSK transmitter with negative electricalfeedback to a semiconductor laser 85−56626
optical PSK heterodyne communications receiver, performance anal. and laser linewidth requirements 86−48740
optical PSK heterodyne expt., 100 Mbit/s, using travelling wave laser amplifier 87−40973
optical PSK transmission system with endless polarisation control, 565 Mbit/s, config. and performance 88−35477
optical receiver XX 87−49057
optical self-homodyne DPSK transmission at 1 and 2 Gbit/s over 86 km of fibre 88−3977
optical source linewidth criteria for heterodyne communication with PSK modulation 86−37883
optical two-channel DPSK transmission system with optical amplifiers, effect of channel spacing 88−67358
optimal local oscillator power in PSK homodyne systems 87−34551
optimum filtering of phase-shift keyed signals with fading 88−40948
OQPSK burst demodulator using reverse modulation, low E_b/N_0 design 88−2935
OQPSK for optical fibre communication links for distributed antennas in space station 87−76796
OQPSK signal design with predetermined eye diagram *(Portuguese)* 86−43134
orthogonal PSK signal systems with low first peaks of correlation function, anal. 86−22884
overlay modulation, performance anal. and comparison of techniques 86−3783
PCM, companded, Rayleigh fading channels transmitted, weighting schemes 86−22892
periodic phase-shift keyed locally optimal signals 86−23045
periodic phase-shift keyed signals, optimality conditions 86−16315
phase estimation of PSK-modulated carrier, matched nonlinearity 86−59198
phase-keyed signals, fast correlation processing algorithm, Vilenkin-Chrestenson functions 87−39785
picture transmission by underwater acoustic channel *(French)* 88−23213
planar surface acoustic wave wideband FM discriminator with 3 dB multistrip coupler 88−26645
PLL, false lock avoidance scheme 85−11113
PLL for PSK carrier recovery appls. 85−44943
PLL system with symmetric PSK of tunable generator, investig. 87−59256
polarisation PSK, coherent transmission technique with differential heterodyne detection 88−53255
polarity-type Costas receivers, false lock performance in presence of periodic data patterns 88−27741
portable communications environment, delay spread effects on digital modulations 88−8672
portable radio environment, delay spread effects 88−46937
postdetection diversity using a modified phase-correction loop for digital and mobile radio 87−27140
power spectrum estimation methods 88−8792
pseudo-coherent demodulation of MSK type signalsadapted to frequency hopping transmission *(French)* 86−48749
pseudo-random PSK sequences demodulation, noise immunity of digital demodulator determ. 87−47474
PSK communication system using SAW devices 86−16113
PSK modulator design using CAD *(German)* 88−6700
pulse-to-pulse phase shift keying, composite LFM signals 86−48747
pulsed bi-phase digital communication system 88−59962
QAM and QPRS systems, clock recovery, simulation study 86−16117
QDPSK, cochannel or multipath interference, error performance improvement using diversity 85−13458
QPSK, decision aided max. likelihood carrier recovery, bit error probability performance 87−39821
QPSK, maximal length nonbinary m-sequences 88−52334
QPSK, spread spectrum direct sequence and frequency hopping systems, perform. comparison 85−47423
QPSK and 9QPRS systems, clock recovery, simulation study 86−10242
QPSK and offset-QPSK signals, symbol timing recovery techniques 86−3752
QPSK and spread spectrum signals, mutual interference comparison 87−40697
QPSK carrier recovery by AFC tracking 88−45859
QPSK communication channel error performance characterisation, in presence of linear transmission distortion 88−2947
QPSK data modulation/demodulation circuits using passiveRF components, design and operation 86−20379
QPSK data transmission, estimator-detector development 85−57202
QPSK digital broadband reflection modulator design using finline techniques, satellite communication appl. 88−53237
QPSK digital satellite communication system with cochannel FDM-FM signal interference, computer simulation *(Chinese)* 87−62864
QPSK GHz-band monolithic modem ICs, bipolar process technology 88−25062
QPSK high speed modem with unique recovery and equalization 87−47487
QPSK high-speed modulator and demodulator with subharmonic pumping, operation and performance 88−70607
QPSK MIC exciter and modulator, microstrip implementation for 60 GHz operation 85−17870
QPSK MIC modulator and exciter, 60 GHz design for high data rates 85−23119
QPSK modems, effects of phase and amplitude imbalance on direct modulation/demodulation performance 88−41468
QPSK modulation and demodulation, Lamb wave signal processing device design *(Japanese)* 88−13652
QPSK modulation systems, asymmetrical pulse shaped, anal. 86−10243
QPSK modulator, 4 GHz, for high bit rates 86−35084
QPSK signal in nonlinear channel in digital shipborne Earth station system, performance *(Japanese)* 86−11036
QPSK signal spectral shaping using baseband techniques 87−19381
QPSK signals, nonlinear channels, digital ship earth station, performance characteris. 87−48973
phase shift keying continued
QPSK synchronous demodulator, design for 12 GHz digital satellite radio receiver *(German)* 87−5722
QPSK system, finite-bandwidth interference rejection using decision-feedback filters 88−2934
QPSK system, novel coded, bit error performance 86−48783
QPSK systems, coherent and differential, bandwidth efficient modulation technique by asymmetrical pulse shaping 85−41846
QPSK systems using decision-feedback filters, rejection of multiple CW interference 88−46867
QPSK transmission, 120 Mbit/s, adaptive equaliser design 88−3900
QPSK transmission, memoryless nonlinear device, modulation transfer effects 85−14191
QPSK wideband IF phase combiner ccts. *(Chinese)* 88−56519
QPSK X-band waveguide modulator 88−50329
QPSK-DS spread spectrum performance on scintillated channel 86−69590
QPSK-modulators designed by CAD methods 87−31765
QPSK/TDMA demodulation system with least-squares link anal., equalised, design 87−76017
QPSK/TDMA satellite channel, burst-mode link analyser with least squares algorithm 88−53208
QPSK/TDMA satellite channel and burst-mode link analyser, computer simulation 88−28762
quarternary DPSK error rates due to noise and interference 87−33633
radar ground clutter, optimum discrete two, three and four state waveforms 88−4093
radio, diversity systems, packet error probability in slow Rayleigh fading and Gaussian noise 86−59764
radio equipment for trunk TDMA systems 85−14216
radio systems sensitivity anal. of digital modulation technique to frequency selective fading 86−4471
random PSK signals spectral, statistical charact. 86−43265
rate−1/2 convolutional codes with QPSK on Rayleigh fading channel, performance bounds 86−68974
rate 2/3 coded nonuniform phase/frequency modulation 88−45871
rate 5/6 trellis-coded 8-PSK 87−19393
reception of PSK signals in a high-speed stochastic communications channel 87−75815
Reduced Bandwidth QPSK digital radio system, propagation influences on performance 85−25748
regenerative satellite, onboard modem 88−46783
regenerative satellite communications systems, uplink filtering 88−46995
relative PSK marine emergency communications system, bit interval duration calcs. 88−73868
RF package for business satellite systems at J-band 86−55282
Rician fast facing environment and Gaussian noise, differential detection, error probability 87−33693
rotationally invariant coded PSK signals 87−27169
rotationally invariant trellis codes for mPSK modulation 86−16118
rotationally invariant trellis codes for MPSK modulation 87−33594
RS-BCH concatenated and BCH single-stage codes, interference satellite channel, performance 87−47506
satellite channel coding performance simulation 88−46965
satellite communication, PSK signal transmission charact., nonlinearity and bandwidth limitation 88−15397
satellite communication, PSK signals transmission charact. nonlinearity and bandwidth limitation 85−63626
satellite communications, onboard burst mode CQPSK modem, test results 87−76650
satellite communications network control simulation 86−30734
satellite Earth station, modem/codec design, modular system architectural approach 87−76708
satellite network control, PSK signal quality estimates 86−30733
satellite networks, BPSK and QPSK system performance, effects of transmitter-satellite and receiver instabilities 86−23821
satellite transponder nonlinear signal output, spectrum anal. *(Japanese)* 88−41598
SAW modules for signal processing *(German)* 85−62169
SAW multipath combiner for satellite communications receiver 85−30985
SBPSK, robust bandwidth-efficient modulation for hard-limited channels 85−30164
SCPC signal demodulator, 400 channel, chirp transform and correlation detection scheme 88−44216
second-order costas digital PLL 87−44705
selection diversity with different receiving sensitivities *(Japanese)* 86−30567
semianalytic BER evaluation by simulation, noisy nonlinear bandpass channels 88−34527
semiconductor lasers with external cavity and linewidth reduction, minimum bit rate 88−9554
sets of orthogonal signals having optimum correlation functions 85−7784
shift-invariant nonlinear null filters for cancellation of autoregressive signals with unknown parameters 87−69215
signal class broadening with good correlation props. 88−72757
signal detection, local oscillator phase noise degradation *(German)* 85−7857
signal equalization over nonlinear channels with nonsymmetrical freq. response 88−27736
signal processing by microprocessor 88−46068
signal processing using SAW devices 87−1867
signal processor chip implementation of demodulator 88−56637
signal transmission experiment via communication satellite *(Japanese)* 86−11030
signal with unknown law of formation, frequency estimation 85−62956
signal-shape optimization for offset keying methods 87−47480
signals, quasicoherent demodulators noise immunity, comparative anal. 86−36900
signals synthesis 87−27406
single sideband 942 MHz mobile radio system for speech and data communication 85−36939
single tone HF serial modem, design using M-ary PSK 85−25623
sound image broadening control system, correlation coefficient variation method use 85−20392
spectral correlation, synchronisers design and performance anal. 87−12876
speed and modulation of the signal in data transmission *(Spanish)* 87−62485
spread spectrum, asynchronous transmission *(French)* 85−25732
spread spectrum direct sequence techniques, PSK system optimisation in jamming/multipath interf. environment 85−57945
spread spectrum indoor wireless communication, channel coding and diversity performance 86−23655

phase shift keying continued
spread spectrum systems, phase-coherent frequency hopped, performance anal. 88−3815
SS-TDMA regenerative repeater for communication satellite, integration and testing 87−70000
SSB PSK system, noise immunity potential 85−36176
SSMA communications, multipath diversity reception 88−15318
subband speech coding and matched channel coding for mobile radio channels 88−72771
suppressed-carrier N-ary PSK signals, tracking, N-phase digital tanlock loop appl. 86−3718
SW digital transmission system, simulation *(Spanish)* 85−19648
synchronization accuracy of phase-shift-keyed signals 88−45847
synchronous data recovery in RF communication channels, CMOS ccts. implementations for transceiver appls. 88−21911
synchronous PSK coded signals, power spectral density function evaluation *(Polish)* 86−3782
TDMA appls., bandwidth efficient DPSK 88−66276
TDMA channel, zero-IF digitisation and entropy anal. 87−76016
TDMA QPSK satellite channel, equalisation 88−3908
TDMA QPSK satellite channel, equalisation 87−3159
TDMA satellite communication system *(Japanese)* 88−15411
TDMA systems, burst interference anal. 86−37718
TDMA-cellular narrow-band mobile radio system, expts. 88−9459
TDMA/QPSK fast carrier recovery circuit using FTF for digital radio systems 87−28370
TDRSS real measured channel/space station, 8PSK, QPSK and TFM feasibility study 87−34507
teleconferencing system used at International Teleconference Symposium *(Japanese)* 85−42774
three-mode oscillator with second and third harmonic resonators, phase regeneration characts. 88−12242
three-position keying in communication systems 85−63187
TMS32010 2400 BPS modem implementation for mobile satellite appls. 88−41573
Tokyo Earth station, construction *(Japanese)* 88−28769
track signal reception in mass transit systems, use of redundant solid state filters 85−5462
tracking of deep space probes, using dual speed pseudonoise ranging system 88−15567
transmission channel nonlinearity, carrier restoration system interference immunity 86−36869
transmission integrity, phase and amplitude impairments impact 85−41831
transmit and receive filters for QPSK signals tooptimise the performance on linear and hard-limitedchannels 86−59197
trellis coded differentially coherent MPSK, phase noise effects 87−39661
trellis coded multilevel DPSK on fading mobile satellite channel, performance 88−2931
trellis coded PSK schemes, phase errors effects 87−27152
trellis coded quadrature-quadrature phase shift keying 88−21066
trellis codes for mobile satellite communications 88−2930
trellis coding with asymmetric modulations 87−39630
trellis-coded M-ary PSK with reference phase errors 88−8659
trellis-coded modulation with redundant signal sets, introduction 87−39628
trellis-coded modulation with redundant signal sets, state of the art 87−39629
tropospheric ducting medium, wide bandwidth signals transmission 85−24837
tuned amp. subject to PSK with smooth phase transition, transients 86−34560
UHF mobile radio, decision feedback and Viterbi equalizers 88−28738
ultrasonic PSK modem realization 88−13645
underwater acoustic telemetry systems, limitations and developments 85−26227
UQPSK modulator, unequal power split hybrid coupler design techniques 87−17324
urban mobile radio channel, Rayleigh fading, limits of data rates 87−69983
variance of phase-shift keyed signal systems with a fixed number of blocks 87−47473
Viterbi decoder, variation-hardened soft decision scheme, expt. eval for QPSK/OQPSK signals *(Japanese)* 87−7666
Viterbi decoder for 8 PSK modems using Ungerboeck codes *(Japanese)* 87−27200
Viterbi decoding of QPSK signals in hard-limited channels, soft decision scheme *(Japanese)* 85−30203
VSAT terminal equipment 88−60096
waveform and architecture concepts for a highefficiency TDMA satcom system 86−59852
weak-signal DPSK detection in narrow-band impulsivenoise 86−3860
wideband homodyne phase diversity receiver, coherent transmission experiments 87−49073
wideband signal propag. in three-layer tropospheric medium, anal. and PSK communication channel model 88−34297
wideband TDMA digital mobile radio cellular schemes, capacity 86−17244
zero-IF digitized QPSK demodulator in a single NMOS chip 88−25060
CO_2 laser intersatellite links, homodyne receiver concepts 87−20520
InGaAsP DFB laser, phase noise and linewidth, effect on DPSK coherent system 87−18973
InGaAsP laser, PSK subcarrier modulation at 3-16 GHz 87−8274
$LiNbO_3$:Ti waveguide phase modulators for coherent systems, eval. 87−56158

phase shift microphones *see microphones*

phase shifters

2-18 GHz continuously variable 0 to 360° phase shifter, design 88−12544
2-bit phase shifter, microwave IC design *(Korean)* 88−44355
10.7-11.7 GHz fast ferrite phase shifter, development 88−25349
30 GHz monolithic receiver 86−67505
90-degree differential phase shifters usingmeander-line networks 87−952
94 GHz synchronized oscillator-chain for fast, continuous 360° phase modulation 87−73737
C-band low-noise MMIC phased array receive module , design for MLS appls. 88−71115
accuracy of phase correction rel. to phase shifter characteristic 88−44314
active aperture arrays, phase shifter setting algorithm 86−29638
active broadband high-speed phase-shift keyers 87−17277
active high voltage divider and phase shifter, with small phase-angle uncertainties 87−11009
active high-voltage divider and phase shifter, power loss meas. appl. 88−16397
adding phase shift to the 8038 86−20362
adjustable-phase power divider 87−6061
airborne radar, using electronically steerable antenna technology 86−69829
analog X-band phase shifter using Schottky varactor diodes 85−1045
antenna array, spectral characts., electrical parameters of controlled components of phase shifters 86−36854
antenna array beamformer performance, phase shifter errors effect 85−62914
antenna array with discrete phase-shifters, pointing accuracy and positioning uniformity improvement 87−12839
antenna phased array optimisation with digital phase shifters by biquadratic programming 87−47414
antennas, C-band PIN-diode phase shifter 86−43075
antennas, dual mode airborne radar array 86−43068
antennas, null steering by controlling current amplitudes only 85−13399
antiparallel diode phase shifter ccts. 87−45134
biological objects, images, phase comparator at 2.5 GHz 86−50489
branch-line hybrid coupled semicond. phase shifters, integral anal. 87−37543
broad-band phase shifters with freq. ranges 0.8 to 2.1 and 0.5 to 2.6 GHz, refl. coeff. *(Slovak)* 87−59823
broadband phase shifters 86−35042
broadband phase shifters, sectioned multilayer stripline waveguides based, synthesis 85−61397
Butler matrices incorporating 90° or 180° hybrids, simplified design 87−27047
Butler matrix with real components, anal. 86−27567
calibration in phase-shifting interferometry 86−2490
cascaded differential microwave phase-shifters 87−45243
circular waveguide phase shifter design with small ellipticity *(Chinese)* 87−45189
commutated array network, phase-scanning 88−15620
control signal phase shifting in 90° steps 85−23064
coplanar Schottky variable phase shifter on GaAs substrate for MM-wave appls. 85−1036
coplanar waveguide and slot line in mag. substrates, anal. and expt. study 88−56832
coplanar waveguide phase shifter controlled by a spatially periodic optical illumination 88−7025
current-mirror phase-shifter oscillator using cascade config., design and characts. 87−23974
CW phase-shift filter cct. 88−70898
dAC lends digital control to phase-shifter 86−52974
data demodulation scheme using decimation phase control 87−23997
dielectric slab matched ferrite gyrator 87−37502
dielectric strip waveguide with movable metal plate, parameters 86−14472
differential analog microwave phase shifters synthesis 88−63915
differential ferrite phase shift section; 90° type using WRD 200 ridge waveguide 87−37509
differential phase shifters, 90° type using meander-line networks, design and matching *(Japanese)* 85−17786
differential-current electronically-variable current-mirror phase-shifter 88−56817
digital 2-D fan filters with complex coeff., 90° phase diff. network *(Japanese)* 86−27485
digital phase shifters, 0-180°, design based on symmetrical low/high pass LC ladders 87−59674
digitally controlled phase shifter *(Polish)* 88−12542
diode phase shifter and model in waveguide 87−73642
diode-grids for millimeter-wave phase-shifters and frequency doublers 88−1018
double dielectric-slab-filled waveguide phase shifter, theoretical and expt. study 85−45218
dual-mode ferrite phase shifter, fast switching type, scanning phased array antenna appl. 87−73650
dual-mode latching ferrite devices, microwave quadrupole type and polarisation insensitive phase shifters 87−987
dual-mode reciprocal phase shifter, magnetostriction insensitive config., design and characts *(Japanese)* 85−61467
E-plane stub-loaded rectangular waveguide phase shifter, optimum design 88−38688
electronically controllable antennas, MM-wave components 88−19353
error meas. by digital methods, accuracy aspects 88−908
fast acting measuring phase shift convertor, power industry appl. *(Slovak)* 86−14429
fast-switching dual-mode ferrite phase shifter 88−25387
ferrite, CW high power nonreciprocal phase shifter, design 88−51354
ferrite, longitudinally magnetised rod, rectangular waveguide, propag. constant calc. 87−75545
ferrite filled waveguide, freq. depend. of modes in premagnetised ferrites near reson. 88−70965
ferrite high power low loss devices 87−74528
ferrite phase shifter finite element analysis including losses 87−74527
ferrite phase shifters and control devices using circular waveguides, architectural aspects 87−45192
ferrite toroidal phase shifters, anal. using coupled-wave theory 88−57997
ferroelectric microwave phase shifters characts. 87−45244
fibre optic interferometer as voltage-controlled optical/RF phase shifter, phased array antenna radiation steering 86−22848
fibre-optic serrodyne frequency translator based on a piezoelectrically-strained fibre phase shifter 86−2698
FIR Hilbert transformers for DM signals, design method 86−34993
four state reflective microwave phase shifters, design *(Polish)* 88−25406
frequency-independent, voltage-controlled, resonant frequency meas. appl. 88−9930
GaAs phase-coherent microwave multiple-signalgeneration using all-pass networks 86−67509
gyroscope, fibre optic, closed loop, electronics subsystem 87−68145
helical, finite-element anal. 85−55105
hexagonal ferrite materials for phase shifter appls. at MM-wave freqs. 88−64967
high-power multiple-element loaded-line phase shifters for S-bend operation 86−1366
high-speed phase shifter based on optical injection of varactor 87−73771
HV power systems, phase transformers for power flow, model studies and test sites 86−12330

laser, actively mode-locked and Q-switched *(Japanese)* 85−18893
laser, L.P. 17.62, Q-switched and free lasing modes *(Rumanian)* 87−7323
laser active elements, silicate and phosphate glasses, effect of laser radiation repeated exposure 86−3274
laser glass, water induced absorption bands 86−48370
laser glasses, ion-exchange strengthened 88−2200
laser glasses, IR absorpt. of water *(Chinese)* 86−54111
laser glasses, moisture proofing *(Chinese)* 87−7236
laser glasses, research and development in China 85−56588
laser glasses, water and its removal, IR absorpt. bands *(Chinese)* 85−56586

phosphate glasses continued
laser glasses in China, research and development *(Chinese)* 85−18898
laser slabs, fracture due to thermal stress 86−63779
Nd:phosphate glass strengthened for high average power laser applications 88−20616
optical glasses, thermal distortion, IR and visible ranges, refr. index and stress-optic coeff. comp. depend. calcs. 85−41102
particle track detectors 87−29535
phosphate laser glass of absorption loss of 10^{-4} cm^{-1} 88−26742
quartz glass fibre light guides with Ge and P oxides, microdefects, stimulated Raman scatt. 86−9461
strengthened laser glass, ion exchanged, in high repetition rate active mirror amplifier geometry 88−65115
thermoluminescent glass, dosimetry, measurement possibility in kGy dose range *(Czech)* 85−64646
Al_2O_3-P_2O_5-SiO_2 based fibres, Nd^{3+}(Er^{3+}) doped, fabrication, assessment, optical props. 88−51461
$15Al(PO_3)_3.50BaF_2.20YF_3.xEuF_3$ cathodoluminescent glass compositions, efficiency 85−29707
B_2O_3-P_2O_5-SiO_2 borophosphosilicate glass, LPCVD from organic reactants 87−58970
$Ca(PO_3)_2$:Tb^{3+}, radiative lifetime, green fluoresc. laser meas. 85−18834
Cr^{3+}, Yb^{3+}, Er^{3+}: phosphate glass, lasing efficiency study with Cr^{3+} sensitiser 85−24511
FeO-P_2O_5-MgO glasses, polaronic hopping conduction, AC mechanism 87−45620
K_2O-Al_2O_3-R_2O_3-P_2O_5 quaternary glass system, laser props. glass form., Nd^{3+} conc. quenching, fluoresc. studies 85−41103
K_2O-MoO_3-P_2O_5 semicond. glass, electron transport, press. effects 85−61695
Li_2O-Al_2O_3-P_2O_5:Nd(Cr) glasses, luminesc. solar concentrators 86−51910
Li_2O-Nd_2O_3-La_2O_3-P_2O_5 glass, γ irrad., UV filtering of pumping radiation, effect on energy charact. 86−54122
MnO-P_2O_5 glasses, band-gap variation with manganese conc. 88−43949
MnO-P_2O_5 glasses, band-gap variation with manganese conc. 88−43949
MnO-P_2O_5 glasses, field depend. of optical band gap, expt. study 88−20488
$Na_3Al(PO_4)_2$:Nd laser glass in pulse-periodic regime, investig. 86−28776
Nd silicate and phosphate glass laser rods pumped in pseudoelliptic close-coupled cavities, thermal transient effects 86−22360
Nd:glass, fibre optic temp. sensor using fluoresc decay 85−56340
Nd:glass lasers, comparative tests in free-running, Q-switched and pulse periodic regimes 85−62543
Nd: phosphate glass CW laser, mode-locking 85−18891
Nd:phosphate glass laser rods, thermal effects 87−26352
Nd:phosphate glass, single 6 ps laser pulses with 2 Hz repetition rate 86−68491
Nd:phosphate laser glasses, flashlamp-pumped, heating and energy storage 86−42504
Nd^{3+}: phosphate glass laser, contribution of UV absorpt. to laser power 87−46825
Nd^{3+}-doped, rod amplifiers, influence of Nd^{3+} concentration and flashlamps 85−2270
P_2O_5-Al_2O_3-MgO-SrO-MnO glass thermoluminescent detectors, emission spectra and supralinearity 88−68230
P_2O_5-CuO-Na_2O glasses, elec. and optical props. 85−55476
P_2O_5-K_2O-R_2O_3 ternary glass system, laser props. glass form., Nd^{3+} conc. quenching, fluoresc. studies 85−41103
P_2O_5-BaO-ZnO-Na_2O-$Na_2U_2O_7$ VG-13 glass, high resolution nuclear-track-recording detector 87−41878
PbO-BaO-P_2O_5:Er^{3+}, Yb^{3+}, Cr^{3+} glass, energy parameters of lasing 85−2264
PbO-P_2O_5-V_2O_5 glasses, DC elec. cond., temp. depend., hopping mechanism, dielec. const. 86−8813
Pm^{3+}:PbO-In_2O_3-P_2O_5 glass laser, emission at 933 and 1098 nm 88−27102
TiO_2-V_2O_5-P_2O_5 thin glass films, switching and crystn. in high elec. fields 88−25901
V_2O_5-P_2O_5 glass, AC cond., polaron hopping model anal. 85−18102
V_2O_5-P_2O_5 glass cathodes for Li secondary battery, electrochem. charact. 85−44153
V_2O_5-P_2O_5 glasses, polaronic hopping conduction, AC mechanism 87−45620
V_2O_5-P_2O_5-(TeO_2) glass films, high field cond., memory switching 85−23461
V_2O_5-P_2O_5-Bi_2O_3 glass, conductivity minimum 87−74029
V_2O_5-P_2O_5-Sb_2O_3 glass, conductivity minimum 87−74029
$(V_2O_5)_x$-$(P_2O_5)_{1-x}$ glasses, local struct. and hopping cond., EXAFS and XANES studies 85−50222

phosphorescence

CRT screen fabrication, phosphor deposition technique 87−3670
CRT screen flicker, influence of phosphor remanence *(French)* 87−63454
degradation under cathode-rate excitation 85−35617
detector for X-ray spectroscopy, energy resolution 87−71041
digital projection radiography, storage phosphor system imaging performance 88−10323
displays appl., evolution and 1985 status 85−51037
displays design, luminophores selection *(French)* 87−54179
electroluminescent light sources *(Polish)* 88−14040
electron beam effects obs., CRT displays appl. 86−28980
fibre optic coupled CCD system 88−22650
film charactn. meas., vacuum UV, using multichannel detector 87−74923
flicker-free video display terminals design 88−67953
fluorescent lamp phosphors, spectral energy distrib. shape, Gauss error function anal. 85−35619
gated second generation image intensifier, performance charact. 88−53723
green phosphor for improved optical output of small fluorescent lamps *(Japanese)* 88−14022
head-up display CRTs, phosphor screens evaluation 88−67954
IIa-VIb compound phosphors *(Japanese)* 88−8053
image intensifier with short decay time, performance charact. study 87−41373
image intensifiers, microchannel plate, phosphor glow persistence 85−34436
inorganic materials, activator ion doped luminescence *(French)* 87−18839
L-43 and L-50 phosphors, comparison of performance for chromaticity correction in mercury vapour lamps *(Russian)* 85−16397
lamp phosphor relative quantum efficiency obs. *(Japanese)* 85−56427
lanthanide beta″ alumina, solid electrolyte for solid lasers and phosphors 86−22345
laser-stimulable luminescent phosphor imaging plate detectors for single exposure dual-energy digital radiography 88−29992
light output in fluoresc. lamps, depreciation 86−40284
light-signal electroluminescent panels with a controllable multicolour image *(Russian)* 85−35647
luminescence, conference, Rovno, USSR (Nov. 1984) 87−16238
luminophors, Soviet-made, nomenclature and quality 87−18834
Lupica-Ace high-efficacy three-band fluorescent lamp characteristics 85−53914
materials for electroluminescent thin films 87−46673
materials for large area displays, evolution and present status 86−2943
metal halide lamps, phosphor coated, low colour temp., increased red output 85−16383
microchannel plate image intensifier tubes, nanosecond light shutters in coupled video systems 87−53130
miniature CRT single-crystal phosphor screens, saturation land heating obs. 85−18036
monochrome CRTs, choosing a color, white amber or green phosphors 85−8716
moving surface temperature meas. using phosphor thermography 85−64318
multicolor thin-film electroluminescent device with patterned phosphors 88−16332
multicoloured CRTs, dry process for phosphor screen fabrication 86−1647
narrow-band, fluoresc. lamps, spectral charact. improvement 88−6011
oxide ionic crystals, broad gap, luminescence, synchrotron radiation studies 87−18837
P1, P43 and P53, for head-up display CRTs 86−50714
P43, fine grain, miniature CRTs with high brightness and resolution appl. 85−18037
P53, electron beam effects obs., CRT displays appl. 86−28980
passive tried AC plasma colour panel 86−31493
photometry with image intensifiers and integrating readout devices effect of phosphor persistence 87−6339
photostimulable phosphors for computed radiographic imaging 87−50276
power coatings, optical props. calc. by Monte Carlo methods 88−58333
projection CRT glass, radiation damage obs. 85−14661
protein crystallographic data acquisition using Kodak storage phosphor plates 88−42460
proximity image intensifier persistence improvements with Y_2O_2S:Tb phosphor 87−34791
radiographic imaging of X-ray information using storage phosphors, image quality 88−8054
radiography utilizing photo-stimulated luminesc *(Japanese)* 85−38088
radioluminescent imaging, factors affecting light output 85−20897
rare earth chalcogenides, $RGa_2S_4(Se_4)$:Nd^{3+} *(Russian)* 87−68267
remote thermometry in combustion environment appl. 88−42605
sampled colour monitor displays, perceptual analysis 88−67970
saturation in electron beam tubes, trends and developments in system parameters *(Russian)* 86−1641
scintillation counter material P31, for soft X-ray spectroscopy 85−59173
screens, adherence, poly(vinyl alcohol), faceplate glass and slurry props. 85−18800
screens, XUV detectors for normal incidence X-ray telescope 88−36158
silicate based luminophors, props., fabrication and appl., review *(Czech)* 85−41258
single-crystal particle phosphors incorporating several activators in onion-skin structure 87−2024
sodium salicylate, soft X-ray fluorescence obs. 85−2138
storage phosphor system for computed radiography: destructive scanning 87−14864
storage phosphor system for computed radiography: screen optics 87−14865
storage phosphor system for computed radiography, optical effects and detective quantum efficiency 88−23056
storage phosphor X-ray diffraction detectors, acquisition system 88−42459
streak camera, phosphor nonlinearities 86−11463
strontium sulphide based electroluminescent phosphors 86−36326
sulphates and sulphides, X-ray luminescence using synchrotron radiation 87−68270
phosphors continued
Sunstone II-VI phosphors, up-conversion characteristics 88−40056
tetraphenyl-butadiene, soft X-ray fluorescence obs. 85−2138
thermographic phosphors, bibliography on temp. dependencies 87−46671
thermoluminescence dosimetry, annealing cycle effect on glow curve, sensitivity and background 85−38252
thermoluminescence dosimetry materials, spectral characteristics 88−26967
thin film electroluminescent edge emitter array for optical image bar appls. 87−2037
time-multiplexed plano-stereoscopic CRT display systems, 'ghosting' effect 88−4562
transparent single-crystal garnet cathodoluminescent phosphors for overcoming CRT phosphor limitations 88−8052
TV phosphor screens, optical props. 88−50602
vacuum fluorescent displays, technical features *(Swedish)* 85−3891
VDUs with bright background, use of slow phosphors to eliminate flicker 87−29200
wavelength conversion for enhanced fiber optic ultraviolet sensing 88−67858
X-ray film with intensifying screens, sensitivity, tube voltage depend 86−18317
X-ray intensifying screens for mammography, charact. 86−25217
X-ray phosphors, development, parameters, future outlook 87−46672
X-ray phosphors, efficiency, light storage, and image information content 87−18836
AlO_x:Ce^{3+}, Tb^{3+}, Mn^{2+}codoped polyaluminate phosphor, green light emission 88−33867
$(Ba,Ca,Mg)_{10}(PO_4)_6Cl_2$:$Eu^{2+}$ phosphor for three-band fluorescent lamp *(Japanese)* 85−56428
BaFBr:Eu medical X-ray storage phosphors, photostimulation mechanisms 88−58350
BaFBr:Eu^{2+} evaporated thin films, photostimulated luminesc. 88−40060
$BaMgAl_{14}O_{23}$:Eu^{3+} phosphor in AC plasma display panel for colour TV display *(Japanese)* 85−14902
$BaSO_4$:Eu^{2+} TLD phosphors, photoluminesc. 86−22231
$(Ca,Mg)_2SiO_4$:Tb,Eu, activated phosphors, UV emission 88−51668
CaF_2-AlF_3:Mn^{2+}, cathode and X-ray luminescence, long afterglow phosphors *(Japanese)* 87−68268
CaMgS:Mn, orange emitting phosphor for terminal display tubes 87−74924
$Ca_{1-x}Mg_xS$:Eu(Ce) phosphors, cathodoluminesc. 85−2137
$Ca_{10}(PO_4)_6F_2$ crystal as fluorescent lamp phosphor, colour centre studies 87−61033
CaS phosphors, doped, thermoluminesc. dosimetry 88−33866
CaS thin film AC electroluminescent devices, light evolution 87−38937

$(Y_{1-x}La_x)_2O_3:Eu^{3+}$ phosphor, luminescence props., La substitution effects 85−35618
$Y_2O_3:Eu^{3+}$ phosphors, dye laser spectroscopy 85−46258
Y_2O_2S:Eu phosphor-based thermometry of generator rotors 88−4668
Y_2O_2S:Tb X-ray intensifying screens for mammography, charact. 86−25217
Y_2O_2S:Tb phosphor screens, X-ray efficiency, 20 to 60 kV range 88−65476
Y_2SiO_5 and $Y_2Si_2O_7$, phosphor potential 85−46256
Y_2SiO_5, single cryst. phosphors, thermal expansion 88−31861
$Y_{3-x-y}Tb_xLu_yAl_{5-w}Ga_wO_{12}$ single cryst. phosphor, total light output and LPE growth 88−56231
$Y_2(WO_4)_3 \cdot nH_2O:Eu^{3+}$, luminescent precipitate prep., photolum. brightness 85−2139
$Y_{0.77}Yb_{0.20}Er_{0.03}F_3$ IR to visible conversion phosphors, cryst. growth by two-step firing *(Japanese)* 87−46670
(Zn,Cd)S:Cu, Br large-area matrix-addressed ACEL display device 87−3470
$Zn_{1-x}Cd_xS$ phosphors, UV light irradiated, surface anal. 88−14021
ZnCdS:Ag phosphor screens, X-ray efficiency, 20 to 60 kV range 88−65476
$Zn_{0.25}Cd_{0.75}S$:Ag,Cl phosphors for vacuum fluorescent displays, grinding and baking effects 88−26966
$Zn_{1-x}Cd_xS$:Ag, metallised semiconductor phosphor powder, luminesc. 86−42418
ZnO phosphors, electroluminescence elec. and UV radiation effects 85−35622
ZnO phosphors, photocond. meas. 85−56411
ZnO:Zn phosphor, sintered ceramic plate, electrolum. and photolum. 88−40059
ZnO-based phosphors synthesis and characterisation, display screen appl. 86−58827
ZnS, ZnSe, crystal growth by chem. transport using NH_4Cl transport agent 87−31481
ZnS blue emission probing rel. to AC thin film electrolum. structs. 86−9672
ZnS, polycrystalline, AC driven thin film electrolum. displays 87−2036
ZnS:Ag, Cl phosphor films, emission props., influence of insulating Y_2O_3 layer *(Japanese)* 88−2109
ZnS:Cl,Cu,Mn phosphor layer, light amplifier, dynamic charact. 86−2975
ZnS:Cu, Br, Mn phosphor, electroluminesc. deterioration, EPR study 85−35621
ZnS:Cu, Pr, Cl, phosphors, current variation, high field electroluminescence 85−7315
ZnS:Cu, electrolum. phosphor, microscopic structure 88−40058
ZnS:Cu, phosphor screens, X-ray efficiency, 20 to 60 kV range 88−65476
ZnS:Cu,Pb phosphor, IR pulsed stimulation and transient emission spectra 85−24393
ZnS:Cu,Yb phosphor, AC electrolum. study 87−7209
ZnS:ErF_3, YbF_3 thin-film electroluminescent device, influence of Yb^{3+} *(Japanese)* 88−51688
ZnS:ErF_3, high-contrast thin-film/powder composite DC electroluminescent display 85−14921
ZnS:LnF_3, thin film electroluminescent display, polychromism in attenuating field *(French)* 85−12721
ZnS:Mn AC thin film electroluminescent devices, MOCVD grown, memory effect 86−58838
ZnS:Mn AC thin film electroluminescent devices, MOCVD prep. 86−22251
ZnS:Mn, Cu, electroluminescent flat screen *(French)* 85−14918
ZnS:Mn, Cu_xS coated, EPR and brightness studies 88−40057
ZnS:Mn, electrolum. study 87−7210
ZnS:Mn electroluminescent thin films, photothermal deflection spectroscopy 87−18838
ZnS:Mn evaporated films, cathodolum. props., 2-6 kV acceleration voltage range 86−22229
ZnS:Mn films, RF magnetron sputtered, AC thin-film electroluminescent devices 88−51685
ZnS:Mn, high-contrast thin-film/powder composite DC electroluminescent display 85−14921
ZnS:Mn high-field thin film electroluminescent displays 88−4550
ZnS:Mn single crystal phosphor layer for AC electroluminescent devices 86−9697
ZnS:Mn sintered phosphor-ceramics, DC electroluminescent devices 87−38938
ZnS:Mn, thin film electroluminesc. devices, yellow emission decay 88−40093
ZnS:Mn thin film electroluminescent device, MOCVD fabrication 86−58837
ZnS:Mn thin film electroluminescent devices with doubly-stacked insulating layers 87−54195
ZnS:Mn, thin film electroluminescent display, polychromism in attenuating field *(French)* 85−12721
ZnS:Mn thin-film electroluminescent devices, double light pulses obs. 86−63727
ZnS:Mn(Pl,Cl) powder phosphors, storage effects 86−22233
ZnS:Pb electroluminophores, properties 86−15564
ZnS:Pb,Mn, phosphor, pulsed laser stimulation and excitation 85−7317
ZnS: Pr, Cl, phosphors, current variation, high field electroluminescence 85−7315
ZnS:Sm,(Cu) electroluminescent phosphors, Alfrey-Taylor relation 85−2136
ZnS:Sm,P thin film electrolum. devices, new phosphor, red emission 86−36350
ZnS:Sn,Cu electroluminophors, base condition influence on electrolum. props. 88−40061
ZnS:Tb, F electroluminescent thin films, RF magnetron sputtered, annealing effects 87−54180
ZnS:Tb/ZnS:SM/ZnS:Tm colour electroluminescent devices, MOCVD preparation 88−2129
ZnS:Tb,F active layers for high-brightness green-emitting electroluminescent devices 86−58836
ZnS:Tb,F thin films, electron-beam evaporated and RF magnetron sputtered, electroluminesc. 87−68272
ZnS:TbF thin-film electroluminescent devices, excitation mechanism 87−26218
ZnS:Tb,F thin-film electroluminescent devices, Tb-F emission centres 87−61048
$ZnS:TbF_3$, electrolum. obs. after alcohol adsorption 88−51669
$ZnS:TbF_3$, high-contrast thin-film/powder composite DC electroluminescent display 85−14921
$ZnS:TbF_3$ thin films, electron-beam coevaporated, green electroluminesc. 85−35615
$ZnS:TbF_x$ MOCVD films, green-emitting electroluminescent devices, photoluminesc. and electroluminesc. 88−51684
ZnS-based electroluminescent phosphor, influence of surface Cu_2S 87−2025
$(ZnS)_{1-x}(CdS)_x$:Cu, Yb, Co luminophor for near IR detection 87−38918
ZnS(Se):Mn, electroluminescence driven by short voltage pulses, energy transfer 85−41257
ZnSe:Mn DC electroluminescent cells, plasma-assisted MOCVD using di-π-cyclopentadienyl manganese 85−51038
ZnSe:Mn, temp. depend. electroluminescent props. 85−29708
Zn_2SiO_4 phosphors, UV photolysis in fluorescent lamps, XPS and chem. anal. 87−58439
Zn_2SiO_4:Mn, MgO surface modified, phosphor direct view storage tube screens, adhesion 86−27809
Zn_2SiO_4:Mn phosphor in AC plasma display panel for colour TV display *(Japanese)* 85−14902
Zn_2SiO_4:Mn phosphor in Townsend discharge memory panel for colour TV display *(Japanese)* 85−14901
Zn_2SiO_4:Mn,As phosphors, electron-hole recomb., diffusion model 86−22230
$ZnY_2Si_2O_7$, phosphor potential 85−46256

phosphosilicate glasses
B_2O_3-P_2O_5-SiO_2 glass films, CVD for Si MOS LSI *(Chinese)* 86−67693
boro-phospho-silicate glass passivation layer on InGaAs-InP planar photodiode, reliability and leakage current charact. 88−26979
borophosphosilicate glass, plasma-assisted deposition, depend. on substrate props. 88−6496
borophosphosilicate glass film, rapid isothermal fusion 87−11685
borophosphosilicate glass film CVD optimisation 86−490
borophosphosilicate glass film deposition by pyrolytic decomp. of tetraethylorthosilicate 86−52520
borophosphosilicate glass films, CVD growth at low press. and temp. 86−20104
borophosphosilicate glass films, low press. CVD 88−6497
borophosphosilicate glass flow, solid-state imager appl. 86−17972
borophosphosilicate glass for VLSI device fabrication 86−28408
borophosphosilicate glasses, low pressure deposition by pyrolysis of tetraethylorthosilicate 88−24764
chip glass passivation, P migration kinetics from PSG, electron microprobe 85−7045
CVD deposition and reflow 85−33529
dielectric films on InP and GaInAs, XPS studies 85−50435
electroluminescent displays brightness-voltage charact. deterioration analysis 88−16342
film, photo-CVD deposition charact. 85−44792
film, reflow in steam, rapid thermal processing 87−11684
film wet etching and induced defects 86−67808
films, low temp. plasma-enhanced CVD process for hot and cold wall reactors 88−24786
films, plasma-activated deposition 85−453
films, rapid isothermal fusion, for IC fabrication 86−21651
films, step coverage improvement, dry etching, VLSI multilevel interconnect technology appl. 85−55902
flow rel to semicond. processing, numerical modelling using SAMPLE process simulation program 88−32969
glass transition temp. and thermal expansion, VLSI appl. 85−39820
high temperature and energy-related materials, conf., Santa Fe, NM, USA (April 1984) 86−13156
laser-induced flow modelling in multilayer struct. 87−25060
layers, device back-end processing, structural impact, incoherent light annealing 86−41643
low-temp. CVD of dielec. films using O_3 and organosilane 88−20103
LPCVD, forced convection flow, LTO, PSG and BPSG dielec. film form. 88−451
metallisation, multilevel technique for advanced CMOS and bipolar ICs 87−1788
p-n-p power transistor failure anal. in low process yield 87−67223
passivation, Al electromigration MTTF, effect of stress due to passivation 88−19861
passivation on IC devices, effect of fillers in plastic resin *(Japanese)* 88−71665
PGSG films planarisation process for 2 μm metal interconnect process over severe topography 85−40661
planarisation with spin-on-glass/LPCVD composite films 86−41711
planarised CMOS double metal structures, statistical anal. 87−1789

phosphosilicate glasses continued
plasma etching conditions for microelectronics appls. *(German)* 85−40644
plasma-enhanced CVD coatings, dielec. and passivation-related props. 86−2044
PSG and BPSG, plasma enhanced CVD 85−10776
rapid heating reflow, As ion implantation effects 87−11657
rapid thermal annealing, transient reflow of PSG and BPSG 87−1795
reflow during semicond. processing, 2D simulation 87−25134
ring resonator fabricated in phosphosilicate glass films deposited by CVD 87−12121
viscous behaviour in VLSI processing 87−18247
B_2O-P_2O_5-SiO_2 glass films, moisture resist. 88−474
B_2O_3-P_2O_5-SiO_2 BPSG doped glasses, rapid flow for VLSIC fabrication 87−74384
B_2O_3-P_2O_5-SiO_2 glass films, contact resist. behaviour, enhanced Si oxidation 87−66998
B_2O_3-P_2O_5-SiO_2 glass films, low-temp. CVD of dielec. films using O_3 and organosilane 88−20103
B_2O_3-P_2O_5-SiO_2 glass films, simultaneous B and P content determ. by FTIR spectroscopy 85−54541
B_2O_3-P_2O_5-SiO_2 glass flow in PH_3-O_2 ambient, VLSI appl. 87−336
B_2O_3-P_2O_5-SiO_2 glass reflow of contact vias in VLSI processing 87−1592
B_2O_3-P_2O_5-SiO_2 glass viscous behaviour in VLSI processing 87−18247
B_2O_3-P_2O_5-SiO_2 glasses, dopant conc., FTIR spectroscopy anal. 87−45746
B_2O_3-P_2O_5-SiO_2 glasses for MOS ICs 85−54513
B_2O_3-P_2O_5-SiO_2 interlevel dielec. for double-level metal process 86−28243
B_2O_3-P_2O_5-SiO_2, spin-on liquid doping sources, VLSI appl. 86−21758
B_2O_5-P_2O_5-SiO_2, borophosphosilicate glass films, low pressure CVD using miscible liquid precursors 87−36795
BPSG as interlayer dielec. for dual metal CMOS process 88−13588
BPSG films deposited by APCVD 88−12066
P_2O_5-GeO_2-SiO_2 optical fibre preform core, phosphor exam. 87−74653
P_2O_5-GeO_2-SiO_2 optical fibre preform, parameters distrib. along radius 87−74654
P_2O_5-SiO_2 glass/SiO_2 double layer dielec. films, X-ray irrad. effects 87−32413
P_2O_5-SiO_2 glass/SiO_2 film radiation-hard insulator for MOS LSI deviceisolation 86−35873
P_2O_5-SiO_2:P films, reactive sputter deposition in P vapour 85−60992
Si-SiO_2/phosphosilicate glass double layer, passivating effect *(German)* 85−12201
SiO_2-GeO_2-P_2O_5 poled fibres, frequency doubling by modal phase matching 88−65179
SiO_2-P_2O_5 optical fibres, γ-irradiated, phosphorus oxygen hole centres 87−7066
SiO_2-SnO_2-P_2O_5 optical fibres, improved modified CVD fabrication technique 85−18677
SiO_2-ZnO-Li_2O-P_2O_5-K_2O, ceramic with similar thermal expansion coef. to Cu, preparation and bonding *(German)* 87−60711
W interconnect, blanket CVD for VLSI devices with PSG 87−1462
ZnO-B_2O_3-SiO_2-P_2O_5 passivation and VLSI packaging glasses 87−25114
ZnO-SiO_2-B_2O_3-P_2O_5 glass system, DTA, thermal expansion, comp. depend., LSI package sealing appl. 87−52224

photoacoustic effect
2 MHz photoacoustic meas. technique 87−50588
acoustic emission, appls. to laser processing of ceramics 88−54815
chemical etching of ceramics, laser-enhanced, acoustic emission appls. 88−16983
coating thickness meas., photoacoustic method 86−18112
convergent acoustic waves, laser generation, appl. to materials evaluation 87−71462
ferrochrome tape, FMR depth profiles, photoacoustic detection 85−24163
fibre optic sensors, multimode, with freq. output, photoacoustic excitation of mech. resonators 87−32951
fibre sensor, optoacoustic, for trace anal. in gases 85−50962
inhomogeneous materials, US evaluation, conf., Erice, Italy (Oct. 1985) 88−498
integrated circuit subsurface features, detect. by photoacoustic microscopy 87−23373
laser beam power meter using photoacoustic cell 85−51229
laser generation and reception of ultrasound 88−10172
laser in process monitoring, laser beam analyser and acoustic mirror 88−2433
laser optical power meter, using piezoelectric detection 88−34091
laser power meter based on photoacoustic effect 88−20716
laser pump and probe beam collinear alignment using photoacoustic deflection technique 85−51078
lasers in acoustics, sources, detectors and signal anal. 88−29719
layered imaging for subsurface features of integrated circuits by photoacoustic microscopy *(Chinese)* 88−64634
layered materials, thermoelastic inspection, dynamic analysis 86−569
medical photoacoustic microscope, cancer cells detect. appl. 86−50556
metallurgical thermal treatment prod. by Nd:glass laser, acoustic charactn. 88−45528
methanol optically pumped by CO_2 laser, optoacoustic effect 86−42490
microelectronics failure anal. using scanning laser acoustic microscope 86−7550
microscopy, two-dimensional Hadamard transform appl. 87−71409
microscopy of thermally anisotropic materials 86−6153
microwave power meas. in mm-wave and submm-wave beams 86−38540
open-cell photoacoustic radiation detector 88−22550
optical meas. of acoustic and photoacoustic effects 87−71410
optical remote control using photoacoustic cell *(French)* 85−25384
optical sensors construction 88−60743
optoacoustic interaction and phase conjugation of sound beams in piezoelectric semiconductors 87−32269
optoacoustic transducer prototype, focusing procedure 88−75000
optoelectronic devices, photoacoustic and currentacoustic effects 86−9689
optopneumatic convertor, high-sensitivity, fluidic control appls. 88−74441
oscillator sensors with optical feedback 88−36029
photovoltaic cells, photoacoustic calorimetry of thermal loss mechanisms 85−39192
piezoelectric crystals, acoustic props. investigation by means of photoacoustic effect 85−56017
polymethylmethacrylate, damage by pulse-periodic CO_2 laser radiation 85−41449
pulse energy meas., high-sensitivity pyroelectric and optoacoustic receivers 88−36002
pulsed photoacoustic microscope analysis 88−16952

photoacoustic effect continued
rock anisotropy meas. using laser-generated ultrasound 88−16881
scanning laser acoustic microscope using surface acousticwaves and digital image processing 86−6152
self-resonating optically driven oscillators appl. 88−4421
semiconductor defects, nondestructive obs. with photoacoustic and photothermal radiation microscopy 86−587
soft X-ray flashes meas., using X-ray acoustic effect 85−4248
thin-film characterization using a scanning laser acoustic microscope with surface acoustic waves 88−75007
transparent dielec. material, inclusion response to laser radiation, statistical inspection 88−70389
ultrasonic transducers, calibration using laser interferometry and laser-generated ultrasound 88−61683
ultrasonics conference, San Francisco, USA (Oct. 1985) 87−19
vascular tissue ablation by laser beams, time resolved photoacoustic studies 87−50234
CdS piezoelectric transducer for phase insensitive detection of laser-generatedultrasound 86−38980
Nb, supercond., nondestructive inspection by scanning laser acoustic microscope 87−366
Ni/Fe sandwich, FMR depth profiles, photoacoustic detection 85−24163
PZT-4 transducers for photoacoustic signal detection, resonant charact. 88−16087
Si solar cell, intrinsic energy conversion efficiency and quantum efficiency, photoacoustic determ. 87−43435
Si thin wafers, photoacoustic pulses, optical detect. 87−23768
Si wafers, ion-implanted, HF differential piezoelectric photoacoustic investig. 88−32999

photoacoustic spectra
1,1-difluoroethylene laser optoacoustic meas. of absorpt. saturation using CO_2 laser 88−2166
difluoromethane FIR laser lines pumped by tunable CO_2 laser, optoacoustic meas. 86−15620
excimer lasers in cardiovascular surgery, ablation products, photoacoustic spectrum of arterial wall 86−44691
methanol optically pumped FIR laser media, nonlinear level crossing in IR transitions 88−8102
methyl alcohol, $^{13}CH_3OH$ and $^{13}CD_3OH$ optically pumped FIR laser, large offset emission, optoacoustic meas. 86−48324
$CuInSe_2$ film, amorphous, deposition, conductivity and energy gap 87−74030
Cu_2O as an O electrode catalyst in a solid electrolyte fuel cell 85−60411
Fe_2O_3 homogeneity in magnetic tapes, photoacoustic anal. 88−20246
GaAs, ion implanted, laser annealing in high press. Ar atmosphere, optical studies 85−18220
GaP, ion implanted, laser annealing in high press. Ar atmosphere, optical studies 85−18220

GaP-electrolyte interface, photoelectrolysis, H impregnation in electrode 86−28075
Ge chalcogenides, photodoping kinetics study 88−26042
(Hg,Cd)Te, photochemical oxidation and interfacial electronic props. 85−34838
$Hg_{1-x}Cd_xTe$, photochemical organometallic vapour phase epitaxy 87−10466
InP films, excimer laser induced MOCVD 86−482
n-InP, laser stimulated etching photoelectrochemical reactions 88−39059
n-InP, minority carrier diffusion length meas. using a photoelectrochemical technique 87−17721
InP, n-type, preferential photoelectrochemical etching 88−50726
n-InP, photoelectrochem. etched features, resolution 85−50442
n-InP, photoelectrochemical etching, surface orientation effects 88−64417
InP_xAs_{1-x} in acidic electrolytes, photoelectrochemical behaviour 85−12066
In_2S_3, synthesis and photoelectrochemistry 86−28963
$In_{2-x}Sn_xO_{3-y}$/Si heterojunction photoelectrodes, cyclic voltammetry studies 86−63139
Li_2O-SiO_2 based photosensitive glass, machining without photoresist 87−10519
$NiFe_{1.96}O_{4+\gamma}$ electrodes in aq. electrolytes, photoelectrochem. charact. meas. 87−26170
$O(^3P)$ production by NO+N reaction in multifactor stress environment 88−68519
PN photochem. vapour deposition and characterisation, InP MISFET gate insulator appl. 86−52530
Pd-Ni, deposition on semiconductors and polyimide from laser-irradiated solns. 86−46357
$Ru(NH_3)_5$-bipyridylbutadiene-$Ru(NH_3)_5$ compound photoisomerisation mol. switching, electronic coupling parameter calc. 87−11271
Si (100), laser-induced chemical etching in Cl_2 atmosphere, continuous irradiation 88−44533
Si, etching, IR laser irrad. effect 85−45570
Si, etching characteristics using excimer laser Cl_2 gas 85−50448
a-Si films, photo-CVD using unified reaction chamber with lamp 85−44791
Si p-n junction electrodes protected by Pt deposition, ESCA and photoelectrochemical studies, solar energy conversion appl. 85−49061
Si, photo-oxidation under ArF excimer laser irradiation in O_2+NF_3 gas mixture 87−6574
Si, photochemical CVD at 200°C 87−31546
Si, photochemical cleaning and epitaxy 88−13147
a-Si, photochemical vapour deposition from SiH_4 and Si_2H_6 88−24747
Si, reduced-pressure low temp. epitaxy, photochem. effects 87−31545
Si, surface processes in laser-induced etching, XPS obs. 88−33068
Si surface, through-oxide cleaning by photoexcited radicals 88−19843
a-Si:H, elec., optical and doping props. 87−45622
a-Si:H, photo-CVD deposition, initial processes *(Japanese)* 87−5458
a-Si:H, photochemical vapour deposition, solar cell fabrication 86−51919
Si:P, polycrystalline, excimer laser photochemical directional etching 87−32429
n-SiC, single crystalline, photoelectrochem. props. in aq. electrolyte 85−12063
a-SiC:H, photochemical vapour deposition, wide optical gap 86−51919
Si_3N_4, synchrotron radiation-excited CVD 88−12053
SiO_2 deposition by photo-initiation 87−31583
SiO_2 interlevel dielectrics for submicron VLSI, photo CVD technology 87−67605
SiO_2, laser-induced chem. dry etching 85−45606
SiO_2 thin films by UV arc lamp photochem. CVD, deposition and charactn. 88−39220
SiO_x antireflection coating for Si solar cells, growth rate in photoelectrochemical process 86−40089
n-SnS_xSe_{1-x}, photoelectrochem. and corrosion studies 86−8909
p-SnSe electrodes, photoelectrochemical studies, solar cell appls. 87−58266
TaO_x films, photo-CVD and dielec. characts. 88−18755
TiNb oxide electrodes, photoelectrochemical characts., zero point of charge effect on flat band potential and O_2 evolution 87−22687
TiO_2 electrodes, polycrystalline, photoelectrochemical props. 85−61798
TiO_2 films, n-type semicond., sol-gel prep., photoelectrochemical props. 87−74920
n-TiO_2, photoelectrochem. studies of Prussian blue 85−12064
TiO_2 semiconductor binder layers, photoelectrochemical preparation 85−45399
n-TiO_2-organic binder-semiconductor, stability, for use as photoanode 86−35471
W films, excimer laser initiated CVD growth on SiO_2 and Si substrates, phys. props. 87−58966
W, photochemical CVD for VLSI metallisation appls. 87−23730
WO_3 film-acidic H_2O electrolyte contact, photoelectrolysis solar cell potentiality determ. 87−74034
p-WSe_2 photoelectrochemical cells, dark electrochemical behaviour of electrodes 85−21809
n-WSe_2 single crystal, growth, struct. and photoelectrochem. props. 87−16557
WSe_2:Ca (Mg), thin films, synthesis, surface characterisation and photoelectrochemical studies 87−60120
ZnO, dark and photodissolution, pH depend. 85−61799
ZnO:Cr(Mn)(Fe)(Co)(Ni), photoelectrochem. props. 85−34693
ZnS, photoelectrochemical etching, non-uniform flow of charge carriers in Schottky barriers 85−12170

photochemistry continued

naphthalene, ultrapure, high mobility organic photoconductors 85−35586
narrow gap semicond., photocond. oscills., periodic struct. prod. by laser beam *(Russian)* 86−36306
nonstationary transport in MODFETs and heterojunction devices 87−46030
organic photoconductive particles in thin layers, photoresponse characts. *(Japanese)* 87−18802
organic semiconductors, photogeneration with discrete spectrum of intermediate states 86−36302
p-i-n S-diode, short-base I-V characteristics, intrinsic, extrinsic illumination effects 87−53471
p-n junctions, current parameters, meas. by optical beam excitation, scan vel. effect 87−60146
p-n junctions, defects, optical beam induced current imaging 88−19916
p-n junctions, irradiated, electron and hole nonlinear diffusion, photocurrents 86−58313
p-n junctions, light-generated minority carrier transfer in mag. field, photocond. studies 88−44569
perylene, ultrapure, high mobility organic photoconductors 85−35586
photoconduction of copper phthalocyanine-binder photoconductor sensitized with poly-N-vinylcarbazole 85−24368
photodiodes, three-dimensional, saturation effects and photocurrents 85−46263
photogalvanic cell, using brilliant cresyl blue, for solar energy conversion 85−16186
photoinduced current from finely focused light beam in p-n and Schottky barrier diodes. anal. 87−61015
photoresist exposure and contrast enhancement, algebraic description 86−63142
photoresistor periodic struct. with heat sink, spatial distrib. processes *(Russian)* 85−11589
phthalocyanine, τ form metal-free, photoconductor for diode laser use *(Japanese)* 86−2912
phthalocyanine films, α-metal-free, carrier photogeneration, acceptor effects 85−11955
phthalocyanine films, organic photoconductors for near IR region 87−74916
phthalocyanine thin film, vac. evaporated, photocond. after purification by sublimation *(Japanese)* 88−26935
picosecond optoelectronic devices 88−8068
picosecond photoconductive switches, transient behavior 88−26984
polar semiconductors, direct gap, carrier distributions, relax. process kinetics 85−34451
poly(ethylene terephthalate) film dielectric, X-ray induced photocarriers, TSC studies 85−23982
poly(N-vinylcarbazole) films, steady state and transient photocond. 88−24825
poly-N-epoxypropylcarbazole, amorphous semiconductor, charge carrier mobility 87−46658
poly-N-vinylcarbazole, amorphous semiconductor, charge carrier mobility 87−46658
poly-p-xylylene-metal interface, anode effects under photoillumination 88−50687
polycrystalline thin film impulse photoconductive study 86−47321
polydiacetylene single crystal, photo-stimulated charge carrier transport 86−68379
polydiacetylene-bis-p-toluene sulphonate, fast transient photocond. 87−61025
polydiacetylene-toluene sulphonate, 1-D semicond., photocond. decay and carrier trapping 85−24371
polydimethylsiloxane oils, photocond. induced by vacuum UV irrad. 88−26612
polyepoxycarbazole, sensitised, photogeneration and carrier mobility *(Russian)* 85−35603
polyester matrix, embedded diazo pigment, photocond. 85−24377
polyethylene, photocurrent transients 86−15303
polyimide, photoconduction anisotropy rel. to mol. orientation 87−54163
polyimide films, anisotropy of photoconduction 88−64866
polymer bis(p-toluene sulphonate)ester of 2,4-hexadiyne-1,6-diol, 1D semicond., pulsed photocurrents 86−63710
polymers, synthetic, elec. insulating solid, present status and future trends 88−51080
polyphenylacetylene films prep. by photochemical polymerisation, structure and elec. props. 88−64867
polyphthalocyaninato-μ-thiagermanium (IV), photoconductivity studies 86−28952
polyvinyl carbazole thin films, plasma-CVD polymerised, photoconduction props. 87−18814
polyvinylcarbazole, photocond. meas., dispersive hole transport obs. 88−2100
polyvinylcarbazole films, trapping rate distrib., photocurrent transient spectra meas. 88−1399
polyvinylcarbazole-ZnO(RhB) system, photoconductivity study 88−51665
polyvinylidene fluoride, bulk photovoltaic effect 85−12697
psn diodes, spectral photocurrent-voltage characts. 88−26947
photoconductivity continued
$[Pt(en)_2][Pt(en)_2(I_{1-y}X_y)_2](ClO_4)_4$ quasi 1D semicond. complex, elec. props. studies 88−7325

CdS-Cu_2S sprayed heterojunction solar cells, electrical characts. anal. 85−32710
CdS-$CuISe_2$ thin film solar cells, photovoltaic activity effects of $CuInSe_2$ structural characts. 85−34548
CdS-$CuInSe_2$ diodes, low temp. characts. 88−62605
CdS-GaAs n-n heterostructures, photoelectric props. 86−21181
CdS-Si and CdS-$CuInSe_2$ heterojunctions, struct., elec. and photoelectric props. 87−11411
CdS-based solar cells single- and multiple junction, optimal design 85−5389
n-CdS-n-CdSe heterojunction, barrier photoresponse, free exciton transport 86−53387
CdSE single crysts., photocond. fatigue obs. under IR illumination, tunnelling model calcs. *(Russian)* 87−38912
CdS_xSe_{1-x}, single cryst., stoichiometric control, photoconductivity 85−56412
CdS_xSe_{1-x}, with controlled deviation from stoichiometry, photoelectrical props. 85−34486
CdSe, film, photocurrent, saturation and negative differential resistance 87−54165
n-CdSe films, traps and minority-carrier diffusion length 87−66907
n-CdSe in sulphide electrolytes, photocorrosion 85−61796
CdSe photosensitivity centres, US effects *(Russian)* 88−8045
CdSe, planar n^+-n-n^+ and Ni-n-n^+ photoexcited structures, current-voltage characts. 85−29018
CdSe polycrystalline films, formation using separate sources by mol. beam deposition, struct. and elec. characts. 86−26896
CdSe single cryst., photocurrent relax. kinetics study *(Russian)* 88−26958
CdSe thin film solar cells, photoelectric processes 86−7109
CdSe thin films, electrodeposition from diethylene glycol+tri-n-butylphosphine selenide 87−52157
CdSe thin films, photoconducting props., annealing effects 87−61016
CdSe:Cu, and undoped, deep levels, depletion region capacitance and photocond. meas. 86−8772
CdSe:Cu, transient photocond. anal. 87−33045
(CdSe-ZnS):La, photocond. rise and decay, La conc. effect 88−51663
$CdSe_xTe_{1-x}$ sintered layers, phase composition, homogeneity and photocond. 86−22212
n-$CdSiAs_2$:In, photoconductivity spectra 86−42411
CdTe, THM grown, defect levels after γ-ray induced damage, PICTS and TSC meas. 86−8774
CdTe amorphous thin films, electrical and optical props. 87−11375
CdTe film, polycryst., grown by UV-enhanced OMCVD, picosecond photocond. 87−26179
CdTe films, electrochemical deposition, optical props. and photoelectrochemical behaviour 85−12702
CdTe, high resist. samples, photo-induced current DLTS study 86−47312
CdTe, persistent cyclotron reson. and photocond. obs., charge separation model 87−45587
CdTe, photoconductivity relaxation curves, appl. of anal. technique 86−22218
CdTe, single cryst., photocond., gamma-radiation effect 86−63704
CdTe sintered films, photoelec. props. and relax. times *(Russian)* 85−11917
CdTe thin film solar cells, efficiency improvement 87−9849
p-CdTe thin films for solar cells, vapour phase and ion-assisted doping, struct., photoelectric props. 88−37574
CdTe:Cl, pure and doped, photoconductivity, fundamental absorpt. edge 86−68374
CdTe-$Cd_xHg_{1-x}Te$ heterostructures, electrical and photoconducting props. 87−46661
CdTe-CdTe-CdSe p-n-n film struct., photoelectrical props. 86−21185
CdTe-HgTe superlattices, IR material characterisation, transport phenomena anal. 87−32317
CdTe-ZnTe strained layer superlattice, electrochem. and electro-optical studies 88−57348

photoconductivity continued
p-CdTe-n-CdTe-n-$Zn_xCd_{1-x}S$ film photoconvertors, photoelectric properties of p-n junctions 85−44171
CdX (X=S, Se, Te), crystals, photocurrent, spectral depend., effect of contacts *(Russian)* 88−8051

Geiger mode APD for very low light levels laser ranging, expt. eval. 87−41030
glass-metal seals, light detection obs., optical fibre light detector appl. 85−35432
goniophotometer, automated moving arm, for measuring the spatial distribution of light sources 87−70637
harmonically modulated radiation flux meas., principles of receivers based on thermoelastic effect *(Russian)* 86−5312
Hartmann sensor in adaptive optical system, photon noise estimation 85−3997
height sensor characteristics of Melcut-3DCM laser cutting machine 87−7476
heterodyne detection, tilt and offset effects 87−41504
heterodyne detection in background radiation presence, max. heterodyne efficiency 85−13533
heterodyne detectors, quantum efficiency evaluation 87−65943
heterodyne receiver, DC to 80 GHz 86−38393
heterojunction FET photodetector, high-speed integrated gated device 87−56689
heterojunctions, tunable barrier heights device appl. 86−1784
heterostructure light demultiplexing devices 85−46268
HF optical communications, conf., Cambridge, Ma, USA (Sept. 1986) 87−43754
high dynamic range video detector 87−8540
high sensitive and fast photodetectors, transparency at 820 nm 88−74405
photodetectors continued
high sensitivity system employing optoelectronicintegration for optical power measurements 86−11611
high speed, diffusion driven 88−4431
high-frequency photodiode-HEMT hybrid photoreceiver at 10 GHz 86−48262
high-gain photodetectors in thin-film transistors fabricated from laser annealed Si 85−50583
high-gain photodetectors using TFTs, struct. and performance, document scanner appls. 86−5309
high-resolution light spot localization with photodiode arrays 85−3905
high-speed, response speed meas. using picosecond optical mixing 86−38376
high-speed optoelectronic detectors for fiber-optic communications 88−45305
holographic gratings, surface wave applications 88−8341
home security, detector, control units, monitoring and alarm systems review 86−38320
homodyne receivers based on decision-driven PLL, performance anal., laser linewidth requirements 86−30798
homodyne reception of optical radiation, input aperture effects on speed meas. accuracy 87−56695
HP 81519A optical receiver for 550 to 950 nm 85−26333
hybrid optical bistable device, light level detection 85−52784
hygrometers, near-IR, insensible perspiration meas. appl. *(Japanese)* 85−38001
ICs, development 88−60728
ideal, response to photon flux and/or energy flux 86−11602
II-VI semiconductor photoresistors, signal conditioning using system-technical means *(Russian)* 86−17978
III-V DH semiconductor lasers and photodetectors by molecular beam epitaxy 85−29859
III-V photoconductive detectors, gain and noise props. 85−41275
III-V semiconductor-based optical detectors, historical developments 85−12728
III-V semiconductors, material props. and cryst. growth rel. to communications appls. 86−8756
image scanning control method for accumulation type sensor/high-intensity LED config. 87−20912
image sensors, detector size optimisation 85−20499
imager, spatial variation of responsiveness, meas. 87−28955
imaging 1D randomly translating object at low light levels using triple correlation 86−49002
impurity doped photoconductive detectors, operation in low-background photon flux conditions 86−55743
$In_{0.53}Ga_{0.47}As/InP$ p-i-n photodiode monolithic array, design for optical fibre system appls. 85−56456
inclination sensor, using LED spirit level mounted on photodiode array 86−55741
infrared photo-electric sensors using fibre optic technology 87−49723
injection laser amplifiers, photodetection regime, anal. 86−54147
injection laser for detection of amplitude modulated radiation 86−24544
inspection, optical, sensor develops. 88−4444
instantaneous source wavelength identification with aminimal number of detectors 85−63025
integrated optoelectronic circuits, review *(Dutch)* 86−2993
integrated optoelectronics, laser diodes and photodetectors on single chip, optical switches and repeaters 85−58113
integrated optoelectronics, monolithic, for lightwave communications 86−29019
integrated photodetector arrays, planar and channel optical waveguides fabrication 85−46126
intelligent optoelectronic measurements 87−3400
interdigital photodetectors, integration with optical waveguides on Si 88−35992
interferometer, photoelectric type with digital output *(Russian)* 86−38438
internal quantum efficiency in CCD photodetectors, temp. depend. *(French)* 86−2189
ionisation-type semicond. photographic system, limiting charact. 86−24370
IR alarm system using LED transmitter and photodiode detector, anti-theft device appl. *(Spanish)* 85−55075
IR bolometers and photoconductors, advanced, physics and design, review 85−37629
IR detector, high sensitivity sampling, using photoionisation of semiconductor carriers 85−37630
IR organic photoreceptor for electrophotography *(Japanese)* 85−42996
IR photo sensor setting apparatus for watthour meter testing *(Japanese)* 87−29178
IR photodetectors, nonequilibrium devices for cooling requirements reduction 87−14345
IR telecontrol equipment, IC based designs and detectors/transducers *(French)* 86−32612
junction detectors, high-frequency rolloff in response 86−24538
lambda phototransistor, model, theoretical/expt. study and appls. 86−36337
laser beam, power detector, using balanced bridge network 86−24549
laser beam energy centre, power and diameter determ. with quadrant pyroelectric radiation detector 86−29029
laser beam profiling with photographic plates, beam scanning and detector arrays 86−22465
laser beam quality diagnostic, high frame rate CCD based 88−27271
laser dimensional metrology, use of galvanometric mirrors and polarised beam 88−4644
laser power density distribution meter and synchronous detector 85−18985
laser power meters, microprocessor domination 85−24620
laser radiation with fluctuating phase, coherent detection 87−56699
laser speckle strain gauge using photodetectors 86−60234
lasers, industrial, and their applications, book 85−22159
lasers and detectors for 1.3 and 1.5 micron optical fibre communication 86−30766
LED-based through-wafer optical interconnection coupling characteristics 88−50910
length meas., method, photodetector cct. technique using glass scales with gratings *(German)* 87−14527
level sensor, pendulum type, design using LED/phototransistor config., attitude control appl. *(Japanese)* 86−38342
light source, photodetectors array reception, angular position estimate 85−15035
light stabilising loop efficiency, source-photodetector mismatch effect 87−76783
lighting energy savings, by scheduling and daylighting control strategies 85−21941

photodetectors continued
lighting energy savings, using photosensor controlled switch and control equipment *(German)* 85−39312
lightwave device technology for communications 87−62930
lightwave source and detector technologies, recent advances 88−8233
lightwave transmission systems, developments in devices and components 88−73950
linear array light detectors inspection systems, scanning laser illumination techniques 85−24690
linear arrays, alignment methods 87−41521
linear charge coupled device, laser beam transverse struct. study 88−58641
liquid level meas. using optoelectronics *(German)* 87−70678
local investig. by scanning laser microprobe 87−21076
local oscillator levels, optimum for coherent detection using photoconductors 88−74399
long wavelength light systems, photodetectors and low-noise amplifiers 85−31478
long-wavelength, low capacitance high sensitivity, fabricated from GaAs doping superlattices 85−8846
long-wavelength components by VPE 87−23663
longitudinal detector photoconductive gain determ. 87−63419
loss and amplification in one waveguide, effect on propag. in multilayer heterostructure 87−7146
low band-gap, generation-recombination processes and Auger suppression 88−35997
manufacturing industries, photosensors for detecting brightness, colour and texture changes *(German)* 85−52765
mark sensor requires no sensitivity adjustment 87−49755
mass flowmeter based on Coriolis force *(German)* 88−53931
matrix CCD photodetector in modulation spectrometer, synchronous integration 87−14340
MBE/MOCVD technology appl., using tailor-made sensing materials 86−55748
metal-barrier-metal electron tunnelling devices in optics, optical and IR detectors 85−40556
microchannel plate intensified multichannel detectors, gain variation correction 87−37841
microcomputer controlled position sensitive measurementsystem, using hybrid integrated optical sensor 87−3765
microprocessor-controlled photodiode array for measurementof diffraction patterns 85−58520
microprofilometry using dynamically focusing electro-optical sensor system 88−42290
microstructure of S-1 photoemitting surfaces, model 86−14798
microwave signals, direct transmission over optical fibre, optoelectronic componentry 87−74950
mid-IR fibre characts. meas., laser sources and detectors 88−58166
miniature form, compliance to standards and various appls. *(German)* 88−16106
mirror reflection meas. in normal geometry *(Hungarian)* 88−14034
modal noise arising from nonuniform quantum efficiency 86−17973
modulated light type light detector IS440 with optical IC *(Japanese)* 87−35099
monolithic, gain-bandwidth product maximisation *(Romanian)* 88−33897
monolithic IC, protection from cosmic ray-induced damage, photoconductor detector/switch config. 86−9201
monolithic integration of a 3-GHz detector/preamplifier using a refractory-gate, ion-implanted MESFET process 87−18865
monolithic integration of photodetectors and waveguides, effect of absorbing layers on propagation constants 88−65352
monolithic LED/photo-detector device for analog baseband video transmission 87−56122
monolithic light sensing devices, design, operation and cct. appls. 85−41295
monolithic light sensors, developments *(Spanish)* 86−24541
monolithic optoelectronic appl. 88−65509
monolithic superlattice pin waveguide detector, dual-wavelength demultiplexing 88−67396
monolithic wideband parallel channel detector array 85−14690
monolithically integrable high speed photodetectors 87−49765
monomode fibres, design of French of S 280 submarine system *(French)* 86−11083
MOS photodetector, position sensitive, using lateral photovoltaic effect 87−41512
MOS photon-counting sensor operating in above-breakdown regime 85−8851
movement recording in real-time, inexpensive microcomputer-based system 88−42470
moving object counting system using photoresistor detector, counters and seven-segment displays *(Spanish)* 85−20549
MQW props. and appls. in high-speed detectors and modulators 88−51548
multi-user modulated optical digital communication, optimal demodulator using point-process observations 86−55327
multianode microchannel array detector systems, performance characts. 86−24367
multiband detector module for industrial automated visual inspection *(Japanese)* 85−26336
multichannel data acquisition and transmission system using optical pick-ups *(German)* 88−35863
multielement radiation detector, stabilising image speed *(Russian)* 86−24535
multifunctional integrated sensors, based on Si and ZnO 88−29407
multimode Gaussian beam photoreceiver recording 87−26496
multiphotogate, microprocessor-based time measurement system 88−15907
multiple-window optoelectronic system, isolation of geometrical parameters of reflecting surface 88−53694
multiplexed bidirectional optical fibre links components *(French)* 86−30832
multipoint optical detectors, phase and amplitude meas., quantum theory 85−58721
multiport homodyne detection near the quantum noise limit 87−28597
n-i-p-i doping superlattices, potential for novel semiconductor devices 85−55865
narrow-field light-recording systems, sensitivity 86−17977
near IR photoreceptor devices incorporating evaporated chloroindium phthalocyanine 88−4436
near-IR detectors, signal-to-noise ratio comparison 85−26325
noise variance calcs. using algorithmic method, in fibre optical transmission system *(Polish)* 87−20561
non-contacting optical displacement transducer 86−50097
noncontact displacement sensor using optical method *(Japanese)* 88−42102
noncontact sensors *(German)* 86−17923

photodetectors continued
nonlattice-matched device systems 88−39530
nonlinear photoreceivers used in photographic exposure meas. systems, equisignal and equienergy meas. comparison 86−5319
nonlinearity meas. in optical radiation detectors, by light addition 87−63417
object proximity photo-sensor based on IR beams *(Russian)* 86−24540
on-chip activation of superlattice detectors via light coupled out laterally from optical fibres 87−7227
one-electron photodetectors, selection method 85−26341
optical angle encoders, design and operating principles *(German)* 85−42958
optical burst mode TDM transmission system 87−20576
optical cells for noncontact spatial meas. *(French)* 88−53862
optical communication, coherent system using optical local oscillator to operate with photodetector mixer 85−3477
optical communication appls. of optoelectronic devices, struct. and characts., review 85−37078
optical communications link, performance meas. 87−68525
optical correlator with reference signal mask and scanning CCD photodetector 85−64157
optical data processing systems, photodetector develops. *(Russian)* 87−41518
optical detectors for communications, advantages and disadvantages 86−60249
optical disc noise measurement and modelling 87−38882
optical displacement meter, MD-1211, laser based, principle and features *(Japanese)* 88−9986
optical fibre, sources and detectors., conf., Cannes, France (Nov. 1985) 87−36302
optical fibre communication, rise-time meas. 87−54190
optical fibre communication, semicond. sources and detectors, design and characts. *(Japanese)* 85−8427
optical fibre communication photodetectors for the 1−1.6 μm wavelength range 87−28596
optical fibre communications, semiconductor components *(Spanish)* 85−8434
optical fibre loss meas. system, detector selection for production testing 87−68151
optical fibre microshell-tipped sensors for high-press. pulse detect. in adverse environments 85−35418
optical fibre power meas. for optical sources *(German)* 87−70833
optical fibre receivers appl. *(Spanish)* 85−8858
optical fibre sensors *(Korean)* 85−14806
optical fibre telecommunications, large capacity and subscriber loop systems 88−28836
optical fibre telecommunications research, current status and future trends 85−8421
optical fibres, optical time domain reflectometry, coherent detection techniques use 86−48152
optical head for magneto-optical disk evaluation 86−42389
optical lock and key system using coded IR signal, design and construction *(Spanish)* 87−52779
optical position sensor using pn diodes and with integrated signal processing *(German)* 85−42993
optical power measurements using detectors 88−9979
optical proximity sensors, techniques; characts. and appls. *(Italian)* 87−70642
optical range sensor based on bright ring pattern projection, robot appl. *(Japanese)* 87−41529
optical receiver, p-i-n-bipolar, for submarine system appl. 85−62446
optical receiver performance employing avalanche photodetector in presence of timing uncertainty 85−31049
optical receivers for lighthouse communication systems 86−30799
optical recording materials, recent trends *(Japanese)* 88−13779
optical sampling for measurement of short optical pulses 85−52775
optical sensor for paper detection in line printers 85−3994
optical signal differentiation by charged-coupled photodetectors 86−49013
optical signal processing, role of photodetectors 88−67784
optical switching device technologies 87−56141
optical system performance, photodetector defects impact 87−62939
optical system performance, photodetector defects impact 87−13706
optical tactile sensor using the CT reconstruction method, design and performance 88−16104
optical thickness meter, MD-2301, laser based, principle and features *(Japanese)* 88−9986
optical time domain reflectometer with a laser diode operating as light emitter/photodetector 85−37776
optimal shape for power fluctuation dispersion minimal value 87−29127
optimization of the photodiode-operational amplifierpair for weak light flux measurements 86−44313
opto-electronic measurement system for vesselmotion in waves *(Japanese)* 86−18110
optoelectric components for multigigahertz modulation *(French)* 86−42572
optoelectronic components for fibre links, low loss, opto-isolators 85−14257
optoelectronic detection systems, false alarm spatial density 85−18772
optoelectronic devices for long wavelength fibre communication in China, review 88−15464
optoelectronic devices with multiple-element photodetectors, algorithms for evaluating coordinates of images *(Russian)* 88−53692
optoelectronic IC emitter and receivers, material and technological developments, review 88−65512
optoelectronic semiconductor position-sensitive sensor 87−29130
optoelectronic switching circuits for process data transmission over optic cable networks *(German)* 87−38958
optoelectronic system, for model railway control *(German)* 85−12750
optoelectronics, information age appls., perspective of future development 87−68306
optoelectronics status, prospects and markets *(German)* 87−68248
organic insulating materials surface tracking deterioration detection using light sensors 88−1830
p-i-n FET receiver circuit architectures, performance comparison 86−30801
p-i-n FET receivers, optimisation of optical sensitivity 88−60147
p-i-n high-speed detector, large-area devices on GaAs substrate, monolithic IC appls. 86−31427
p-i-n photodetector package, fibre-coupled, hermetic for use in fibre-optic preamplifier circuit 86−31434
p-i-n photodiode monolithic array, elec. crosstalk 87−18846
p-i-n photodiode photoreceivers with operational amplifiers for fibre optic communication 87−18847
p-i-n photodiodes for 0.82 μm optical communication systems *(Slovak)* 86−17388

photodetectors continued
p-n junction type, noise, under longitudinal photoeffect 86−29002
parametric down-conversion, normalised intensity correlation function, intensity depend., photoelectric correlation meas. 85−56811
parametric downconversion for detector quantum efficiency absolute meas. 88−14268
PD 164 PI photodetector for compact disk use *(Japanese)* 86−11608
personal smoke detecting fire alarm unit 87−49744
phase adjustment characts. 87−24724
phase characts. meas. using bimodal lasers 88−53814
phosphor convertor for Si scanning photoreceiver, MTF 85−26340
photo optic detector circuit 85−14802
photo-DOVATT heterojunction IMPATT device, optical radiation effects 87−46676
photo-MESFET, ion implanted freq. depend. characts. 87−33061
photoacoustic and currentacoustic effects 86−9689
photoconductive detectors, interdigital and straight structures 87−14332
photocoupler systems using laser diodes *(Japanese)* 88−8002
photodigitizer thruput limitations 86−70149
photodiode array pair, optical method of angular displacement meas. 85−15022
photodiode arrays, two pair, optical method of angular displacement meas. 85−20721
photodiode arrays with image convertors, weak pulsed signals recording appl. 87−63271
photodiode matrix system, radiation energy density distrib. meas. over laser beam cross section 87−75202
photodiode noise degradation, radiation threshold levels 85−12733
photodiode quantum efficiencies and performances in 5 to 1000 eV range 88−22597
photodiode selection method 88−36003
photodiode vacuum surface effects, spatial response uniformity mapping via computerised electrooptics scanning 87−26189
photodiode-based photodetector for semiconductor-laser pulses 86−68598
photoelectric receptor parameters, apparatus for meas. 85−31488
photointegrator, high-precision SNR calc. 87−70652
photointerrupter with high resolution encoder function moire stripe appl., Sharp GP1A35R *(Japanese)* 88−2080
photometer optimum parameters determ. with various photoreceiver types 85−20628
photometry, high speed, half-tone images, photodetector system with photodiode and operational amplifier 85−26342
photon counting mode, parameter estimation of receiver 87−49753
photon formalism for IR photodetector, extension and appl. 87−49750
photon parameter characterisation of IR photodetectors 86−55732
photon-limited laser pulses, arrival time estimate in presence of shot and speckle noise 87−54454
photopolarimeter, in-line light-saving and fibre optic analog 87−77278
photoreceiver channel with reactive load, efficient parameters, selection 85−58714
photoreceiver model, sweep modulation of laser radiation intensity 85−35848
photoreceivers for microwave and millimetre wave applications, use with optoelectronics 87−20485
photoreceptors and vidicons, review 86−36346
photoresistor interface to microcomputer, light-level meter appl. 87−70647
photosensors development *(Japanese)* 86−60252
phototransducer characteristic time constant meas. device 85−8854
photovoltaic detector arrays, 3D analytical model 87−56709
physical and mathematical framework of IR photodetector theory 86−55731
picosecond, impulse response determ. directly from power spectrum meas. 86−65192
picosecond fluorescence lifetime detector 86−2959
picosecond optical autocorrelation experiments on fast photodetectors 87−46705
picosecond optical detection techniques and devices 85−64159
picosecond photoconductive devices for >10 Gbit/soptoelectronic switching 85−56448
PIN photodetecting structures photoresponse comparison *(Czech)* 87−46679
PIN photodetectors, design and performance for microwave and MM wave fibre optic systems 86−69796
PIN-FET optical receivers, anal. and noise study *(German)* 88−28859
PIN-FET receivers, high speed, for fibre optic communications 86−37893
pinFET receiver, wide bandwidth low noise, high-bit-rate optical preamplifier appls. 88−73905
pipe-surface inspection using laser techniques and fibre optic bundle photodetector system *(Japanese)* 85−5813
planar waveguide thin-film photodetectors, periodic coupling 85−62402
plant stem diameter contactless measurement apparatus using LED and photodetector *(Japanese)* 87−14548
polyimide cure monitor, fluorescence detect. using photocell arrangement 85−3925
polyvinylidene fluoride pyroelectric focal plane array , technology and props. 88−74476
porch light, energy-saving cct. design using light-activated switching config. 85−16410
position detectors, signal evaluation system *(German)* 86−44309
position meas. devices for active magnetic bearing 85−31593
position sensor with integrated signal processing 86−55745
precision photodetector with frequency output 86−70148
principles and appls. *(German)* 86−11592
printer paper form top/end sensor using reflective light detection 85−26335
programmable detector system for plasma spectroscopy, high-speed design 86−55555
protection from strong exposures, cct. based on photomultiplier voltage control 87−21087
proximity switches and photoelectric controls *(Japanese)* 88−9984
pulse energy meas., high-sensitivity pyroelectric and optoacoustic receivers 88−36002
pulse rate meter with visual display, cct. design using photocell/counter config. *(Spanish)* 85−15306
pulse signals time search by single electron photodetectors 87−35083
pulse-modulated radiation energy and time parameters determ., using thermo- and pyroelectric detector 88−67800
pulsed laser beam parameters meas. cct., biological appl. 87−46955
pulsed light barrier systems, design considerations *(German)* 85−34100
pulsed light images recording, using CCD, automated system 88−36072

photodetectors continued
pulsed photocells transient characts. meas., using streamer semiconductor lasers 86−29001
pulsed radiation sources location, parameters optimisation of dissector system 87−49754
pulsed signal reception systems having avalanche photodiodes, optimisation 87−56700
pyroelectric detector signals analysis by analogue technique 87−3616
pyroelectric radiation receivers, linearity meas. of output characts. 88−4433
pyroelectric radiation receivers, with high linearity 85−58713
quad detectors for optical disc tracking, calibration 86−44028
quadrant light receiver , coordinate-sensitive 88−74473
radiation effects on light sources and detectors 86−48294
radiation effects on optoelectronic devices for fibre links 88−15474
radiation receivers employing CCD, effect of charge transport inefficiency on signal parameters 85−3999
radiometric calibration procedures, using NBS MARBLE electronics package 86−50110
raindrop sensor for car windshield wiper control 88−31169
Raman multichannel detector selection guidelines 88−47530
range meas. by phase detected triangulation 88−53870
receiver, optimum, design 86−4656
receiver for high-speed optical transmission, low noise 86−30800
receiver for optical transmission line 88−60170
receivers, balanced mixer homodyne and heterodyne, quantum-limited operation 86−59903
receivers, homodyne and heterodyne, quantum and excess noise 85−43002
receivers, long-wavelength light-wave, photodetector/low-noise-amplifier combinations 85−4000
rectifying optical heterodyne receivers employing point-contact diode detectors, quantum limitations to sensitivity 85−8852
reflection mode beam vector sensor for laser scanning appls., XY photodiode config. 86−17969
reflection sensors, meas. appls. for chemical industry 85−26339
reflective light sensors, size reduction 87−41513
reflectometer, self-detecting optical-time-domain, for single mode fibres using laser diode as pulse emitter and photodetector 85−29600
remote current sensing using IR and UV radiations 88−53812
remote sensing, multispectral conical scanner for natural resources study 88−61627
responsivity determ. using pinhole diffraction 88−4437
review of sensors and actuators 88−35918
RL1024G diode array, blooming and crosstalk, Monte Carlo simulation 88−26975
robot electronic eye, DIY 88−29460
robot eye in gripper, composed of solid state linear array sensor 87−14161
robot laser rangefinding sensor for robotic weld seam tracking 88−31486
robotic locating system, test bed for visual measuring system feasibility assessment 87−63390
robust detector of optical radiation intensity modulated by subcarrier frequency 87−35081
sampled photodetector based on FEU-83 photomultiplier 87−41520
scanning optical microscope using sequential imaging 87−28952
scanning opto-electronic devices, general model of transformation *(Russian)* 85−58710
Schottky detectors, frequency and polarisation-selective 87−29128
Schottky SEED device, optical optoelectronic, and elec. bistability and multistability 87−33073
Schottky-barrier IR detectors, hot-electron photoemission theory 85−24397
scintillation-photodetector systems, pulse height distribs. 87−41826
seam-position detector for electric-resistancewelded tubes, IR/visible type, online US ATE appl., *(Japanese)* 86−38386
selection criterion optimisation for photon counting 86−31440
selective measuring transducer for light intensity meas. 88−22584
selective radiometers with photoelectric radiation detectors, stability obs. 86−31432
self-focusing scanner, design for surface inspection appls. 85−39565
self-scanning photodiode array for optical diffr. pattern meas. 87−77271
semiconducting detectors, influence of lighting conditions on photoelectronic measurements 88−29392
semiconductor, high speed devices, materials and new technology *(Japanese)* 85−14809
semiconductor, lateral photoeffect position-sensitive device *(Japanese)* 86−24537
semiconductor avalanche MDS photodetectors for underwater nuclear instrumentation 86−11607
semiconductor devices, review *(French)* 86−9703
semiconductor devices for fibre communications *(Japanese)* 87−40913
semiconductor film sensor for CO detection, photoimpedance response obs. 86−31444
semiconductor IC faulty action, feint luminesc. detection apparatus 88−44829
semiconductor materials and structures, electro-optical device development 86−2857
semiconductor photodetectors, SEM and scanning optical microscopy 85−14805
semiconductor photodetectors for underwater muon and neutrino detection, DUMAND project 86−11606
semiconductor polarimetric photodetectors, prep. principles, photopleochromism, review 87−63418
semiconductor quantum well structures for optoelectronic devices *(Japanese)* 86−48405
semiconductor sensor technology *(German)* 86−31438
semiconductor wafer pre-align station capable of pre-aligning variouswafer sizes 86−35757
semiconductor-clad optical waveguide devices, periodic coupling 86−28857
sensitivity and speed *(German)* 88−9978
sensitivity of passive fibre star networks using Manchester coding, laser bias effect 86−37879
sensitivity of photoreceivers for Poisson and Gaussian photon statistics 87−49768
sensor development, operation principles and meas./monitoring appls *(German)* 87−21024
sensors for digital system interfacing *(Danish)* 86−31431
shape-testing optoelectronic sensor, testing using coordinate gauging devices *(German)* 88−53703
Siemens TFA 1001W photodetector IC *(German)* 86−17967
signal delay, analog, using integrated array of photodetectors 88−60723
signal detectibility improvement by multiple obs. 85−57504
signal detection in Poisson noise of unknown intensity 88−34756

photodetectors continued
signal detectors using direct photodetection scheme, parametric optimisation 85−47985
signal processing, digital phase lock amplifiers, optimal SNR 87−37010
single-electron recording of light flow, reliability 87−70646
single-mode fiber loss meas., light detection technique *(Japanese)* 85−31612
slow-response photoreceiver systems, amplitude-time charact. 86−17976
slow-response photoreceiver using APD, light flash envelope size rel. to sensitivity 85−8857
smart oxygen mask arterial O_2 saturation monitoring system for pilot protection in fighter aircraft 88−68572
smoke alarm, electronic type with LED transmitter and photodiode detector *(Spanish)* 85−55076
smoke detector, multipoint, using nephelometric-type lightguides 87−35134
SNR, light intensity correlations effect 87−70653
SNR and error rates of noise-like optical signal, random multiplication gain effects 86−70139
sodium salicylate as combined fluoresc./refl. coating for broad band detector *(German)* 87−3613
soft X-ray CCD TV sensors, sensitisation using rare earth convertor screen 88−22653
soft X-ray fluorescence ultrahigh vacuum compatible proportional counters for EXAFS in surface studies 88−23022
soft X-ray imaging using CCD sensors 88−22654
soft X-ray imaging with high-gain MCP detector systems 87−28966
soft X-ray microscope detector systems for high photon rates 88−23021
soft X-ray radiation sensitivity of film emulsions, detective quantum efficiency 88−23020
SOI light detector and 10-bit linear image sensor fabricated in doubleactive layers 86−44190
solar disc automatic search/aim/tracking using photosensitive charge coupled device arrays 85−37623
solar flux measurement using photovoltaic cells for solar power input prediction 85−58718
solar UV photodetector, charact. *(Chinese)* 86−44307
sorting of parts by size using photodetectors, errors evaluation and reduction 86−24756
SOS, submicron-gap photocond. switching 87−26180
SOS interdigital photodiodes, ultrafast, for UV photodetector appls. 86−9675
spatial filter detector with weighting function variability *(Japanese)* 88−8033
spatial laser beacon alignment in cluttered optical communications 87−49121
spatial scanning rate, effect of optoelectronic device parameters 86−38387
special purpose photoelectric sensors 88−29415
speckle correlation using 2D photon event detector 86−24528
spectral charact., colorimetric coordinate system *(Russian)* 86−24380
spectral responsivity function determination 85−37636
spectral sensitivity for short wavelength, error representation *(Chinese)* 86−38379
spectrometry with photodiode array detection system, data acquisition 86−11489
spectrophotometer, waveguide, with multiple detectors and computer control, remote monitoring appl. 85−37624
spectrum analyser based on pre-detector optical signal processing 87−14243
speed record for experimental photo detector *(Dutch)* 88−47515
squeezed state photodetection, semiclassical and quantum theories 87−54192
state-of-the-art components *(Italian)* 86−28942
static-induction photosensor, high-sensitivity meas. 85−47978
Stokes-spectro-polarimetry with a two-dimensionaldiode array for solar appl. 86−38396
strained-layer-superlattice optoelectronic devices 86−22264
street lighting control, appraisal of CdS photocell detectors 85−39318
strobed multichannel photon counter with LI-706 supervidicon 88−67799
subnanosecond optical pulse detector 88−67788
sun tracker, two-axis universal mount, electronically controlled, design and construction 85−26319
superconducting tunnel detectors in radio astronomy 86−48007
superlattice APD structures, optimisation and modelling 87−68284
superlattice p-i-n photodetectors, monolithic waveguide array, high-speed dual-wavelength demultiplexing and detection 86−70137
surface barrier, photodetectors, investig. 87−41526
surface discharge meas., optical detection system 88−74579
surface roughness eval. by electro-optical sensor 88−7976
switch, optoelectronic, using photodetector as switching element 85−51048
switching circuit, photodetectors, switching transistor in series with photodiode 85−51049
tactile sensor, image-based, geometrical setup 88−53742
tactile sensor array for robot hand 88−29412
target games, operating principles 85−31489
TEGFET based baseband photoreceiver, sensitivity improvement with low-temp. operation 87−40877
telecommunications, use of optical fibres, present and future 85−42604
temperature distrib. in core piece *(Chinese)* 88−74400
thermal detector of optical radiation based on ferromagnetic resonance 87−35082
thermal imager, parallel scan with thermoelastically cooled multielement 86−24377
thermoelectrically cooled, for 0.8 to 2.5 μm band, astronomy appl. 87−56703
threshold devices, noise stabilisation, design 85−26343
time parameters of systems seeking sources of optical radiation 88−53693
time-domain beam former, optical implementation using linear photodiode array detector 87−27602
time-of-flight distance sensor for industrial appls. 87−49935
TLD signals measurement using photodiode 88−61483
touch-sensitive input overlay device with light guide/photodetector config. for scanning displays 85−43047
touch-sensitive input panel, config. using 2D LED/photodetector array 86−31498
touch-sensitive sensor key, light operated, photodetector/LED config. using total internal refl. *(German)* 85−47975
transfer standards for energy and peak power for 1.064 μm laser pulses and CW laser power 86−42469
transimpedance optical preamplifier using a common base input stage 87−5696
transmitters and receivers for light waveguide *(German)* 85−58102
transmitters and receivers for waveguide technology *(German)* 85−52334

photodetectors continued
transverse and longitudinal, responsivity and detectivity, light attenuation effects 87−29122
triangulation based range finder, high-speed, robot vision appl. 88−53868
triangulation with large dynamical range 87−49531
tunable superlattice p-i-n photodetectors: characteristics, theory, and application 88−65481
two-channel optical transducer for an industrial inspection system , using linear CCDs 88−74471
two-detector recording, correlations of readings distrib. of Gaussian field 86−60250
two-tone alarm circuit, photocell/multivibrator config. for light-triggered operation *(Spanish)* 85−11481
types, properties, sensitivity and efficiency *(Czech)* 85−42990
types for long-wavelength lightwave communication, comparison 88−16111
ultra high speed, charact. packaging and physics 87−46909
ultrafast microchannel plate photomultipliers 88−44527
ultraviolet position locator system 86−60258
ultraweak light signal detection, synchronous single-photon counting using Si APD 88−16528
undersea lightwave systems at 1.55 μm, future trends 85−37048
unity-gain photodetectors for intensity meas., optical fibre systems 86−17965
UV absorbance detector for capillary separation systems 88−9990
UV imaging photon detector, large format for astronomical spectroscopy 87−34986
vacuum photosensitive detectors in hostile environments, space telescope Faint Object Camera case study 85−4410
variable gap structs. for spectrometric meas. 86−38381
vehicle position meas. using laser beam tracking, expt. 88−47223
video signal transmission by optical link, intensity modulation of LED light carrier 85−47522
visible light sensor systems, sunlit ICBM trajectories 88−48409
VLSI, optical interconnections, implementation of components 87−38956
voltage-tunable, wavelength-selective, using multiple quantum well struct. 85−58704
volume meas. of solid objects, by immersion in water, computerised system 86−65301
wafer level HF meas. of characteristics 88−74398
washing machines, automatic, water and electric power consumption reduction by computerised control device 85−21969
wavefront sensors, principles of construction based on Talbot effect 87−77277
waveguides, photodetector array using laser recrystallised Si 85−29533
weak light signals recording system, pulsed or continuous 86−11761
wide dynamic range optical power meas. *(Japanese)* 86−31683
wideband freq. response meas. system using optical heterodyne detection 86−36333
wideband freq. response meas. using optical heterodyne detect. 86−60248
workpiece geometrical parameters meas., using charge-coupled photoelectric transducers 85−64280
X-ray image sensors using a photoconductor and an optical addressing or read-out technique 88−10035
X-ray remote detect., coupling between plastic scintillators and light fibres 87−21441
Al-Al_2O_3-Al(Ag), planar tunnel junction photodetectors, electromag. resonance enhanced photoabsorption 87−41510
Al-SiO_2-Si_3N_4-Si digital photocapacitance sensor 88−42104
Al-SiO_2-p-Si MIS junction, surface plasmon enhanced quantum efficiency in visible range 86−38378
AlAs/GaAs Bragg reflectors for photodetector appl., MOCVD growth 85−46277
AlGaAs injection heterolasers and integrated laser-photodetector pairs, prepared by microcleaving 87−18868
AlGaAs laser for tunable superselective radiation detector 87−63423
AlGaAs/GaAs HEMT, optically controlled microwave performance 87−73770
AlGaAs/GaAs p-i-n photodiode/preamplifier monolithic photoreceiver integrated on semi-insulating GaAs 85−51069
AlGaAs/GaAs superlattice p-i-n photodetectors, spectral and temporal characteristics 86−11591
AlGaAs-GaAs combined laser and photodetector in monolithic integrated-optics module utilising coupled waveguides 86−36248
AlGaAs-GaAs dual-wavelength photodetector with 500 Å resolution 85−20627
AlGaAs-GaAs photodetectors, high efficiency, appl. for data/energy transmission on fibre-optic communication lines 86−70142
$Al_{0.48}In_{0.52}As/Ga_{0.47}In_{0.53}As$ multiquantum well avalanche photodiodes, high-speed long-wavelength operation 85−64147
$Al_{0.48}In_{0.52}As/Ga_{0.47}In_{0.53}As$ MQW APD, MBE grown, p^+-i-n^+ struct., high-speed/long wavelength device 86−48284
AlInAs-GaInAs p-n junction quantum well APD, photodetector appls. 87−49746
AlInAs-GaInAs-AlInAs, MODFET, observation of large absorption modulation in a quantum-well field-effect device 88−33247
Au cathode photoelectric detectors, absolute photon sensitivity characterisation 87−14348
Au/GaInAs and Au/AlInAs Schottky diodes as internal photoemission detectors, design and charact. 85−56446
$BaPb_{1-x}Bi_xO_3$ superconducting detector for 3 micron band 600 MHz signals 85−35439
$Ba_xSr_{1-x}Nb_2O_6$ pyroelectric detector, sensitivity estimation in range 0.24 to 10.6 microns 86−31439
CO_2 laser parameter meas. with pyroelectric detector 87−61220
Cd $S_{1-x}Se_x$ film photoresistor, two-coordinate photoelectric transducer appl. 85−47982
CdHgTe photodetectors for infrared measuring techniques *(Russian)* 87−8626
$Cd_{0.2}Hg_{0.8}Te$ epi-layer for a high detectivity PC-type IR detector, LPE growth and charact. 88−29414
CdHgTe/CdZnTe/CdZnTe LPE growth and characterisation 88−70325
CdS, longitudinal photodetector, current flow study *(Russian)* 85−24388
CdS photoconducting cell, detecting unit appl. in portable electrolum. voltmeter 88−4515
CdS photoconductive cell fabrication, optoelectronic charact. optimisation 87−49761
CdS single cryst. UV detector with injection gain 85−51047
CdTe film, polycryst., grown by UV-enhanced OMCVD, picosecond photocond. 87−26179

photodetectors continued
CdTe polycrystalline photodetector with broad spectral range *(Russian)* 86−14552
CdTe-CdS heterosystem, rear-barrier photoelectric transducer, preparation and props. *(Russian)* 87−56690
Cr-Si-Al thin film photodetectors on waveguides 87−12335
p-$Cu_{2-x}S$/n-$Zn_xCd_{1-x}S$ heterojunction short wave photodetectors, performance characts. *(Russian)* 85−14800
Fe_2O_3/o-toluidine photoelectrochemical imaging system *(Japanese)* 87−20910
GaAlAs composite cavity laser array, monolithic integration with photodetectors 86−68554
GaAlAs laser amplifier, high sensitivity picosecond optical pulse detection 87−26431
GaAlAs lasers, injection, photodetection props. 87−19108
$Ga_{1-x}Al_xAs$ photodetectors as exposure meters 86−50103
GaAlAs/GaAs two and three terminal microwave devices, RF modulated optical signals detection 88−25515
$Ga_{1-x}Al_xAs$/GaAs MBE heterojunction bipolar phototransistor, for monolithic photoreceivers 86−2966
GaAlAs-GaAs heterojunction FET compatible with photodiode , integrated design and characts. 88−74411
GaAlAs-GaAs heterojunction bipolar transistors for monolithic photoreceivers at 0.85 μm 87−38965
GaAlAs-GaAs monolithic photoreceiver implemented with heterojunctionbipolar phototransistor and transistors 85−62065
$Ga_{1-x}Al_xAs$-GaAs heterojunction bipolar phototransistor for monolithic integral photoreceiver 85−41274
$Ga_{0.96}Al_{0.04}Sb$ avalanche photodetectors, performance evaluation 88−58363
$Ga_{0.96}Al_{0.04}Sb$ junctions, LPE grown, 1.55 μm photodetection props. *(French)* 87−70659
GaAs CCD, electro-optical signal processing appls. 85−30304
GaAs FET, MBE growth on lattice-mismatched InP, for monolithic optoelectronic integration 85−1593
GaAs FET integrated with heterojunction photodiode 88−20521
GaAs IMSM photodetectors, MESFET compatible 87−49122
GaAs MESFET high-speed photodetectors *(Japanese)* 85−51053
GaAs MESFET high-speed photodetectors, optical response study and operational model 87−56691
GaAs MESFET photodetector, gate width depend. of photoresponse *(Japanese)* 86−31446
GaAs MESFET photodetector, responsivity, light illumination shape effects 85−52773
GaAs MESFET with interrupted gate, photo-detection props. *(French)* 87−70658
GaAs Schottky barrier diode mixer for FIR laser interferometer 86−11597
GaAs Schottky barrier photodetectors, 0.82 μm operation 88−9977
GaAs Schottky barrier photodiodes, photocurrent multiplication 87−33059
GaAs Schottky photodiode and FET association, planar monolithic integrated photoreceiver 87−56706
GaAs Schottky photodiode ultra-high-speed photodetector, design and fabrication 85−56442
GaAs Schottky-barrier photodetector for microwave optical fibre links 87−49088
GaAs circuits for monolithic optical controller 88−72237
GaAs detector array/CCD multiplexer for acousto-optic spectrum analyser 85−14689
GaAs detectors, direct backside connection of optical fibres 88−65205
GaAs doping superlattice photodetector 85−42994
GaAs electroabsorption avalanche detector, responsivity of ion implanted p-n junction 86−65194
GaAs fast photoconductive detector, sensitivity improvement 85−43006
GaAs high gain photodetectors for Raman spectroscopy 86−17983
GaAs high purity crystal depleted layer photoconductor, detector appl. 86−42413
GaAs, high-gain, Raman spectroscopy, applic. and performance 88−47529
GaAs high-gain photoconductive detectors, detectivity 88−65480
GaAs high-gain photoconductors as detectors in spectroscopic systems 88−29382
GaAs, integrated photoreceivers using ion implanted IC technology, on-chip charactn. 88−20522
GaAs, integrated receiver with JFET and heterojunction photodiode 88−51711
GaAs, ion-implanted MESFET photodetectors, comparative study 88−22594
GaAs large bandwidth Mott-barrier photodetector fabricated by quasi-ternary growth 86−42427
GaAs material requirements for optoelectronic appls. 85−29731
GaAs monolithic optoelectronic receiver, 5.2 GHz bandwidth, design, characts. and performance 88−41642
GaAs monolithic photoconductive detector arrays, crosstalk in GHz region 85−58702
GaAs monolithic photoreceiver 85−18823
GaAs monolithically integrated photoreceiver with large gain-bandwidth product for 800 nm wavelength 87−54202
GaAs, non conventional types of detectors for opticalcommunication systems *(Slovak)* 86−30833
GaAs optoelectronic integrated receiver arrayexhibiting high-speed response and little crosstalk 86−68407
GaAs, photoconductive detectors, 2D electron gas, device for photoreceiver applications 86−2970
GaAs photoconductive detectors and MESFETs, monolithic integration with distributed coupling to optical fibers 85−2144
GaAs photoconductive detectors fabricated in heteroepitaxial layers 87−46706
GaAs photoconductive detectors for optoelectronic switch matrices, recent developments 85−41296
GaAs photoconductive detectors, gain and noise props. 85−41275
GaAs photoconductive detectors, gain noise and optimal structure *(French)* 85−52762
GaAs photoconductive detectors, high-speed 88−14057
GaAs photoconductive detectors, photoresponse characts. 87−33060
GaAs photodetector effectiveness improvement, SiO and Si_3N_4 antireflection coatings appl. *(Slovak)* 86−31430
GaAs photodetector in 0.8 to 1.4 micron wavelength range. 85−43005
GaAs photodetector, lateral, fabricated by Ga focused-ion-beam implantation 86−70146
GaAs photodetectors for monolithic optoelectronics 88−45326
GaAs photodetectors; numerical simulation of high-speed photodiodes using drift-diffusion model 88−45316

photodetectors continued
GaAs, photoreceiver, high-speed, monolithic integration using metal-semiconductor-metal photodiodes 86−15588
GaAs photoreceiver, monolithically integrated, for high-speed signal processing appls. 86−29016
GaAs, planar optical photoconductive detectors, gain mechanisms 88−29394
GaAs power FET, sensitivity as light transducer, expt. study 85−40730
GaAs reverse-biased doping superlattice based long-wavelength photodetector 86−11610
GaAs selectively doped heterostructure transistor and photoconductive detector, monolithic integrated receiver front 85−35659
GaAs semi-insulating wafer photoconductive detectors, interdigital and straight structures 85−41265
GaAs superlattice photoconductive detector, high-speed response 85−46276
GaAs, surface, anisotropically etched, use in optoelectronics 88−7471
GaAs/AlGaAs MESFET as picosecond HEMT photodetector 87−21086
GaAs/AlGaAs, carrier confinement photoconductive detector 88−47513
GaAs/AlGaAs high-speed photoconductive detector using p-modulation-doped multiquantum well struct. 86−50096
GaAs/AlGaAs picosecond HEMT photodetector *(Japanese)* 88−36005
GaAs/Si and GaAs/SOS photodetectors, ps response, MBE fabrication and characts. 86−48286
GaAs-AlGaAs superlattice, photovoltaic detection of IR light 88−47512
GaAs-AlGaAs two-wavelength disordered quantum-well photodetector, struct. and characts. 88−29383
GaAs-Au metal-semiconductor-metal photodetector, photocurrent enhancement due to ultrasmall Au islands 88−42089
GaAs-SiO_2, MBE photoconductive detectors on SiO_2 fibres, optoelectronic integration 88−51695
GaAsAs/GaAs, photoconductive detectors, 2D electron gas, device for photoreceiver applications 86−2970
GaAsInP avalanche photodiode, volt-ampere and noise props. obs. *(Czech)* 86−60251
$GaAs_{1-x}Sb_x$ varigap structures as selective photodetectors 85−43007
GaInAs PIN-GaAs IC preamplifier receiver for high data rate optical fibre systems 87−38966
GaInAs interdigitated MSM 1.3 μm photodetector, MBE growth on GaAs substrate 88−42100
GaInAs monolithic pin photodiode/FET 88−41626
GaInAs p-i-n photodiodes grown on Si substrates, MOCVD fabrication, 1.55 μm detection appl. 87−74926
GaInAs, photoconductive detectors, 2D electron gas, device for photoreceiver applications 86−2970
GaInAs photodetectors, nanometer scale device fabrication in a 100 keV e-beamsystem 86−22247
GaInAs photodiode, monolithic integrating of InP inverted rib waveguide 87−74947
$Ga_{0.47}In_{0.53}As$ VPE grown photoconductive detectors, characterisation 86−63721
$Ga_{0.47}In_{0.53}As$ high-speed junction-depleted photoconductive detectors 85−58703
$Ga_{0.47}In_{0.53}As$, photocond. detectors, receiver sensitivity calcs. 85−29717
$Ga_{0.47}In_{0.53}As$ photoconductive detector/GaAs FET hybrid photoreceiver, 2-Gb/s sensitivity 85−37620
$Ga_{0.47}In_{0.53}As$ photoconductive detectors, receiver sensitivities, bit rate depend. 85−37626
$Ga_{0.47}In_{0.53}As$ photoconductive detectors, dark noise 86−42425
$Ga_{0.47}In_{0.53}As$ photoconductive detectors, dark noise 86−17966
$Ga_{0.47}In_{0.53}As$ photoconductive receivers, fall times reduction using back gating 85−26328
$Ga_{0.47}In_{0.53}As$ vertical photoconductivedetectors with high gain and low bias voltage 86−44311
GaInAs/AlInAs heterojunction diode as internal photoemission detectors, design and characts. 85−56446
GaInAs/InP photoconductive detector with high receiver sensitivities 85−4001
GaInAs/InP, photoconductive detectors, 2D electron gas, device for photoreceiver applications 86−2970
$Ga_{0.47}In_{0.53}As$/InP superlattice avalanche photodiode, MOCVD growth 87−54182
$Ga_{1-x}In_xAs$/GaAs diode photodetectors, dark currents 88−9976
GaInAs-AlInAs p-n heterojunction quantum well APD, photodetector appls. 87−49747
GaInAs-AlInAs-doped quantum well APD, low-noise photodetector appls. 87−26196
GaInAs-GaAs photoconductor, monolithic integration with GaAs FET, 1.3-1.55 μm appls. 88−58396
GaInAs-GaAs, planar monolithic integrated photoreceiver 86−63733
GaInAs-InP PIN photodiodes, atm. press. MOVPE growth 86−2945
GaInAs-InP monolithic photodetector arrays for high-density WDM appls. 88−73906
GaInAs-InP photodiodes for optical communications, steady-state and transient simulations 87−7223
GaInAs-InP pin photodiode with small junction area and monolithic microlens 88−22075
GaInAs-InP quantum wells and heterostruct. devices, growth by chemical beam epitaxy 87−44320
p^+n-$Ga_{0.47}In_{0.53}As$-InP Schottky-barrier diodes, MBE grown, barrier height enhancement, IR photodetector appl. 88−51675
GaInAsP integrated directional couplers with photodetectors by hydride vapour phase epitaxy technique 88−72136
GaInAsP-InP:Fe monolithically integrated laser/photodetector, fabrication and performance characts. 88−40100
GaInAsSb photodetectors for mid-IR communications 88−15479
GaInAsSb-GaSb PIN photodetectors for wavelengths to 2.3 μm 86−31424
$Ga_{1-x}In_xAs_ySb_{1-y}$-GaSb photodetectors grown by CVD 88−56248
GaP thin film MOS struct., with tunnel transparent native anodic oxide, characts. and photodetector parameters 85−34672
$GaP/GaAs_xP_{1-x}$ multilayers, optical interference filters and integrated high reflector/photodiode fabrication 86−68363
GaP-$GaAs_{0.35}P_{0.65}$, optical interference filter, photodiode, single-crystal integration 87−77285
GaSb, long wavelength photoconductive detectors fabricated on Si substrates 86−50095
GaSb planar photodiode diffused from spin-on dopant 85−41276
GaSb/AlSb multilayers, alloys and optical devices, MBE on Si (100) 87−44351
Ge, APDs for 1.3 μm monomode appl. 87−41523
Ge, ion implantation doping by low energy P ions 86−35551

photodetectors continued
Ge photoconductor, stressed, for detecting luminescence from Ge 85−31477
Ge photodiodes, quantum sensitivity spectral dependence *(Russian)* 88−72225
Ge photodiodes, temperature and uniformity effects 87−35092
n-Ge photon-drag photodetectors for the far-IR andsubmillimeter regions 86−5321
Ge, point-contact warm carrier device for CO_2 laser detection 87−56698
Ge:Ga, photoconductive detector, noise and responsivity rel. to γ-irrad. 85−31484
Ge-Si IR photodetector, fibre optics communications appl. 87−3622
Ge-Si alloys, strained layer epitaxy, review of developments 87−23659
$Ge_{0.6}Si_{0.4}$ rib waveguide avalanche photodetectors for 1.3 μm optical fibre communication 87−8627
Ge_xSi_{1-x} strained layer superlattice, waveguide photodetectors in IR region 86−50094
Ge_xSi_{1-x}/Si strained-layer superlattice avalanche photodetectors, 1.3 μm operation, MBE fabrication and performance 86−48289
HgCdTe focal plane array photodetectors, growth, performance and array fabrication 87−8634
HgCdTe, high responsivity heterojunction contact photoconductor 86−2955
HgCdTe high temperature detectors for CO_2 laser beam control and heterodyne detection 87−38935
HgCdTe high-speed room-temp. Co_2 laser detectors 85−20623
HgCdTe hybrid focal plane development 87−20929
HgCdTe intermediate temperature detector for 10.6 micron heterodyne rangefinder 87−41037
HgCdTe photoconductive detector with optical mask, performance meas. 88−47525
HgCdTe photoconductive detectors, CO_2 laser applications 87−61043
n^+-pHgCdTe photodetectors, quantum $1/f$ noise investig. 86−68400
HgCdTe photodiodes for heterodyne appls. 87−38934
$Hg_{0.4}Cd_{0.6}Te$ APD, 1.55 μm, noise anal. in vicinity of reson. impact ionisation 88−26978
$Hg_{0.8}Cd_{0.2}Te$ photovoltaic detectors, surface layer electric field effect calc. 88−47526
$Hg_{1-x}Cd_xTe$ APDs for detection at 1.3 and 1.5 micron wavelength 88−4445
$Hg_{1-x}Cd_xTe$ Ir detectors, MOCVD growth and performance charact. 88−42096
$Hg_{1-x}Cd_xTe$ photoconductive detector, quantum efficiency, reflection and surface recombination velocity effect 88−16107
HgI_2 photodetectors for scintillation spectroscopy 85−42997
In GaAs-InP OEIC photoreceiver with 5 V supply voltage *(Japanese)* 88−65527
$InAs_{0.22}Sb_{0.78}$, MBE growth and photoconductance, detector appls. 88−65459
$InAs_{0.85}Sb_{0.15}$/InAs IR detectors, LPE grown, broadband type for 1.8-4.8 μm range 86−31428
$InAs_{1-x}Sb_x$-GaAs, long wavelength detectors, MBE grown 88−16102
InGaAs 12-channel p-i-n detector arrays and packaging for 1.3 μm appls. 88−45325
InGaAs 8 GHz low-noise p-i-n photodiode for GaAs FET optical receiver 87−40878
InGaAs PIN photodetector, passivated, for PINFET receiver 87−77280
InGaAs PIN photodetectors with modulation responseto millimetre wavelengths 85−64148
InGaAs PIN photodiode grown by MOVPE 86−42441
InGaAs PIN photodiodes and JFETs on InP:Fe substrates for optoelectronic ICs 87−38962
InGaAs PIN photodiodes and junction FETs, monolithic integration 87−38961
InGaAs PIN punch-through photodiode for high-speed photodetection 85−35627
InGaAs VPE for large area extended spectral range photodetectors 88−12013
InGaAs and InP semi-insulating substrates, high-speed lateral photodetectors 86−38392
InGaAs based high performance lateral PIN photodetector 85−26327
InGaAs, comp. gradients, growth model and elec. effects on photodetectors 88−63313
InGaAs fact photoconductive detectors, speed enhancement using Be ion bombardment 85−56443
InGaAs heterostruct. avalanche photodetector, transit-time-limited freq. response 85−7321
InGaAs high speed photoconductors, ion bombarded 85−37621
InGaAs layers in photodiodes, MBE growth and elec. props. 85−49543
InGaAs monolithic integrated waveguide photodetector 87−46724
InGaAs p-i-n detector, monolithic integration with InP depletion-mode FETs 86−22266
InGaAs p-i-n photodiode detectors, design and performance, optical fibre communication appls. 86−49604
InGaAs p-i-n/photoconductor hybrid circuit, high-speed operation 87−3608
InGaAs photodetector, 20 GHz bandwidth, design for long-wavelength microwave optical links 85−46265
InGaAs photodetector for microwave optical transmission, 20 GHz bandwidth 86−42439
InGaAs photodetectors, electron irradiation 88−14046
InGaAs photodetectors, gain noise reduction by hole sweep-out effects, expt./theoretical study 86−48287
InGaAs photodiodes, high-speed/long wavelength photodetectors, electro-optic sampling system for response meas. 86−36332
InGaAs photodiodes, reliability programme for SL submarine cable appls. 85−41270
InGaAs planar p-i-n photodetectors, MOCVD fabricated, design and charact. study 86−22234
InGaAs planar p-i-n photodiode for receiver in SL undersea lightwave system 85−37041
InGaAs ultrahigh-frequency optical detector bandwidth meas. using interferometric FM sideband technique 88−22595
$In_xGa_{1-x}As$ photodetector for 1.7-2.0 micron region 85−64155
InGaAs:Be^{3+} photoconductors, 2ps, speed of response evaluation, optical pulse mixing 88−67786
$In_{0.53}Ga_{0.47}As$:Fe high-gain photoconductive detectors 85−3991
$In_{0.53}Ga_{0.57}As$:Fe photoconductive detectors for optical communication 86−30791
InGaAs/GaAs, strained-layer superlattice (SLS),junction photodetectors, LEDs, injection lasers, andFETs for optoelectronic IC applications 85−51073
InGaAs/InAlAs superlattice photodiodes, dual gain mechanism 87−54183
InGaAs/InP avalanche photodiodes, time response 86−2967

photodetectors continued

InGaAs/InP photodiodes, MOCVD growth and charact. 87−12316
InGaAs/InP photodiodes for optical fibre communication, design with sensitivity improvement *(Japanese)* 86−54043
InGaAs/InP photon counting avalanche detector for 1.3 μm room temp. optical time domain reflectometry 85−31475
$In_{0.2}Ga_{0.8}As$/GaAs ion implanted strained-layer superlattice photodetectors, photocurrent multiplication 86−11590
$In_{0.2}Ga_{0.8}As$/GaAs strained-layer superlattice photodetector, Be^+ implanted device charact. 85−56444
$In_{0.53}Ga_{0.47}As$/InP lateral phototransistor for optical communication appls. 85−35628
InGaAs-InP 1.5 μm photodetectors, optical communication appls. 87−18963
InGaAs-InP DH PIN photodetectors, LPE grown 86−31445
InGaAs-InP PIN mesa photodiode, 22 GHz, fabrication and characteris. 87−26206
InGaAs-InP integrated waveguide p-i-n photodetector by MOVPE regrowth 88−8078
InGaAs-InP, lattice matched heterostructure, metallorganic VPE, for high speed photodetectors 87−77284
InGaAs-InP long-wavelength PIN photodiodes, reliability 86−42440
InGaAs-InP monolithic p-i-n diode/amplifier, high speed operation *(Japanese)* 88−65528
InGaAs-InP planar p-i-n photodiode detectors, very high speed operation, performance charact. study 87−12314
InGaAs-InP superlattice avalanche photodetectors, gas source MBE grown 87−8628
InGaAs-InP:Si planar APD fabrication using ion implantation and regrowth techniques 88−45304
$In_{0.53}Ga_{0.47}As$-InP integrated waveguide p-i-n photodetector 88−33903
$In_{0.53}Ga_{0.47}As$-InP planar p-i-n photodiodes with very high failure activation energy, reliability anal. 88−51677
InGaAsP lasers, injection, photodetection props. 87−19108
InGaAsP waveguide PIN type, high-speed zero bias, features 86−70140
$In_xGa_{1-x}As_yP_{1-y}$ lasers, generation and detect. of 15 ps light pulses in visible range 86−36455
InGaAsP/InP avalanche photodiodes as optical detectors 86−2965
InGaAsP-InP LED photodiode arrays for optical communications systems 88−3995
InP LD with monolithic photodetector fabricated by Br_2 RIE technique *(Japanese)* 88−65715
InP based JFET for monolithic integration in optical receivers 85−18822
InP based high performance lateral PIN photodetector 85−26327
InP bipolar transistors as laser detectors, ion implantation *(Japanese)* 88−53702
InP optical waveguide/photodetector combination in OEIC-receiver equipment of future fibre optic telecommunication networks 88−58397
InP self-electro-optic effect devices, optical bistability 88−40355
InP/$Ga_{0.47}In_{0.53}As$ superlattice avalanche photodiode, photoresponse charact. study, fibre-optic communication appl. 88−65479
InP/$Ga_{0.47}In_{0.53}As$ superlattice avalanche photodetectors, trichloride VPE growth 87−21083
InP/InGaAs near-IR detector self-calibration feasibility determ. 87−14350
InP/InGaAsP channelled-substrate BH laser monolithically integrated with photodetector 86−15589
InP/InGaAsP device structures, LPE growth 87−16624
InP/InGaAsP heterojunction photodiodes for 1-1.6 μm high bit rate communications 87−41522
InP/InGaAsP/InGaAs avalanche photodiode with frontillumination for optical fiber transmission at Gbitrates in the 1-1.6 μm wavelength region 86−42443
p-InP/n-InGaAsP/n-InP heterojunction waveguide photodetectors 87−49766
InP-Au internal photoemission detectors, enhanced quantum efficiency by grating coupling to surface plasma waves 85−52763
InP-GaInAs p-i-n photodiode, planar embedded, very high-speed operation 88−20502
InP-GaInAs-InP p-i-n photodiode, front-side-illuminated 87−46683
InP-$In_{0.53}Ga_{0.47}As$-InP photodetectors for 1200-1600 nm range, single layer antireflection coating design 88−58331
InP-InGaAsP, directional grating-coupled waveguide photodetector, wavelength selective 88−4429
InP-InGaAsP-InGaAs APDs for high bit rate lightwave systems 88−45303
InP-InGaAsP-InGaAs APDs, gain-bandwidth improvement 86−42442
InP-InGaAsP-InGaAs-InP structs., growth by LPE, photodiode appl. *(Japanese)* 88−12009
InSb narrow gap semiconductor diodes, current leakage analysis and obs. 88−45302
p-InSb thin film linear array detector for CO_2 pulsed lasers 86−50100
$LiTaO_3$ high-speed pyroelectric detector for laser pulse shape study 88−14265
$In_xGa_{1-x}As$, growth on patterned Si substrates, photodiode fabrication 88−63338
$NaC_7H_5O_3$ fluorescent reflective coating for detector for VUV to IR 85−47972
Nb based light-sensitive planar interferometers 87−67854
NbN-BN granular films, high speed detector for far IR radiation 87−63413
Pb_2CrO_5 photovoltaic device for light-beam position detection 88−29377
Pb_2CrO_5-Au thin film device, position-sensitive photovoltage 88−20508
PtSi photodiode staring IR sensor evaluation 87−14177
PtSi Schottky-barrier IR-CCD image sensor, config., performance and TV camera appl. 88−22636
PtSi internal photoemission, theory and expt. 88−29409
PtSi/p-Si Schottky barrier wide spectral band photodetector, 0.4 to 5.2μm 86−17970
PtSi-Si optically enhanced Schottky barrier photodetectors for IR sensor appl. 87−14339
Si 3D LSI device fabrication, by dual-laser beam recrystallisation method 86−2051
Si ADP, charactn. for photon correlation meas., active quenching 87−68273
Si CCD line sensors, behaviour at cryogenic temperatures *(German)* 87−3614
Si HV solar cells for solar radiation sensor 87−43421
Si, IR pyrometer for thermodynamic temp. meas. between 683K and 933K 87−14338
Si MIS photodiode integrated arrays of photodetectors in spectral instruments 87−35079

high-frequency photodiode-HEMT hybrid photoreceiver at 10 GHz 86−48262
high-resolution light spot localization with photodiode arrays 85−3905
high-speed optoelectronic detectors for fiber-optic communications 88−45305
Hitachi's fibre optic components, laser diodes, connectors, transmitter and receiver modules 87−20493
Honeywell CS70 intelligent colour sensors supervise automated manufacturing *(German)* 88−4480
HV electro-optic driver with DMOS power FETs and optocoupling isolation 88−70563
HV opto-isolator, using LEDs and photodiodes 86−29000
hybrid FIR filters using semiconductor LEDs and photodiodes 87−45119
hybrid IR photodiode array-CCD imager, direct injection 86−60165
hybrid optoelectronic components for optical fibrecommunications *(Polish)* 86−43840
hybrid photodiode for low P_t physics at SSC 88−68290
III-V DH semiconductor lasers and photodetectors by molecular beam epitaxy 85−29859
III-V semiconductor-based optical detectors, historical developments 85−12728
image sensor, linear integrated contact type with a-Si:H photodiodes and CMOS TFTs 86−5056
image-sensing camera appl., noncontact meas. of specimen marks 86−44161
imager, spatial variation of responsiveness, meas. 87−28955
impedance matched fibre optic transceivers for microwave signal transmission 87−49089
$In_{0.53}Ga_{0.47}As/InP$ p-i-n photodiode monolithic array, design for optical fibre system appls. 85−56456
$InAs_ySb_{1-y}/GaInAsSb/GaSb$ struct., LPE growth, charactn. and IR photodiode appl. 87−52117
inclination sensor, using LED spirit level mounted on photodiode array 86−55741
industrial computer operated visual sensor SCI-700 *(Spanish)* 87−8534
information processing and communications appl. 87−2117
InGaAlAs/InP ridge waveguide photodiodes, MBE-grown, monolithic integration 88−58381
injection-mode IR detector, spectral response 87−3619
InP/GaInAs/InP PIN photodiode with FWHM <18 ps 87−46704
integrated optical fibre data link transmitter/receiver for LAN appl. 86−23863
integrated optoelectronic circuits, review 88−58383
integrated optoelectronic technologies for future fiberoptic systems, review 88−65514
integrated photodetector arrays, planar and channel optical waveguides fabrication 85−46126
integrated tactile/vision arrays, shadow anal. appl. 87−49581
interline CCD image sensor with reduced image lag, photodiode struct. 85−20495
interline-transfer CCD imager with clock-line-isolated photodiode struct., operation and characts. 86−5043
IR LED transmitter and photodiode receiver using PFM, design and construction *(Spanish)* 86−30829
IR photodiode array using 64×64 CCD photocurrent multiplexer, config. and operation 87−28977
IR photodiodes for 3 to 14 μm, comparison 87−29120
IR phototransducers frequency characts. meas. device 86−17979
IR photovoltaic detectors effect of space charge layer and bias voltage on detectivity *(Chinese)* 88−2113

photodiodes continued

laser and photodetector packages for microwave optical transmission 88−24570
laser beam power meter, design using fast photodiode detector 85−24634
laser beam spatial and temporal change, meas. with photodiode array and microcomputer system *(Chinese)* 86−3264
laser Doppler anemometry for velocity meas., semiconductor devices appl. *(German)* 88−4650
laser power meas. standards comparison, C-series calorimeter and quantum-efficient photodiode 88−14253
laser power meas. standards scales intercomparison 87−12545
laser range finder, synchronised scanner approach, signal processing requirements 88−53726
laser speckle strain gauge using photodetectors 86−60234
laser-Doppler flow monitor with diode laser and photodetectors integrated in probe 85−53031
lateral collection, cylindrical symmetry, minority carriers distrib. calc. 86−15573
lateral collection diodes, thin circular, generalisation of theory 87−18843
LBIC photocurrent, effects of finite dimensions, 2D anal. 87−54174
Lidar, coherent range-resolved differential absorption, description *(Japanese)* 85−31102
lightguide systems development *(German)* 87−34554
line-scanner with IEEE-488 interface *(German)* 88−4339
linear IR CCD focal plane array with programmable stare time 85−58586
linear photodiode array with serial and addressablereal-time output capability 85−62454
long diode, graded band gap, photon recycling process, direct voltage drop stabilisation time calcs. *(Russian)* 87−46697
long haul fibre-optic solutions 88−47022
long variable-gap photodiodes, photosensitivity under double injection conditions 85−29720
long wavelength optical devices for fibre-optic communications, laser diodes, LEDs, photodiodes *(Japanese)* 87−13718
long-wavelength components by VPE 87−23663
longitudinal segmentation of total absorption electromagnetic calorimeters with photodiode readout 88−22919
luminous power meas. instrument struct. *(Italian)* 88−36254
machine vision, sensors and cameras 85−64034
mark sensor requires no sensitivity adjustment 87−49755
matrix system, radiation energy density distrib. meas. over laser beam cross section 87−75202
MBE/MOCVD technology appl., using tailor-made sensing materials 86−55748
measurement errors in optoelectronic devices with quadrantsectional photodiode *(Russian)* 86−2953
medical photo-diode array angiographic system for imaging and blood flow measurements 85−4276
merocyanine dye/distearyl paraquat molecular p-n junction photodiodes of Langmuirmultilayer semiconductors 85−62447
MF-14 photodiode array for TV systems *(Russian)* 87−70466
microelectronic chip-to-chip interconnections using optical imaging with LEDs and photodiodes 86−2992
microprocessor-controlled photodiode array for measurementof diffraction patterns 85−58520
microwave generation by optical mixing 88−72463
microwave optical fibres RF optical receiver 88−12585
microwave wideband laser diodes spark new designs in optical links 85−42574
miniature photoelectric angle digitizer 87−63335
miniature vacuum photodiodes for calorimeters 88−29871
molecular photodiodes consisting of unidirectionally oriented amphipathic acceptor-sensitizer-donor triads 88−72222
monolithic fiber optic video signal transmission module 87−13710
monolithic four channel photodiode amplifier array, integrated on GaAs substrate 86−42462
monolithic four-channel photoreceiver integrated on GaAs substrate using MSM photodiodes and FETs 86−29017
monolithic light sensing devices, design, operation and cct. appls. 85−41295
monolithic optoelectronic ICs for high-speed fibre optic transmission 87−18864
monolithic photodiode FET receiver 88−65515
monolithic superlattice pin waveguide detector, dual-wavelength demultiplexing 88−67396
monolithically integrated opto-electronic receivers for long-wavelength applications 88−73978
monolithically integrated photodiode and preamplifier for wide-band fiber optic links 88−51707
MOS imaging device with photodiode array, design and performance 86−5045
MOS integral linear photocell array, self-scanning *(Russian)* 85−2140
MOS integrated photodiode optical signal convertor, linear model, implementation for image analyser *(Russian)* 85−29730
MOS solid state color imager with buried oxide wallfabricated by low pressure selective epitaxy 85−52679
multielement MOS integral photodiode optical signal convertors *(Russian)* 85−35657
multielement threshold photodiode convertor in reception of optical half-tone image 88−65478
multimode lasers, detector-dependent beating 86−29222
multiplexed bidirectional optical fibre links components *(French)* 86−30832
narrow band gap semicond., radiant refrigeration 86−2954
narrow-field light-recording systems, sensitivity 86−17977
near-background-limited photodiodes, performance evaluation method 86−42436
near-IR detectors, signal-to-noise ratio comparison 85−26325
new integrated optical sensor with digital output based upon a flip-flop and an on-chip photodiode 87−26215
noise degradation of photodiodes, radiation threshold levels 85−12733
noise evaluation in photodiode array optoelectronicinstruments *(Italian)* 86−58830
nomenclature for circuit configurations for processing signals produced by photodiodes and photoconductors 86−63719
nonequilibrium devices for infra-red detection 85−42995
object proximity photo-sensor based on IR beams *(Russian)* 86−24540
OEICs, planar struct., advanced optical processing and communications appls. 88−40107

PIN photodiode-bipolar transistor transimpedance optical preamplifier with very low input resist. 87−33070
PIN photodiodes, 40-, 85-MeV proton irrad. effects 86−22244
PIN photodiodes in automatic polarisation spectral response meas. systems for optical fibre couplers 88−20390
PIN-FET receiver for gigabit/second optical communications systems 87−40972
PIN-FET receivers for Gbit/s optical fibre communication systems, 1.1 to 1/6 μm 86−11113
PINFET hybrid optical receiver for 1.2 Gbit/s systems 85−25907
PINFET long-wavelength optical receivers development and perform. 85−31019
pinned photodiode for an interline-transfer CCDimage sensor 85−51054
plant stem diameter contactless measurement apparatus using LED and photodetector *(Japanese)* 87−14548
polymer waveguides, plasma-etched for intrachip optical interconnects 88−51706
position sensitive array, for X-ray detection 85−15162
position sensitive particle detectors, high count rate, for synchrotron radiation expts. 87−29537
position sensitive photodiode IC *(German)* 88−26985
position sensitive solid state detectors for the soft X-ray region 86−60557
preamplifier, fast-response photoreceiver for fibre optic communication lines, noise charcts. 86−63722
precision photodetector with frequency output 86−70148
programmable detector system for plasma spectroscopy, high-speed design 86−55555
programmable optical demultiplexer using 32-element Si photodiode array *(Japanese)* 88−60194
projectile angle measurements, optoelectronic system 87−21246
projectile yaw angle measurement using optoelectronic system 86−5528
pulsed laser beam parameters meas. cct., biological appl. 87−46955
pulsed laser wavemeter using CCD/photodiode array-image data 88−58643
quantum efficiencies and performances in 5 to 1000 eV range 88−22597
quantum efficiency improvement and spectral response alteration in vacuum 85−2148
radiation effects on light sources and detectors 86−48294
raindrop sensor for car windshield wiper control 88−31169
Raman multichannel detector selection guidelines 88−47530
range-finding intelligent peripheral, calibration and segmentation algorithms 87−14171
receiver, 1.3 μm, optoelectronic IC with self-aligned JFET 88−65516
receivers, long-wavelength light-wave, photodetector/low-noise-amplifier combinations 85−4000
reentry vehicle performance meas. appl. 88−5040
reflection mode beam vector sensor for laser scanning appls., XY photodiode config. 86−17969
reflective photoelectronic displacement sensor with subnanometer resolution *(Japanese)* 88−4377
reflectometer, portable, for rapid quantification of cutaneous haemoglobin and melanin 88−68380
reliability in fibre optic video distribution systems *(Japanese)* 88−8071
resonant opto-electronic optical logic device, device proposal for three-terminal behaviour 88−2120
response modelling, use of splines 87−61047
response time meas. of photodiodes and laser diodes for high-rate link *(French)* 87−70060
Reticon detector, fibre optic illumination, noise improvements 87−77147
RL1024G diode array, blooming and crosstalk, Monte Carlo simulation 88−26975
robot eye in gripper, composed of solid state linear array sensor 87−14161
Schottky, quasi-planarization of vertical structures for integration with planar devices 85−45639
Schottky diode, avalanche photocurrent at fundamental absorption band edge 86−67827
Schottky diode and GaAs FET integration for Raman spectroscopy use 88−47529
Schottky-barrier, V-A charcts. obs., using compensated cathode-ray curve tracer 86−60300
Schottky-barrier photodiode, with interfacial layer, appl. of differential photocurrent method 85−46266
scintillation detector for radiac instrumentation 85−15185
selective IR garage door remote control circuit *(German)* 86−14428
self scanned photodiode array for astronomical spectroscopy 88−14031
self-scanned array use for soft X-ray multilayer characteris. 88−23018
self-scanning photodiode array for optical diffr. pattern meas. 87−77271
semiconductor devices, review *(French)* 86−9703
semiconductor electron current detector for direct recording of electron microscopic diffraction images 85−29714
semiconductor optical sensors, technology and appls. 85−12732
series connection circuit, photovoltage jumps 86−58832
Si, p-i-n photodiodes for optoelectronic matrix switch, design and performance 88−33905
small signal modelling using finite difference/lumped parameter approach 88−22160
smart colour sensor 87−26214

photodiodes continued
smear-suppressing CCD imager, interline-transfer type using bell-bottom photodiode 87−20971
soft X-ray microscope detector systems for high photon rates 88−23021
SOI light detector and 10-bit linear image sensor fabricated in doubleactive layers 86−44190
SOI photodiode array stacked on VDMOS for optical switching, MOS relay appl. 88−40084
solar radiation measurement, Si photodiode rotating shadowband pyranometer, empirical radiometric correction for 87−71359
solar tracking system and electronic sun finder 87−15980

CdS longitudinal injection photodiodes, polarized radiation sensitivity 85−29718
CdS single cryst. UV detector with injection gain 85−51047
CsI(Tl) cryst., photodiode readout improvements 85−37906
$CuInSe_2$/Au sintered Schottky diode 85−40681
$CuInSe_2$-ZnSe heterodiode, LPE growth and elect. characterisation of $CuInSe_2$ 86−57453
$Cu_{2-x}S$-ZnS p-n heterostructures, elec., photoelec., and electroluminesc. props. *(Russian)* 85−50250
(Ga,Al)As-GaAs, semiconductor scintillator, nuclear particle and X-ray detector 87−77595
Ga-Al-In-As ternary and quaternary alloy compositions, MBE growth and device appl. 87−44324
GaAlAs combined heterostructure LED and photodiode, steady-state characteristics 86−22263
GaAlAs heterostruct. devices, research at RSRE, control of interface props. 87−60167
GaAlAs p-i-n detectors, high speed, MOCVD, fabrication and assessment 85−12731
GaAlAs-GaAs heterojunction FET compatible with photodiode , integrated design and characts. 88−74411
GaAlAs-GaAs integrated optical repeater, monolithic integration of laser, MESFET and photodiode 85−2346
GaAl(As)Sb mesa p^+n photodiodes, prep. and noise characts. 86−63725
GaAlSb, LPE layers for IR photodiodes, improved growth apparatus 85−392
GaAs FET integrated with heterojunction photodiode 88−20521
GaAs FET/Schottky photodiode monolithic integration for 0.8 μm appls. 86−4635
GaAs IRED 87−2041
Ga(As,P) Schottky-barrier photodiode with interfacial layer, optical absorpt. coeff. and minority carrier diffusion length *(Japanese)* 86−2962
GaAs Schottky barrier photodetectors, 0.82 μm operation 88−9977
GaAs Schottky barrier photodiodes, photocurrent multiplication 87−33059
GaAs Schottky diodes using polymer Langmuir-Blodgett layers 86−22245
GaAs Schottky photodiode and FET association, planar monolithic integrated photoreceiver 87−56706
GaAs Schottky photodiode ultra-high-speed photodetector, design and fabrication 85−56442
GaAs Schottky photodiodes, photocurrent amplification 87−2029
GaAs Schottky-barrier photodiode based on transparent $In_{2-x}Sn_xO_{3-y}$ 85−62445
GaAs Schottky-barrier photodiode, optical absorpt. coeff. meas. in depletion region 85−18806
GaAs acoustic charge transport device, near IR radiation response 88−42105
GaAs detectors, direct backside connection of optical fibres 88−65205
GaAs four-channel optoelectronic integrated circuits 87−46727
GaAs high gain photodetectors for Raman spectroscopy 86−17983
GaAs high-speed Schottky-barrier photodiode, Monte Carlo investigation 87−26210
GaAs, high-speed p-i-n photodiodes, MBE grown on Si, DC operating characts., impulse response and microwave response meas. 88−45293
GaAs, integrated receiver with JFET and heterojunction photodiode 88−51711
GaAs light emitting and detecting diode for fibre-optic bidirectional communication 86−11131
GaAs metal-semiconductor-metal photodiodes, low dark current using WSi_x contacts 86−68396
GaAs monolithic four-channel photodiode/amplifier receiver array 87−18867
GaAs monolithic integrated photoreceiver, Schottky photodiode and FET for 0.8 μm wavelength 88−40103
GaAs, monolithic integration of MSM photodiode and preamplifier 85−18819
GaAs monolithic optoelectronic receiver with bandwidth of 5.2 GHz 88−40108
GaAs monolithically integrated photoreceiver with large gain-bandwidth product for 800 nm wavelength 87−54202
GaAs optoelectronic IC fabrication, direct writing electron beam lithography process 85−46293
GaAs optoelectronic integrated receiver arrayexhibiting high-speed response and little crosstalk 86−68407
GaAs photodetectors; numerical simulation of high-speed photodiodes using drift-diffusion model 88−45316
GaAs photodiode/transistors non conventional types of detectors for opticalcommunication systems *(Slovak)* 86−30833
GaAs photodiodes, Schottky barrier height increase by carboxylic acid monolayers 85−18811
GaAs photodiodes, response speed meas., picosecond optical autocorrelation technique 86−48288
GaAs, photoreceiver, high-speed, monolithic integration using metal-semiconductor-metal photodiodes 86−15588
GaAs planar back-to-back Schottky-barrier photodiode, expt. study 85−46271
GaAs planar p-i-n photodiode with picosec. time response 85−24395
GaAs technology and props. investigation at CESF SAV Electrochemical Institute *(Slovak)* 86−27864
$GaAs/Al_xGa_{1-x}As$ heterojunction photodiodes, band discontinuities 87−33048
GaAs/AlAs graded superlattice PIN photodiode with low dark current 86−54038

photodiodes continued
GaAs/AlAs quasi-graded band-gap superlattice p-i-n photodiode, high-speed response 87−7213
GaAs-$Al_xGa_{1-x}As$ quantum wells, excitonic transitions, optically excited transport 87−74918
GaAs-AlAs-GaAs p^+-i-n and n^+-i-p photodiodes, photocollection efficiency 88−5867
GaAs-AlAs-GaAs photodiodes, bias-dependent photoresponse of p^+ 87−33047
GaAs-AlGaAs two-wavelength disordered quantum-well photodetector, struct. and charact. 88−29383
GaAs-InGaAlAs superlattice photodiodes, coherently strained, performance charact. 88−2112
GaAs-Si photodiodes, influence of geometric dimens. on charact. *(Russian)* 86−15578
GaAsInP, quaternary, volt-ampere and noise charact. obs. *(Czech)* 85−24400
GaAsP photodiodes, real-time microcomputer-assisted array spectroradiometer for photobiological weighting of irradiance 88−48152
$GaAs_{0.6}P_{0.4}$ LED for FIR detect., photocond. and bolometric response 87−2041
$GaAs_{1-x}P_x$:Be^+-GaP:Be^+ strained layer superlattices, ion implantation doping, optical and elec. props., device appls. 87−25075
GaAsP-GaAs(P) strained-layer superlattices, MOCVD and device prep. 87−312
GaAsSb near IR photodiodes, Ta_2O_5 antireflection coating appls. 86−58811
$GaAs_{1-x-y}Sb_xP_y/GaAs_{1-x}Sb_y/Al_yGa_{1-y}As_{1-x}$ Sb_x p-n struct. photodiodes with controlled spectral sensitivity 87−38932
GaInAs PIN-GaAs IC preamplifier receiver for high data rate optical fibre systems 87−38966
GaInAs Schottky photodetector, high-speed photodiode 85−29712
GaInAs embedded pin diode for optoelectronic integration 85−41280
GaInAs integrated PIN/JFET for monolithic photoreceiver 87−74940
GaInAs monolithic PIN/FET receiver 88−47127
GaInAs monolithic pin photodiode/FET 88−41626
GaInAs p-i-n photodetector, ultra-low-capacitance flip-chip bonded 85−56431
GaInAs p-i-n photodiode GaAs preamp. photoreceiver for gigabit-rate communications 88−67353
GaInAs p-i-n photodiode and optical waveguide, monolithic integration, modeling and realisation 88−40104
GaInAs p-i-n photodiodes grown on Si substrates, MOCVD fabrication, 1.55 μm detection appl. 87−74926
GaInAs photodiode as transfer standard for picosecond meas. 88−40066
GaInAs photodiode compared to GaInAs/InP photoconductive detector with high receiver sensitivities 85−4001
GaInAs photodiode, monolithic integrating of InP inverted rib waveguide 87−74947
GaInAs photodiode, optoelectronic nonlinear effect and appl. to multiplexing systems 88−26973
GaInAs/AlInAs heterojunction diode as internal photoemission detectors, design and charact. 85−56446
GaInAs/InP PIN photodiode in PIN-FET hybrid integrated preamplifier for high speed optical transmission system 86−69795
$Ga_{0.28}In_{0.72}As/Al_{0.28}In_{0.72}As$ photodiode heterostructures, atm. press. MOCVD, 2 μm, sensitivity, structural charactn. 87−18845
$Ga_{0.47}In_{0.53}As$/InP PIN diodes for telecommunication applications, electrical performance study 86−2971
$Ga_{1-x}In_xAs$/GaAs diode photodetectors, dark currents 88−9976
$Ga_{1-y}In_yAs/InAs_xP_{1-x}$ p-i-n photodiodes for long-wavelength regions (>2 μm) grown by hydride VPE 88−40063
GaInAs-AlInAs heterojunction photodiodes, MOCVD grown, low-leakage design for detection to 2.4 μm 87−13696
GaInAs-InP PIN photodiodes, atm. press. MOVPE growth 86−2945
GaInAs-InP monolithic twin PIN photodiode for balanced dual-detector optical coherent receivers 88−45295
GaInAs-InP p-i-n photodiodes, high yield/reliability planar devices fabricated by atm. press. MOVPE 88−33869
GaInAs-InP photodiodes for optical communications, steady-state and transient simulations 87−7223
GaInAs-InP pin photodiode with small junction area and monolithic microlens 88−22075
p^+n-$Ga_{0.47}In_{0.53}As$-InP Schottky-barrier diodes, MBE grown, barrier height enhancement, IR photodetector appl. 88−51675
$Ga_{0.47}In_{0.53}As$-InP, quantum well photodiode, photocurrent step-like struct. 87−74092
GaInAsP photodiode-waveguide coupling for hybrid integrated optical ccts. 87−74941
GaInAsP/InP laser/monitor photodiode with CARIBE etched facets 86−42539
GaInAsP-InP p-i-n photodiode, high-speed front-illuminated 88−45294
GaInAsSb photodiode structs., avalanche multiplication 88−25949
GaInAsSb/GaAlAsSb heterostruct., photodiode props. charact. 87−68289
GaInAsSb/GaSb p-n photodiodes characterisation 88−70346
GaInAsSb/GaSb p-n photodiodes for 1.8-2.3 μm wavelength range, LPE growth 86−48259
GaInAsSb-GaSb PIN photodetectors for wavelengths to 2.3 μm 86−31424
$Ga_{0.49}In_{0.51}P$-$Ga_{0.47}In_{0.53}As$-InP, Schottky photodiode and FET monolithic integration 88−58394
GaP p-n structures, radiation yield coefficient determination 88−14029
$GaP/GaAs_xP_{1-x}$ multilayers, optical interference filters and integrated high reflector/photodiode fabrication 86−68363
GaP-$GaAs_{0.35}P_{0.65}$, optical interference filter, photodiode, single-crystal integration 87−77285
GaSb, LPE layers for IR photodiodes, improved growth apparatus 85−392
GaSb p-n junction photodiodes grown by vacuum chemical epitaxy 87−52116
GaSb planar photodiode diffused from spin-on dopant 85−41276
GaSb spin-on diffused mesa photodiode with high breakdown voltage 86−28986
GaSb/GaAs heterojunction photodiodes, plasma-assisted epitaxial growth, photoresponse charact. 85−46281
GaSb-GaAs photodiode, low-temp. growth by plasma process *(Japanese)* 87−272
p-GaSb-n-GaAs plasma assisted epitaxial growth, photoresponse 88−435
Ge photodiode for OTDR 88−33629
Ge photodiode, self-calibrating, design and fabrication by ion implantation 85−51050
Ge photodiodes for optical fibres, gamma-ray irradiation effects 86−36354

InGaAsP photodiodes for use in prismatic multiplexers *(Polish)* 85−19939
InGaAsP/InP dual mode laser/detectors in 7.5 km bidirectional single-mode optical-fibre link 85−46395
InGaAsP/InP pin-photodiodes, fabrication, props. 86−48279
InGaAsP-InP heterostructures, light emission and degradation charact. 87−26199
In_2O_3:Sn-SiO_2-Si photodiode struct., photoresponse meas. 88−33881
In_2O_3/SiO_x/Si, photodiode, absolute radiometer with 100% internal quantum efficiency 88−74409
InP, dielectrics for passivation 88−13117
InP:Zn,S solar cells, influence of substrate degradation on photoelectrical props. 88−18060
InP/GaInAs p-i-n photodiode, planar embedded struct. with high-speed response 87−26191
InP/GaInAs/InP heterostructures, OMVPE, high speed p-i-n photodiodes, photolum., Hall meas. 87−12315
InP/InGaAs:Zn, PIN detectors, OMVPE growth 87−10434
InP/InGaAs/InP double heterojunction photodiodes, chemical beam epitaxy grown, charact. 86−58829
InP/InGaAsP heterojunction photodiodes for 1-1.6 μm high bit rate communications 87−41522
InP-GaInAs p-i-n photodiode, planar embedded, very high-speed operation 88−20502
InP-GaInAs-InP p-i-n photodiode, front-side-illuminated 87−46683
InP-$In_{0.53}Ga_{0.47}As$-InP heterostructure photodiode, EBIC obs. 86−53405
InSb back-incidence-type photodiode, IR charact. *(Japanese)* 87−35088
InSb charge amplifier for use in spectrometer array 86−52683
InSb narrow gap semiconductor diodes, current leakage analysis and obs. 88−45302
InSb photodiode low-temp. charact, analysis 87−46692
p-InSb:Ge injection photodiode charact., electron irrad. effects 87−18840
$In_{2-x}Sn_xO_{3-y}$ Schottky barrier photodiodes for high frequency appls. 86−29005
$In_{2-x}Sn_xO_{3-y}$-GaAs photodiodes, 1100 GHz bandwidth high-efficiency devices, fabrication and charact. 87−54185
$In_{2-x}Sn_xO_{3-y}$-GaAs photodiodes, design and charact. for MM-wave appls. 87−12313
IrSi Schottky barrier photodiodes, comparison with PtSi photodiode 88−29408
IrSi Schottky-barrier infrared image sensor 88−42168
$Ln_xGa_{1-x}As$, growth on patterned Si substrates, photodiode fabrication 88−63338
NiO catalyst reduction, photodiode array system for energy dispersive EXAFS 88−42426
PbSe hetero-epitaxial deposition on Si substrates for infrared sensor applications *(German)* 85−39722
PbSe-Si heterojunctions, solution-grown, elec. and photoelec. props. 85−1371
$Pb_{0.80}Sn_{0.20}Te$ Schottky barrier photodiodes, high performance at 8 to 14 μm 87−74929
$Pb_{0.8}Sn_{0.2}Te$:Cd mesa diffused photodiodes, charact. and minority carrier lifetime 85−29709
Pt-Ir silicide Schottky-barrier IR detectors 88−35994
PtS; photodiode staring IR sensor evaluation 87−14177
PtSi Schottky barrier photodiodes, comparison with IrSi photodiode 88−29408
PtSi/p-Si IR camera imagery 87−20962
PtSi/p-Si Schottky barrier wide spectral band photodetector, 0.4 to 5.2μm 86−17970
PtSi-Si optically enhanced Schottky barrier photodetectors for IR sensor appl. 87−14339
Si MIS photodiode integrated arrays of photodetectors in spectral instruments 87−35079
Si, NBS photodetector spectral response calibration transfer program 88−67630
Si PIN and avalanche diodes in signals transmission with optical fibres *(German)* 87−7100
Si PIN, lag props. 85−35637
Si PIN photodiode defects, optical system performance limitations 88−58361
Si PIN photodiodes, low energy X- and γ-ray spectroscopy 88−54414
Si SIS structures, anisotypic, appl. as photodiodes 88−26986
Si, amorphous, photodiodes, from laboratory to large size solar panel prod. 88−17971
Si and AlGaAs/GaAs radiation-hardened optoelectronics components, detectors review 87−21089
Si, candela realisation at NPL 88−47698
Si, combined scintillator-photodiode detectors development 86−5805
a-Si contact image sensor, rod lens/photodiode array using hybrid technology, design and appls. 85−20506
a-Si contact-type image sensor, photodiode array/custom driver IC config. *(Japanese)* 87−77130
Si, four-detector photopolarimeter construction, calibration and testing 88−29410

photodiodes continued
Si, infra-red sensitivity of bulk-barrier diodes due to lattice defects 88−2117
Si, input amplifiers props. and realisation, data transmission appl. *(Czech)* 87−56705
Si integrated colour filtering element with enhanced wavelength tunability 88−65449
Si integrated transducer based on blackbody radiation fromheated polysilicon filaments 86−55749
Si interdigital Schottky diode structure with fast UV response 87−14335
Si inversion layer photodiode, response time and linearity 85−46259
a-Si large-scale linear image sensor, anal. and design 87−14134
Si, laser recrystallised, photodetector arrays integrated with optical waveguides 86−15516
Si light-activated diode switch characts. studies 88−33142
a-Si long photodiode for optical scanning image sensor *(Japanese)* 88−36076
Si monolithic photodetector/amplifier IC for fibre and integrated optics appl. 86−2994
Si, optical links appl., operational experiences with 8 and 34 Mbit/s systems *(Czech)* 86−43842
Si optoelectronic components behaviour under pulsed gamma irradiation 88−72218
Si p^+-n^--n^+ photodiode, accelerated lifetime testing 87−61045
a-Si p-i-n diode 2D photosensor, config. and characts. 88−16182
Si p-i-n diode, spectral information coding by IR photoreceptors, colour vision analogue 87−21080
Si p-i-n photodiode with buried isolation region for short-haul optical fibre communications 87−2030
Si p-n diode arrays, storage lifetime, nondestructive SAW charactn. 87−46685
Si p-n diodes, maximum power spectroscopy 85−12730
Si p-n diodes, photocurrents under high intensity pulsed-laser illumination 88−51671
Si p-n photodiodes, quantum yield of photocurrents under high intensity pulsed laser illum. 88−20510
Si partially depleted p-i-n photodiode under transientexcitation, anal. 86−15566
Si photodetector, combination X-ray detector with scintillator and silicon photodiode 88−16667
Si photodetector self-calibration, near IR limitations 85−51051
Si photodetectors for optical position sensing 87−29293
Si, photodetectors, ion implanted, laser annealed, high blue-light sensitivity *(Chinese)* 85−58705
Si photodetectors, reliability evaluation and prediction 88−45299
Si photodiode, Au-point blackbody and synchrotron radiation, intercomparison between irradiance scales 86−65199
Si photodiode, LV high-speed device with buried isolation region 85−56447
Si photodiode, Schottky barrier, picosecond optical power meas. 85−52778
Si photodiode absolute spectral sensitivity estimation *(Japanese)* 86−28996
Si photodiode array, Sun boresight alignment testing for halogen occultation expt. 88−48325
Si photodiode array for monitoring individual lasers in a laser array 85−41269
Si photodiode array radiometer, linearity of response 85−3985
Si photodiode array, self-scanned, programmable scan controller 87−3455
Si photodiode as detector of exposure dose rate 85−37934
Si photodiode based radiation detector 85−31716
Si photodiode detector for fluorescence EXAF 88−8065
Si photodiode, edge illumination at UV wavelengths to improve quantum efficiency 87−26188
Si photodiode physics, radiometric appl. 86−55747
Si photodiode, predicted quantum efficiency for absolute spectral irrad. meas. 85−8975
Si photodiode properties, radiation damage in mixed n-γ field *(Czech)* 88−58357
Si photodiode, radiation hardened, incorporating sinker diffusion, radiation response 85−35624
Si photodiode radiometer, calibration, irradiance scales intercomparison 85−52777
Si photodiode radiometry compared with Australian radiometric scale 87−63412
Si photodiode, semiconductor and combined detectors dynamic nonlinearity determ., for computer-assisted tomography 88−42523
Si photodiode spectral nonlinearity in IR 86−42421
Si photodiode, surface-type, UV sensitivity *(Chinese)* 86−28984
Si photodiode transfer-standard monochromatic comparator pyrometer 87−8763
Si photodiode-CsI:Tl scintillator combination, γ-ray dose rate detector 85−43261
Si photodiodes, absolute spectral responsivity, selfcalibration technique *(Spanish)* 85−8855
Si photodiodes for in vivo dosimetry 88−74899
Si photodiodes for optical communications, steady-state and transient simulations 87−7223
Si photodiodes for optical fibres, gamma-ray irradiation effects 86−36354
Si photodiodes, low leakage design, lifetime and stability props. 86−48269
Si photodiodes, miniature props. in 14.7 MeV neutron field, therapeutic dosimetry appl. 88−58356
poly-Si photodiodes, ohmic contacts *(Russian)* 85−50278
Si photodiodes, optimal operating parameters with CsI detector 86−2958
Si photodiodes, origin of dislocations and dark current *(Russian)* 85−51045
Si photodiodes, p-type processing to enhance long-wavelength performance 88−33878
Si photodiodes, performance in combination with plastic scintillators 86−50373
Si photodiodes, position-sensitive, appl. *(German)* 88−42060
Si photodiodes, spectral response, short wavelength limitation *(Romanian)* 88−33872
Si photodiodes, use for dose depth distrib. meas. in oncology 87−35449
a-Si pin diode 2D photosensor *(Japanese)* 87−29139
Si pin photodiode characteristics 87−29490
Si pin photodiode fabrication by yo-yo solute feeding method *(Japanese)* 88−72213
Si planar photodiodes, α-spectrometry appl. 88−4859
Si, quantum efficiency and spectral responsivity self-calibration 87−70663
Si, quantum efficiency as absolute radiometric standard 87−14349
Si, radiometric calibration procedures, using NBS MARBLE electronics package 86−50110
a-Si, scanning image sensor with LED array 88−22635
Si, self-calibration, front-surface recombination losses determ., oxide-bias meas., 85−52774
Si single-chip colour imager with integrated colour filters 87−34965
Si, spectral ageing patterns obs. 88−60730
Si substrate, guided wave optical structs., integrated photodetector arrays 85−41201
Si, temperature sensor with wavelength-dependent detection, using fibre optics 88−42138
Si:As high quantum efficiency, UV-enhanced photodiodes 87−33058
Si:B, quantum efficiency stability 88−26968
a-Si:H Schottky-barrier thin-film-waveguide photodiode 86−38388
a-Si:H TFT array driven linear photodiode image sensor with capacitance coupling isolation struct. 86−50111
a-Si:H TFT array technology, appl. in printing, document scanning 88−44774
a-Si:H, TFT driven linear image sensor 88−45310
Si:H amorphous contact linear image sensor, ISO A4 size, MIS photodiode 85−25376
Si:H, amorphous, linear image sensor photodiode array, poly Si TFT drivers 85−47862
Si:H, amorphous, photodiode linear sensor array, semitransparent metal-Si electrodes 85−47861
a-Si:H contact linear image sensor 87−20944
a-Si:H drift-type photodiode, colour discriminating sensor appl. 88−47532
a-Si:H film deposition by electron-cyclotron resonance plasma CVD method, characts., photodiode appl. *(Japanese)* 88−12923
a-Si:H films, electron cyclotron resonance microwave plasma CVD, photodiode appl. 87−44384
a-Si:H heterojunction photodiode, appl. to compact scanner 86−36348
a-Si:H image sensors, photoelec. props. 88−29445
a-Si:H integrated photo-sensor array, photodiodes and thin film transistors *(Japanese)* 87−14330
a-Si:H p-i-n devices, role of impurities in batch processing 86−36344
a-Si:H photodiode characts., unsymmetrical electrode struct. effect 87−26217
a-Si:H photodiode, dark current investigation 86−28998
a-Si:H thin film solar cells, accelerated stress testing using photodiode array 87−22763
a-Si:H/metal system, silicide layer form., photodiode appls. 85−50287
a-Si:H,B Schottky diode, spectral response 85−41271
Si:P, quantum efficiency stability 88−26968
Si:Zn(S) photodiodes, photosensitivity, spectra noise density 87−7219
Si/SiC heterojunction contact-type linear image sensor with integrated poly-Si TFT drivers *(Japanese)* 88−29434
Si-CsI(Tl) photodiode multidetector system electronics 88−29917
Si-PIN-photodiode proton radiation damage analysis, suitability for HERA p-ring beam loss monitor 88−58358
Si-$TaSi_2$ photodiodes, eutectic composite, high quantum efficiency 87−68274
a-Si-based p-i-n diodes, high speed high resolution contact line imager 88−45312
Si-surface barrier photodiodes, pulsed and steady-state photon source calibration 86−44557
SiC UV photodetector characts. and spectral quantum efficiencies 88−67804
SiC optical emitter operation in prebreakdown mode 87−38933
SiC:N, ion implanted and rapid isothermally annealed for p-n photodiodes 88−44654
a-SiC_x:H/a-Si:H/metal heterojunction diode for contact linear image sensor *(Japanese)* 87−8521
Si(Li) photon counters, spectral efficiency and resolution, 0.3 to 5 keV 88−22978
XeCl high PRF excimer laser beam, ID imaging with photodiode array 88−40317
ZnO-Au Schottky barrier photodiodes for UV detection 86−68391
n-ZnSe/p-GaAs photodiode, illuminated at two different wavelengths, photoresponse 88−51683
$ZnSnP_2$-GaAs heterostructure diodes fabrication and photoresponse 88−449

CdSe thin film liquid-junction photovoltaic cell, photoelectrochem. charactn. 87−30893
CdSe/CoS bipolar semiconductor photoelectrode arrays, electrolytic processes, modeling 88−49105
CdSe/aqueous polysulfide photoelectrochemical cells, photocurrent quadrature signal 85−16187
n-CdSe/p-CdTe photoelectrochemical storage cell 85−16188
CdSe-CdTe-selenide-polyselenide multiple junction photoelectrochemical cells 87−36151
CdSe-sulfide-polysulfide electrolyte, photoelectrochemical cell power parameters, temp. depend. 86−26241
$CdSe_{0.5}Te_{0.5}$ electrodeposited thin films for photoelectrochem. solar cells 86−51904
$CdSe_{0.65}Te_{0.35}$ electrodeposited films, charact. and solar cell perform. 88−24152
$CdSe_{1-x}Te_x$, photoelectrochemical cell research 86−7112
$CdSe_{1-x}Te_x$, thin film photoelectrochemical solar cells, electrochem. energy storage 87−58262
n-$CdSe_xTe_{1-x}$ photoelectrode, potentiostatic codeposition prep., photoelectrochem. behaviour *(Chinese)* 86−41627
$Cd(SeTe)/S_x^{2-}$ cells, bulk and photoelectrochemical charact., effect of K_2S high aqueous solubility 86−66329
$Cd(SeTe)/S_x^{2-}$ cells, bulk and photoelectrochemical charact., high aqueous solubility of K_2S 86−66330
$CdSe_{0.65}Te_{0.35}$/aqueous polysulphide interface, photoelectrochemical props. 87−24984
$CdSe_{1-x}Te_x$/aqueous polysulfide photoelectrochem. cells, OH^- ion effects 85−60381
$CdSe_{0.65}Te_{0.35}$-Cs_2S_x photoelectrochemical solar cell, control of soln. chem. 86−40108
n-$CdSe_xTe_{1-x}$-caesium polysulphide photoelectrochemical cells, high efficiency, resulting from soln. chemistry control 85−39193
$CdSnP_2$/aqueous polysulphide system, photoelectrochemical cell studies 85−21776
CdTe, Ru surface modified for solar cells XPS obs. 87−16044
n-CdTe electrodeposited thin films, cell conversion efficiency, annealing effects 86−33674
CdTe photoelectrochemical solar cells, effects of Ru surface modification 87−22750
CdTe thin films, KCN surface treatment, photoelectrochem. solar cell appl. 86−42407
CdTe thin films, cathodic electrodeposition and photoelectrochem. props. 88−31818
CdTe thin films, electrodeposition, photoelectrochemical cells fabrication 85−10756
$Cd_{1-x}Zn_xS$ sprayed film, photoelectrochem. cells, Zn composition effects 85−5350
p-CuCNS photocathode for dye-sensitised photoelectrochemical cell 87−4854
CuCNS photocathode, photostability enhancement of adsorbed methyl violet by adsorbed dye 86−58347
p-CuCNS photocathode sensitized with Acridine Orange, photocurrent quantum efficiency 87−22688
CuIn chalcogenides, development progress at Weizmann Institute, Israel 86−45630
$CuIn_{11}S_{17}$, synthesis and photoelectrochem. characterisation *(Japanese)* 88−30973
n-$CuInS_2$ based polycryst. semiconductor in electrochemical cell, solar-energy conversion appl. 86−56945
$CuInS_2$ polycrystalline electrodes, photoresponse, chem. surface treatments effects 85−29691
n-$CuIn_5S_8$ photoanodes for photoelectrochem. solar cells 85−21805
$CuIn_5S_8$, photoelectrochemical cells 86−6966
n-$CuIn_5S_8$ thin film electrode, electrophoretic deposition and photoelectrochem. characterisation *(Japanese)* 88−37352
n-$CuInS_2$/sulphide-polysulphide electrochemical photovoltaic cells 85−65414
n-$CuIn_5S_8$/aqueous polysulphide photoelectrochemical cells, photoelectrochemistry 85−21777
n-$CuInS_2(Se_2)$ aqueous polysulphide (polyiodide) photoelectrochem. cells, solution composition effects 87−58260
n-$CuInS_2(Se_2)$/aqueous polysulfide photoelectrochem. cells 85−60379
n-$CuInS_2(Se_2)$/aqueous polysulfide photoelectrochem. cells 85−60380
$CuInSe_2$ PEC, flash evaporation methods 88−75891
n-$CuInSe_2$ based 12% efficient photoelectrochemical cell 86−66331
$CuInSe_2$ based photoelectrochemical cells, characterisation of thin $CuInSe_2$ films 86−13078
$CuInSe_2$ electrodeposited films, photoelectrochem. solar cells fabrication 87−4883
$CuInSe_2$, electrodeposited thin film, photoelectrochemical solar cell 85−44193
n-$CuInSe_2$ films, quasi-rheotaxy, photoelectrochemical charactn. 86−14887

photoelectrochemical cells continued

photoemitter membrane light modulator, structure, operational theory and performance 86−42437
picosecond dispersing voltage pulse on transmission line, photoemission sampling meas. 87−70735
picosecond photoemission sampling for contactless high speed integrated circuit diagnostics 88−39629
PMMA films, X-ray lithography with synchrotron radiation, photoelectron and Auger electron prod. 86−8923
polymethylmethacrylate resist film, X-ray lithography, electron scatt. effects 85−23615
pulsed laser beam, autocorrelation meas. using two-photon photoemission 86−54189
pulsed photoemission in UV to IR regions under Nd:YAG laser irrad. 88−44511
quantum wells for IR detection 85−3986
scanning laser imaging of surface chemistry and physics 88−40436
Schottky-barrier IR detectors, hot-electron photoemission theory 85−24397
semiconductors, narrow gap semimagnetic, electronic structure by synchrotron radiation investig. 88−1382
shuttering efficiencies of nanosecond-gated photoemissive shutter tubes 87−11306
Si amorphous heterojunctions, valence band discontinuities, photoemission studies 86−27982
stroboscopic voltage measurements via electron emission, electron dynamics 88−16389
surface contamination meas. and control, by optically stimulated electron emission technique 86−35210
transition metal 86−58317
treeing inception tests using needle electrodes 87−46248
X-ray lithography, patterning characts., effects of photoelectrons ejected from substrates 87−74160
X-ray lithography resolution, influence of photoelectrons and fluoresc. radiation 88−26130
Ag-O-Cs, S-1 photocathode, microstruct., optoelectronic props. 88−57248
AlInAs Schottky diodes, internal photoemission studies 85−45634
Au-InP high-speed internal photoemission detectors enhanced by grating coupling to surface plasma waves 87−26208
CdS/Si(Ge), heterojunction band discontinuity control, ultrathin metal interlayer effects, photoemission study 86−14889
Cr/model polymer interface, core level photoemission studies 86−63210
CsI coated microchannel plates, surface characteristics and quantum efficiency meas. 88−4811
CsI soft X-ray transmission photocathodes characterization 85−31708
Cs_3Sb laser-illuminated photocathode in injector linac, design and beam diagnostics 88−50573
Cu/model polymer, interface, core level photoemission studies 86−63210
GaAlAs-Mo junctions, Schottky barrier height, electrical props. 87−32326
GaAlAsSb, alloy for 2 to 4 μm laser diodes 87−54349

photoemission continued
GaAs (001), H plasma interaction, photoemission studies 85−23687
GaAs (110) oxidation, O-1s core level photoemission studies 86−2048
GaAs (110), oxidation, photoemission results and models 85−12192
GaAs MBE growth rate determ., photoemission current oscills. meas. 88−49820
GaAs Schottky contacts elec. props., interface state effects study 88−19729
GaAs bipolar transistor combines three functions including photoemission and photoreception 85−12252
GaAs devices, picosecond resolution sampling via multiphoton photoemission 88−39343
GaAs, electron beam energy distrib. and spin polarisation meas. 86−55951
GaAs epitaxial layers, deposition of Cs, AES, photoemission, and work function study 85−18014
GaAs passivation in N multipolar plasma, photoemission study 87−60338
GaAs, photocathodes, electron emission, effects of O and F adsorbed layers 88−71267
GaAs photoemission electron source, operating experience 87−29432
GaAs quantum well IR detector, performance aspects 88−67791
GaAs, spin-polarized electron source and measuring system 86−60532
GaAs/Al, Schottky barrier form. at low temp. and room temp. 86−47395
n-GaAs/Al Schottky diodes, surface plasma-enhanced internal photoemission 87−60399
$GaAs/Al_xGa_{1-x}As$ heterojunction photodiodes, band discontinuities 87−33048
$GaAs/Al_xGa_{1-x}As$ heterostructs., band offset meas., internal photoemission study 86−21226
$GaAs/Al_xGa_{1-x}As$ quantum wells, exciton absorpt peaks, Stark shifts, photocurrent spectroscopy study 86−47346
GaAs/Ge, heterojunction band offsets, interface defect irrelevance 85−29009
GaAs/In, Schottky-barrier form., photoemission spectra studies 86−14935
n-GaAs/W-Pt Schottky contacts, barrier height meas., annealing effects 85−55552
GaAs-AlGaAs superlattice, photovoltaic IR detector 88−53688
GaAs-Cs-Si junctions, valence band discontinuity modification, photoemission meas. 88−57367
GaAs-H-Si junctions, valence band discontinuity modification, photoemission meas. 88−57367
GaAs-In interface, Schottky barrier form., photoemission studies 86−63101
$GaAs_{1-x}Sb_x$, solid solns., negative electron affinity photocathodes, use in photomultipliers 88−38970
GaInAs Schottky diodes, internal photoemission studies 85−45634
GaInAs/AlInAs heterojunction diode, internal photoemission studies 85−45634
Ge, exciton impact ionisation kinetics, photocurrent study 85−40429
$Hg_{1-x}Fe_xSe$ electronic structure by synchrotron radiation investig. 88−1382
$Hg_{1-x}Mn_xTe$ electronic structure by synchrotron radiation investig. 88−1382
$In_{0.43}Al_{0.57}As$, n-type, MBE, Schottky barrier height 86−67744
InAsSb, alloy for 2 to 4 μm, laser diodes 87−54349
InP (-1-1-1)/Au interface, P-enriched, Schottky-barrier height fine tuning, photoemission spectra 86−1818
InP (110), adsorbed Cs, catalytic oxidation, photoemission studies 87−45796
InP-Au internal photoemission detectors, enhanced quantum efficiency by grating coupling to surface plasma waves 85−52763
Pd-Ag-O-Cs photocathodes, photoemission characts. under star illum. *(Chinese)* 87−45487
PtSi internal photoemission, theory and expt. 88−29409
PtSi/p-Si thin Schottky diodes, TEM, TED, I-V curve and photoemission characts. 87−6661
(Rb, Cs)Na_2KSb photocathode with improved photosensitivity and green-red response *(Chinese)* 87−37793
Sb-Na-K-Cs photocathodes, photoemission characts. under star illum. *(Chinese)* 87−45487
Si (100) 2×1 surface, alkali metal-promoted nitridation, core level photoemission study 88−64411
Si (100), adsorbed Cs and Na, catalytic oxidation, photoemission studies 87−45796
Si (111), Al and Ge chemisorption, high resolution EELS studies 85−61762
n-Si MOS struct., interface states, electron photoemission study 86−35462
Si, homoepitaxial thin film, deform., X-ray diffraction, secondary emission 87−271
a-Si:H Schottky barriers, tunnelling effects, internal photoemission study 88−7362
a-Si:H/Si heterojunctions, energy band discontinuities meas. by internal photoemission *(Japanese)* 88−1430
a-Si:H/c-Si heterojunctions, energy-band discontinuities, internal photoemission studies 87−32282
a-Si:H-Au, Schottky barriers, barrier height temp. dependence 87−66987
Si/Au(Al)(Pd)(PdSi) interface structs., photoelec. yield spectra, theoretical considerations 86−63107
Si/Co interface, reactions, struct. and epitaxy 88−1439
a-SiGe:H,F/Pd(Au)(Ni), Schottky barrier height, internal photoemission meas. 87−24944
$a-Si_xGe_{1-x}$:H,F films, band potential, optoelectrical props. 87−38903
a-SiH/c-Si interface, band discontinuities, internal photoemission study 86−27983
$a-SiN_x$:H/a-Si:H heterojunction, valence band discontinuity, photoemission study 86−27986
SiO_x:H,N/a-Si:H heterostruct., plasma deposited, photoelectronic and optical props. 85−50297
SiO_xN_y film in MIS struct., photoemission meas. of graded barrier 85−40532
$(Ti_xFe_{1-x})_2O_3$, solid solutions, optical electrophysical and photoemission props. 85−11945
Tm-GaAs(110) interface, Schottky barrier formation 88−32927
W needle, photofield emission in the ps regime 87−37800
Y_2O_3 cathode, Van de Graaff 3 MV accelerator feasibility for short electron pulses generation 87−8816

photoemission, inverse *see inverse photoemission spectroscopy*

photoemission spectra *see photoelectron spectra*

photoemissive devices

photogalvanic effects *see photoconductivity; photovoltaic effects*
photogalvanic spectroscopy *see optogalvanic spectroscopy*
photoglow tubes *see phototubes*
photogrammetry
10 m diameter reflector antenna, photogrammetric form determination 85−41729
advanced alternating frame technology (VISIDEP-TM system), appl. to 3-D remote sensing 87−57351
aerial photography, exposure and processing optimisation 85−48457
aerial photography, retractable camera rig for light aircraft 87−21772
aerial photomosaics, geometrical seam elimination *(Japanese)* 88−48318
aerospace industry assembly tooling inspection 88−68517
aircraft and satellite image maps preparation and use in emergencies and environmental appls. 88−61669
anti-vignetting technique for super wide field of view mosaicked images used in pilot training 87−39901
aquatic resources evaluation, use of remote sensing and geographic information systems 88−68650
biostereometric analysis for breast cancer detection 88−68363
biostereometrics, conf., Cannes, France (Dec. 1985) 87−51703
biostereometrics, transform. of irregularly sampled data points into regular grid, surface interpolation, smoothing 87−63724
bridge deformation detection, vision technique 88−66701
cerebral probe implantation method, spatial viewing, simulator using floating line concept 87−63807
cineradiographic system, high speed, for biomechanics research 86−65420
cloud stereoscopic imaging and stereophotogrammetry from satellites 86−6126
computer-based, for locating embedded inserts, power plant erection 85−15700
computerised resource measurement system using Apple IIe computer 85−4425
conference, Nuclear technology, Travemunde, W. Germany (May 1988) 88−55833
contour imagery data, digital processing technique 85−43464
crash vehicles meas., computer aided anal., features 86−24782
data logger, COORDIMÈTER-H and MTU 5300/P type deck 87−70481
digital, on advanced data and picture transformation system, ADAPTS 87−70526
digital cartography and aerial photograph interpretation, database viewpoint 85−38334
digital monoplotting technique, exptl. appl. to orbital radar imagery 87−50536
Digital Photogrammetry System, stereo-push-broom scanner system characts. 87−57337
digital terrain model generation and high-precision image matching 88−61631
digital terrain modelling (DTM), automatic data prod. using digital offline techniques 85−26883
digital-optical hybrid correlation system from processing aerial stereo photographs 88−34781
electron data collection, composite sampling using minicomputer-supported analogue instrument 85−26882
engineering science appl. of meas., conf., London, England (March 1985) 85−44451
hierarchical segmentation using a composite criterion 88−59260
hologrammetry for automatic inspection in hostile environments 87−19070
hybrid moire topography *(Japanese)* 85−37806
image sensors, conf., Stuttgart, Germany (Sept. 1986) 87−42225
in-reactor inspection, photographic and photogrammetric techniques 87−71825
InduSURF photogrammetric industrial surface measurement system for automatic 3D measurement of car bodies 88−47431
instrument automation, information processing and microelectronics trends 86−24435
ISIPS, interactive satellite image processing system, hardware and software 87−42215
ISPRS congress, Rio de Janeiro, Brazil (June, 1984) 85−26881
land surface topography remote sensing, computer aided photointerpretation 88−42680
Landsat TM images stereocorrelation 88−14803
linear features detection from digital remote sensing data, computer-assisted methods 88−10501
Mapvision, photogrammetric machine vision system of Technical Research Centre of Finland 88−11778
METADAT data acquisition system for surveys in large industrial plant construction 87−70480
microwave antenna measurement 87−19313
Montalto di Castro nuclear plant, close range photogrammetry for metal piercing elements surveying *(Italian)* 88−17256
movements analysis, human, biostereometric study, IR strobophotogrammetry 87−57101
N Mozambique contour analysis from Landsat images 85−64725
multiphoto matching geometrically constrained 3D object coordinate determ. 88−73213
NDT, optical techniques, conf., London, England (Jan. 1986) 86−26520
nuclear engineering installations, video photogrammetry appl. *(German)* 87−71874
nuclear power plant as-built efforts, photogrammetry appl. 87−71858
nuclear power plants, photogrammetry applications for safety related components 87−78377
nuclear power plants, photogrammetry techniques, appl. to reactor vessel, steam generator 88−62099
nuclear power station metal piercing element surveying using close range photogrammetry *(Italian)* 87−71798
nuclear reactor, instrumentation 85−48817
object space least squares correlation 88−73214
optoelectronic camera internal calibration, 2D translational robot 88−42171
orbital radar imagery, exptl. app. of digital monoplotting technique 87−50536
pattern recognition, photogrammetrically guided 86−30025
photogrammetric measurement of microwave antennae 86−22786
photogrammetry continued
photography from space, symposium, London, England (March 1985) 86−12140
position determination appl. *(German)* 86−5533
radar SAR imaging, appl. of stereo viewing 85−38326
radarclinometry, applicability of surface integral approach 88−68609
radarclinometry, line integral approach 87−50537
radarclinometry, mathematical theory and algorithm 87−21753
radargrammetry, mapping with aircraft and satellite radar images 86−12141
radargrammetry in a mountainous region 85−64696
raster stereography use for automatic body shape meas. 86−32294
real-time operation using digital imagery 85−64018
real-time photogrammetry, image acquisition and processing 88−68621
real-time prototype system for engineering appls. 87−20942
remote sensing, geophysical perspective 86−32508
signal-coordinate meas. in digital images 88−3217
space scanner imagery, geometric correction, coord. transform. 85−43497

action potentials, oscilloscope spot intensifier to improve photographic recordings 86−5947
AEC tokamak, plasma instability research, high-speed photography role 88−14326
aerial photo-interpretation, SIRIUS concept 85−3921
aeroballistic research using high speed electronic imaging 85−31384
amorphous superlattices characterisation, by photographic recording of diffracted X-rays 88−64339
automated photographs processing from large bubble chambers 87−29675
biostereometrics, transform. of irregularly sampled data points into regular grid, surface interpolation, smoothing 87−63724
body motion measurement, photographic and electronic techniques appl. *(Japanese)* 87−50210
bubble chambers photographs analysis, using HPD automatic opticomechanical system 85−8764
circuit breaker speed analysis, using multi-flash photography 88−24087
colour flow-visualisation photography, digital image processing techniques 88−47461
compressed gases, fast photographic diagnostics applied to breakdown phenomena 85−1208
computerised photographs processing from bubble chambers 87−29030
contour mapping of recumbent patient 86−32292
cosmic rays composition meas., light attenuators for plastic scintillation detectors 87−77566
Cosmos satellites at 82.3° , possible missions deduced from orbital data and signal transmissions 88−74956
CR-39, automatic α-track acquisition with Frascati PEPR 87−21494
deep sea photographic and video equipment 86−25437
diesel engine flame, temp. and soot conc. meas. using high-speed motion film and image processing system 86−5161
domain boundaries dynamics obs. using high-speed photography 86−18083
dust particle velocity in interelectrode space, expt. verification of model 88−34253
failure mode imaging with laser strobe and X-ray techniques 85−29962
fast measurement techniques for research in dielectrics 87−21208
fillet welded joint residual stress meas., nondestructive X-ray photoanalysis 86−571
film, video and the computer, interrelationships 85−31212
flight simulation, landscape generation, LTV system 88−48265
flow field analysis, two-dimens., using digital image processing techniques *(Japanese)* 86−11774
flow photographic mapping, surface proximity surveys 86−31725
flow velocity meas, in gas jet, by laser speckle photography 86−38611
forestry and range applications of high altitude reconnaissance technology 87−15000
fundus image processing system for early detection of glaucoma 87−41957
high speed camera survivability in a high explosive environment 88−48415
high speed photography, videography and photonics, conf., San Diego, CA, USA (Aug. 1984) 85−27914
high strain rate materials studies using LED illuminator 85−29725
high-speed, time-resolved wavefront meas. 88−51913
high-speed motion analysis appls. 88−22328
high-speed photography, videography and photonics, conf., San Diego, CA, USA (Aug. 1987) 88−49337

photographic applications continued
high-speed photography and photonics appls., conf., Pretoria, South Africa (Sept. 1986) 88−18304
high-speed photography appl. to explosive rock breaking research 88−22503
Himalayan environmental degradation analysis from Landsat images and aerial photographs 85−64727
holographic bubble chambers, track information recording from photographs 86−5826
holography, photographic, for spatial imaging use 85−12984
in-reactor inspection, photographic and photogrammetric techniques 87−71825
jet formation and characterization of a conical shaped charge 88−48414
KS-147A LOROP camera integration into RF-5E aircraft 87−14998
KS-147A LOROP camera system for RF-5E aircraft 87−14999
laser beam profiling with photographic plates, beam scanning and detector arrays 86−22465
laser beam recorder, high resolution for tactical appl. 88−22638
laser photographic and cinematographic techniques, for transient phenomena obs. 86−59000
laser speckle photography and particle image velocimetry, photographic film noise 85−2444
laser trigger for high speed camera 88−20818
light-pulse generator for recording electrical signals, using Kerr cells 87−68203
lighting system for high-speed photography, Au underground mining appl. 88−24256
lightning automatic photographic system development *(Japanese)* 86−12165
liquid atomisation in electrostatic fields, observation 88−34223
log stacking density determ. by photograph and photoelectric device *(Russian)* 86−17886
long distance television reception, recording of examples 88−35689
LOROP imagery processing, use of computer-aided photointelligence workstation 88−48416
machine vision techniques for high speed videography 85−31213
magnetic discs, servo pattern, optical recording 85−29445
magnetooptical apparatus for transparent, magnetic materials transitions meas. 87−18775
Mapvision, photogrammetric machine vision system of Technical Research Centre of Finland 88−11778
measurements of raindrop canting angle 86−68739
medical imaging, video recording paper appl. 85−38062
microwave IC CAD, microdensitometer in write mode appl. 88−25740
motion of magnetically driven short arcs in air at low atmospheric pressure 88−13612
multilens cameras for high velocity/low altitude photoreconnaissance 87−26114
NASA space programs, photographic instrumentation and motion picture photography appl. 88−16834
NDT, conf., Vancouver, BC, Canada (April 1987) 88−18335
NDT, optical techniques, conf., London, England (Jan. 1986) 86−26520
nuclear reactor instrumentation, photogrammetry appl. 85−48817
nuclear reactor safety, computer program validation using high-speed cinematography *(French)* 86−12623
nuclear reactor safety calculation program validation using high-speed cinematography 86−12622
nuclear track detectors, photographic data retrieval and possible applications 85−31727
object small displacement real time meas. by high speed video camera with moire pattern 85−31590
open view streak technique, simultaneous initiation devices appl. 88−22502
optical fibre probes, multistage, for detonation phenomena diagnostics 86−2795
optique applications to photography and television 87−3301
particle image velocimetry, fringe visibility and pedestal removal 85−64333
particle tracking, automatic, in three-dimens. flow field 86−11771
PCB manufacture, photographic films and their importance to the finished product 88−12844
PCB manufacture filmwork generation techniques 85−28799
PCB photolab modernization 87−37733
PCB production, appl. of phototechnical films *(Hungarian)* 85−1169
PCB production, phototools 87−59983
PCBs, laser photoplotters require high-precision film 87−66731
photodosimeter of accelerated protons, using superfine-grain photographic films 85−20822
photothermographic films use with industrial radiography 88−23027
phototools for PCB prodn. 88−1126
pulsed-laser cinephotography of deflagration over extended surfaces 88−42606
railgun plasma diagnostics using high-speed photographic techniques 86−11461
raster stereography use for automatic body shape meas. 86−32294
real-time laser speckle photography 85−19044
real-time radiographic imaging using photographic documentation 88−22523
retinal blood flow visualisation and meas. by laser speckle photography 87−29741
rotation direct meas. by laser speckle method 85−4117
scanning Auger electron microscopy, dynamic obs. of surfaces by motion picture technique 85−17296
screens and screening in photography for graphic arts 85−5596
sea surface simulated images, optical analysis 88−30181
security printing, rel. to optical security systems 88−52586
skin, structure anal. using holography and four wave mixing 86−18321
Spacelab Metric Camera monochrome images of Italy 85−64706
speckle pattern correlation by photographic means, developments and appls. 88−1187
speckle photographs analysis, using microcomputer-based image processing system 86−31299
stereometric measurement system for quantification of object forms 87−57102
stereophotogrammetry and small format analytical plotters 88−48390
streak records in wedge technique with high resolution, shock or detonation wave obs. 88−22857
stroboscope, HF, using LED light source, design and appls. 86−5358
surface flashover across precharged insulator, high speed photographic study 86−6394
three-dimensional image reconstruction, computer tomography appl. *(Czech)* 86−43343
photographic applications continued
three-dimensional liquid flow velocity pattern obs., using single camera and mirror 86−55890
time-lapse photography conversion to 4D holograms, meteorological appl. 87−71324
track photography in streamer chambers, photographic film sensitivity increase 86−5824
tree location and classification by interactive analysis of aerial photographic tracks 86−12146
ultra-high-speed photography in high voltage, gas discharge research 88−20180
urbanisation meas. form multitemporal aerial reconnaissance surveys 85−64772
urinary sediment images, binarization, threshold selection method *(Japanese)* 85−4301
use of high-speed motion picture photography in blast evaluation and design 88−47456
Viking satellite equipment and auroral data processing *(Swedish)* 87−71293

holographic recording materials, properties and behaviour 88−27331
holographic ultrafiche file storage system 88−27333
holography, multiplexed image emulsion thickness influence 85−51290
nuclear emulsions, destruction of the latent photographic image by laser-radiation 86−11913
nuclear emulsions, thick-layer, threshold development *(Russian)* 85−48189
photopolymers, holographic investigations of recording mechanism 85−12996
processing of holograms recorded in methylene blue sensitized gelatin 88−65884
reflection hologram efficiency, influence of photographic emulsion Ag^+ conc. *(Spanish)* 86−68645
soft X-ray radiation sensitivity of film emulsions, detective quantum efficiency 88−23020
video recording paper design for medical video recording 86−32273
Ag halide emulsion grain electron lifetime meas. by microwave photocond. *(Japanese)* 88−20489
Ag halide emulsion multiple holographic transmission gratings 87−33331
Ag halide emulsion planar volume hologram characterisation, comparison with coupled-wave theory 85−35904
Ag halide holographic plate, diffraction efficiency and meas. 86−3335
Ag halide photographic emulsion, high diffr. efficiency refl. holograms, wavelength and angular selectivity 86−3322
Ag halide photographic materials, phase-relief hologram prod. 86−22552
Ag halide volume holograms, polarisation sensitivity of noise gratings 88−65881
Ag halides photographic plates, relief-phase holograms, copying 87−26564
AgBr emulsions for charged particles recording, field-induced sensitivity enhancement 86−38713
AgBr, photodosimeter of accelerated protons appl. 85−20822
AgCl emulsions as adaptive optical filters for image processing 85−12691
photographic filters *see optical filters*
photographic lenses
see also aberrations
aspheric lens, precision molded, for camera or compact disk systems 87−26121
camcorder, zoom lens systems with aspheric plastic lens 88−15783
Canon zoom lenses for television cameras, design philosophy 88−29078
design innovations 87−26116
European broadcasting union, specifications for film and TV camera lenses *(German)* 88−35679
film and TV camera lenses, specifications, EBU activity 86−69926
focusing, automatic for video cameras 88−67569
folded telephoto vidicon lens, passively athermalised, design 85−56390
IR zoom lens for thermal cameras and video equipment *(Japanese)* 87−33022
motion picture and video cameras, automatic focusing *(Russian)* 86−68361
photolithographic lenses, optical performance meas. 85−29072
stretchable concave mirrors 87−68238
test projector for camera lens quality control *(Russian)* 85−22275
TV camera lenses, specification and testing 87−76992
TV camera lenses with integrated digital control electronics *(French)* 87−70371
TV cameras, primer for lighting directors 87−74900
TV zoom lens, optics primer 87−70214
ultrasonic motor actuators for auto focus photographic lens appls. 88−75660
video cameras, automatic focusing system 87−13914
zoom lens design for thermal IR 85−56391
zoom lens systems with new infrared autofocus mechanism for consumer video cameras 87−12283
zoom lenses for broadcast quality TV cameras *(Russian)* 88−22303
photographic light sources *see light sources; photography*
photographic material sensitivity
colour image scanner, design method using spectral sensitivities of tri-color separation optics *(Japanese)* 87−56534

photographic material sensitivity continued
copper phthalocyanine-PMMA corona charged layers, surface pot. decay characts. 86−2918
dichromated gelatin film, hologram recording anisotropy, interference pattern orientation depend. 85−35920
dichromated gelatin film, red sensitivity, holographic recording material 85−41516
electrophotographic image formation, latent, physical processes 85−56410
fluorenone bisazo pigments, electrophotographic sensitivity *(Japanese)* 87−18801
gelatin plates, dyed, phase gratings formed by induced anisotropy 85−51291
heat-sensitive layers development for elec. discharge method of surface flaw detection 87−36833
hologram recording features on two-layer photographic material 87−26569
holograms dynamic, amplitude-phase recording and maximum sensitivity of resonant atomic media 85−51297
holographic photomaterial characteristics, influence of development acceleration *(Russian)* 85−46505
nuclear emulsions, thick-layer, threshold development *(Russian)* 85−48189
organic photoreceptor for electrophotography, sensitivity eval. *(Japanese)* 87−46646
phthalocyanine based instant dry updatable IR film with high sensitivity and resolution 86−58817
poly-N-epoxy propylcarbazole layers sensitised by pyryl salts, electrophotographic characts. *(Russian)* 85−46249
poly-N-vinylcarbazole derivative sensitization, electrophotography appl. *(Japanese)* 85−35589
poly-N-vinylcarbazole photosensitive film, holographic recording characts. *(Chinese)* 85−29941
polyvinyl carbazole, spectral sensitisation in IR range 88−33856
polyvinylcarbazole film based photoreceptor, photoinduced memory effect, appl. to laser recording *(Japanese)* 87−18803
radiographic film-screen combinations, sensitivity, resolution and contrast 85−31789
radiography, film-screen speed system considerations 85−38046
roentgen film processors, sensitometric control 88−16684
screen-film systems for X-ray detection, sensitivity limitations 85−59246
soft X-ray radiation sensitivity of film emulsions, detective quantum efficiency 88−23020
tabular grain X-ray film, cross over and MTF characts, 85−38047
thin films for holographic recording, grating formation 85−56885
α-titanylphthalocyanine photoreceptors for solid-state laser beam printers *(Japanese)* 87−18804
track photography in streamer chambers, photographic film sensitivity increase 86−5824
video recording paper design for medical video recording 86−32273
Ag halide materials, recording media for holographic images 86−10012
Ag halide photographic materials, phase-relief hologram prod. 86−22552
Ag halides photographic plates, relief-phase holograms, copying 87−26564
As_2S_3-Ag-As_2S_3 photosensitive semicond.-metal recording media based on photostimulated diffusion *(Russian)* 86−48071
As_2Se_3:Sb(Bi)(Te), electrophotographic films, photodischarge mechanism 86−54028
As_2Se_3-Ag-As_2Se_3 photosensitive semicond.-metal recording media based on photostimulated diffusion *(Russian)* 86−48071
CdHgTe thin films for holographic recording, grating formation 85−56885
CdS heterogeneous layer on Al barrier substrate, electrophotographic characts. *(Russian)* 85−46251
CdS, photoconductivity supersensitisation by dye combinations 85−51028
CdS:Cu crystals, holographic grating recording, diffraction efficiency 85−56863
PMMA blocks, sensitised, holographic storage 85−56859
ZnCdS(Ag)/poly-N-vinylcarbazole double layer system, electrophotographic characts. 86−68378
ZnO photoreceptor material, electrophotographic sensitivity/photovoltaic characts. study, laser printer/IR imager appls. *(Korean)* 86−58818

Agfa-Gevaert contributions to film and TV, historical aspects *(German)* 86−43933
Agfa-Gevaert sheet film processing for reflection holography 85−56846
archival films, standards for duplication and quality control 88−24594
bichromated gelatin holograms, unique features 88−34150
cellulose triacetate media for IR hologram recording, time and exposure characts. 86−15806
chloroindium chlorophthalocyanine, near-IR sensitive electrophotographic photocond. 85−24362
dichromated gelatin films, waveguide holograms 85−19057
dichromated gelatin holographic gratings, diffraction efficiency improvement 85−29937
dichromated gelatin reflection holograms, diffraction efficiency, effect of electron donors and heat treatment 85−56857
direct laser platemaking by dimethylaminobenzalacetophenone resists 86−3411
EBU activity, film and TV camera lens specification development 86−60022
electrophotographic recording paper with liq. developer, charging characts. *(Japanese)* 85−56968
fibre optic interferometer and appl. to photographic materials testing 87−21049
film analysis systems and medical imaging applications, review 85−4320
film deformation meas. using TV methods *(Russian)* 88−47351
film radiographs, noise and granularity model 88−38286
film role in UK TV over 50 years from 1936 87−28729
flash X-ray radiography, films and screens in 1987 88−54454
heat-sensitive layers development for elec. discharge method of surface flaw detection 87−36833
hologram recording on Polaroid's Polapan CT film 86−22548
holograms, ring iridescent, recording, image quality 85−56870
holograms, thick, recording in media with nonlinear phase-exposure characteristics 85−7555
holographic, film nonlinearity, influence on Rayleigh criterion of resolution and energy concentration 85−62689
holographic micropatterns, appl. to ordering of photographic grains in film systems 85−56847
holographic recording media, phase characteristics 85−51300
holographic recording medium synthesis *(Chinese)* 88−27314
holographic scanning, principles and appls., review 85−35909
holography, development of two materials, comparison of two development types 85−62684
image hologram quality, focusing diffr. grating meas. 85−2439
IR humidity meter for cine film 85−64342
IR semiconductor laser exposure of photographic materials 86−3261
liquid developer characterisation in pictorial electrography 86−42788
micrographic image generator, laser-based, recording materials micrographic image generator 85−35936
organic electrophotographic film, image resolution 86−54029
parallel-sequential optical correlator with a photoanisotropic medium 88−59193
PCB photographic film requirements 87−45377
phase diffraction gratings, 3-dimens., effective thickness 100 μm 87−7459
photopolymer, optical information processing appl. 88−33583
photopolymer compositions, camera-speed, appls. to lithographic plates and films 87−73855
photopolymer system for hologram recording 86−3356
photopolymers, high speed, for laser scanning 86−3410
photorefractive polymer for optical recording of waveguide gratings 87−1929
photosensitive film spark damage prevention by gated powered static neutraliser 85−29980
photothermographic films use with industrial radiography 88−23027
phthalocyanine based instant dry updatable IR film with high sensitivity and resolution 86−58817
PMMA media for IR hologram recording, time and exposure characts. 86−15806
Poland's DMP-128 photopolymer for reflection holograms, properties 88−27330
reflection holography, sheet film processing problems 87−19094
relief recording media characts., holographic anal. 86−15807
speckle photography, two-exposure, on thermoplastic photographic recording media *(Russian)* 86−22540
spectral corrections to optical-density measurements 87−63541
thermoplastic materials, information recording procedures, review *(German)* 85−7549
thermoplastic media films for holographic recording, specific noises 85−35915
TV picture quality of motion-picture films and video interface 86−60036
xerographic developer, materials design *(Japanese)* 87−33389
xerographic development with conductive two-component magnetic brush, electrical properties 86−42791
Xerographic reproduction, toner deposition simulation 88−55753
Ag content reduction, colour positive motion-picture films, photographic indices effect *(Russian)* 87−3349
Ag halide gelatin spatial frequency response holographic recording 85−19041
Ag halide grains, microwave photoconductivity meas., high sensitivity apparatus *(Japanese)* 87−70776
AgBr microcrystal layer luminesc. spectra during decay *(Russian)* 85−46255
AgI microcrystal layer luminesc. spectra during decay *(Russian)* 85−46255
CdS heterogeneous layer on Al barrier substrate, electrophotographic characts. *(Russian)* 85−46251
CdS_xSe_{1-x} thin film based photoconductor-photothermochromic structure, photographic characts. *(Russian)* 85−46250
He-Ne laser test-pattern exposition device *(Hungarian)* 88−40433
Nd:YAG pulsed laser and appl. to holographic material investig. 88−33983
Se hydrosols, photodeposition recording and display technology 86−11658
a-Si:Al photoreceptor drum for diode laser printer 87−1933
Tb-Dy-Fe amorphous films, thermomag. photography 85−29428
ZnCdS(Ag)/poly-N-vinylcarbazole double layer system, electrophotographic characts. 86−68378
ZnO powder-polyvinyl butyral films, dark discharge props. 87−33041
